# Preface to the XII Annual Volume

## Indian Year Book, 1925.

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

A good many changes in and additions to this volume have been made. There has in particular been a re-arrangement of the contents so that the main sections of the book are now presented in a more logical order and a more comprehensive form than before. In one respect in particular it has been possible to bring this work up to date. for the publication during the past year of the report on the Census of India 1921 has enabled the Editors to complete the revision of the important section dealing with the peoples of India. But the chief, and it is to be hoped the most welcome change in connection with the book is really the earlier date of publication. As has been explained in previous editions, publication has been delayed owing to the belated appearance of various Government reports The Editors have now decided not to wait for those reports but. with the much appreciated co-operation of various officials, to present the most up-to-date statistics that are obtainable.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before October have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay, December 1924,

#### An Indian Glossary.

ARKARI,-Excise of liquors and drages

AFSUR - A corruption of the English" officer ARLUWALIA - Name of a princely family resident at the village of Ahlu, near Lahore

ZIARAT.—A Mahomedan shrine, North-Western Frontier

ZILA .-- A District.

### The Peoples of India.

with the people of India, that it is a continent rather than a country Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants No one would continue the main types, such as Gurkhas, Pathans, Sikin, Ralputs, Burnann, Nagas, Tamils, etc. nor does it iske fong to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ al together from those of Northern Asia, and more nearly resemble the tribes of Malaya Sumatra and Madagascar Whate er hisy be their origin it is certain that they have settled in the country for countless age and that their present cvolved physical characteristics have been evolved locally. They have been displaced in the North West by successive hordes of invaders including Aryans, Scythians Pathans and Moghals, and in the North East by Mongoloid tribes alked to those of Burun, which is India only in a smodern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled

The people of the Indian Lumpire are divided hy Sir Henry Risley (Custe, Tribe and Race Indian Census Report, 1901, the Gazetter of India, Ethnology and Casto, Volume f Chapter 6) into seven main physical types There would be eight if the Andamanese were included, but this tiny group of Yegritos may be disregarded

The Turko-Iranian represented by the Baloch, Brahul and Afghans of Buluchistan and the North West Frontier Province Probably formed by a fusion of Turki and Porsian cloments formed by a fusion of their and torshan elements in which the former pre-dominate in stature above occasionally gray, latter on face plantful, head broad, now understuly arrow prominent and very king. The feature in these people that strikes our most prominent glass the pertentions length of their moses and it is probably this peculiarity that has given the to the tradition of the Jewish origin of the Afghans

The Indo-Aryan occupying the Punjab, Raj putana, and kashmir and having as its charac-teristic an index the halputs Mantria, and Jats This type which is readily distinguish able from the Turko-Iranian approaches most closely to that ascribed to the traditional Aryan colonists of India The stature is mostly tall , complexion fair, eyes dark, hair on face plenti ful, head long, nose narrow, and prominent, but not specially long

The Serine-Dravidian, compring the Maratha Brahmans, the kunths and the Coopy of Western India Probledly formed by a mix ture of Seythian and Dravidian chemens. This type is clearly distinguished from the Turko Turko, and the Coopy of the lower orbito nasal index All of these characters. except perhaps the last may be due to a varying define of intermixture with the Dravidians in the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced

It is essential to bear in mind, when dealing putana, and in Bihar and represented in its upper strata by the Hindustani Brahman and in its lower by the Chamar - Probably the result of the intermixture, in varying proportions, of the Indo Fryan and Dravidian types The head form is long with a tendency to medium, the complexion varies from lightish brown to black, the now ranges from medium to broad being always broader than among the Indo Aryans, the stature is lower than in the latter group, and usually below the average according to the scale The higher representatives of this type approach the Indo Aryans, while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Channar for a genuine Dravishan I he distinctive feature of the type the character which sives the ry-1 clne to its origin and stamps the Aryo Dravidian as racially different from the Indo Aryan is to be found in the proportions

> The Mangola Dravidian or Bengall type of Lower Pengal and Orisea, comprising the Bongal Brahmins and Lavasthas the Maho medans of Lastern Bengal and other groups peculiar to this part of India Probably a blend of Dravidian and Mongoloid elements with a strain of Indo Aryan blood in the higher groups. The fixed is broad complexion dark, hair on face usually plentiful stature medium, nowe medium, with a tendency to broad. This is one of the most distinctive types in India, and its munices may be recognised at a glance through out the wide area where their remarkable apti tude for circleal pursuits has procured them employment. Within its own habitat the type extends to the Himslayas on the north and to Assau on the east, and probably includes the bulk of the population of Orista the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal

> The Munginiad type of the Himelayar Nepul, Assam and Burma represented by the Kancts of Labul and Kulu the Lepchas of Darles ling and Sikkim, the Limbus Murmis and Gurnus; of Acpal the Bodo of Assam, and the Burniese The head is broad complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, fac: characteristically flat, eyellds often oblique

The Dravidian type extending from Ceylon to the valley of the Ganges and pervading Madras Hyderabad the Central Provinces most madras Hydrahada Infection (earliest produces make of Central truths and Cho's Nagpur Its most characteristic representatives are the Panlyans of Malabar and the Santais of Chota Nagpur Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Seythian, and Mongo-loid elements to typical specimens the stature is short or below mean, the complexion very dark approaching black, hair plentiful, with an clements are more pronounced

The Aryo-Deviction Hindustani, long, now very hond, sometimes depressed at found in the United Provinces, in parts of Eal it her rol, but not so as to make the face appear

fat This race the most primitive of the Indian may I mis race use most primitive of the indian types, occupies the oil est geological formation in India, the medley of forest-clar ranges, terraced platean and undusting plains which stretch roughly speaking from the Vindiyas to Cape (Comorin On the east and the west of the penincular area and domain of the Drawkilan is conterminous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Ralmahal Hills Where the original characteristics have been unchanged by contact with Indo Tryan or Mongolold people the type is remarkably uniform and distinctive Labour is the hirthright of the pure Dravidian whether hoeing tea in Asam the Duars of Ceylon, cutting rice in the swamps of Lastern Bengal or doing scavenger a work in the streets of Calentta, Bangoon and Singapore he is recognizable at a glauce by his black skin his formation had taken place

squat figure, and the negro-like proportion of his nose. In the upper strate of the vast social deposit which is here treated as Dravidian these typical characteristics tend to thin and disap-pear but even among them traces of the original stock survive in varying degrees

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an elmographic map They melt into each other insentially and, although at the close of a day a fourney from one ethnic trut to another an observer whose stantion had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change he would certainly be unable to say at what particular stage in his progress the trans

### MAIN STATISTICS OF THE INDIAN EMPIRE

square miles about 3 000 square miles being added at the last consus owing to the enumera tion by estimate of certain tracts in Burma which had been excluded from previous consuses

had been excluded from previous censuses.

Of the both area 1004,300 square mile, or of the property of the control of the con

The Indian Propire has an area of 1 805 932 | these figures by comparison with the countries of Furope and in respect of area and population the Indian Empire has been frequently compared to Europe without Russia. The war has to Europo without Russia The war has, however, considerably altered the national and political distribution of countries and the new political map of Lurope is perhaps harrly yet sufficiently familiar to form a graphic contract Turning further west we find that India lth an area about half that of the United States has a population almost three times as large

The most important statustics are set out in the

ī

Bensity — Over the whole of India the population are considered in the mean the second of the second second of the second small Bates are taken as a unit, and the cities are excluded the mean density ranges between a minimum of 1 and a maximum of 1,882 per square mile. The unequal distribution of the population of India is due to causes a nailyed in previous editions of the Year Book, it is chiefly dictated by physical conditions Other influences are at work, such as the state of law and order, the means of communication otmate, and the existence of irrigation Indus trial factors are becoming more and more import ant as the nopulation moves out of the congested rural tracts to supply the labour needed for industrial enterprise—for the tea in Assam,

### MOVEMENT OF THE POPULATION

The population of India has increased by 1 2 per cent during the decade. The figure-of previous ceususes with the variations per cent are given below. The average increase since are given below. The average increases since the crisus of 1872 falls at a rate of 5 per cent, but the real gain is considerably less additions of area and population included; it each centure and (b) the progressive increases in the accuracy of the chimers ton from census to common 50 far as the pre-ent census to common 50 far as the pre-ent census to component the additional area and population included amount to 2 67's quart miles and 85 583 persons, respectively while for the present purpose it may be taken that the cumus ration of 1921 was, as regards numbers as accurate but not more accurate than that of 1911 real increase in the population during the last 49 years is thus estimated at about fifty four militons or 20 1 per cent

Population	Variation per cent rince previous census
906 162 860	Ī _
	- 23 2
287 314 671	+13 2
204 341 056	+ 2 5
31 > 156,396	+71
318,942,480	+12
	206 162 850 253 636 330 287 314 671 204 341 656 31 1 156,396

Factors in the Movement - The increase was slightly greater in the British districts (1 3) than in the States (1 0) Assam and Burma show comparatively high rates of increase, immigration is an important factor in the rise in Assam, but neither of these Provinces was exposed to the invasion of influenza which wiped exposed to the invasion of innerma which wheel off the whole of the natural increase in the Central Provinces and Berar, Bihar and Ordesa and Bombay, and substantially reduced the population in the United Provinces and Eaj putana, the Central India Agency and Hydera Lad State The stimulus given to agricultural putters, the ventral latin Agency and Hyders and State The stimulus given to agricultural prosperity in the Funjab by a large expansion of casal irrigation did much to neutralise the effects of the high death rate in 1918 In Bengal and Madras unhealthy conditions were more localised and the development of the population was only partially retarded

The War -- The war itself had little direct effect on the population of India Such effect could operate in three ways (1) by death casual ties, (2) by increasing the number of persons outslide India at the census, and (3) by decreasing the birth rate. The actual number of death casualties among the officers and ranks of Indian Army units and labour corps was 58 238 The maximum number serving out of India in com-batant and labour units at any one time between 1914 and 1919 was, approximately, Indian troops 250,000 labour corps 230,000, total \$80 000 the number about the time of the census being troops 105,000, labour corps 20,800, total 125,800 So far as the larger totals are concerned the war is not a direct factor of any importance

in the census in any province

Economic Conditions—In considering the
economic factors which determined the mave ment of the population during the decade it can be divided into two periods, a fairly normal period from 1911 to 1917 and the disastrons epideinic year 1918, accompanied by scarcity and followed by a second crop failure in 1920 in 1917 conditions in India began to respond to the world conditions of the war, men for the fighting and labour units and food, munitions and war material of all kinds were demanded and war material of all kinds were demanded. The strain on the railway organisation discoaled the loca markets and the distribution in the case of the control of the contr but influenza, starting in 1918, visited almost every portion of the country and in a few months wiped out the natural increase in the population

Public Health —The distinctive feature of the decade 1901 1911 was plaged. The recorded number of deaths from plague in the ten years was 6; millions in the recent decade the deaths were less than half that number Cholers is normally most prevalent in the Eastern Provinces

Provinces
Virulent as the epidemic can still be with its
hold is established it in now usually of a temporary and local nature, and the total deathrate in British India from the disease during
the decade did not amount to more than 1 5
per cent. By far the largest number of deaths

in India are entered under the category of frever "and allowing for inaccuracy of diag nosis it has usually been assumed that about two-thirds of the deaths a recorded rawy be accrited to maintain Recent investigations made in special areas however, suggest that this preportion has been considerably over estimated and that maintain only accounts for from one fifth to onewfourth of the number of reported fover cases, the remainder being cases of dysentery, pneumonia, phthiats and other disease.

In the last few years the prevalence of a affection which is the caree of considerable nortality called Relegancy Ferer has received considerable attention by the Heath Depart ment. This disease has been disposed a common in most parts of the country, specially in the northern provinces and in the Central Provinces and Berar and Bombay, but the extent of the mortality which can be accribed to it cannot at present be estimated. Nor can figures in given of phthisis which is undoubtedly responsible for considerable mortality, especially in the towns of western India, the deaths from this diesage in Ahmedabad amounting in 1918 to 5 per mille of the population. All other considerable in the third of the population of the population of the population of the population and the population and 1919 which has dominated the population flutures at the 1921 cennus.

influenza —The influenza epidemic of 1918 invaded India in two distinct waves. The first infection apparently radiated from Bombay, but it is impossible to say where the more virulent virus of the second invasion came from

The rural areas were most severely infected the reason probably being that while villages have little advantage over towns in the matter of overcrowding, santated and and organised effort. Mortality was specially high among adults (20-40), partially advantage and the second of the second high second hi

There is no direct means of ascertaining the mortality from the epidemic Various estimates

have been made based on the excess nortality over some satishie mean. The average of these calculations gives a total number of deaths in the areas under registration of about 7.100,000 in 1918, to which must be added, as the results in 1919 giving a total recorded mortality of nearly 84 millions in the two years. Even that the results have been been substantially as the satisfaction of vital statistics was in many cases suspended during the progress of the pidemic in 1918

The total influenza mortality for India is put at between 12 and 13 millions. Ibls is a conservative estimate Even this estimate nakes the influenza mortality, a large part of which occurred in three or four months, exceed by pearly two millions the total estimated deaths from plague in twenty years. On an estimated case mortality of ten per cent the estimated case mortality of ten per cent the or two fifths of the population of India. There was a further reaction on the bith rate.

Houses and Families.—The average momber of persons per bouse has not changed decline between 1881 and 1911. The trend of the figures varies in different provinces, but they do not afford substantial ground for any material inference. It would, for cample, be expected that the incidence of the influences mortality would fall fairly would therefore cause a reduction in the number of presens per house. It does not appear to have done so either in Bombay, the United Provinces, the Central Provinces, or Rajputans, while in Bengal where there is a rise in the population, there is a fall in the size of the bouschold. The Bengal where there is a rise in the population, there is a fall in the size of the bouschold. The limite a discussion on the condition of the joint family it is doubtful if they can really be held to illuminate it. The general option of the Provincial Superintendents is that they do not do so and that other indications do not show that the John Lamily system has yet undergote a first set of the country.

Future Population of India —A study of a growth of the population of India and the iblems which it presents is viriated by the normal conditions of the past decade t the rate of increase of population ween 1872 and 1911 was equivalent to about per cent and that at this rate the popula n would double itself in about a century i a half. The real increase in the last fifty rs in the population of India is just over 20 cent at this rate the doubling will take ther 190 years But calculations of this d, though of interest can hardly be taken lously Almost every one of the last five ades has witnessed some special disaster severe famine in Sooth India therked the tease in the decade 1872 1881 m 1891 1901 was dominated by the great ines of the closing period Growth in North and Western India was checked in the oeeding decade by plague and we have had the past decentium an epidemic which has sed more concentrated mortality than any vious calamity The decade 1881 1891 alone

was free from any exceptional calamity and is usually considered a period of fairly normal progress

Difference between the birth rate and death rate estimated by the actuary for certain provinces in certain decades

Province	1881 1891	1901 1911	
Bengal	7 0	7 8	
Bombay	13 9	5 %

In these statistics the population of Calcutta is taken as embracing the suburbs, and this method is a suburbation of the suburbs, and the calcutta only It is a formation of the calcutta within the considerable suburbs of Bombay just outside the limite of the Island The actual population of Calcutta within the Minicipal size is 885,815.

Migration —Of the population of the Indian Empire only 903 526 were enumerated as borain other parts of the world Of these about four fiths came from other static countries such an expair, Afghanistan, China, Blam Ceyion and Arabia and the remainder mostly from Great Britain and other countries of Lurope The engigration from India is approximately 17 millions on the numbers who move between india at other countries is about two millions. On Burms 573,000 are Indians 102 000 Chinese representing 80 and 15 per cont respectively of the whole number Of the Provinces which countributs most largely to the streams of migranist the most conspicuous are lither and Orises about 19 million the United Provinces about 1 million. Madras 4th of a million Registration of the Province about 1 million and Indiana 100 per source of the province about 1 million and Indiana 100 per source of the province about 1 million and Indiana 100 per source of the province about 1 million and Indiana 100 per source of the province about 1 million and Indiana 100 per source of the province about 1 million and Indiana 100 per source of the province about 1 million and 110 per source of the province about 1 million and 110 per source of the per source

The statistics of entigration outside India are far from complete

The number of Indians belonging to regiments and labour-corps outside India at the time of the census was about 125 000 Of those the majority were probably in Me operations and Palestine According to the returns

the number of Indians in the colonies, irrespective of brith-place, amounts to 1,043,000, of whom 1,028,000 or about two thirds are males. More than four-dirths are Hindus and about half of the remainder are Musaimans. The colonies which attract are Musaimans. The colonies which attract the processor of the province of birth, and of the remainder no less than 841 000 or 80 per cent. were from Madras 24,000 from Bombay, 18,000 from the Paulah, 17 000 from the North West Frontier Province and 11 000 from Bompa! The majority of the Province and 11 000 from Bompa! The majority of the Paulah, 17 000 from the North West Frontier plantations. Under the Defence of India Ruies indentured labour emigration was stopped in March 1917 but there had been a considerable outflow of ishourers to the colonies is the previous years and more than 24 millions of natives and Calcutta as indentured labourers for the various colonies during the docade of the labourers 33,000 west from Calcutta, but the ball were from the Madras Presidency and their destination was caylon and the Straits Settlements. There is very little emigration from the contract of the majority of the Madras from the colonies during the decade of the about two million is bourers returned to India from the colonies during the decade

### RELIGIONS

The subject of religion is sevenly controversal in India where of its it is coloured by politics and racialism. As the Year Book sims at boing impartial all disputed inferences are excluded. Speaking broadly of every hundred persons in the indian Empire 68 are Hindus 22 Mahomedans 3 Buddhisia, 3 follow the religion of their tribes one is a thristen.

tian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain much less probably a Parsi and just as possibly either a Jow, a Brailmo or a bolder of indefinite beliefs, The commented totals of the Indian religions are set out in the following table—

Kellgion	Actual	Proportion	Variation
	number	per	per cent.
	in 1921	10,000 ef	(Increase +
	(000's	population in	Decrease-),
	omitted)	1921	1911-1921
Indo-Aryan Hindi Brahmanle Brahmo Sikh Jain Buddhlat Iranhan [Zoroatrian (Parsi)] Seautic Musalman Oodetican Primitive (Tribal) Missedianeous (Mino-Religions and religions not returned,	232,723 216,735 216,881 468 6 8 239 1 178 11,571 102 73,511 68,735 4,754 23 9,778	7,862 6,856 6,841 15 2 108 37 366 3 2,325 2,174 150 6	+ 16 1 1 4 5 1 1 4 5 1 6 9 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

The Hiadus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 89 per cent of the population Hindus are in the majority in Assam, Bihar and Oriesa, the United Provinces, the Central India tracts Rajputana and Bombay Muhammadans monopolise the North Werl Frontier Province Baluchistan and Kashmir And Kashmir and Eastern Bengal and Bind. They form about 28 per cent of the gopulation of Assam, 14 per cent in the United Provinces and 10 per cent in Hyderabad The Huddhitsta are simust entirely confined to Burna where they are 85 per cent confined to Burma where they are 85 per cent of the population. The Sikha are localized in the Punjab and the Jains in Rajputana, A just Merwara and the neighbouring States
Those who were classed as following Tribal
Religious are chiefly found in Bihar and Orisas,
the Central Province and Assam but Bengal, Rurma Madras Rajputana, Central India and Hyderabad also returned a considerable number under this head More than three fifths nt. the total number of Christians reside in Bonth India including the liyderabad State The

the larger aumbers being returned in the Puniab, the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam The Parsis and Jawa are chiefly residents of the Bombay Pro siden

Christians — The Christian community now numbers just 42 millions of persons in India or 14 per cent of the population Fifty nine per cent of Christians are returned from the Madras Presidency and its States and the com munity can claim 32 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent in Cochin and 29 per cent in Travancore, where the increase during the decade was about 30 per cent Elsewbere the Christians are scattered cent allseword the Unitalians are featuring over the larger Provinces and States of India, the Pusjab and Bibar and Oriesa each having over 300 thousands, Bombay, Burma and the United Provinces between 200 and 300 thousands and Bengal and Assam between 100 and 150 thous-Bengal and Assam seween 100 and and countries and a Divided racially Europeans (and allied races) number 176 thousands, Anglo-Indians 118 thousands and Indians nearly 44 millions, so that out of every 100 Christians 93 are Indians, remainder are scattered over the continent, 4 are Europeans and 3 are Angle Indians

Set Ratio—In the whole of India there is an excess of males over females, the figures being 945 females per thousand make. The figures results being opposed to experience in most other countries of the world have been challenged and reasoning is released by the first period by the first manufacture, who insist that the disparity between the soviet and the to special conditions in the Indian Empire The sex ratio has failen in the last twenty years intronghout folds. The statistics of birth suggest that the proportion of females borning this period and in any case there has been a marked decline in the last five years of the last decade in most provinces. The decline in the proportion of women however is chiefly due (of the absence of famine mortality which contribute the proportion of women however is chiefly due (of the absence of famine mortality which mortality from plague and indicensa which has selected adversely to formales

Marriage —The subject of polygamy has been discussed fully in the report of 1911 Both Both Hindus and Muhammadans are allowed more wives than one Muhammadans being nominally restricted to four As a matter of practice poly-gamy le comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The table shows the number of married women per 1000 married men in India and the main provinces. No definite conclusions however can be drawn from these figures because (1) they probably contain a certain number of widows divorces and prostitutes who have wrongly returned as married and (2) it is impossible accurately to gauge the effect of migration on the figures of the married in any area. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India It is also practised among many of the lower castes and aboriginal tribes. Its effect is reliected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest

Early Marriage -The figures clearly show an increase in the numbers of those in the carly age categories who are still unmarried. The most marked in the Hindu most community but is shared by the other religions, for women and 10 to 20 for me.

the change being less noticeable among the Buddhist and Christian communities who are not addicted to early marriage. The change is most conspicuous in the age categories 10 to 15

#### SOCIAL AND ECONOMIC CONDITIONS

Literacy -The number of persons in India Literacy — Ine number of persons m India literate in the sense of heing sole to write a letter and read the reply is 22 6 millions amounting, if children under fite years of age are excluded, to 82 in every thousand of the population Of males 139 in every thousand at age five and above are literate, the corres ponding proportion in the case of females being

The Hindus have one literate person in every thirteen, for males the ratio is one in eight and for females one in sixty three The proportion of Sikh males who are literate is less than that of Hindus One Mahomedan male in 11 and one female in 116 can read and write The low position of Musalmans is partly due to the fact that in Bengal the Punjab, North West Frontier Province and Sind, where they predominate, they are mostly agricultural. Where they are in a minority, as in the Central Provinces United Provinces and Madras, they are usually town dwellers and have a considerably higher proper tion of literates The Hindu community embraces every stratum of society and the proportion of literacy is seriously affected by the inclusion of the vast mass of the lower rural classes. Some of the higher Hindu castes have more literate males than the Pareis whilst others are on a level with or even below the aboriginal

Ragitah —In the whole of India 2 5 million persons or 100 males and 18 females in every ten thousand persons of each sex aged five and over can read and write languish.

In Madras Assam and Burms the proportion is 2 per cent while in Bihar and Orissa, the Central Provinces and the United Provinces it is below 1 per cent Of the States Cochin and Travancore have between I and 4 per cent but in others the perpertions are much lower More than the porportions are much lower half the number of Parsi maies and one fourth of their females can read and write liaglish Of Christians nearly all the Europeans and many of the Anglo Indian are literate in English , but except on the southern coast English literacy is rare among the Indian Christians and the regional proportions therefore largely follow in the other communities taken on the total populations, are small, some of the higher castes have a fairly large number of Huglish knowing members. In Bengal about half of the Baidya males and a quarter of the Brahman and hayastha males are literate in English, while in Madras more than a quarter of while in magras more than a quarter of the Tamil Brahmans can claim this ac-complishment of the Jains in Kathiawar nearly a tenth are literate in English though the Chaturth Julia of Kolibapur, who are cultivators, are less literate than the average of the Presidency During the decade the number of males knowing English rose by 51 per cent and that of females by 57 per cent Among the main Provinces the greatest progress has been made by Bengai, Assam and Bombay and in the States by Cochin, Travancore, Mysore and Baroda

The necessity of a common medium of conversation and intercourse, which has given rise to bi lingualism and the consequent displace

ment of tribal languages, has formed the subject of a considerable amount of discussion and suggestion during the last decade and a good doal has been written on the possibility of a linguage prace for India. The combined appealuage to the strength of any other individual language in India and if we add to these twn languages Blant and Rajasthani, which so recentible Hindia 180 he frequently returned under that name in the cenars schedules, we get well over 100 millions of epseakers that the strength of the strength of any other languages may be scientifically distinct but this fanct the popular view. There is a common central India in their pure forms these four languages may be scientifically distinct but this fanct the popular view. There is a common central India which randers their speakers, with the strength of the strength of the scientific the strength of th

Infirmities.—These are clauses under four main heads—insuity, deaf mutism, blindness and leprosy. The appended statement shows the number of persons enforing from each infirmity at each of the last fave consuces and the proportion per hundred thousand of the population.—

There had been a continuous decline in the total number as well as in the proportion of fall has been ascribed, partly, to a progressive improvement in the accuracy of the diagnosts and, partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better assistation and (aspecially in the case effected with the sild of modern medical and garginal science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe families must have been a comidenable factor in the decides above as the two severe families must have been a comidenable factor in the decides above as the two severe families must have been accomidenable factor in the decides above as the two severe families must have been accomidenable factor in the decides above as the two severe families must have been and activation of the proposition adoption and originally in 1901, many of the persons.

afflicted must have escaped notice in the course of tabulation Compared with the year 1801, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per bundred thousand persons falling from 315 to 267. The small increase in the present decade amounting to 28,455 persons or mae per 100 000 may be due to improvement in record and tabulation but is certainly unexpected.

effected with the aid of modern medical and gangleal science in the decade ending 1901 clie relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline above at that the hirdest results here, the curious means considerable factor in the decline above at that constant of complation adopted large and contained in 1901 and in the previous ceasus was defective and contained the superious ceasus was defective and contained the superious that the previous ceasus was defective and contained the superious that the previous the superious that the previous constant was defective and contained the superious that the previous constant was defective and contained the superious that the superious that the superious the superious that t

#### OCCUPATIONS.

India is essentially an agricultural country india is essentiam an agricultural country and agriculture proper supports 224 millions of persons or 71 per cent of the population of the Empire If we add the patient and in thing occupations the percentage rises to 73 while a considerable proportion of the unfortunately

Organized industries occupy only 1 per cent of the people in trade and transport, on which less than 6 per cent and 2 per cent, respectively depend a not inconsiderable number are connected with the disposal of the various kinds of agricultural products. The administraa considerable proportion of the unfortunatedy large number of persons in the category of vasue large number of persons in the category of vasue large number of persons in the category of vasue and unclassifiable occupations are probably abouters closely cunected with the occupations of the land Industries support 10 per central control of the land Industries support 10 per central control of the land Industries support 10 per central control of the land Industries support 10 per central control of the land Industries concept and control of the land Industries connected with the support of persons and household are redominated in Industries concepts and the almple implements of work. in spite of the trade of Calcutta and the numerous industrial and mining concerns of Bengal and Bihar and Orisas the population of the eastern provinces in overwhelmingly agricultural and contains a higher percentage are considered to the contained and contains a higher percentage that the contained of the contained and the propositions in the local population are in the rought, the United Provinces and Bomhay Of these three provinces, however, agriculture dominates the scoromic life of the first two, where the interaction of the contained and the provinces and contained the contained and the contai

Compared with 1911 the agriculturists have increased a little faster than the total population, though fishermen and inniters are fewer. Miners have risen in number with the recent expansion of the industry. Industries have substantially decreased and of the principal forms of industry the textile workers have dropped considerably, as also have potters and orders in wood and a recommendation of the principal forms of industry the textile workers have described in southered by a drop moder transport by road is countered by a drop moder transport by road 1 rade has increased trade in textiles showing a slight dree and trade in food a slight drop. The number employed in public administration to practically stationary but the army has risen while the police has fallen heavily. Law and medicine have gained at the axpense of eligion, and though instruction has agroad domestic servants as many Beggars and domestic servants as many Beggars and dargarins, the raw material of crime and disease, have decreased hut criminals, the finished article, have free in numbers.

Collicties.-Of a total of 288 thousand California.—Of a total of 205 Industrial supported by collected 205 thousand are actual workers. The most important coal mines lie in the provinces of Bihar and Orissa and Bengal. The Jherria coal field in Manbhum, the importance of which is due to its accessi the importance of which is due to its accessibility and the superior quality of its cost alone produces over fitty per cent of the total annual notput of cost in India. According to the industrial census the total population employed in the cost mines of Manshum was \$2,510, of whom 347 were managers, 1,519 belonged to the supervising and technical staff and 1,485 to the clerical staff while 32 843 were skilled and 46,428 nnekilled workers

Textiles - Cotton, -Of the industries the textile industries are by far the most important, the number of persons occupied to industries connected with cotton being returned as 5,872 000 or jost three-quarters of the whole number of those supported by textile industries

The bulk of the organized establishments are in the western tracts where the large cities owe a considerable portion of their prosperity to the development of the textile industries to the development of the textue innuseries and the octon growing country is covered with mechanisally worked gins and presses for the preliminary treatment of the raw material of the 2047 establishments connected with of the 207 scalar minimal connected with out of the persons, no less than 737 establishments with 277,000 employees or 64 per cent of the personnel helong to the western Fresidency and

Jute -- The spinning pressing and weaving of inte support a population of 493,090 as compared with 362 369 ten years ago. There are a few mills and presses in Assan Bihar and Oriesa, and Madras, but the ladustry is practically confined to Bengal

Nature of Ownership —Of the total number of 15,006 establishments 677 are owned by Government 8 292 by registered companies and 11,637 by private persons The Government owned concerns are mostly railway and engi noering workshops and other concerns such as brick and tile factories connected with the construction of roads and building and printing presses. The tes and rubber plantations are preses The tes and runner manuations are mostly the property of companies. Out of the 795 tes plantations in Assam 632 belong to companies. On the other hand the coffee plan tations of Madras which are much smaller con corns than the tes gardens are mostly privately owned, only 28 out of 127 belonging to com panies in Madras and 10 out of 242 in Mysore The collieries are mostly company-owned bot of the 42 manganese mines of the Central Provin ces half are owned by companies and half by private persons Of the 392 cotton ginning mills in Rombay 833 are private owned but of the cotton weaving mills 129 out of 345 are of the cotton weaving mile 12z out of 340 are owned by companies Similarly the jute pre-ses are mostly private, while 60 out of the 62 jets mile of Bengal are company owned Practically all the printing presses are private

Assam and Bengal, hus as has already been seen anomin and nongari, one as an arready occo seen indian anterprise is growing in regard to the private ventures indigo in Bihar and Orissa, coffee in Madras and rubber in Travancore are mostly in European hands but the coffee plan tations of Myeore are largely owned by Indians Most of the large collieries of Beogal are held by European companies, but 65 out of the 73 private concerns belong to Indiaos The cotton Industry of Western Iodia is almost entirely Indian, while the jute mills of Bengal nre in Eucopean hands though the small presses are mostly owned by Indians. The rice and flour mills and the brick and tile factories, with the exception of a few large coocerns, are in the

Women as Workers.—The adult womeo (unskilled) number 508 per 1 000 adult men and the proportion of the children of both sexes and the proportion of the character of Post 88X78 moder 14 years old is 140 per 1,000 adults By far the majority of women isbources etc. 32° ont of 540 thousand are on the plantations where thair proportion per 100 men is as high as 94 the children being 190 per 1 000 adults Womeo and children are also numerous in the textile and mining industries and in the former there are 408 adult women (ueskilled) per 1,000 mee and in the latter 521 Nearly 30 per coot of the women employed in textile industries are recorded as skilled About 61 per cent of the total number of children amployed in organized Industries are boys and the girls simost equal the boys no the plantations and in the mines and form about oos fifth of the child labour in the textile industries Io the larger indostries (20 persons and above) both female and child labour has dropped since 1911 the proportion of women (unskilled) being 515 now against 561 In 1911 per I 000 men and the proportion of children per 1 000 adults 141 against 191 in 1911 The figures vary curiously in different industries and suggest that they are not alto gether trustworthy Womeo have increased in gether trustworthy Womeo have increased in the plantations and textiles and declined in the mines Children have decreased in the plau tations and textiles and increased in the mines Both womeo and children ind considerable employment in the establishments connected with glass, pottery, cement and building and to a less extent in those of food and dress

Occupation of Europeans —Of the 103,405 male Furopeans 63,538 belong in some capacity to the category of Public Force, is the Army, Navy Alf Force and Police, over 9 000 to Traceport te largely ralway, officials and about 6 000 to Fublic Administratioo, 4 900 to Mines and Industries 5 900 to professions, 4,600 to trade, while there are about 4 200 imperfect entries a number which to gether with the know o deficiency in the coosua of Europeans generally semi-what detracts from the value of the details. The abnormal con-situation of the foreign European population is exhibited by the small number of dependants viz 62,000, as against 111 000 workers, whereas Practically all the pursuing presses are private concepts, and so are a large number in the above concepts, and so are a large number in the above concepts, and so are a large number in the above concepts and so are a large number in the present of the present the number of Anglo-Jodiao dependants is just about double the number of their workers Nearly one-third of the Anglo Indian males are

### Manners and Customs.

Hext to the complexion of the people, which waites from fart to black, the fournists attention in Inclin is dreamy their contributes a stention in Inclin is dreamy their dreams consists of a piece of doth round the iona Many an ascette, who regards dress as a incrury, wears nothing more, and he would dispense with even so month if the police at lowed him to The Mahomedan always covers with a piece of doth itself cound the waist and resoling to the ankies. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the predents of civiliastion and will not meet the tourist as of the contribute of the contribute

Dreas.—The next stage in the evolution of the Hindu dreas brings the folinded nearly down to the feet. On the Malaber coast, as in Burma, the ends are lett loose in front. In the greater part of India, thay are tacked np behind—a tashlon which is supposed to beht the warrior, or one end is gathered up in foliable before and the other kinded in behind. The behind—a tashlon which is supposed to beht the warrior, or one end is gathered up in foliable behaves and the other kinded in the standard of the control of t

Fashion Variations.—Eashions often vary with climate and occupation. The Rombay haberman may wear a short one and a can, and may carry a watch in his poctor, yet, as he must work for long haptan n watch, it would not cover his ham, best amound only a colorander weather from he watch in front. The Fatient of the cold north-rest minor long beauty of the cold north-rest minor long beauty

trousers, a fall head-dress befitting he status and covers his ease with his folds at it to keep off coid. The poorer people in Bengal and Madras do not cover their heads, except when they work in the cun or must appear respectable. Many well to-do Indians wear Bruppean dress at the present day, or a compromise modely the Indian Christians and Pane. Bruppean loably the Indian Christians and Pane. Bruppean loably the Indian Christians and Pane. Bruppear head how the Indian Christians and Pane. Bruppear collar and cuffe The majority of the people do not use shoes those who can atlord them wear sandais, all pere are it shoes, and a tent Bruppear in the Bruppear should be soot after the Bruppean fashion in public.

Women's Costumes —The sunal dress of a woman consists of a long plees of cloth tied round the waist, with folds in front, and one end brought ever the shoulder or the head. The folds are semetimes drawn in and tucked up helpind in the greater part of India women wear a bodice on the Maisbar coast many de not, but mersy throw a piece of cloth over the breast. In some communities petiticate, or drawers, or both are worn. Many Musalman isdice wear gowns and sears over them. The wat majority of Mahomedan women are poste, and their dress and persons are hidden by a veil when they appear in public a few converts in Northwarn talls. Blade women have some rally adopted the Musalman practice of seein sion. In the Dekhan and is Southern India they have no links and is Southern India they have no links and in they have no links and in the Dekhan and is Southern India they have no links.

Hindn women wear more ornaments than others of the corresponding grade in society fornaments bedeck the head, the cars, the socs, the neck, the arms, wrists, fingers, the wist-until motherhood is attained, and by some even later—and the toes Children grees and the hings in the continuous constructions to the continuous constructions to the continuous continuous

Caste Marks.—Caste masks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest segmentary wit the higher coaries. The simplest mark is a reusel spot on the forehead its represents presperity or joy, and is omitted in mearning and on inst-days. It may be red, or yellowish as when it is made with ground anneals wood paste. The wenthippers of Vishru draw a vertical line across the spot, and as Laishnin is the goddess of presperity, it is said to represent her. A more elaborate mark on the forehead has he shape of U or V, generally the forehead has he shape of U or V, generally and represents Vishou's foot. The worship-wiss of Rhiver adors horizontal lines, made with and represents Vishnn's foot. The worship-pess of Shiva adopt horizontal lines, made with sandalwood paste or ashes. Some Vaishnavas asadawood paste or ashes Some Vaishnavas cisamp that temples, near the corners of the oyes, with figures of Vishun's conch and dis-terment of the corner of the corner of the marked. The material used is a cind of yel levish clay To smear the arms and the cheer with sandawood paste is a favourite kind of tolicit, capecially in the hot season. Boats of Tails or served Baatl, and berries of Rudraksha Tulai or ascred Basil, and berries of Rudraksha schoorpus genituru, strung together are worn round their necks by Vaishnavas and Shalvas extespectively. The Lingayata, a Shalta seet, suppend from their necks a metallic casked containing the Linga or phalins of their god Bairagia, saccides, besides wearing Rudraksha rosaries cound their necks and matted hair, resaries cound their necks and matted hair, mendicants suppend from their necks. Since of the god in whose name they beg. Since of the god in whose name they beg. Since of the god in whose name they beg. Since of overtees may also be seen round their necks. Mustim deviables sometimes carry besook? Muslim dervishes sometimes carry pescock's

Hindu women mark their forcheads with a red spot or borizontal line. High caste widows are forbidden to exhibit this sign of happiness, are forbidden to extrior tolk also to inappears, as also to deck themselves with flowers or organismus. Flowers are worn in the chignon. Hindu women amear their faces, arms, and feet Hidds women amear their faces, arms, and foet connectimes with a peate of terment, so that they may although the good The choice of the they may although the choice of the choice of the they are prepared in the same way. The red flegild with which the ovil eye is averted may be a substitute for the bound of the animal samphered for the purpose to former times, an in many other cases this colour has no such In Brang order cases an except mas no sura associations. The Muslim devida afforts green, the Siki, Akali is fond of blue, the Sanyasi adopts crange for his robe, and no reason can be assigned with any degree of certainty

Shiwa.—India is a land of temples, mos-ques and shrines, and the Hindu finds at every turn some supernatural power to be appeased Shiwa has the largest number of worshippers. He has three eyes, one in his forehead, a mocon's areacent in his matted hair, and at the top of the coll a woman's face representing the river Games. His abode is the Mount Kalles in the Gasgra. His abode is the facent Källes in the Himshayas, from which the river take its entires. Bound his needs and about his cars and Rimbs are serpents, and he also wears a notificas, of skulls. In his hands are several notification, who assisted him in his expectition of his with a dealer of his country several notification of the several notification of his country with middle by several notification of the seven

a jug is attached to every part of his physical personality. The three eyes denote as insight it. It is personally and the skills denote masting in years and crycles, for Shiva is a personification ed. of time, the great destroyer. He is also would shipped as a Lings or phalius which represents much creative energy.

tallapati Ganah or Ganpati, the contallapati Ganah or Ganpati, the contallapati Ganah or Ganpati, the contallapati Ganah or it off when he wanted to attack the moon for ridiculing him. The different parts of his body are also esoterically explained. His vehicle is a rat

Parvati —Parvati, the female energy of Shiva, is worshipped under various names and forms. She is at the head of all female superforms. She is at the head of all famale super-natural powers, many of whom are her own manifestations. Some are benign and bear-tful, others terrible and ugy. Kall, the tute-lary drity of Kalighat or Calcutta, is one of her ferce manifestations. In this form she is black a tongue smeared with blood projects from her gaping mouth besides her weapons, she carries corpses in her hands, and round her neck are airills. Bombay also takes its name from a goddess, Mumbadovi Gouri, to whom offerings are made in heldan homes at an ananal fectival is besign for the other hand the fectival is besign for the other hand the poor are caused by certain goddesses or mothers."

Vishme, the second member of the Hindu trinity, is the most popular deity next to Shiva. He is worshipped through his several incarnations as well as his original personality. His home is the ocean of milk, where he reclines on the coils of a huge, many-headed septent. At his feet sits Lakahni, shampooing his legs. From his navel issues a lotus, on which is seated Brahma, the third member of the trinky In his hands are the conch, which he blows on the his hands are the count, which he blows in the battlebed, and the disc, with which the heads of his enemies are severed. Round his neck are parlands of leaves and flowers, and on his springer of the severed. As Silva represents destructed the limit of the severed as Silva represents destructed the severed as Silva represents the sou is the god of love. To carry on the work of protection, he incarnates himself from time to time, and more temples are dedicated newscays to his most popular innarrations, newscays to his most popular innarrations, soundity. Bame is hand to his original per-sonality. Bame is the silva severed the severe bow in one of his hands. He is always ac-companied by his wife Silva, often by his brother bow in one of his hands. He is always accumpanied by his wile sits, often by his brother Lakshimana, and at his feet, or standing before him with joined hands, is flaumuran, the monkey chieffaid, who assisted him in his expedition agritust. Havana, the abductor of the wife. Krishna is also a hannan figure, presently represented as highlying on a fister, with which he charmood the damanch of his dity, contonically explained to mean his dervotage.

Miner Beities.—The miner gods and goddenses and the definel heroes and herobes who Ill the Rindiu pathiene, and to whom sirines are erected and wraship is offered, constitute a higion. Many of them enjoy a local reputation, are unknown to sacred literature, and are of them, though not mentioned its ancient tite rature, are celebrated in the works of modern saints.

The James in their temples, adore the sacred personages who founded and developed their sect, and venerate some or the delice common to Hinduism. But their view of Divinity is different from the Hindu oncorption, and in the opinion of Hindu theologians they are athelets. So sho the Buddhista of Burnus pery almost the same veneration per form the same veneration of the same temperature of

Images — Beadles invisible powers and delicided persons, the Hindra venerate certain animals, trees and inanimate objects. This recertain must have originated in gratined, fear, wunder, and belief in spirits as the cause at all good or harm. Some of the animals are vehicles of certain gods and goddesse—the cage of Valum with even of Brahman the of Banns one serpent upholds the earth, an other makers Vishnu's bed elephants support the ends of the universe, beadles one such animal being indra's vehicle the goddes Durga or Kall rides on a tiger one of Vishnu's becaused on was the server of the control of the Brahman of the Brahman

soon under many trees by the roadside. The principal trees and plants vendipped are the formal trees and plants vendipped are the formal trees and plants of the formal plants for the formal plants of the formal plants of the formal plants of the formal the second state with some dety. The sm, the soon, and certain plants are among the free second to the vendip bodies where the formal plants are mong to formal great rivers are held sacred Certain mountains, perhaps because they are the abodes of gods and Rishis, are holy Publis from the Gandaki and the Narmada, which have curious lines upon them, are worshipped in many bouseholds and temples.

Worship - Without going into a temple, one can get a fair idea of image worship by seeing how a seprent-stone is treated under a tree. It is washed, smeared with anothel decurated with flowers food in a vensel is placed before it, manps are waved, and the worshipper gees to the seed of the see

Domestic Life —Of the daily domestic life of the people a tourist cannot see much. He may see a marriage or funeral procession. In the former he may notice how a bridgeroom or brids is decorated the latter may shock him for a Hindu dead body is generally carried on a few pleece of bamboo leabed together a thin coth is thrown over it and the body is tied to the frame. The Mahomedan bler is more decent, and resembles the Christian coffin Some Brodus, however, earry the dead to the burist ground in a palangin with great planp, there is the continuous control of the Muzilma, and the Parals expose the dead in Tuwers of Silence

### Indian Names.

The personal name of most Hindins denotes a material object, colour, or questity an animal a relationship, or a delify The undenoted man, who cannot correctly pronounce long Senakrit words, is content to call his child, father, brother, unels, or mother, or sister, as the case may be. This practice survives may be the senate of the personal content of the child, father, brother, meet as well approximate the content of the

white, and so does Arjuna Krainas black-Bhims terrible Rakula a mongoose Shusaka a dog Shuka a parrot Shutaga a horn. Among the names provisient at the present day Hira is a diamond. Batan or Ratan a fewer land the state of the state of the state is a diamond. Batan or Ratan a fewer land the state of the state of the state is a diamond. Batan or Ratan a fewer land the state of the state of the state are often called after the days of the week or which they were born, and hence they have the names of the seven heavenly bodies concerned. When they begin to same corred. When they begin to same corred. When they begin to consider the names upon a new stage of civilisation. It is depulsively whether the Aminists over various to assume the names of the dreaded spishis to assume the names of the dreaded spishis of a fevril is fo inside him to contain the state of a fevril is fo inside him to contain the state of a fevril is fo inside him to contain the state of a fevril is fo inside him to contain the state of a fevril is fo inside him to contain the state of a fevril is for inside him to the state of human and the state of the state of the state of human and the state of the state of the state of human and the state of the state of the state of human and the state of a fevril is for inside the state of the state High-caste practices.—The high caste filled, on the other hand, believes that the more often the name of a dety is on his life, the more merit be certar. Therefore he deliberate of the term of the content of the cont

Family names.—When a person rises in suportance, he adds to his personal name a family or caste name. It was once the rule that the title Sharms might be added to a Frahman's name, a way of the state of the Sharms might be added to a Frahman's name, Varms to a Kahatriyas, a property of the state of the first two titles, but the meaning of the other swo has changed. Dasa means a siave or servant, and the proudest Brahman cannot dealin to call himself the servant of some offendain to call himself the servant of some growing the servant, and the proudest Brahman cannot grow as a Shotra, Ramadas, the famous grows as a Shotra, Ramadas, the famous grow of Shivali, was a Brahmin The Valshaware have made this fashion of calling one-serie as severant of some got ercoedingly popular, and in Western India high caste Hindius of a series. The Brahmans of Southern India high caste Hindius of Alyar or Alyangar to their names. Shastri, Acharya, Bhat, Bhattcharya, Upadhyaya, Khikopadhyaya, changed in Bengai into Shatri, as among the titles indicative of the Shatri, as among the titles indicative of the Shatri, as among the titles indicative of the Singh the sacred books. Among warlfus classes, the should be a more force. Against the Benguis family names, like Bose and Ghoose, The Benguis family names, like Bose and Ghoose,

Dutt and Mitra, Sen and Guha, enable one to identity the caste of their bearers, because the caste of a family or olan cannot be changed. Snet, chief of a guild or a town, becomes Chestey, a Vaishya title, is Southern India. Modalyar and Kayndu, meaning leaders, are a lines remained and Kayndu, meaning leaders, are a lines remained to make the content of the conte

Professional names.—Yamily names sometimes denote a profession in some cases they might have been conterred by the old rulers. Mehta, Kultarni, Deshpande, Chimayai, Mahahnavis are the names of offices held in former times. One family names may meas a four liquor sellor. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the unflix 'tar' or 'wallah' is according place, the unflix 'tar' or 'wallah' is according place, the unflix 'tar' or 'wallah' is acided to the name of the place and it makes a cortain place, the unflix 'tar' or 'wallah' is acided to the name of the place and it makes a nay have Chiplunkare and Suratvallahe or without three affixes we may have Bhavnagris, Malabaris and Billmorias, as among Pandis Three Vasandev Pandmang Chiplunkar would be a Bilnou, whose personal name is Vasandev's Esther's hame Pandurung, and family name reaches a Hindu name. But Humilms have no god or goddesses, and their names are derived from their religious and secular history. These turesque as Hindu names. But Humilms have no god or goddesses, and their names are derived from their religious and secular history. These turesque as Hindu ange. But Humilms have no god or goddesses, and their names are derived from their religious and secular, history. These sians others as well as honorife additions like Khan bave meanings which throw light of Muslim and secular history. Their surmannes frequently indicate a profession or a place, as it the oase of Hindus in Western India. Batil-wallah, Beadymoney, Contractor, Sakistwallah, Adamayallah and Others Iku them are tell-take enterning with the contractor, Sakistwallah, Adamayallah and Others Iku them are tell-take enterning with them are tell-take enterning with the contractor, Sakistwallah, Adamayallah and Others Iku them are tell-take enterning with them ar

Sames

Conversions.—As a rule, a child is named soon after it is born, and in the case of males the appellation is not changed The higher Hindu castes have a separate ecremony called the name, giving occurrony performed on the tweffth day after birth. When a girl is married in these castes the hunbands a family give her with the sacred strate when a same joins an order of ascetice, his lay same is dropped, and he assumes a new name. So also when a Burman joins an order of mostle or must, the lay name is apprecaded by a Pall name. Christian converts change that original name when they are beprised.

### Indian Art.

In India there has never been so marked a looing its own special characteristics of which separation between what are now known as the star-shaped plan of the shries, with the five-the Fine Arts, and those applied to industry foll hands of external ornaments, is the prina was the case in Europe during the silescenth cipal feature. Fathan Architecture was contury As, bowerey, Industrial art forms introduced into India by the Mahomedan invana was to the or a surply curring the interesenth century As, however, Industrial art forms the subject of a special article in this boot, the term Indian Art will here be confined to Architecture, Sculpture and Painting

Historical—The degree of proficiency at tained in art by Indians prior to B O 250, can only be conjectured by their advancement in literature, and by the indirect evidences of indebtedness shown by the works in the historic period, to those which preceded them. or direct records of artistic work of an earlier date than B C 250 do not exist. The chief historic schools of architecture are as follows

Harding Dome		
Name.	Dates.	Locality of the beat Examples
Buddhist	B C 250→ A D 750	Ellors, Aianta, Kali
Jaina	A D 1000	Ellora, Monnt Abu, Palitana.
Brahminica	A D 500 to the presen	Ellora, Riephanta, t Orissa Bhuvanes- war, Dharwar
Chain kyan	A D 1000—	Umber, Somnathpur Ballur
Dravidian	A D 1350-	Ellora, Tanjore, Ma dura, Tinnevelly
Pathan	A D 1200 1550	Delhi, Mandu, Jann pore
Indo-Saracen	le A D 1520-	Labore, Delbi, Agra

Amber, Bljapur

Ruddhist Architecture is mainly exemplified by the rook out temples and monasterice found in Western India and in the Topes or sacred mounds. The laterior decorations, and exter all facades of the former, and the rails and gates surrounding the latter point unmistak
ably to their being derived from wooden struc tures of an earlier period. The characteristic features of these temples are horse since open ings in the facades to admit light, and collo-nades of pillars with richly ornamented caps in the interior halls Jaina Architecture is found the interior hais Jaina Architecture is found in its most highly developed form in the Dilwara temples at Mount Abn The ground plan consists of a shrine for the god or saint, a poroh, and an arcaded courtyard with niches for images. The characteristic of the style is grace and lightness, with decorative carving is grace and lightness, with decorative carving. covering the whole interior, executed with great elaboration and detail. Constructional methods suggest that original types in wood

sion of the thirteenth century At old Delhi are fine examples in the Futub Mosque and Minar The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindn craftsmen. The mosques and tombs at Abmedabad already show Hindn influence but parer examples are to be found at Jaunpore and Manda Indo Saraoanie Architecture reached the climax of its development during the reigns of the Mogbul Emperors, Akbar, Jehangir and Shah Jahan. It edipsed in richness of material and refinement of taste the building efforts of previous periods its crowning example being the Taj Mahal at Agra-The buildings erected during the Adil Shahi dynasty at Bijapur at a slightly later date, dynasty at Bijappr at a signory mater care, exhibits a certain Turkish infinence, expectally in the great tomb of Mahmond. Though less refund and lacking the attraction of precious materials in their decoration, these spiendid cellifices are held in higher exteem by some critics than those of the Morhals, oo account of their simplicity, grandear and fine proportions. The era of great civil architecture io India was and era of great civil aroniceture is inclus was revived by the Mahomedan powers Spiendid palaces and forfressos were built at Madras, Delhi, Agra, Fattehpore Sikri and Silpaur, and the example thus set was copied by the Hinda princes at Jaipar, Udsipur and elsewhere in India. The application of great architectural treatment, nnequalled in extent elsewhere, is to be seen in the Ghauts or stops coclosing lakes and on the backs of rivers The most actable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome

Sculpiure —The use of scolpture and painting in isolated works of art was practically non existent in India until modera times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture No civil statusry, such as is now understood no ava sakuary, such as is now inderfeood by the term, was excepted, for no contempo-rary portrait figures, or busts in marble, or bronze, have come down to us from the ruiss of ancient India, as they have from those of Egypt, Greece and Rome Sculpture has been may receive and moins configure has been used oxclusively as the handmaid of religion, and to this fact may be attributed the stereo typed forms to which it became bound. The nothing suggest that original types in wood have been copied in marble spines and Dravidian style differ little in essential plan, all baving a shrine for the god, preceded by pillared por heat. The outer forms wary. The northern Brakmisical temples have a curved pyramidal root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or root to the strikes, which is the southern or to the strikes, and the strikes which is the strikes of the strikes and the strikes and the strikes and the strikes and the strikes the strikes and the strike and the strikes and the strike and expressive grandour with the greatest managerphese of Beprilan art. The ortenanding characteristics of Hindin accipture are the power displayed in suggesting movement, the five sense of decorative arrangements of the sense and an overpowering ingentity in intrinsic design. Mahoundan accipture in India, though not exclusively confined on the sense of the sense of a compared with that of the Hindus Floral motifs are often used in the comments to some sense of magnetic fields and invention. The sense of mosques. Their geometric oranment to some of mosques. Their geometric oranment to some first of the Hindus Floral motifs are often used in the three of mosques. Their geometric oranment theory of the sense of mosques are in the sense of mosques. Their geometric oranment or an invention of numan or animal agures is rarely to be met with Seniperror and modelied rolled is, as a rule, kept very low, and is mainly confined to the decore hands of oranment which relieve large exterior wall apaces. Buildings of purely Mahomedan bands of oranment which relieve large exterior wall apaces. Buildings of purely Mahomedan design and workmanship show greater restraint than those upon which Hindu workmen have been employed and are more satisfactory, but as Ahmedan d the two celebrated windows as the two wilden of a heppy combination of the two celebrated windows as the two wilden of a heppy combination of the two celebrated windows as the two wilden of a heppy combination of the two celebrated windows as the two wilden of a heppy combination of the two celebrated windows as the two celebrated windows as the two celebrated windows as the two celebrated windows and the two celebrated windows an

Painting—Much of the carved stonework pon ancient Indian buildings was first plastered and theu decorated with o lour in the only paintings, in the modern acceptation of the terms, now cristing, which were to the complete complete complete the complete complete complete the complete complete complete complete complete the complete complet

the callgraphist. As its range extended, a re-markable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, the decorative feeling, and extraordinary delicacy and finish in the painting of detail The artists of a Hindu of shoot of this moveand answer or a mindu on-shoot of this move-ment, known as the Rajput school, were less fully endowed with the technical and purely aesthetic qualities than were the Moghni pain-ters but they brought to their work poetry and sentiment which are not to be found in that of the Mahomedans The pictures of both branches of the Moghul school, although highly decorative of the Mognui school, authorign mg my decomment in character, were not intended for exhibi-bition npon the walls of rooms, seconding to Western practice, and, when not naed as illus-trations or decorations to manuscript books, were preserved in portfolios. As this school of painting was the last expression of tradi-tional art in India, in the restricted sense here applied to the term, and, as the question has a distinct bearing upon the modern development distinct bearing upon the modern development of paintings, a few words may be added regarding the difference between the conventions followed by Eastern and Western paintern Until the middle of the fourteenth century the conventions of both East and West were practically the same, though the use of them differed according to environment and national differed according to environment and national temperament. These conventions the artists of the East have retained and development that the second of the convention of the harmony of colont, and expressive action Their at has throughout heen deconative and when natural objects have been depicted, their treatment has been that of a flat pattern. The European painters, after the period above mennationed on the contrary, sought to attain the appearance of actuality in the objects deploted by the study of the science of light and hand, and perspective and in achieving this end, and developing it into the realisation of atmosphere and light, they specified a large measure of the decorative quality which characterised the work of the earlier school. Eastern artists have ignored or been blind to light and shade, and in works entirely free from European in finence one will look in vain for any suggestion of it in their figures or for shadows of objects cast upon the ground During the last fifty years there has been a strong movement toward a return to decorative conventions, on the part of European strists who have assimilated part of European strikes who have assimilated much that the East has to teach them, without thereby affecting the distinctively western the strike have been less necession as in Takanese artists have been less necession as the strike have been less necession and appear to lose whatever is hest in their traditional practice without acquiring the finer qualities of that of the West.

care of his successors, Jehangte and Shah January.

Unlike the works of the Alpanta paloters, and the works of the Alpanta paloters, and the Mogalius properties of the Mogalius shoot were ministures. They were executed in a species of opaque water they were executed in a species of opaque water the origin to proper or veillum, resembling in technique the liminiated missals produced by the mouth in Rurope during the middle age. Some of the finest of the earlier specimens in lands are of a religious character, this phase of veillum and the state of the earlier specimens in lands are of a religious character, this phase of veillum and the state of the earlier specimens in the state of the earlier specimens in the specimens to the state of the earlier specimens in the specimens to the specimens of the finest of the earlier specimens in the specimens in the lands are of a religious character, this phase of veillum and the specimens in the lands are the specimens in the s

) become stereotyped in his practice. All rieim designers, painters and craftsmen be had been attracted to India by the great ories carried out by Akbar, Jehangir and Shaisan let the country, and their places were ken by no successors. The indigenous artists of to themselves in the soluted courts of small adian princes, or collected in schools in remote intricts, employed themselves mainly upon peating the works of a previous age, instead t seeking now motifs for artistic treatment o purely mechanical did the work become that some of the schools or guilds of painters, the xecution of a single picture was subdivided, ne craftsmin painting the face, a second the irapery, and a third the background Such acthods could only lead to deterioration and acthods could only lead to deterioration and leave At the time when the British Kast ndis Company ceased to be only a guild to necessarily and bocama a great administrative lower in 1757, very little vitality shrvived in years of the state of the state of the other of the sadministrative history. Detween be battle of Plassey and the Indian Mittiny, be "Com nany was too fully occulded in be "Company was too fully occupied in ighting for its existence, extending its bordere and settling internal economy of its ever and settling internal economy or its ever noreasing ribories, to be able to give much stent to to conserving any remnant of artistic prace which had survived Without any bill rate intention of introducing western art nto the country Oreek and its derivative styles of architecture were adopted for public and private buildings in Calentta, Bombay and bladras because these were found to be more statras because these were round to de more suitable for their purpose than buildings of indigenous pattern. The practical result was the same, for the Indian crattamen employed upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which traditional ornament and concerning which they had no knowledge or sympatry & a there were no sculptors in India capable of modelling or exving of the substant, the monuments to or exving of the substant of the substant of the form and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in England Although a considerable amount of research of the property of the substant o ologists, no official interest was taken in artistic education until the Government of India was ransferred to the British Grown in 1859 In England itself, the first fifty years of the nine-teenth century was a period of gross commer calism and artistic degradation but with the advent of the international Exhibition of 1851 the eyes of the nation were opened to the value of art as applied to industry

The Schools of Art then instituted throughout England were imitated in a timid and tentative manner in India, and were attachand tentative manner in India, and were attached to the demastional system, which had been
previously modelled upon a definitely European
state. These subcoist of art, it should be rebeen the season of the season of the season of the
the artistic industries of the country, and not
to provide instruction in architecture, and protage of the season of the season of the
arrowity escaped artistiction by the Secberg of State, upon the ground that they
say become schools of painting and had than

been diverted from performing the original firms tion for which they were established. The work of the Schools of Art in regard to industrial art is referred to elsewhere; and as two of them, that at Madras and that at Lahore, have confined their activities almost excitatively to confined their activities almost excitatively to mention colly the work of the Schools at Calcutta and Bombay in the present article. The Calcutta shool, except for occasional experiments in the application of the graphic arts to thickgraphy, engraving and stained glass, has at Bombay covers a wider field, for in addition to classes for modelling, planting and design it possesses a special school of architecture; arrange of technical workshops, in which instruction is given in the applied arts, and research the strength of the Pottery industry. It is in the principles underlying the instruction in painting that the schools of Ociente and Bombay have taken almost diametrically opposite means as reach the each time to have in law. only have taken a most dimetrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters for Havell, who until a lew years back was the Principal of the Calcutta School banken from within its walls every vestige. of European art, and claimed that the tradi-tional art of India, in its old lorms, is not dead, but merely sleeping or smothered by the blanker of European culture laid upon it for the last 150 years and needed but to be released from this incubus to regain its pristine vigour Woll coupled with literary ability, backed by in tense enthusiasm for the views he held, which be advocated with admirable persistence, he imposed upon his students an exclusive and severe study of the Moghul and Rajput schools of painting He was fortunate in finding a willing and equally enthrelated disciple in Mr Abhandranath Tagore, an artist of fine imagination and fancy, endowed with technical imagination and fancy, endowed with technical ability of a high order, combined with a serious devotion to his art. He with other Bingal painters, inspired by Mr Havella precepta, founded, shout fifteen years ago, what has since become known as the Calcutta School of paintbecome known as the Calcutta School of painting In their early work the painters of this school closedy adhered to the conventions of Moghul and Ralput attites, whom they took as their models, and these schi examples made a great impression upon all European critics who saw them. They were velocomed attention of the convention of the first sign of a genuine revival of Indian painting, based upon traditional lines, and it was con-sidently hoped that the movement would meet classes. Indeeding a many individual works of the school undon biedly are the anticipations which greeted its inception have exacely been fulfilled by the Calcutta school. The painters thomselves have prever reached the high tech Learning was a layer restrict two produced the best works of the Moghni or Rajput school and, as time has passed, their outlook appears to have shifted, and, while stemming the flood of western influence, they appear to have driffsed into a backwater of Japanese conventions. The Indian public has failed to give the school the support it was hoped they would afford, and the movement has had to depend for encourage-

Sembay School of Art.—The attitude towards the development of art in modern India taken by Mr Gordl Burns, who long guided the policy of the Bombay school, was diametrically opposite to that favoured by Mr Havell While yielding to no one in his admiration for the ancient art of India, and giving every encoursessment to his sudents to study its master pleases the view he takes it that with European Beleest the View he takes it that with European the the durated classes in India are trained, with the educated classes in India are trained, with European House, and sedence nermeating the European ideas, and science permeating the professional, commercial, industrial, and political life of the country, it is not possible for modern Indians now to recapture the spirit which alone gave vitality to the great works of the past that without this spirit, the con ventions the ancient artists adopted are mere dead husts: and that to copy these would be an unprofitable as it would be for the artists of Europe to harness themselves to the conven-tions of the Greek and Roman sculptors or to those of the medieval painters that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpleces of Enropean art and that, with the wide adoption of mo pean styles of architecture in India, it is neces sary for a school of art to possess the nes examples of ornament applicable to the great historic styles, for the purpose of study and take rence. There are certain basic principles com mon to the technique of all great art. sue fine and accurate drawing in its widest some composition and design, and the science of colour harmony By means of these an ar at can express his individuality and emotions, and Mr Burns held that the main function of a School of Art is to equip its students with the power of expression, untrammelled by any set conventions, so that when they leave the school, they do so with the capacity to employ their faculties in any direction their sympathies and tastes may impel them to take Which of these two very divergent theories will produce the result both these gentlemen nuite in wishing to see brought to pass, time alone will show Certain it is that the driving force of any artistie impulse must come from within the nation and that India, like every other country in its art, as in other matters, must work out its own salvation

One striking success of bopeful sugury has by a miniature paint-d model of the was front been achieved by the Bornbay School in rocket of Wazir Khan e Mosqua which is the facest years. This is the establishment of a four-sching example of this style of Maghiar architecture.

ms mainly apon Buropeans in England and lis. Second of architecture its which the study of the Second of Art.—The attitude wards the development of art in modern data association designed to keep past sixuations to be the second of the second and with one are the second of the second of the second and the second of the sec the means whereby the ancient glories of Indian architecture will be some day revived in new forms, bringing in its train a vitalising influence upon every other form of artistic activity

Marsal Painting —Mr W E Gladstone Bolomon, the present Principal, has during the last four years studiously avoided any degmation theories as to the ultimate and which Indian art is destined to attain, though be has consist-ently pointed out the Indian's pre-eminence in the decoration of wall spaces. The guiding principle with Mr Solomon has been to teach the students to draw and to paint what they see, and further to encourage by all possible means their natural progress in the direction towards which their inherent instinct most obviously urges them. The application of this close training in the study of form and colour from the life to a decorative purpose, which accords both with analysis. accords both with ancient traditions and modern manifestations of the Indian artistle genius, has recently taken a definite line in the production of mural paintings executed by he students Specimens of mural paintings by the students of the Sir J J Behool of Art Bombay, were sent to the Empire Exhibition at Weinidey and exhibited in a email room sp cially con structed for the structed for the occasion Indian mural painting was also to be seen in the Pengai Court at the Exhibition which was decorated by Mr Mukui Dey, a Beng li artist resident in London, an i in the Punjah Court for which the Lehore School of Art prep and an elaborate scheme hand of past and pre ent s udents from Labore was sent t arry out this scheme and they made the walls glow with the colours of tha seventeenth century mosaic work to be seen at Lahore and in its greate t perfection in the With Khan Mosque These decrations are historicall accurate, the animal panels are full size faceimile drawings of those in Lahore Fort the flor J p nels and spandrils and the reometrio drawings their represent the tile work of the Fort the Wasir Khan Mosque, and other his oric I buildings, or are designed in the tyle of thos d corations. This representation of a sch of architecture which was over-shadowed by other splendoms was rounded off

### Indian Architecture.

#### L ANCIENT

The architecture of India has proceeded on lines of its own, and its monuments are unique among those of the nations of the world. An sucient civilization, a natural bent on the part of the people towards religious terrour of the contemplative rather than of the fanatical sort, combined with the richness of the country in the sterner building materials—these are a few of the factors that contributed to making it what it was, while a stirring history gave it both variety and glamour Indian architec-ture is a subject whinh at the best has been ture is a subject whinh at the best has been studied only imperiently, and a really comprhensive treatise on it has yet to be written from the subject is a vast and varied one, and it may be each a treatile never will be written in the form of one work at any rate. The spirit of Indian art is so foreign to the European in each of art culture that it is only one European in of art cultities state to is using one famingeau as hundred who can entirely understand it, while art criticism and analysis is a bransh of study that the modern Indian has not as yet ventured upon to any appreciable extent litherto the one, and with a tew exceptions Hitterto the one, and with a few exceptions, the only recognized authority on the subject has been Fergusson, whose compendions work is that which will find most ready acceptance by the general reader Bat Fergusson attempted the nearly impossible task of covering the Stone of the control of and it is sometimes bed that he was a man of too prely Buropean a column abbet who and open a proper some some and too prely Buropean as of the some and color of the some above the some and color of the some and the some that the some that there is no opped hitherto. He asserts that there is no copted hitherto he asserts that there is no copted hitherto. He asserts that there is no copted hitherto he copted hitherto he copted hitherto hit has been copted to the some in the copted hitherto hitherto hit has a reater religion, to the great Asoka, who reigned B C 272 to 236."

Forgusson's first architectural period is then the Buddhist, of which the great tope at the sanhli with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan topes and monas-teries. Perhaps the examples of Buddhist architecture of greatest interest and most ready scene reruspe to stampes or Boddhist content and the street at most ready at a cross to the proper street at most ready in the Chairys balls or rock-cut cares of Karli, almata, Nask, Ellora and Kanhert. A point with relation to the Gandhara work may be slinded to in passing. This is the strong Buropean candency, variously recognized as Buropean to another, which is the strong Buropean to the Gandhara work the strong Buropean to the Gandhara of Creek. A possible of the Gandhara to the Gandh

The architecture of the Jahas comes next in order Of this rich and besuiting style the most noted examples are perhaps the Dilwars temples near Mount Abu, and the unique "Tower of Victory" at Chittory at Chittory

#### Other Hinds Styles

The Dravidian style is the generic title-unally applied to the number of the water the Made Fresidene and the local title work; the seen in many rock-ent temples as at Ellow, where the remarkable Kylas' is an instance of a temple out out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its experior It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid test in length, not built, but sculptured in solid stone, ar undertaking of vast and, to Crr modera ideas, unprofitable industry The Pagoda of Tanjore, the temples at Striagam, Childambaram, Veilore, Vilayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style

The writer finds some difficulty in following feroscon's two next divisions of chassinestion, for some control of the control "Hinds "—however unscientifie he may thereby stand confessed Amongst a wast number of Hinds temples the following may be men timed as particularly worthy of study.—Those strategies and the standard of the standard temples at Khajuraho, Bindrahun, Udahur, Bestare, Gwallor de The paises of the Hinds Baja Man Singh at Gwallor's one of the most beautiful architectural examples in India So also are the paises of Amber, Datiya, Urcha, Dig and Udahpur.

### Indo-Saracenic.

Among all the periods and styles in India Among all toe periods and styles in incua the characteristics of none are more easily recognizable than those of what is generally called the "indo-dancemic" which developed after the Mahomedan conquest. Under the new influences now brought to bear on it the architecture of India took on a frech lease the new innuences now prought to pear on at the architecture of indic took on a fresh lease of sacilytic and underwent temaritable modifi-cation of the control of the control of the factors bilishert, became imposed no mice we factors bilishert, became imposed no mice we development, while the arch, at no time a favourite constructional form or the Hindu builders, was now forced on their attention by the profilections of the ruling class. The minaret also became a distinctive factors. The requirements of the new religion,—the mosque with its wide spaces to meet the needs of the control of the control of the control of the architecture of the control of the control of the treatments that heat hitherto been to some extent densich. The Mealem hastred of identity only a ball out the time of substant of the control of the actions of animate objects by the admirabili-or the profiless. the builders to a greater extent than before to proportion, eale and mass as means of giving beauty, mere richness of soulptured surface and the aesthetic and symbolic interest of detail being no longer to be depended on to the mane degree

The art was thus the galuer by the new con The art was thus the galuer by the new con-sitions. It gained in power and variety much as "Classic" a rathlecture gained under the the control of the control of the con-bact discount of the control of the bard the writer was impressed by this on-his first view of the Gwalior palace already mentioned Though a Hindu building that palace has yet much of what might be called the more sophisticated quality of the Inde deall it has being Hindu, a certain amount detail It has, being Hindu, a certain amount it was applied of sculptured ornament of animated forms, and the general effect of roundness, richness and interest thereby imparted seemed eloquent in suggestion as to what is lacking in so many of the Mahometan huildings.

### Foreign Influence

There would appear to be a conflict between archeologists as to the extent of the effect ou indian art produced by foreign influence under the Mahometans. The extreme view on the one hand is to regard all the best of the art as having been due to foreign importation. The Gan dharan sculptures with their Greek tendency, the development of new forms and modes of treatment to which allusion has been made, the similarities to be found between the Maho-metan hulidings of India and those of North metan huildings of India and those of North
Africa and Europe, the introduction of the
minaret and, shows all, the historical evidences
that exist of the presence in India of Europeans
during Mogul times, are cited in support of
the theory On the other hand those of the ture from the other linding tones, a tendency to
opposite school hold the foregoing view to be adhere to the lintel and bracket rather than to
the arch the mercalling European processing the school hold the longer than to the school hold the foregoing view to be adhere to the lintel and bracket rather than to oppose school hold the integoing view to be due to the prevailing European preconception that all light and leading must come by way of Europe, and the best bings in art by way of Greece To them the Gandharan sculp Euro, instead of being the best, is the worst in India even because of its Greek tincture They find in the truly ludigenous work beauties and significances not to be seen in the Graco-Bactrian sculptures, and point in the Graco-Bactrian sculptures, and point to those of Borobndei in Java, the work of Buddhist schoolasts from Iudia, wonderfully preserved by reason of an immunity from destructive inflanceoe given by the insular position, as showing the best examples of the art extant. It is probable that a just estimate of the merits at the controversy, with respect to sculpture at any rate, cannot be formed till time has obliterated some of the differences of taste that exist between East and West.

To the adherents of the newer school the and ambiguite between Indo-Maho-metan and Hindu bulkings outwelch those between Indian and Western Mahometan west, aspecially in the light of the dis-timi-larities between the letter. They admit the phrashes produced by the advent of Islam.

of other decorative forms. Great ingentity but contend that the art; though modified, came to be displayed in the use uf pattern and yet remained in its essence what it had always ed geometrical and foliated ornament. This before the pattern of the standard of the pattern of the builders to a greater ortent than before to be greater ortent than before to proportion, scale and mass as means of giving to the arts the decided treatment and orations. so far as their detailed treatment and crafts-manship are concerned, rendered in a manner distinctively Indian, Fergusson is usually regarded as the leader of the former school while the latter and comparatively received school has at present found an eager champion in Mr E B Havell, whose works, on the subject are recommended for study side by side with those of the former writer. Mr Havell pra-tically discards Fergusson, making methods or classification into the trying the regards to a greater extent than did his tamons precursor as before logical review or what he regards to a greater extent than did his famous precursor as being one octutauous homogeneous Indian mode of architectural expression, though subject to variations from the influences brought to hear upon it and from the varied purposes to which

### Agra and Delhi.

Agra and Delhi may be regarded as the principal centres of the Indo-Saracenic style principal centres of the Indo-Saracenio style-the former for the removed Tail Mahal, for Athar's deserted capital of Fatchpur Shirt, his tomin at Secunders, the Motif Majid sans, which was the Saracenia of the Majid sans, we have the great Jamma Majid, the Fort, the tombs or Humayon, Baidar Jung, &c., and the unique Gutt Minar Twu other great centres may be mentioned, because in each their appeared certain strongly marked and vidualizes that differentiated the Archer seen of the style there found from the variety seen of the ktyle clare found from the variety sea at Delhi and Agra, as well as that of one from that of the other These are Abmedabed in Gujarat and Bilapur on the Dekhan, both in the Bombay Presidency

have recourse to the areb, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion The Ahmedanad work is probably most famous for the extraordinary beauty of its stone 'lall'— or plerced lattice-work, as in the palm tree windows uf the Sidi Sayyid Musid.

### Bijapur

The characteristics of the Bilapur variety of the style are equally striking. They are perhaps more distinctively Mahomedan than those of the Ahmedabad buildings in that here the dome is developed to a remarkable bere the dome is developed to a remarkable degree, indeed the tomb of Mahmud—the well-known 'Gol Gumbas'—is eited as shew in the properties of the control o that of the preveiling material, the head me-compromises Dathan beaut in a familiar compromises Dathan beaut in a familiar and write mandatometric of the Ahmedahed work with its greater relones of ornamenta-vitos are bound up with the nature of the Guirat-rico are bound up with the nature of the Guirat-restone, while at Delils and Agra, the free relative of these centres,

### II MODERN.

The modern architectural work of India then mncb discussed project of the Government divides itself sharply into two classes. There is first that of the indigenous Indian "Master builder" to be found chiefly in the Native States particularly those in Ealphanas, and there is that of British India, or of all those parts of the posinsials wherever me is that of British India, or of all those parts of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsials wherever me is India's expense. The advocates of the posinsial wherever me is India's expense. The advocates of the posinsial wherever me is India's expense The advocates of the posinsial wherever me is India's expense. The advocates of the posinsial wherever me is India's expense The advocates of the India's posinsial where all those parts of the peninsula wherever Western ideas and methods have most strongly spread their influence, chiefly, in the case of architecture, through the medium of the De partment of Public Works. The work of that department has been mnob animadverted upon as being all that building should not be, but, considering it has been produced by men of whom it was admittedly not the metter, and who were necessarily contrading with lack of expert training on the one hand and with de-partmental methods on the other, it must be conceded that it can shew many notable build legs. Of recent years there has been a tend ener on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service. of Government as the result of a policy ini-litated in Lord Curson's Viceroyatty in time, therefore, and with the growth of the influence of these men, such of the reproach against the building of the B itish in India as was just and was not merely thoughtlessly maintained as a corollary to the popular jape against every thing official, may gradually be removed. If this is so as to Government work progress should this is so as to Government work progress should be even more assured in the freer atmosphere the progress of the second of the greater cities, where the trained modern architect has established himself, in private practice, there are signs that his influence is beginning to be felt. He still complains, how ever, that the general public of India needs much efficiently in the progression of his mode efficiently in the recognition of his much educating np to a recognition of ins value, both in a pecuniary sense and other-wise. It is also to be observed that the sur-vival of a relic of the popular idea of the time before his advent, to the effect that though an architect might occasionally "design" at stimet might occasionary design a building it was siways an engineer who built it, is still indicated by the architect in some cases deeming it advisable to style himself architect and engineer."

To the work of the indigenous "masterbuilder" public attention has of recent years

ment at India's expense. The advocates of this view appear for the most part to have been adherents of the "indigenous Indian" school of archeologists already mentioned, and to bave based their ideas on their own reading of based their incass on their own reduing of the past They still muster a considerable following not only amongst the artistic public of England and India, but even within the Government services Their opponents, bolding what appears to be the more official view both as to archwology and art, have pointed to the death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy sil efforts to resist this law, or to institute what they have termed "another intile revival" The British in India another lattle revival to be british in they contend, should do as did the ancient Romans in every country on which they planted their conquering foot As those were wont to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art This is the view which, as we have indicated, appears to have obtained for the moment the more influential bearing, and the task of designing and directing the construction of the principal buildings in the new Capital has accordingly been entrusted jointly to a London and to a South African architect, neither of whom can be unduly influenced by either past or recent architectural practice so far as India is concerned

The results cannot but be awaited with the kenest interest, and meanwhile the controversy, with suspended ladgment, naturally falls into abeyance it is, moreover, bowever vital to the interests of the country's architecture, too purely technical and academic for its merits to be estimated by the general reader or dis cussed here Its chief claim on our attention has in the fact that it affords an added interest to the tourist, who may see the fruits of both schools of thought in the various modern brild-ings of British india as well as examples of the builder." public attention has of recent years ings of British India as well as examples of the been drawn with some instituces, and the suggestion has been pressed that efforts aboud be invested to the present the suggestion of what is pobled out—and now and bearsar. The town of Lashkar in all versatives allowed the presentation of what is probled out—and now and versative alknowledged—to be a remarke big in instances of picturesque modern Indiagon and versative about which is three-toned with present the whole is three-toned with gradual grad

## Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon architecture; the second comprise those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories and to personal adorament.

The articles of the first group were intended for some fixed and defiults position and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated fromes of the second group were movable, and the range of their design was less constricted as the same ples of work in both groups are so numerous, and the arts comprise such a diversity of explication, that only a current survey can be attempted within the limits of a short review although the design and treatment differ in the two groups, the materials used were often the same. These materials over a very wide range but space only permits of reference to the Indian confirmance attended to the review of the landing confirmance attended the wood moved attended the contractions are stoned to the contractions and the contractions are stoned and textiles.

Before dealing separately with each of these materials as few words upon the principal Indian styles are uscessary. The two distinctive styles are Hindu and Mahomedrain. The former may be learned indigenous, dating as it does may have been also as the secondary of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features sesentially Indian in character. The art of both Hindus and Mahomedrain sheed appropriation and the requirements of religious ritical. The obvious expressions of religious ritical. The obvious expressions of religious ritical in Hindu art all natural forms are accepted and employed for devertive purpose, but in that of the Maiomedans, nearly all usural forms are rejected and forbidden. The bests of Mahomedan decoration is therefore mainly geometrical religious ritical forms are accepted and employed for devertive purpose, but in that of the Maiomedans, nearly all usural forms are rejected and forbidden. The bests of Mahomedan decoration is therefore mainly geometrical religious particular and the state of the service of Hindu work is exuberance, imagination and poetry, that of Mahomedan, retience, intellect and good taste. The Hindus are laviat, and often mediscriminations, in the response of ornament, the service of t

Stone Work.—Carved sto e work it the principal form of decoration supployed in Filed the state of the state of the state of the form the measure figures in the Stodichist and Brahminical Cave Tempies, and the detached sulpture of the tempies of Southern India, to the delicately incised reliefs and claborately fested formation of the Jain tempies at Mount Abu A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Modewal craftwork, the regular progressive stops from art in its primitive state to its out-minating point and its unbesquent decay Styles in India seem to spring into existence fully developed, the earlier examples often exhibiting finer oraftsmanship than those of a later date. There can be little doubt that stone carving in India was simply the application of the wood carvors' art to another material. The treatment of stone by the Hindu craftsmen, a von in the constructive principles of their buildings, bears a closer resemblance to the practice of the wood worker than to that of the stone mason The carlier wooden examples from which the stone buildings and their decorations were durived have loug sluce disappeared, but their influouce is apparent. The keynote of Hindu dougn is rhythinic rather than symmetrical . that of their craftsmauship vigour rather than refinement. In the carving of the human figure and of animals great power of expressing action is shown, and this spontaneous feeling is preserved despite the greatest elaboration and detail. The industry displayed is a maxing, uo amount of labout appears to have daunted the Hindu craftsmen lu carrying out their bage and intricate schemes of decoration.

The stone carving on Mahomedan buildings, evept where Hindu carvers have been allowed a free hand, is much more restrained than that carried the state of the designers prompted them to concentrate the ornament upon cortain prominent features, where its upon cortain prominent features, where its rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appear to be inethinatelline, while wonders of the state of the sta

stones by Indian jewellers may here be referred to fir George Bridwood states that "the Indian jeweller Shinks of producing the sumptimal bridship of the printing of the printing of the printing the printing of the printing the general sense and "full many a gen of puret my screen's nettern than the printing for a printing for a strong sense of the printing for the printing clous stones from the Indian mines were taken to Enrope to be cut, many of the finest jewels found their way back to the treasure houses of Indian princes.

Wood Work —With a fine range of tim-bers mitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings 'Indrunately, most ni the ancient wood work has been destroyed by the action of the climate and the teeming insec tivorous life of India, and that which escaped these enemies was wiped out by fire and the sword It is therefore only possible to con jecture the height of artistic development those buildings and their decorations displayed by the copies in stone which have been preserved Few if any examples of a date earlier than the sixteenth century are to be found Many of these, and specimens of a later date to be seen in towns and cities throughout the country, in towns and cities throughout the country, are masterpieces of design and craftamanship. The curred timber fronts and inner country and parts of Western India are notable for their picturesqueness and beauty: the structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manure which miles cichness of acte with good taste and propriety Of furniture, as the term is now understood few examples were ierm is now indestrood few examples were in use in India before Europeans introduced their own fashions. These were confined to behave an accross, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with indiays of coloured woods, ivory and metal, while in some cases the wooden basis was entirely plated with copper, brass or silver In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the atten-tion to detail and the finish generally associated with the carving of Ivory Coloured iso was freely used to decorate many articles of fur niture, especially those turned on the lathe, and rich colour effects were obtained in this, perhaps the most distinctive and typically indian development of decoration as applied

Indian development to woodwork.

Metal Work — With the exception of weaving, the metal working industry employed and still employs the greatest number of artistic and still employs the greatest number of artistic copper and brass have

beam and sopper Indian oraffamen have shown a taste and skill unsurpassed by those of other nations, except in the department of fine cont-ing. In this, and in the working of gold and sliver, a higher standard of technical and constructive exercises has been reached by the metal workers of Europe and Japan. It may be taken as an axiom that the more bantiful the shape of an article is, and this especially applies to metal work, the loss need exists for the decoration of its surface. It is equally true that the highest test of craftamarahip is the production of a perfect article with anily is the production of a perfect article with out any decoration. The reason being that the slightest a choical fault is apparent on a plain surface, but can be hidden or discussed of one which is covered with organization. On coldemiths and silverspills of India were extremely skillful and industrious, but judged by this test their works often exhibit a lead of care and exactness in the structural portions and a completely satisfactory example of per fectly plain work from the hands of the gold and aliversmiths of India is rarely to be met with Much of the excessive and often inappropriate ornamentation of the articles that they producornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose. For many generations, ornaments of gold and silver were resarded in the light of portable wealth, a practice which naturally made for massiveness These solid ornaments are most effective and picturesque and, despite an enormous output of elaborate and delicate work from their hands, the most valuable contribution of the Indian metal workers to the sum total of man s artistic use of the precious metals will probably be found to lie in a certain barbaric note which be found to He in a certain barbaric note which distinguishes these pieces—a note not present in the craft work of other countries. In the design of Hinda gold and silver ornaments, religious symbols have been extensively need. The ornaments which bedeck the early scuip-tured figures, and those depicted in the paintings at the Cave Temples of Ajanta are precisely the same in design and use as similar articles made at the present time, thus affording a striking evidence of the inherent conservation of the Hindn people and its effect noon an industrial art that makes a closer personal appeal than any other

Textiles -The textile industry is the widest in extens in India and is that in which her craftsmen have shown their highest achievements. Other countries, east and west of India have produced work equal, if not superior. anvier in reproduced work organ, is not soperior, in stone, wood, and metal but nowe has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken fabries. Some of the products of the fooms of Bengal are marvels of technical skill and ing, the metal working industry employed of Bengal are marvels of technical skill and astill employs the greatest number of arts street tante, while the plum bloom quality tie cratiumen in India. Copper and brass have always been the two metals most widely need not which places then it also by themselves, and the context of the cold Cashnere shaws is an artistic arbitrary of the country. They exhibit that sense of weaving being essentially a process of repetitive country. They exhibit that sense of loom application of the country. They exhibit that sense of loom wasving to such a state of perfection that which gives by the work of the human hand, and the states of the country of the human hand, and the states which gives by the work of the human hand, and the states of the manual that the country of the manual transfer of the states of a such as the sills of Lacashira. But we work of the manual transfer to such as the mills of Lacashira. The processes in the second transfer to the transfer and the such as the s the finest handwork of the ancient weavers of India. Many of the most beautiful varieties of Indian textile work have disspeared, tilled by the competition of the power toom and it is to be fisared that under modern conditions they are never likely to revived. In other branches of art as applied to identical the tilder branches of art as applied to identical in that we wanted. so pre-eminent a position as in that of weaving The printed silks and calloos of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations, whose craftsmen learnt many valuable lessons from the technical skill, and artistic tasts they display In embroidery and fine needlework the West and the Far East have more than held the West and the Far Mask have more than been their own, while nothing approaching the sapestree made in Europe in the middle ages has been produced in India The nearest approach to these is in carpet and rugs That art was introduced from Persis, but Indian crattamen have mover succeeded in equalities the finest work of their instructors either in colour or design

Modern Conditions —In the foregoing skatch of the ancient industrial art of India, as sketch of the shorten industrial art or radia, he applied to the forcer industrial materials employed, only a general industrial of its more striking characteristics has been possible. A volume would be required to give a detailed description of any one of them, and would leave many other mino; arts to be considered. All those branches of art came into existence, were developenes of all came into calculate, and ever developed and fourthed in Iudia when social and economic conditions were vasity different from those of the present day. Like similar artistic crastic carried on in Europe np to the end of the sighteenth century, they were executed by hand is bour. The processes involved had not been discovered by scientific inquiry, such as is now understood by the phrase, but were the ontoone of generations of slowly built up expe riences. We now come to the effect upon them of the changed conditions which have revolu tionised industrial art in Europe during the last century

The invention of the steam engine, and the appli ation of mechanical power and scientific research to industry in Europe, mark the divid-ing line between ancient and modern industrial Not only ou its technical side is this so, but the effect of these changes has been to so, but the effect of these changes has been to after the character of the work itself and the spirit which animated the craftman. In piace of the ancient ideal of variety in design and treatment, which meant a limited output has been substituted. The capitalist has dispined the master craftsman, the orga-nised factory, the small workshop, specialisa-tion and division of isbour have taken the piace of general proficiency among the artisans, the function of the designer has been separated from that of the craftsman, local markets have

opening of the Sues Canal, and the handlerafts-men of India have since been struggling to avoid the same fate which overtook those of Europe half a century before. With less time to adapt themselves to the changed conditions the Indian craftmen have had to meet the competition of European rivals already fully equipped with new and unknown weapons Even before this period of intense competition, observers interested in Indian craftwork had noticed evidences of its deterioration. The falling off, both in design and workmanship, falling off, both in design and workmanship, was attributed to the conservative practice of the craftemen, to the gradual loss of foreign markets, and to the long period of internal disorder which had deprived them of both the patronage of the rulers of an earlier age and the stimulating contact with foreign craftsmen who had previously been attracted to the splendid courts at Delbi and Agra. During the same period, an even grater degradation in same period, an even greater degradation in design had overtaken the graftwork of Europe This was due to entirely different causes, namely, to the introduction of machinery Attention had been so concentrated noon speedy produc-tion, mechanical accuracy and commercial organisation that beauty of design had been almost entirely neglected. This was so forcibly demonstrated at the International Exhibition of 1851 that efforts were at ouce made to bring art and industry together once more Schools art and industry together once more Schools of Art and Museums were founded throughout England and the same system was copied in a tentative and timid fashion in India. The function of these institutions was accurately estimated in England, where the artistic industries were already highly organised and were commercially successful, and whose produce to the found in every market of the control to satury the requirements of cussomers in any country It was never supposed for an instant that a School of Art could lead an industry In India their function was as completely mis-understood as were the causes of the depres-ation in Indian craftwork. The schools were not only expected to lead the industries which the mortional and resurrest those which were mortional, and resurrest those which were dead. In the report of the Indian Industrial Commission the need for some State-aided system of industrial and commercial organisation of the industrial arts with an expansion of the industrial arts with a special control of the industrial arts with a special control of the industrial arts with which it is applied, and the practical knowledge and the assessment optimized by occur of the different seateness equivalent to the control of the industrial and industrial arts with a special control of the industrial arts with a second of the different seateness equivalent to the industrial and Local Governments to the Indian craftsman that have been bestowed by their own Governments. were living, but to revive those which were toon that of the craffman, food markets have been extended to serve the whole world, and the skilled handlerstiman has, in a great measure, become a machine-minder it took about one funded years of product handlers and about one funded years of product handlers are considered to the same mandal satisfance and about one funded years of product handlers are strongly as the same mandal satisfance and during the greater portion of that period ladies protected by the difficulties of transport, continued the language of the same continued to the ladies of the same of the same continued to the same continued to the ladies of the same of the same continued to the same continued to the ladies of the same of the same continued to the same continued

# Archmology.

ed into (1) architectural and sculptural monu-ments and (2) inscriptions. No hullding or sculpture in India with any pretensions to be sculpture in india with any pretensions to be considered an example of architecture or art can be ascribed to a time carrier than that of Asoka (circa 250 BC) In the pre-Asoka ar-chitecture of India, as in that of Burms or China-st the present day, wood was solely or almost solely employed. Even at the close of the 4th at the present day, wood was solely of almost solely employed Even at the close of the 4th century, B C, Megasthenes, the Greek Ambas ador at the court of Chandragupta, grand-hiber of Asoka, describes Patalipotra, the capital of the Indian monarch, as "survousded by a wooden wall pierced with loop holes for the discharge of arrows" If the capital litedit was then defended, we can easily inter that the architecture of the period was wooden. And long long after stone was introduced the lithic etyles continued to be infinenced by, or copied from, the wooden

Monumental Piliars —The first class of works that we have to notice are the monumental piliars, known as date. The oldest are the monouscule columns of Asoka, nearly thirty in number, of which ten boar his inscriptions. Of these the Lauriya-Nandangarh column in the Champaran District, Tirbut, is practically unliqued The capital of each column, the tenth of the shart, was monolithic, and comprised three members, was insubolidate, and comprised three members, etc., a Perspolitan bell, abacus, and crowning soulpture in the round. By far the best capital of Asoka's time was that ex binned at Sarnath near Benares. The four lions standing back to back on the abacus are carred with extraordinary precision and ac cursoy of the post-Asokan period one pill is r (B 0 150) stands to the morth-east of Hes magar in the Gwalior State, another in front of the cave of Karil (A,D 70), and a third at Eran in Central Baryline has been seen as the carried to the cave of Karil (A,D 70), and a third at Eran in Central Baryline has been seen as the carried to the cave of Karil (A,D 70), and a third at Eran in Central Baryline has been seen as the carried to the ca in Central Provinces belonging to the 5th Century, A D All these are of stone, but there is one of iron also It is near the Quth Minar is one of iron and it is near the quite sainar at Delhi, and an inscription on it epeaks of its having been erected by a king called Chandra, (lebutified with Chandragupta II (A D 376 418) of the Gnpta dynasty It is wonderful "to find the Eindus at that age forging a bar of iron larger than any that have been forged even in Europe to a very late date, and not frequently even now " Piliare of later style requently even now "Future of later style are found all over the country, especially in the Madras Presidency No kes than twenty exist in the Sonth Kanara District A particularly segant example faces a Jaina temple at Mudahldri, not far from Masgalore

Topes, Steps, known as dagebes in Ceylon and commonly called Topes in North India, were constructed either for the safe custody were constructed either for the safe custody of relies hidden in a chamber often near the base or to mark the score of notable event in the leading of value is seen of notable even in the leading of value is seen of relies to the leading of the leading of the leading to the l

The archivological treasures of India are as ambulation, and the whole is enclosed by a may varied as they are numerous. Those of the sive stone rulling with being steen from the pre-Mahammadan period may roughly be divided cardinal points. The gates are essentially of into (1) architectural and sculptural monu wooden in character, and are carred, inside and cardinal points. The gates are essentially wooden in shareter, and are carred, inside and wooden in shareter, and are carred, inside and wooden in shareter, and are carred, inside and robust to the time of Aspea, but as Sit John Marshall's recent explorations have conclusively abown, the railing and the gates are conclusively abown, the railing and the gates ways were at least 160 and 200 years later, respectively Other kanons Buddhist stepses that Allahabad and Jubhulpors. Amiraval in the Madrae Presidency, and Piprahwa on the Napalese fronther The tope proper at Bharhat has entirely disappeared, having been utilised for building villages, and what runained of the robust of the property of th stupa at Piprahwa was opened by Mr W C. Peppe in 1898, and a steatite or scap-stone reliquary with an inscription on it was unearthed. The inscription, according to many scholars, speaks of the relies being of Buddha and en chrined by his kinsmen, the Bakyas And we have thus here one of the stypes that were erected over the ashes of Buddha immediately after his demise

Caves —Of the rock excavations which are one of the wonders of India, nine-tenths belong to Western India. The most important groups of caves are situated in Bhaja Bedsa, Karli, Kanbert, Junnar, and Nasik in the Bomber Presidency, Ellora and Ajanta in Nisam's Dominions, Barabar 16 miles north of Gaya, and Udayagiri and Khandagiri 20 miles from Outtack in Orissa. The caves belong to the three principal sects into which ancient India was di-vided, vis., the Baddhists, Hindus and Jainas. The earliest caves so tar discovered are those of The earliest caves so far discovered are those of Barahar which were excavated by Asoka and his grandson Dasaratha, and dedicated to Aji kitas, a naked sect tonded by Makkhall Gossia. This refutes the theory that cave architecture was of Boddisis Dasa. Pitalinate cave as the control of the control of Boddisis Dasa. Pitalinate cave to 9 at Ajanta and No 19 at Nasik. They have been assigned to 200 B C by Bergueson and Dr Burgess. But there is good reason to suppose from Sir John Marnhall's recent researches and from epigraphic considerations that they are considerably more modern. The Buddist sewes and without such as the suppose from the considerably more modern. The Buddist sewes and without so of monasteries for the residence of monks. The Burdist cover and with residence of the first are with vaniled roofs and and videres of monasteries for the residence of monis. The first are with vasited roofs and horse-thoe shaped windows over the entrance and have interiors consisting of a nave and side alicles with a small steps at the inner circular end. They are these remarkably similar to Christian basiless. The second class consist in a half surrounded by a number of cells. In the later others, there was a stanton in the centre of the house wall stated to the control of the contr

giri and Udayagiri, those of the medieval type, in Indra Sahha at Ellora, and those of the latest period, at Ankai in Nasik The ceilings of many of these caves were once adorned with fresco paintings. Perhaps, the best preserved among these are those at Ajanta, which were exe outed at verious periods between 350 650 A D and have elicited high praise as works of art Copies were first made by Major Gill, hut most of them perished by fire at the Crystal Palace in 1866 The lost ones were again copied by John Griffiths of the Arts School Bombay, half of whose work was similarly destroyed by a fire of whose work was similarly destroyed by a fire at South Kensington. They were last copied by Lady Herringham during 1909 il. Her pictures, which are in full sonle, are at present exhibited at the Indian Section of the Victoria and libert Musum, South Kensington, and have been reproduced in a volume brought out by the India Society

Gandhara Monuments —On the north-west frontier of India anciently known as Gandhara, are found a class of remains, ruined monasteries and nuried super, among which we notice for the first time representations of Juddha and the second superior of the first time representations of Juddha and see capitals, frees of unde Erotes bearing a long garland, winged Atlantes without number, and a host of individual motific learly establish the influence of Hellenistic art. The mound at Yeshawar, locally known as Shahi ji ke-Dhorf, are found a class of remains, ruined monasteries resnawar, tocaty known as blast he-Distri, which was explored in 1903, brought to light several interesting soulptures of this school togather with a reliquary casket, the most romarkable hrouse object of the Gandhara most remarkable nouse object of the casket left no doubt as to the mound being the stays raised ever the bones of Buddha by the Indo-Scythlan king Kaulshka They were presented by Lord Minots Government to the Buddhass of Burma and are now enshrined at Mandalay

Structural Temples.-Of this class we have ons of the earliest examples at Sanchi, and another at Tigowa in the Central Provinces In South India we have two more examples, sur, Lad Khan and Durga temples at Alhole in Bijapur All these belong to the early Gnpta period and cannot be later than 500 A.D. The

Dravidian to the horizontal. The salient feature of the former again is the cur-vilinear steeple, and of the latter, the pyramidal tower The most notable examples of the first kind are to be found among the temples of Dineanu are to be roung among the temples of the beneswar in Grissa, Rhajarah in Bundelkhand, Osia in Jodhjur, and Dilwara on Mount Aba, Gue of the best known groupe in the Dravidian style is that of the Mannalapuram Raths, of Saven Pagodas, un the seashore to the south of Madara They are each hewn out of a block of granite, and are rather models of temples than raths. They are the earliest examples of typical Dravidian architecture, and belong to the 7th century To the same age has to be assigned the temple of Kallasanath at Conjecveram, and to the following century some of the temples at Alhole and Pattadkal of the Bijapur District, Bombay Presidency, and the mono-lithic temple of Kailasa at Ellora, referred to above Of the later Dravidian style the great temple at Tanjore and the Stirangam temple of Trichinopoly are the best examples.

Intermediate between these two main styles comes the architecture of the Doccan, called Chainkyan hy Fergusson In this style the plan becomes polygonal and star shaped instead plan becomes polygonal and star shaped inetestal of quadrangular, and the high storyed epire is converted into a low pyramid in which combined with the perpendional of the Indo-Aryan Some size examples of this type crist at Dambal, Rathlahi, Thiwatil and langal is Dharwar, Bombay Freeidency, and at Itzag and Waraugal in Rizans Dombines Stit it is in Mysore among the temples at Hallebid, Beiur, and Somnathpur that the style is found in its full perfection

Inscriptions —We now some to inscriptions, of which numbers have been brought to light in India They have been engraved on varieties of materials, but principally on stona and copper The earliest of these are found inclosed he two distinct kinds of alphabet, known as Brahmi and Kharoshthi The Brahmi Was read from left to right, and from it have been evolved all the modern vernacular suripts of india. The Kharoshthi was written from right to left, and was a modified form of an ancient Aramalo alphabet introduced into the Punjab thian king Kasinika They were resembled of the Aramano alphabet introduced into the Punjab by Lord Afinton Government to the finediated into the State of the Perusai command of Burms and are now enshrised at Mandalay in the State of Burms and are now enshrised at Mandalay in the State of th Shahhangarhi 40 miles north-east of Peshawar to Nigilva in the Nepal Tarai, from Girnar in Kathlawar to Dhauli in Orissa, from Kaisi in the Lower Himalayas to Siddapur in Mysore, show-ing hy the way the vast extent of territory held hy him. The reference in his Rock Edicts to Lad Kham and Duran templer at Alhole in by him. The reference in his Book Ridiets to Bigapur All these belong to the easily dapta be seen contemporary direct Princes. Anthon period and cannot be later than 500 A.D. The conty common obstractions is after too without a gives of any kind. In other respects they are B.C. 259 as the date of his contractions and actively different and already here we mark the Romanded pillar inscription, again, discovery beginning of the two styles, Indo Aryan and ed in Kepal Tarai, now actives, beyond all doubts, Dravidias, whose differences become more and the birth-place of Budtha which was for long and some sponessaged from the fits century or words.

Marshall was the first to notice the inscription on it. It records the ercetion of this columns of the columns Valshnava Another inscription worth noticing and especially in this connection is that of Cave No 10 at Nasik The donor of this cave, Ushavadata, who calls himself a Saka and was thus an Indo Seythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmans and as having annually fed one hundred thou sand Brahmans Here is another instance of a foreigner having embraced Hinduism Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are forlorn and

Saracenic Architecture —This begins in India with the 18th century after the per manent occupation of the Muhammadane Their trai mosques were constructed of the materials of Hindu and Jalua temples, and some-times with comparatively slight alterations. The mosque called Adhai-din-ka jhompra at Ajmer mosque cancer Antervance permits a control and that near the Quth Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under the various dynasties, imperial and local. The the various dynasties, imperial and local. The scarly Fathan architecture of Debih was massive and at the same time was characterised by elaborate riohness of commenctation. The Quib-Minar and tombe of Altamsb and Ala-ud-din fallill are typical examples. Of the Sharqi style we have three mosques in Janupur with several tomb. At Mandul in the Dara State, a third form of Saracente architecture sprang up, and we have here the Jami Masjid, Hochangs tomb, Jahas Mahall and Hindola Mahall as the most notable instances of the secular and seci-siastical styles of the Malwa Pathane The scientiatical styles of the hailwar fathanic life Miniammadana if Bengal again devoloped their own style, and Pandua, staida, and Gast teem with the ruins of the hulldings of this type, the important of which are the Adina Masjid of Sikandar Shah, the Elakhi mosepre, Kadam Basul Masjid, and so forth The Bahmani dynasty of Gulbarga and Bidar were also great builders, and admined their capitals with important buildings. The most striking of these is the great mosque of Guibarga, which differs from all mosques in India in baying the whole central area covered over so that what in others would be an open court is here roofed by sixty-three small domes "Of the various forms which the Saracenic architecture assumed says Fergusson "that of Ahmedahad may probably be considered to be the most elegant." It is notable for its carved stone work and the It is notable for its carved stone work and the control over the exception of pricest are and work of the perforated stone windows in Bidd radie in satignities. Under the discretion of Bid Sayyid's mosque, the carved niches at the John Marshall, Ki., o. z. Director-Peneral of minars of many other mosques, the sculptured advershology, a comprehender and eystemiked. Microbe and dossed and papelled root is so campaign of repair has been pre-couled, and expension discretions at any period. No other property standard consistent of the control of

pur There is here relatively little trace of kinds forms or details. The principal buildings of Gagan Mahall, Mhara Maha, Insulin Rates and mosque and the Gol Gumbas. Like their predecessors, the Pathans of Delhi, the Mognula were a great building race Their style first began to evolve itself daring the reign of Athar in a combination of Hindu and Muhammadan is a combination of Hindu and Munammadas features. Noteworthy among the emperors buildings are the tomh of Rumayun, and the paiances at Fatchpur, Sikri and Agra Of Jehangir'e time his mosque at Lahore and the tomh of Itimad ud-danis are the most tryfeal structures. "The love and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail was during his reign that the most splendid of the Moghui tombe, the Taj Mahal at Agra, the tomb of his wife Mumtar Mahal, was con-structed The Moti Masjid in Agra Fort is another eurpassingly pure and elegant montment of his time

Archeological Department—As the archeological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archeological Department. The wo of this Department is primarily two-field, on vervation, and research and exploration. Required hut spannode efforts appear to have been made by Government in these directions till 1870 when they established the Archaelantal 1870 when by Government in these directions till 1870 whese they established the Archaelogical Survey of india and entrasted it to General (afterwards SI)? Alexander Cunningham, who was also the Brst Director-General of Archeology The Entrast advance was the initiation of the local Surveys in Bombay and Madras three years after. The work of these Surveys however, was restricted to manufaquation research and described the surveys of the Surveys of the Surveys of the Surveys of the Surveys however, was restricted to manufaquation research and described with the Surveys of the Surve old hulldings was left to the fitful efforts of the old nulldings was left to the first energy of the closed Governments, ofton without expert guid ance or control it was only in 1878 that the Gavernment of India under Lord Lytton awaks to this deplorable condition, and santologed a sum of 3f lakes to the repair of monuments in United Provinces, and soon aft r appointed a conservator Major Cole, who did useful work for three years Then a reaction set in and his post and that of the Director-General were abolished The first systematic step towards recognising nfficial responsibility in conservation matters was taken by Lord Curzon a Government, who established the seven Archeological Circles that n w nitain, placed them on a permanent footing nd united them together under the care troinf Director-General, provision being also made to subsidising local tovernments out of imperial funds, when necessary The Ancient imperial audia, when necessary for Andeas Jinnaments Preservation Act was passed for the princetion of historic monaments and relies especially in private possession and also for State control over the excavation of succent alter and

For many years Indian time was in a state of ductic confusion. What was called Madras or Eallway time was kept on all the railways and cach great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the divergment of India took the matter up in 1904, and addressed to the Local Governments, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter are indicated below

"In India we have slready a etandard time, which is very generally, though by no means universally, recognised It is the Madras local time, which is kept on all railway and telegraph lines throughout India and which is 5h 21m 10s in advance of Greenwich Similarly, Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h 24m 47e shead of Greenwich But neither of these standards bears a cimple and easily remembered

relation to Greenwich time

"The Government of India have several times been addressed by Scientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack The Committee of that Society which advises the Government of India upon matters connected with its observatories writes — The Committee think that a change from Madras time to that corresponding to a longitude exactly 5; bours east of Greenwich would be an improve hours east of Greenwich would he an improve ment upon the oxisting arrangements but that for intornational scientific purposes the hours zone system, making the time 5 hours in advance of Greenwich in the weet, and 6 hours in advance is the cast of India, would be preferable in the cast of India, would be preferable of the March of India were connected with Europe by a continuous senies of civiline inactions what

seir continuous railway systems all of which had adopted the European hour zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as site is not, and as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated ocionies and to adopt

the first auggestion
"It is believed that this will be the better solution There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and to as to bisect all the main lines of communi cation, and keeping times differing by an hour on opposite sides of that line India has be-come accustomed to a uniform standard in the Madras time of the rallways and the substitu tion for it of a donble standard would appear to be a retrograde step, while it would, in all to be a retrograde step, while it would, in all robability be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians slike, and it is cortain that the double standard would passie the latter greatly, while by emphasizing the part that railway differed from local time, the slight phanescent or oven altogether prevents the latter groups of the latter by poople generally over a large part of Ledis, The one great dynamage which his second

possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour whereas under the latter it will even exceed an nour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the

than that of keeping two different times on the Indian system of rallways and telegraphs. It is proposed, therefore to put on all the raisway and telegraph clocks in India by Sun. 50s. They would then represent a time 5 four state than that of Greenwich, which would be known as Indian Standard Time would be known as Indian Standard Time. time at the places mentioned below would be approximately as follows, the figures represent-ing minutes, and T and S meaning that the standard time is in advance of or behind local time respectively—Dibrugarh 51 S, Shillong 38 S, Calcutta 24 S, Allahabad 2 F, Madras 9 F, Lahore 38 F Bombay 39 F., Peshawar 44 F, Karachi 62 F, Quetta 62 F

This etandard time would be as much as 14 and 55 minutes behind local time at Mandalay and Rangoon respectively, and since the raliway such thangoon respectively, and enter the manyay eystem of hurma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted that mount extends the me anone of anopted in Burma. It is prepared, however, that in stead of using Ranger of the time as at present, which is 6th he's coular advance of Greenwich, a Burma's the of the should be adopted on all the B at I (givall it ye's and telegraphs which would be one boar in advance graphs which would be one nour in agrance of indian Standard Time, or 6; hours ahead of Greenwich time and would correspond with 97° 30 E longitude. The charge would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic com-munication with other countries

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire Its general adoption for all purposes, while eminently advisable, is a matter which

must be left to the local community in each case."

It is difficult to recall, without a sense of bewiderment, the reception of this proposal by various local bodies. To read now the fears that were entertained if Standard Time was adopted is a study in the possibilities of human adopted is a study in the possibilities of human error. The Government scheme left local error the Government scheme left local error the graph of the Government of the Gover Chamber of Commerce uscause in asyon of and so did the Municipality Bubsequently the opposing element in the Municipality brought in a side resolution by which the Municipal clocks in a side resolution, by which the Mundipal clocks were put at Bombay time which is thirty-nine minutes behind Standard Time. On the lat January 100s all the railway and telegraph clocks in India were put at Indian Standard Time, in Burma the Burma Standard Time became universal. Caloutta retains its former caloutta time, but in Bombay local time is retained only in the clocks which are maintained by the Mundipality and in the establishments by the Mundipality and in the establishments and the construction.

# Coinage, Weights and Measures.

into sizeling. Down to about 1873 the gold value of the rupes (containing 155 grains of pure silver) was approximately equal to a serious and the say to convert rupes into sterling by striking off the final cipher (Rg. 1,000—£100) Sut siter 1879, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the there came a serious and progressive into the exchange, until at one time the gold value of the rupee dropped as low as is. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and un-foreseen finctuations in exchange, it was re-solved in 1898 to close the mints to the free coinage of silver, and thus force up the vaine of the rupee by restricting the circulation The intention was to raise the exchange value of the rupee to 1s 4d, and then introduce a gold standard at the rate of Rs 15=£1 From 1899 onwards the value of the rupee has been 189% onwards the value of the ropeo flas design maintained, with insignificant finctuations, at the proposed rate of is 4d, and consequently since that date three rupes before 1878. For the intermediate period, between 1878 and 1899, it is in manifestly impossible to acopt any End sterling value for a constantly changing rupes. But since 1899, if it is desired to convert rupees mto steriot, not only must the final deber be struck off (as before 1873), but also one-third must be subtracted from the result. Thus Rs. 1,000=£100—£=(about) £67

Notation.—Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India. differs from that which provals throughout Europe Large numbers are not punctuated in hundreds of thousands and millions, but in iakhs and crores. A lash is one hundred thousand written out as 1,00,000, and a crore is one hundred takhs or ten millions (written is one hundred lakhs or ten millions (written our as 1,0,0,0,000) Consequently, according to the exchange value of the rupee, a lakh of rupees (2a. 1,00,000) may be read as the equivalent of £10,000 before 1878, and as the equivalent of (about) 25,600 after 1899, while a control of rupees (2a. 1,000,000 after 1899, while a control of rupees (2a. 1,000,000 1,000,000 before 1878 and a s. the activitient of (about) \$868.687 1878, and as the equivalent of (about) £666,667

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both indians and Europeans. The anna was formerly reckoned as 14d, if may now be considered as exactly corresponding to 1d The anna is again sub-divided into 12 piez.

As the correscy of India is based upon that Bombay, may be thus expressed one manudar upon, statements with regard to morey are 40 neers, one seer-18 chittaks or 80 tolas generally expressed in ropes, nor has it been The actual weight of a seer varies greatly from found possible in all cases to add a convertion district to district, and even from writage to into sterling. Down to shout 1873 the gold village, but in this standard system the tola is 180 grains Troy (the exact weight of the rupee), and the seer thus weight 2 067 lb., and the maund 82 28 lb The standard is used in official reports.

Retail.—For calculating retail prices, the universal custom in India is to express them in terms of seers to the rupes. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money by the observation of the same amount of manify prices, not money prices When the figure of quantity goes np, this of conres means that the price has gone down, which is at first sight porplexing to an English reader it may, however, be mentioned that quantity prices are not altogether unknown in England, espeare not altogether unknown in Engiann, espe-cially at small shope where pennyworths of many groceries can be bonght. Eggs, likewise, are commonly sold at a varying number for the abilling If it be desired to convert quantities prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based mpon the assumption that a seer is exactly 2 lb, and that the value of the rupee remains constant at 1s 4d., 1 seer per rupee=(about) 8 in for 2s, 2 seers per rupee=(about) 6 lb for 2s., and so on

The name of the unit for square measurement in India generally is the bight, which varies greatly in different parts of the country But areas have been expressed in this work either in square miles or in acres

Proposed reforms.—Indian weights and measure have never been settled upon an organised basis cuitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and rail ways opened up trade between one and the other It is pointed ont that in England a hogshead of wine contains 63 gailons and a hogshead of beer only 54 gallons, that a hushel hogshead of beer only 54 gailous, 'that a bushel of oorn weights 40 lbs in Sunderland and 240 lbs in Cornwall, that the English stone weights represents 14 lbs in popular estimation, but only 5 lbs, if we are weighing glass, and eight for meast, but 6 lbs for cheese Similar linstances are multiplied in India by at least as many times as findle is higger than England and the companion of the com formerly reckoned as I4d., it may now be to region to the considered as exactly corresponding to 14 The anna is again sub-divided into 13 pies.

Weights.—The vacious systems of weights the mannot of sugar weight 48; seem in Cavin tool in Islain combine uniformity of scale port, of 10 in Metras. 72; in Gorashpar, 40 in with immenses varietions in the weight of units. The scale med generally throughout Northerto in Barelfy, 46 at Fyanbac, 43; in Saharapput, India, and less ecumonly in Madras and jahanpur, 51 in Goahsogungs, The mannot

varies throughout all ladia from the Bengal when the following committee was appointed or radius; manned of 48-5/7 its, to the Factory to inquire into the entire subject anow :--massed of 74 lbs 10 os. 11 drs., the Bombay massed of 28 lbs., which apparently asswers to the Forest Department manuful nues at the Feel Depot, and the Madras manuf, which access authorities extinate at 26 lbs and nthers at \$4 lbs. and so on

Committees of Inquiry -These are merely committees of laquiry—These are merely typical instances which are multiplied indea sitely. There are variations of every detail of weights and measores in every part of india. The losses to trade arising from the confusion and the trouble which this state of things. causes are heavy Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of retorm. The Supreme and Provincial Gov. ernments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agreed about the question for the past century The lodian reliways and Government departments adopted a standard tola (180 grains) seer (80 tolas) and maund (40 seers) and it was boped that this would act as a successful lead 'which would gradually be followed by trade through ont the empire, but the expectation has not been realired

The Government of India considered the whole question in consultation with the pro-vincial Governments in 1890 1894 and various appeals areps have at different times been taken in different parts of india. The Gov ernment of Bombay appointed a committee 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published but they presented in 1912 an ad internal report which has been issued for public discussion. In brief it point ont the practical Inipossibility of proceeding by compulsory measures affecting the whole of lodia the Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be bearily welcome by the people. They thought that legislation computsorily applied over large areas subject to many diverse condi-tions of trade and social life would not result in bringing about the desired reform so sucress fully as a 'lead' supplied by local legislation based on practical experience The want The want of coherence serour juits, or the means of co operation among the people at large pointed to this conclusion. The Committee pointed to this conclusion are proppe at large possible to the conclusion are committee pointed will follow a good lead it apparent in the East Khandesh District of the Presidency, where the District Officer, Mr Simcox, gradually, during the ocurse of three years, induced the people to adopt throughout the district unit of the conclusion of the control of t form weights and measures the unit of weight in this case being a tola of 180 grains. But the commisties abstained from recommending that the same weights and measures should be adopted near the whole Presidency, present the same of the same way that is not a reasonable to an example of the same and the

Hr C. A. Silberrard (*President*). Hr A. Y G Campbell, Mr Bustomji Fardoonji

This Committee reported, in August, 1915, in favour of a uniform system of welshits to be adopted in India based on the 180 grain tola, The report says —Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Railway weights. The introduction of this system in volves a more or less comsiderable change of system in parts of the United Pro-vinces (Goralchyur Barrilly and neighbouring areas) practically the whole of Madras, parts of the Punjab (rura) portions of Amritear and neighborring districts) of Bombay (South Bombay Bombay eity and Gujarat), and the North West Frontier Province Burma has at present a separate system of its own which the committee think it should be permitted to retain The systems recommended are -

The tola is the tola of 180 grains, equal to the rupee weight. The vise has recently been fixed at 4 60 (ba or 140 tofas

Government Action .- The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January 1922 In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces Similarly, they announced their decision not to adopt all-indla standards of length or area

As regards weight they decided in favour of the standard men'loned under the heading 'Weights', near the commencement of this article this having been recommended by a majority of the Weights and Measures Committee and having received the unanimons support of the Local Governments At the same time they provi lonally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights, the Committee of 1915.—The whole problem of the problem of the space of th

# The History of India in Outline.

"Fo history of ladin can be proportionate, Abosines (Roussis). The Macedonian carried and the briefast summary must saffly from the anne defect. Even a wholesale acceptance as in Rydagos, and crossing the Chanab and history of mythology, tradition, and folkiers and history of mythology, tradition, and folkiers will not nake good, though it makes players to be a state of the control of the cont There are, for example, to this day castes that believe they sprang originally from the loins of a being who landed from an impossible boat a ceing who landed from an impression coat on the shores of a highly improbable sea, and the great epic poems contain plentiful catatements equally difficult of reconciliation with modern notions of bistory as a scleoce. But from the Jataka stories and the Puranas, much valuable information is to be obtained, and, for the benefit of those unable to go to these and other original sources, it has been distilled by a number of writers.

The orthodox Hindn begins the political history of Indla more than 3,000 years before Ohrlet, with the war waged on the banks of the Imman between the sons of Kuru and the sons of Pandu, but the modern critic prefers to omit several of those remote centuries and to take 600 B C or thereabouts, as his start-ing point At that time much of the country ing point At that time much of the country was covered with forest, but the Aryan races, who had entered india from the north, had established in parts a form of civilization far superior to that of the aboriginal savages, and to this day there survive cities, like fonares found to be those involves in the manner to the country of the country of the country of the whole over an about the southern part of the Peninsuls, crushed the shortgines, and at a nucle later period, were themselves and at a much later period, were themselves subdued by the Aryana. Of these two civilia ing forces, the Aryan is the better known and of the Aryan kingdoms the first of which there is authentic record is that of Magadha, or Bihar, is authersize record is that of Magadha, or Bihar, on the Ganges. It was in, or near, this powerful kingdom that Jainism and Buddhism had their origin, and the fith King of Magadha, their origin, and the fith King of Magadha, of Gautama Buddha The King mentioned was a contemporary of Darius, anteorat of Feedlas (52) to 485 B C) who amexed the ladar saliey and formed from his conquest an Indian satrapy which paid as tribute that the same of the sa

forced to turn back and retire to the Jhehms where a face to sail down the rivers to the sea was nearly ready. The wonderful story of Alexander's march through Mekran and Persta to Babylon, and of the voyage of Nearchus on the Fersian Gulf is the Climat to the narrative of India. Alexander had slayed minsteen on India. Alexander had slayed minsteen to carry on the Government of the kingdoms he had conquered but his death at Babylon, in \$25, destroyed the fruits of what has to be restricted as nothing a measurement of the kingdoms of the control of the con by war but not belienized.

The leader of the revolt against Alexander's geograls was a young Hindu, Chandragupta, who was an llegitimate member of the Royal Family of Magadha He dethroned the Royal Family of Magadha He dethroned the ruler of that kingdom, and hecame so powerful 600,000 troops in the field against Belseury, to whom Rabylon had passed on the death of Alexander This was too formidable an opposition to be faced, and a treaty of peace was concluded between the Syrian and Indian monarchs which left the insteer so during the monarchs which left the insteer so during the monarchs which left the insteer so during the capital at Fataliputra, the modern Paton and Bankipere Of Chandragupta soourt and administration a very full account is preserved in the fragments that remain of the history compiled by Magasthones, the ambassadur sout to India by Sciences His memorable could be a supposed to the second of the reign in numerous inscriptions. This king, in an unusually bloody war, added to his dominions the history down of Kalings (the force on Holdian, resolved for the future to abstain from conquest by force of arms. The consequences of the conversion of Asoka were amaxing. He was not deavour to force his creed on his "edition" of the doubtre which her was bud on the doubter with the result that "Buddhism, which had bitherto been a mertyl local seet he was local the valley of the Gangles, was transformed into The leader of the revolt against Alexander's was a contemporary of Darius, antocare of Feeta (52 to 485 B C) who annexed the indus valley and formed from his conquest as Indian strap which paid as tribute the later of the great strap which paid as tribute the paid as tribute the paid of the Ganges, was transformed into the of the greatest religions of the world—the called history, however, loss and country and the previous years and had captured atomos, or the other of the Capture which had hitherto been a merely local sept in

there is a splendia memorial in the twenty and forts of the Bajpin states and in the two great philosophical systems of Sankaracharya (ninth century) and Ramanuja (twelft) century). The triumph of Hindulam had been sohleved, it must be added, at the expense of Buddham, which survived only in Magadha at the title of the Memorian conservations of the Memorian conservations. the time of the Mahomedan conquest and speedily disappeared there before the new faith

## Mahomedan India,

The wave of Mahomedan invadors that the wave of manufacture in watch? that eventually swept over the country first touched India, in Sind, less than a bundred years after, the death of the Propet in 682. But the first real contact was in the tenth century when a Turkish skave of a Persian ruler found. ed a kingdom at Chazul, between Kabul and Kandahar A descendant of his, Mahmnd (967-1030) made repeated raids into the beart (667-1030) made repeated raids into the beart of India, experture piaces so far apart as Mnitan, Kananj, Gwalior, and Sommath in Kathawar, bot permanently occopying only a part of the Pulsab Enduring Mahomedan rule was not established until the end of the twelfith century, by which time, from the little century, by which time, from the lower of the twelfith century, by which time, from the latent of the twelfith century, by which time, from the latent properties of the latent properties of the lay of Eengal, principles of the lay of Eengal, principles of the layer of the arms of this problem and Ajmer, made a brave stand against, and once debated, one of the arms of this price, both defeated, one of the armies of this ruler, bot was himself defeated in the following year Mahoused Ghori was murdered at Labore (1206) and his yest kingdom, which had been (1200) and his vest kingdom, which had been governed by satraps, was split op hin what were practically independent sovereignties. Of these satraps, Quito had-dio, the slave ruler of Delhi and Labore, was the most famous, and is remembered by the great mosque be built near the modern Delhi. Between his rule and that of the Mughals, which began in 1856, only a few of the many Kings who governed and fought and built beautiful buildering and fought and built beautiful buildering the state of the s

It was one of his successors who crushed the Vijayanagar dynasty, and built the great mosque for which Bijapur is famous.

### The Mnghal Empire

As one draws near to modern times it becomes impossible to present anything like a coherent and consecutive account of the growth of India as a whole. Detached threads in the of minds as a wrote. Detached threats in the story have to be picked in one by one and fol-lowed to their ending, and although the attreemth century saw the first European settlements in India, it will be convenient bore to continue the partative of Mahomedan India almost to the end of the Mughal Empire How Bahar the end of the Mughal Empley. How Babar gained Delhi has airsady been told. His son, Humsyun, greatly extended bis kingdom, but was eventually defeated (1640) and driven into exile by Bber Khan, an Aighan of great capabilities, whose short reign oneded in 1645. The Bur dynasty thus founded by Bber Khan lasted another ten years when Rinmayun having extense crough to what back part of his old kingdom. When Humsyun ided (1550) his eldost son, Akbar, was only 18 years old and was controlled by Many Ivials. Nor was Akhar well son, Akpar, was only 18 years old and was com-ronted by many rivals. Nor was Akbar well served, but his career of conquest was almost uninterrupted and by 1304 the whole of India North of the Nerbodda had bowed to bla-surhority, and he subsequently entered the Deccan and captured almedangar rival great ruler, who was a remarkable for the great ruler, who was the remarkable for the condition of the remarkable of the con-traction of the contraction of the contraction of the con-traction of the contraction of the contraction of the con-traction of the contraction of the contraction of the con-traction of the contraction of the contraction of the con-traction of the contraction of the contraction of the con-traction of the contraction of the contraction of the con-traction of the contraction o built near the modern belih. Betwein his its been surpassed by few His son, Johangur, rule and that of the Mughaia, which began in his married the Persian lad Nur Jahan, 1558, only a few of the many Kings who governed and fought and built beautiful build-posterity some notable buildings, stand out with distriction. One of these was also odd in 1226-1219, whose many expressions of the palese at which was been such much weakened the list son the palese and furtress of Laboration to the substitution was been surpassed administrator. Another was Victor and the palese and furtress of Laboratics of the son and the palese and furtress of Laboratics was an many respects admirable, but which ended, on his abdication, in confusion in the reign of his successor, Mahmud (1898-1818), the kingdom of belli went to pieces and ladd, was the surpassed of the son led to the deposition of 1413, the kingdom of belli went to pieces and ladd, was not set to the deposition of 1413, the kingdom of belli went to pieces and ladd, was not led to the deposition of 1413, the kingdom to recover His son, Drashin, still truther extended the kingdom that had been reversated, but was debasted by Baleac, King of Kabul, at Panhat, near Delhi, in 1568, and there was then extended the kingdom that had been reversated, but was debasted by Baleac, King of Kabul, at Panhat, near Delhi, in 1568, and there was then established in ladding many consistent makes and the court of the ware being a twenty-live and ladding the substitute of the court of the ware being a twenty-live and the substitute of the substitute o has been surpassed by few His son, Johangir, who married the Persian lady Nur Jahan,

seemed and the Marshas began to make the memora and the Marshas began to make the most of the opportunity offered to them by support rulers at Delhi and by almost uni-versal discord throughout what had been the Rughal Empire There is little to add to the history of Mahomedan India Emperora continued to reign in name at Delhi up to the middle of the 19th century, but their territory and power had long since disappeared, heing awallowed up either by the Marathas or by the British

## European Settlements

The voyage of Vasco da Gama to India in 1498 was what turned the thoughte of the Portuguese to the formation of a great Empire in the East That idea was soon realized, for, in the Kast That ices was soon resured, ror, from 1500 onwards constant expeditions were sent to India and the first two Viceroys in India—Almeida and Albuperque—said the foundations of a great Empire and of a great trade monpoly Goo, taken in 1510, became the capital of Portuguese India and remains to this day in the bands of its captors, and the to this day in the manus of Hz captors, and use counties rules of churches and forts on the shores of Western India, as also farther East at Malacca, testify to the seal with which the Portuguese endeavoured to propagate thir religion and to the care they took to defend their artifoments. There was greated the theory of the counties of the counties of the counties and the counties of the countie and great missionsries among them—Albuquerque, da Cunha, da Castro in the former class, St. Francis Mayler in the latter But the glory of Empire loses something of its instre when it has to be paid for, and the constant drain of men and money from Portnai, scan drain of men and money from rownia; necessitated by the attacks made on their possessions in India and Maisaya was found aimost intolerable. The junction of Portugal with Spain, which lasted from 1880 to 1610, also tended to the downfall of the Eastern Ed. pire and when Portngal became independent again, it was nnequal to the task of competing in the Hast with the Dutch and English. The Dutch had little difficulty in westing the greater part of their territory from the Portn guese, but the seventeenth century naval wars with England coved them to relax their hold npon the coast of India, and during the French wars between 1795 and 1811 England took all wars between 1752 and 151 England 1500s at Holland's Eastern possessions, and the Drich have left in India but few traces of their civi Mastion and of the once powerful East India Company of the Netherlands.

The first English attempts to reach India date from 1496 when Cabot tried to find the Emperor Charles VI to scoure a share of the Eroth-West passage, and these attempts were repeated all through the sixteenth contury. The first Englishman to land in India is and is and to have been one Thomas Stephene (1879) who has followed by a number of merchant adventurers, but trade between the two countries really dates from 1600 whom Elizabeth innor large the control of the 17th century, much more party, but trade between the two countries was soldived, as will be seen from the follow-really dates from 1600 whom Elizabeth innor large the control of the 17th century; much more large to the control of the 17th century. The Prench Wars.

The Prench Wars.

When was been deed only after Peringuese and Datesh pagnetizes had been overcome, notably in the date from 1496 when Cabot tried to find the

Empire, for which his three sons were fighting, see fight off Swally (Esvall) in 1813. The sealed son be held together. Internal discreter first factory, at Suns, was for measure years and the sound of the sealest seed of the sealest sealest seed of the sealest sealest seed of the sealest une dower of Catherine of Braganza stands our as a land mark, it also likestrates the weakness of the Portuguese at that date, cince in return the King of England undertook to protect the Portuguese in India against their too-the Marianians and the Dutch Commended from the Portuguese an acknowledgment of England's right to trade in the East. and the dower of Catherine of Bragansa stands out from the Portuguese an acknowledgment of Englands right to trade in the East, and Englands right to trade in the East, and Portuguese, as the Stall and by the general disorder prevalent in India Accordingly, is 1686, the Company turned its attention to acquiring territorial power, and annonoeed its intention to establish such a policy of civil and military power, and create and secure and military power, as may be the foun-dation of a large, well grounded, are Englah dominion in India for all time to come Kot much came of this announcement for some much came of this announcement for some time, and no stand could be made in Bengal against the deprodatons of Anrangesh The Coundations of Calentia (1980) could not be laid by Jah Charnock nutil stire a humiliant passe had been concluded with that had been concluded with that the Company found itself in England, though the Company found itself in England, thou was little chance of any immediate change for the better The union of the old East India the better The union of the old East India Company with the new one which had been formed in rivalry to it took place in 1703, and for some years peaceful development followed; lottened in franty controls, passed to ALO, some to some years peaceful development of the same pea sneet Empire-builders the world has known

states Empire-outloses the world has known Attempts to compete with the English were made at course. But the schemes of the made at course is started to the scheme of the Indian traditions to scourse a starte of the Indian traditions to scourse a starte of the Indian traditions to the Scotland, Deannach, Sweden, and Russia By the French, who tounded Fondishary and Chandernagore to wards the end of the 17th centary, most more wards the end of the 17th centary, most more wards the started of the Indian traditions are subjected, as will be seen from the following coulins at the development of Erichel rule

under La Bourdonnals (1746) Dupleix wished to hand it over to the Nawah of Aroot—a deputy of the Nizams who ruled in the Carnetic The French, however, kept Madras, repelling an attack by the disappointed Nawab as well as the British attempt to the Sapture it. The treaty of Air La Chapelle restrict Madras to the Sagisha. The fighting had shown the indian powers the value of European troops, and this was again shown in the next French and this was again shown in the next French war (1750-54) whon City achieved endering fame by his capture and subsequent defence of Arcot. This war arose from Dupleix supporting candidates for the disputed successions at Arcot and Hyderabad while the English at Madras put forward their own nomes. One of Dupleix softners, the Marquis nees One of Dupleix softners, the Marquis noes One of Dupleir's officers, the Marquist de Bussy, permaded the Nixam to take into his pay the army which had established his power, and in return the Northern Circars, petween Orless and Madras, was granted to the French This bettriet, however, was captered to the Control of the Contro Pondicherry passed more than once from the one nation to the other before sottling down to its present existence as a French colony in

111

### Battle of Plassey

ministure

While the Buglish were fighting the third French war in the South they became involved in grave difficulties in Bengal, where Straj-ud in grave difficulties in Bongal, where Surs)-ud Daula had acceded to power The head quarters of the English at Calcutta were threatened by that ruler who demanded they should surrender a refugee and should coase building fortifications. They refused and should surrender a refugee and should coase building fortifications. They refused an Bonne of the Bongiah took to their ships and made off down the river, the rest surrendered and were cast into the jall known as the Black Hole." From this small and stifling room 28 persons, out of 146, came nut alive the next day Cilive who was at Madras, the heat of the stifling of the stifling of the stifling room 28 persons, out of 146, came nut alive the next day Cilive who was at Madras, was the stifling of the stifli the next day Cilve who was at Madras, had set up proved a failure and Warren Hasding immediately sailed for Galeutta with Admirsi was appointed Governor, in 1772, to carry out Watson's squadron, recaptured the town the relorms settled by the Gouri of Directors (1767), and, as war with the French had been mind were to give them the entire care processing, proceeded to take Chanderns—and administration of the revenues. Thus the side of the French, and Cilve, putting translation of the revenues. Thus the side of the French, and Cilve, putting translation of India, and, in applies of the herocovard sitr fatar as candidate for the Nawah's thous attitude of Philip francis, with whom he through manched out with an army consisting logist and all and of other members of his Common of 200 Barcopeans. L000 sepoys and 8 pisces of the Company of the Common of the Company of the Common of the Company of the Common of the Company, the common of the Company of the Common of the Company of

assence the Council at Calcutta deposed Mir Jafar and, for a price, put Mir Kasim in his place. This ruler moved his capital to Monghyr, nganized en army, and began te intrigue with the Nawab Wazir of Outh. He soon found, in a dispute over customs dues, an opportunity of quarrelling with the English and the first shots fired by his followers were and the first shots fired by his followers were the signal for a general rising in Bengal. About 200 Englishmen and a number of sepoys were messacred, but his trained regiments were defeated at Gheria and Oodeynullah, and were defeated at Gheria and Oodsynullab, and Mr Kasim sought protection from the Nawab of Ondh. But in 1764, after quelling a sepon muthay in his own camp by hlowing 24 ring-leaders from the guns, Major (Sir Rector) Manro defeated the Joint forces of Shah Alam, the Mughai Emperor, and the Mawab of Oudh in the battle of Buxar in 1765 Clive (now Baron Cilve of Passey) returned as Governor "Two landmarks stand out in his policy Fire, or the control of the control of the policy of the policy of the control of the policy of the policy of the control of the policy of "Two landmarks stand out in his policy I me, be sought the adoltance, although not the sought the sought policy of the sought the sought policy of the sough carried ont by his immediate successors. But our efforts towards a sound administration date from this second Governorship of Cilive, as our millicary supremacy dates from his victory at Plassey Before Cilive left india, in 1767, he had readjusted the divisions of Northorn India and had set up a system of Government in Bengal by which the English Government in Bengal by which the English received the revenues and maintained the army while the ervinues and maintained the army while the criminal jurisdiction was vested in the Nawah The performance of his second test, the putilscalin of the Company's Service, was holdy opposed but carried out. He died in 1774 by his own band, the House of Common having in the previous rear coasured him, though selmitting that he did reader "great and services to his country."

### Warren Hastings.

The dual system of government that Clive had set up proved a fallure and Warren Hastings

be was the first Governor-General, nominated large tracks of teartiory in lieu of payments under as Ac of Pathkaneat passed in the foresten as abdition for Bettish traces, he there are the support of the payments as a substitute of the substitute committed to the two Maratha wars (1775-82) owing to the ambition of the Bombay Government to place its own uominee oo the throne of the Penhwa at Poons, and the Bengal troops that he seot over made ameda, by the cou-quest of Gujrat sod the capture of Gwalior, for the diagrace of Wadgaon where the Marathas the diagrace of Wadgaon where the Marathas overpowered a Bombay army In the South— where interference from Madras had already led (1769) to what is known as the first Mysore war, a disastrous campaign against Hyder All and the Nizam—he found the Madras Governand the Nham—he found the guards govern-ment again in conflict with those two poten-tates. The Nizam he won over by diplomacy, but against Hyder All he had to despatch a Bengal army under Sir Eyre Coote. Hyder All died in 1782 and two years later a treaty was made with his son Fipu It was in these acts of intervention in distant provinces that acts of intervention in distant provinces that Hastings showed to best advantage as a great and courageous man, cautions, but swift in action when required. He was euccoeded, after an interregant, by Lord Cornwalls, and administration laid by Hastinga, by ententialing original jurisdiction to Europeans and exhibitantia an Appellate Court of Criminal Judicature at Calcutta. In the civil Service be esparaded the functions of the District Collector and Judge and originated the "writers, and activities of the District Collector and Judge and originated the "writers, unfastistative Civil Service. This system was subsequently extanded to Madras and Bombay Lord Cornwallis is better known for his intro subsequently extended to Madras and Bombay Lord Cornwallis is better known for his introduction, on orders from England, of the Fernancian Settlement in Bengal, (See articles and the Section of the Sec

a betrayal of Maratha independence In that the most accessful of British campaigns in India, Sir Arthur Wellesley (the Duke of Wellington) and General (Lord) Lake carries all before them, the coe by his victories of Assays and Argaum and the other at Aligad, and Lawsai. Later operations, such as Codewick of Contract of the Contract of the Codewick of territory made under Lord Wellesley proved on expensive that the Court of Directors, becoming impatient, sent out Lord Cornwallis as second time to make peace at any price He, bowever, ciled soon after his arrival in India, uncut (1806-7) until the arrival of a stronger ruler, Lord Minto He managed to keep the peace in India for air years, and to add to Brit ruler, Lord Minto He managed to keep the peace in India for all years, and to add to Bri-tish dominions by the conquest of Java and the control of the conquest of Java and another new departite, insame he has possible relations with the Punjab, Persia, and Agin-nistan, and concluded a treaty with Hanjit Singh, at Lahore, which made that Sikh ruler the loval ally of the British for life.

The successor of Lord Minto was Lord Motra who found himself obliged almost at one to declare war on the Gurkhas of Nepal, who had been encroaching on British territory After initial reverses, the English, under General Cohterlony, were successful and the Treaty of Sagauli (1816) was drawn up which defines British relations with Nepal to the present day For this success Lord Motra was made Marqua of Hastings. In the same year he made preparations for the last Maratha war (1817-18) which was made necessary by the lawwest con-The successor of Lord Minto was Lord Moira which was made necessary by the lawies conduct of the Pindaris, gangs of Pathan or Rohilla duct of the runaries, gauge of extens or require origin, whose chief patrons were the rulers of Native States The large number of 120,000 that be collected for this purpose destroyed the Pin-daria, annexed the dominions of the rebellious In 1796, was collowed by Lord Wellesley, the friend of Pitt, whose projects were to change the map of India.

sion was undertakes owing to the inscient de-mands and raids of the Burmess, and remited in the Burmess coding Assam, Arsens, and the locast of Maria ban and their claims to the lower provinces. The capture of Rharstpur by Lord Combermers (1820) wheel our the repulse which General Lake had received there twenty years earlier A disputed succession on this occasion led to the Bettien intervention.

### Social Reform.

7 A former Governor of Madras, Lord William Bontinck, was the next Governor-General His epitaph by Macatuly, asya "He abo-lished oruel rites, he effaced humiliating distinctions, he gave liberty to the expression of public opinion, his constant study was to elevate the intollectual and moral character of the nations committed to his charge "

Some of his financial reforms, forced on him from England, and his widening of the gates by which educated Indians could enter the service of the Company, were most unpopular at the time, but were colleged by the acts he took for the abolition of Sair, or widow burntook for the southed of var, or whow burning, and the suppression—with the help of Captain Bleeman—of the professional here disary seasesing known as Thay; In 1832 he annexed Cachar, and, two years later, Corg. The incompetence of the ruler of Mysore forced bin, to take that State also under British as ministration—where it remained until 1881 His rule was marked in other ways by the des patch of the first steemahip that made the pas support of the first steemahip that made the pas support of the long educational controversy in favour of the advocates of instruction in English and the verusculars Lord William Bentinck and the vernaculars Lord William Bentinck left India (1843) with his programme of reforms unflushed The new Charter Art of 1833 had brought to a close the commercial business of croupt to a close the commercial business of the Company and emphasized their position as rulers of an Indian Empire in trust for the Urown By it the whole administration, as well as the legislation of the country, was placed in the bands of the Governor-General in in the bands of the Governor-occuers and Council, and anthority was given to create a Presidency of Agra Before his retirement Bentinck assumed the staintory title of Governor General of India (1834), thus marking the pro-gress of consolidation since Warren Hastings in 1774 became the first Governor General of Fort William Sir Charles Metcalte, being senior member of Council, succeeded Lord William Bentinck, and during his short tenure of office carried into execution his predecessor's measures for giving entire liberty to the ureas

### Afghan Wars.

With the appointment of Lord Auckland as with the appointment of Lord Augustian as Governor-General (1836-42) there began a new are of war and conquest. Before leaving London be announced that he looked with ex-alization to the prospect of "promoting edoca-tion and knowledge, and of extending the bless located made to the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the ings of good Government and happiness to millions in India," but his administration was ings of good Government and happiness to millions in India, "but his administration was almost exclusively comprised in a fatal expedi-tion to Afghanistan, which dragged in its train the anexasism of Sind, the Sikh wars, and the beleman of Especiation in the proteotratio of lindia. The first Afghan was was under-tables pacify to counter the Ressian advance

in Central Aria and parity to place on the throne at Kabul the designment rules. But find the finding in the control of the finding in place of Dock Handsoned. The inter object was easily attained (1889) and for two years Ariganistan remained in the military occupation of the Eritish. In 1841, Bir occupation of the Eritish. In 1841, Bir and Sir William Macanghen suffered the same fave in an interview with the son of Deat Machand The British Commander in Kabul, Gen Riphinstone, was old and feeble, and after two months' delay he led his army of 4,500 and 12,000 camp followers back towards indis in the depth of winter Between Kabul Indis in the depth of winter Between Kabul at the bands of the Afghans or from cold, and at the bands of the Afghans or from cold, and by Bryton was the only survivor who reached as the hands of the Afghans or from cold, and Dr Byrdon was the only arriver who reached the latter city Lord Ellenborough succeeds the latter city Lord Ellenborough succeeded the latter city Lord Ellenborough succeeded Lord Anckkand and was persuaded to send an army of rotribution to relieve Jallais-bad and marched on Kabul, while Gen Nots, bad and marched on Kabul, while Gen Nots, and Joired Pellick at Kabul (148). The bazaar at Kabul was blown up, the prisoner rescued, and the army returned to India leaving Doet Mahomed to take undisputed pomeasion of bit throm 2 he draws ended with a bombastic proclamation from Lord Elkonborough and the parade stream and the latter control of the throm 2 her draws ended with a bombastic proclamation from Lord Elkonborough and the parade stream and the latter control of Mahonud of Ghami

### Sikh Wars

Lord Ellenborough's other wars—the con-quest of Sind by Sir Charles Napier and the suppression of en outbreak in Gwallor—were followed by hie re-rail, and the appointment of Sir Henry (let Lord) Hardings to be Gover nor-General A soldler Governor General was not unacceptable, for it was 10th that a trial of strength was imminent between the British or surveyor was imminent between the Britishs and the remaining Hindle power in India, the Sikhs Ranjit Singh, the founder of the Sikh Kingdom, had died in 1839, loyal to the end to the treaty he had made with Metcaide thirty years earlier He left no son capable of ruling, and the khalsa, or central council of the Sikh and the stalin, or central council of the Sitk army, was burning to measure its strength with the British sepays The intrigues of two men, Las Singh and Fe's Singh, to obtain the supreme power led to their crossing the Smitely Gough, the Commander-in Chief, and the Gor-corrections in turned to the frontier, and within three weeks four pitched battles were cought—at Mudd. Fernovashah Attivational and the Gor-countries Mudd. Fernovashah Attivational control of the Smith Singh S within three weeks four pitched battles were frought—at Mudki, Farrosshah Allwal and Sobrson The Sikhs were driven across the Stude and Labors surrendered to the British, but the province was not annexed By the terms of peace the infant Dublee Pissan was appointed Ecalent, to sasist the Sikh Council of Regency, at Labore, the Juliundur Doab was added to British territory, the Sikh army was limited, and a British force was sent to partison the Funjac on behalf of Regind, at 1640 and was greatly for the Register, at 1640 and was greatly for the Register, and the Register, and the Register of the Regis

Balbousie had only been in India a low months when the second Sikh war broke out, in the attack on the Sikh position at Children wals the British lost 2,400 officers, and mess

menta; but before reinferoencests could arrive was language, breiging BF Charies Napier as Commander-in-Chief, Lord Gough had restored his reportation by the vistory of Gujnat which absolutely destroyed the Sitth army As a consequence the Punjab was annexed and became a British province (1849) its pacification being as well carried out, under the two Lawrences that on the outbreak of the liftship typic in 1852 Lord Balloude had agent to embark on war, this time in Burma, owing to the Bi-treatment of British merchants in Rangoon The lower valley of the Irawaddy was occupied from Bangoon to Frome and annexed, under the from Bangoon to Prome and annexed, under the name of Pegu, to those provinces that had been acquired in the first Burmese war Bri name of Pegu, to those provinces that had been acquired in the first Burmese war British territories were enlarged in many other directions during Lord Dalhonals's tenure of office. His decrine of lapse: By why the factor of the control of the co change

## The Sepoy Mutlay

Dalhousie was succeeded by Lord Canning in 1856, and in the following year the sepoys of the Bengal army mntinied and all the ralley of the Ganges from Delhi to Patha rose valley of the wanges from Definite ratios rose is rebellion. The canes of this convision are difficult to estimate, but are probably to be found in the unrest which followed the progress of English civiliastion, in the spreading of hibe rumours that the whole of India was to be sindured, in the confidence the sepoy should be acquired in themselves under Britscope had acquired in the second acquired by the second acquire troops had acquired in themselves under British Isadenship, and in the ambition of the educated classes to take a greater share in the government of the country Added to this, there was in the deposed King of Delhi, Bahadur Bhah, a centre of growing disaffection Figally there was in story—not devoid of Figally there was the story—not devoid to the standard the American for both Hindus and Mahomedana And when the mutiny did break out it found the Army without many of its best nificers who were employed in brill work, and the

feer; grass and the coleans of these regi-the search ross in mesting, set down but before reinferonments could arrive a grand, truinging fir Charter Rapier as moder-in-Chief, Lord Gough bad respectation by the vetory of Gujent absolutely destroyed the Bith army baselinesty destroyed the Bith army baselinest province (1849) its positions of the second of the se part true to their colours. In Central Indes. the contingents of some of the great chiefs colled the rebels, but Hyderabad was kept loyal by the influence of its minister, Sir Salar

The interest of the war centres round Delhi. Cawnpore and Lucknow, though in other places massacres and fighting occurred The siege of Delhi began on June 8 when Sir Henry Barnard Debit began on June 8 when Sir Henry Barnard died of cholers carly in July, and Thomas Reed, who took he place, was colleged through lilness to hand over the command to Archdale Wilson. In August Nicholson arrived with a reinforcement from the Funkab In the meantime the rebel force in Debit was constantly added to by the arrival of new bodies of mnimeers, before an expension of the contraction of the contract it possible to advance the batteries on September 8, and by the 18th a breach was made on the following day three columns were led to the assault a fourth being beld in reserve, Over the rules of the Kashmir Gate, blown in by Hurse and Saikeld, Col Cempbell feb his mon and Nacholson formed up his troops within the walls by nightiell the British, with a loss of nearly 1,200 killed and wounded, bad only secured a tothold in the city Bir days street fighting tollowed and Della was won, but the gallant followed and bella was won, but the gallant tollowed and bella was won, but the gallant to the constant of the best of a storming party. Bashad Shah was taken prisoner, and his two sons were shot by Captain Itadeson.

### Massacre at Cawapore.

At Campore the sepoys mutinied on June 27 and found in Nana Sahih, the beir of the last and found to Nana Sahib, the beir of the last Feebwa a willing leader in spite of his fermer professions of loyalty There a European force of 240 with six guns had to protect 870 non-combatants, and held out for 22 days, sur-rendering only or the guarantee of the Nana that they should have a safe conduct as far as Allaliased of They were embaxing on the Allaliased They were embaxing on the them. The survey of the survey of the survey before the eyes of their wives and children cost before the eyes of their wives and children on the survey of their wives and children the the women being mutilated and murdered in ily there was the story—not devoid of the women beine nutilated and nutrieved in behat the carridges for the new Englid Cawpore to which place they were states back. were greated with fat that rendered them Their bodies were thrown down a well just be an for both Hindua and Mahomedans when the mutny did break out it found the states of the states of

With the end of the mnthy there began a we can in incis, strikingly marked at the out to by the Act for the letter Green men to the the Act for the letter Green men to the the Act for the letter Green and the letter from the Company to the Crown that Act India was to be governed by, and the same of, the Sovereign through a Secretary of State, assisted by a Counch of afteen combers. At the same time the Company to the Company to the Company of the Company of the Company, numbering sued On November 1, 1858, the Vecaroy nonunced in Durbar at Altahabat that Queen ictoria had assumed the flovernment of fordis.

In the Charter Act of 1833 was reinforced, and in of every near or coed, were to be admitted if a proposal to the content and in th uropean troops of the Company, numbering bout 24,000 officers and mon were—greatly senting the transfer—amalgamated with the tated To deal with the increased debt of india, Mr James Wilson was sent from England to be Financial Member of Council, and to the Financial Member of Council, and the license duty, and State paper curroncy Torcares of office had broken down the Viceroy's beath Lady Canning died in 1852 and this bastoned his departure for England where he died in 790 of that year. His successor, Lord ded in 790 of that year. His successor, Lord Bigin, lived only a few months after his arrival in India, and was succeeded by Sir John (after-wards Lord) Lawrence, the "asviour of the Punjab."

### Sir John Lawrence,

The chief task that fell to Sir John Lawrence was that of reorganising the Indian military system, and of reconstructing the Indian army The latter task was carried out on the prin-

i smally delivered until Sir Colin Camposil Smackel difficulties and the middline of Ledius from the in Could, which Sir Colin Camposil Streems with the cost of a war in Abyminia mouths in Could, which Sir Colin Camposil Sir C commercial crises of the time have to be noted one seriously threatened the tea industry in Bengal. The other was the consequence of the wild gambling in shares of every description that took place in Bombay during the years of prosperity for the Indian cotton industry caused by the American Chip Press. ling impulse to december 200 common the support of the first of the control of th of the Duke of Edinburgh to India when Lord Mayo was Viceroy had given great pleasure to those with whom he had come in touch, and had catabladed a kind of personal link between India and the Crowd of the Presonal link between India and the Crowd of the India and the Spirit when, in a durkar of great magnifeenes beld on January 1st, 1877, on the known Hidge at Delhi, Geore Victoria was preclaimed Kimbon and Crowd of the India and India a The latter task was carried out on the principle that in the Bengal army the proportion of Buropeans to Indians in the infantry and strengous curritons were made to mitigate as eavely smooth to come to two, and the the latter and Bonshay armise one to three the Mactina and Bonshay armise one to three the artillary was to be disposed when the proposed that the same than the proposed of the proposed that the same than the proposed that the proposed that the proposed that the same than the proposed that the prop

Second Afghan War.

The Amir, Shee All, was found to be intriguing with Biness and that fact, coupled with his repulse of a British mission led to the second Alghan War. The British forces advanced by three fouter—the Khyete, the Kuram, and the Boian—and gained all the important wantage points of Eastern Alghanistan. Beer All fied and a treaty was made with his son Yakuh Rian, which was promptly broken by the murder of Sir Louis Cavagnari who had been ent as English envoy to Kabul Purther oper-ations were thus necessary, and Sir F (now Lord) Roberts advanced on the capital and Lord) Roberts advanced on the capital and defeated the Arighans at Charasia. A rising of the tribes followed, in spite of Bir D Stewart's victory at Ahmed Kheyl and his advance from Kabul to Kandahar A pretender, Sirdnen Ayuh Khan, from Herst prevented the establishment of peace, defeated Gen Burrows' brigade at Maiwand, and invested Kandahar He was routed in turn by Sir & Roberts who made a brilliant march from Kahul De Kandahar made a brilliant march from Kabul to KandaArter the British withdrawal sighting continued between Ayub Khan and Abdur Rahmap, hat the latter Wasan and Abdur Rahmap, hat the latter Wasan and Abdur In the meantime Lord Lytton had resigned (1880) and Lord Ripon was appointed Viceroy by the new Liberal Government Lord Ripon's administration is memorable for the freedom given to the Press by the repeal of the Vernacular Press Act, for his scheme of local sire divisions, and for the strengt to extend the jurisdiction of the criminal courts in the Districts over European Rights and the Districts over European Rights and the Districts over European Rights and the Control of the Criminal Courts in the Districts over European Rights splicete Indejurisdiction of the criminal courts in the Dis-tricts over European Etiths subject, inde-pendently of the race or nationality of the predding idage. This strampt, which created a feeling among Europeans in India of great hostility to the Viceroy, ended in a compromise in 1884. Other reforms were the re-establish matter of the Court of the Court of the Court of the country of the European Court of the Court of the matter of the European Court of the Court culture, the appointment of an Education Com mission with a view to the spread of popular instruction on a broader basis, and the aboli tion by the Finance Minister (Sir Evelyn Baring, now Lord Cromer) of a number of cus-toms duties. Lord Dufferin, who succeeded Lord Ripon in 1884, had to give his attention more to external than internal affairs one of his first acts was to had a durbar at Rawalpindi for the reception of the Amir of Afghanistan which resulted in the strengthening of British which resulted in the strengthening of British relations with that ruler In 1885 a third Burmee was became necessary owing to the trooulent attitude of King Thibaw and his in trigues with foreign Fowers. The expedition, under Gtheral Prendergase, occupied Mandalay without difficulty and King Thibaw was exited to Batasufft, where he died on 16th December 1816 domaines of Upper Burms were named of British India on the 1st of Jannana of Strike India on the 1st of Jannana of the Company of the Strike India on the 1st of Jannana on the 1st of Jannana of Jannana of the 1st of the 1s

towards Contral Asia, and which seemed likely to lead to a declaration of war by Great Britain. War was averted, but the Penjdeh haddent had called attention to a menace that was to be felt for nearly a generation more, it had also served to elicit from the Princes of India lies served to ellet from the Princes of India an unanimose ofter of troops and money in case of nood. That offer bore truit under the next viceroy, Lord Langdowne, when the present system of Imperial Service Troops was ornamiced. Under Lord Landdowne's rule also the defences of the North-Western Frontier were strengthened, on the advice of Sit Frederick (now Earth Roberts, who was than Commander in-Chief in India Another formation of Rosets was taken by raking the annual subsidy paid by the Indian Government to the Amir from eight to twelve laking. On the North Eastern Frontier there occurred (1891) in the small State of Manipur a revolution against the Raja that necessitated an

(1891) in the small State of Manipur a revolu-tion against the Raja that necessitated an inquiry on the spot by Mr Quinton the Chief Commissioner of Assam Mr Quinton, the commander of Murdered in a conference and the escort ignominiously retreated. This dis-grace to British arms led to several attacks on frontier outposts which were brilliantly de-fracted. Manipur was occupied by British troops and the government of the State was roorganised. The state of the state of the Manipur was occupied by British and the special state of the proper state of the state of the state of the state of the Mr geveral other events, such as the pessing of Lansowhe's term of once was classinguasised by several other events, such as the passing of the Parliamentary Act (Lord Cross's Act, 1892), which increased the size of the Logislative Councils as well as the number of noztive Councils as well as the number of non-omicials in them legislation sinced at social and domestic reform among the Hindus and the closing of the Indian Mints to the free coin-age of silver (1893). In Burns great progress was made, nuder Sir Alexander Mackennie, as Chief Commissioner comparative order centallished, and large schemes for the con-struction of railways roads, and irrigation works were put in hand. (The Province was made a Liontenant-Governorsbip in 1897)

### Frontier Campaigns.

Lord Eigin, who succeeded Lord Lansdowne in 1884, was confronted at the outset with a deficit of Rs 2; crores, due to the fall in ex-change. (In 1895 the rupes fell as low as 1s 1d.) To meet this the old five per cent, import daties were reimposed on a number of port ditties wer reimposed on a number of commodities, but not on cotton goods and within the year the dnty was extended to plee-goods, but not to yarn The reorganisa-tion of the Army, which involved the abolition of the old system of Presidency Armies, had hardly been carried out when a number of risings to Rainagiri, where he died on 16th December 1916. His dominions of Upper Burma were annexed to British India on the 1st of Jame 1916. His dominions of Upper Burma were annexed to British India on the 1st of Jame 1916. The Russian Henace

Of grater importance at the time were the measurest taken to meet a possible, and as it then appeared a probable, stated or met a strength of the southern and eastern boundaries of Afrianista—was besieged and had to be reseasched to the state of t

est work in India was not to be found in any one department but was in fact the general gearing up of the administration which be schieved by his unceasing energy and personal crample of streamous work. He had at once to turn his attention to the North-West Frontier. The British garrisons beyond our board was gradually withdrawn and replaced are were gradually withdrawn and replaced entracted in British territory behind them as a support. An attempt was made to check the arms tradia and work on strategic railways was pushed forward. The bet that in seven was pushed forward The fact that In seven was pushed forward. The next that in seven years he only spent a quarter of a million upon repressive measures and only found it necessary to institute one blockade (against the Mahsud Washis) is the justification of this policy of compromise between the Lawrence and Forward schools of thought. In 1901 the transward schools of thought in 1901 the translated districts of the Punjab were separated from that Province, and together with the political charges of the Malakand, the Kbyber, Kurram, Tochl and Wana were formed into the new North-West Frontier Province, under a Chief Commissioner directly responsible to the Government of India Inat, war also the Government of India Inat, war also and the challatiment of Atghanistan, and the establishment of an understanding with his successor Habib ullah In 1904 the attitude of the Dalai Lama of Thote being pro-Russian and and British. of Tibet being pro-Russian and and British, it became necessary to send an expedition to Lassa under Colonel (Sir Francis) Younghus bend. The Dalai Lama abdicated and a treety was concluded with bls successor.

In his first year of office Lord Curson passed the Act which in accordance with the room mendations of the Fowler Commission, practically fixed the value of the rupes at 1s 4d, and in 1900 a Gold Reserve fund was created. and in 1900 a Gold Reserve fund was created. The educational reforms that marked this Viscovality are dealt with elsewhere chief among them was the Act of 1904 reorganising the governing bodies of Indian Univertities Under the head of agrarian reform must be mentioned the Princip Land Allenation Act, and the Control of designed to free the cultivators of the soil from viceorating was distinguished by the concentrate cuttons of money-denders, and the instisition of Agricultural banks. The efficiency of the form (real Britain and Russia

Lord Curson so the Sanaocs of India, which was increased by the serious and widespread from the Sanaocs of India, which was increased by the serious and widespread from the Sanaocs of India, which was increased by the serious and widespread from the Sanaocs of India, which was increased by the serious and widespread from the Sanaocs of India, and India of India Archener for the re-aquisiment of relations between the Army beadquarters and the Military Department of the Government, and being unable to obtain the support of the Home Government Lord Curson was succeeded by Government Lord Curson was succeeded by Lord Minto, the grandsou of a former Gover nor-General. It was a stormy bertage to which Lord Minto succeeded, for the unrest which had long been motioned developed in one developed many the succeeded of the lord of the transition of that province The canases of the flood of sedi-tions writings and speeches, of the many attempts at assassination, and of the boyont of British goods are less cally definable The mainspring of the unrest was "a deep-rooted Western society, especially in a democratic country like England, has been built up" Outside Bengal attempts to quell the disagree-Outside Bengal attempts to quell the disaffeetion by the ordinary law were halfy encossetul But szarcoly any province was free from disorder of some kind and, though reconstructions and to the deportation of persons without reason assigned under an Act of 1818, repectal Acts and Explosives Act, a Provention of Societies Meetings Ace, and a Criminal Law Amendment Act which provides for a magnitorial inquiry in private and a trial hefore three indges of the High Court without a jury Concurrently with those legislates that it is not the contraction of the contraction tion by the ordinary law were fairly successful a Hindn and a Mahomedan were appointed to a Hingh and a management were appointed to the Secretary of State's Council, and in 1909 a Hindh was appointed for the first time to the Vicercy's Council The Indian Councils Act of 1909 carried this policy farther by reconsti taking the logislative councils and conferring npon them wider powers of discussion. The executive councils of Madras and Bombay were enlarged by the addition of an Indian member

As regards foreign polley, Lord Minto's Viceroyalty was distinguished by the conclu-sion (1907) between Great Britain and Russia Lord Minto's and ships of the East Indies Squadron were frequently engared off MacInt and in the Persian Gulf in operations designed to check the traffic in arms through Persia and Mekran to the frontier of India

## Visit of the King and Queen.

Bir Charles (Lord) Hardinge was appointed to succeed Lord Minto in 1910 His first year in succeed Lord simbo in 1910. His first year in India was marked by the vilat to India of the King Emperor and the Queen, who arrived at Bombay on December 2, 1911. From there they proceeded to Delhi where, in the most magnificent durber ever beld in India, the coro nation was proclaimed an of all the lord popular of the control of the control of the coro effection. Sure accounted at the same are a concurred an annual grant of so takes for popular education, were announced. At the same eer mony His Majest, announced the transfer of the capital of India from Calcutta to Delhi the remnon of the two Bengals under a Governor in Council the formation of a new Lientenant Governorship for Behar, Chota Nagpur and Orissa and the restoration of Assam to the charge of a Chief Commissioner

In August, 1913, the demolition of a lavatory attached to a mosque in Cawnpure was made the occasion of an agitation among Indian Mahome dans and a riot in Cawnpore led to heavy loss of life of those present at the riot, 100 were put on trial but subsequently released by the Viceroy before the case reached the Bessions, and His Excellency was able to settle the mosque difficulty by a compromise that was acceptable to the local and other Mahomedans

Still more serious trouble occurred in September, 1914, when a riot et Budge-Budge among a number of Sikb emigrants returned from Canada gave a foretaste of the revolutionary plans en tertained by those men The sequel, revealed in two conspiracy trials at Labore, showed that the "Ghadr conspiracy was widespread and had been consistently encouraged by Germany

### Lord Chelmsford as Vicerov

Lord Hardinge, whose great services had been rewarded with the Knighthood of the Garter, left India in 1916 and was succeeded by Lord Chelmsford, whose tennre of office was destined to be one of the most eventini in the modern bistory of India The part played by India in the war was developed in every possible way Not only was the Indian Army increased but the resources of the country were developed with the help of the Munitions Board and India assumed responsibility for 100 millions of the The share of India in the Imperial war debt. The share of India in the Imperial burden of the war was emphasised in another and very significant way by her representation in the Imperial War Cabinet in London by His Highness the Maharaia of Bikaner and Sir S P (Lord) Sinha On the Frontier, where there had been numerous though comparatively alight disturbances in 1914-15, a punitive expedition had to be undertaken against the

In 1917 Mr Montagu, who had succeeded In 1017 Mr. Montaga, who had successor Mr. Chamberlain as Scortary of State, carried off the latter intention of visiting India. The result of the visit was shown in the following flow. Mondayons outbreaks at Malegano, part when a veryont was leasted containing Dharwar and elewhere were followed by a realized by the Scortagat advanced and the successor of the Scortagat advanced by the Scortagat advanced and the work of the Scortagat advanced by the Scortagat advanced as the successor of the Scortagat advanced by the Scortagat advanc

issued a report by the Special Committee of Inquiry, over which Mr Justice Rowlett presided, into seditions grame in India. That report and the legislation which followed in report and the regenation which followes in consequence of it, together with the announce-ment of the proposed referm acheme, led to a renewal of political discussion and agitation which had to a great extent been in absyance during the early years of the war

during the early years of the war.

Early in 1919 prolonged strikes in Bombay and shewhere showed that India, though comparatively little affected by the scomonic tenter of the strike and economic problems which were none the less grave. The gravity of those problems was increased by the ravages of influenza which is supposed to have caused 600,000 deaths during the winter months of 1917 18. Disturbed to the contract of the strike in the strike i passive resistance movement against the Rowlatt Act (the Satvagraha Movement) which pro dneed a situation to which there has been no parallel since the Muthry It is sufficient here to state that in Abmedahad Virampam, Delhi, Labore, Amritaar Gnjranwalla and other Deini, Labore, Amritaar (njiranwalia and others) places the crowd by attaching life and property and by train wrecking and tearing np railway lines and telegraph wires, provoked a situation which could only be met by the product a situation which could only be met by the product at the province of the property of the property of the province of the clamation of martial law and the enforcement of military measures for the protection of law abiding subjects and for the suppression of disorder

Exaggrated reports of those riots and of the effect of the Rewlatt Act may be presumed to have had some influence on the Amir of Afghanistan when he declared war and invaded British territory Amir Habibullah Khan, who had been loyal to his treaty obligations throughout the war, was murdered in February and, after a brief occupation of the throne by his brother Nasrulla Khan, bis son Amannila bad been declared Amir A sequel to this war was the renewal of trouble along a great part of the North Western frontier where the tribesmen, who had at first appeared to be impressed by the British successes, took the offensive against our advance posts especially in southern Wazi-ristan The operations which necessarily folristan The operations which necessarily ion-lowed and the severity of the lighting were on a scale never previously reached in frontier war, and made the campaign of nausual length

The Government of India Blil, embodying Mr Montagu's proposals for the popularisation of the system of Government, was passed in December

The next year, 1920, more than any which receded it, was distinguished by political agitation The cause of this was in part the ladigmetion created by the facts disclosed in the report of the Hunter Commission on the outbreaks of 1919 in the Punjab and elsewhere, and the stimulus given to the Khilafat agitation by the terms of the Peace treaty with Turkey

## Lord Reading's Viceroyalty.

It had been arranged that H B. H. the Prince of Wales should visit India at the end of 1920 and should open the new Councils in 1921, hat, for reasons of health, that visit had to be post-poned, and H. R. H the Duke of Connanght came to India early in 1921 in order to npeu the new Councils The Prince s visit took place in 1921-22 and was essentially non-political

The enthusiasm with which the Prince was greeted during his tour was very marked But almultaneously with the loval display riots broke out in more than one of the cities which he visited But after the imprisonment of some of the leading agitators in the early part of 1922 the country enjoyed comparative quiet, except in the Punjab where the Akall movement mong the Sikhs, which had started as a puritan reli the signs, which had started as a purisan regions movement, developed into a political movement attended by constant and wide-apread disorder. The enhanced position of India in the Empire and the position of India as a in the impire and the position of india as a nation entering actively into the work of the League of Nations, were emphasised during the year by the tour of the Dominions undertaken by the Hon S Sastri

## The Salt Tax

Early in 1923 a great deel of criticism was excited by Lord Reading's certification of the doubling of the sait tax, under the powers conferred by the Reformed constitution, in opposition to the Reformed constitution, in opposition to the clearly expressed will of the Legislative Assembly Objection was taken to this step not so much because an increase in the Sait Tax had siways been looked upon as a measure to which resort should be made only in grave emergencies, as because the finan-cial powers of the elected chambers, much em-phasised in the Montagu Chelmaford Report, were thus shown to be capable of restriction.

### Break up of non-co-operation

Two causes combined during the year to wasken the position of the extremists. The first was the split in the Congress the second the rise of communal feeling between Hindus and Mahomedans The Congress split was brought about by Mr. C. R. Das, who, realising and doubt that Mr. Gandhi had failed and it and doubt that Mr Gandhi had failed and it was unlikely that any other man would have fgreater success by a rigid adherence to his me thods deciared in favour of standing for the Connella

The other cause was the disappearance of the surface unity between Hindus and Maho medans which Mr Gandhi helped by strong feeling among Mahom dans on the Turkish question, had temporarily contrived The feeling among Mahomedane on the Turkiels greaters, the demonstrative contrived. The strength of the control of the quarters the wishes of Indian Mahomedane in this point and in certain quarters there was a received in the point and in certain quarters there was a covernment and intrigue against the neigh point and in certain quarters there was a covernment and intrigue against the neigh point and in certain quarters there was a voluntarily abditated. Somewhat indicrously dead to compare the proper of the Astali transit alim into a nurrier was the chans ceased to need Congress help This the control of the Congress has been presented to the Congress has been presented by the rejoidings of the lack of the control of the

Education in the Punjab, with the object of ensuring that the Punjab Mahomedane, as the largest community in the Province should have the greatest voice in its control, added to Hindu slarm and resentment. In the United Provinaisir and resentment. In the United Provin-ces Hindra were thunderstruck to fin, from the centure returns that in comparison with the Ma homedans they were declining in numbers Consequently two pan Hindra movements were started the Shuddhi movement announced by Swami Shradhanand which almed at the re-conversion to Hinduian of the Malkhana Bajputs and other low class occupants of the Ealputs and other low class occupants of the frince of Islam, and the Bangathan movement, of which Pandit Malaviya was the sponsor and which a direct of the property of the p quence, when the A'l brothers were released from jail they were unable to take any clear line they did not wish to take the popular course and abuse the Hindus, and on the other hand they would have had few followers it they had begun another bitter campaign against the Government

### Kenya and the Imperial Conference

Considerable feeling all over India was aroused by the terms of the Kenya settlement, which did not confer on Indians complete equality with the white settlers The polms particularly resented were the reservation of the highlands for Europeans the restriction of the fran chise and the rules concerning immigration, which it was illought might be used so as to operate unfarly against Indiana After the Imperial Conference, at which India was represented by H H the Metharaja of Alwar and Sir Tel Dahadur Sayru, feeling on this point improved slightly for though no very great galas were made at the Conference, the great gams were made at the Comercace, the fullest possible statement of the Indian case was given to the entire world, and the general attitude of the various premiers at the Conference was friendly

### Violent Movements.

In the Punjah the Akali movement showed an increasing tendency to forget the teachings of Mr Gandhi The Babar Akalis murdered or ar tandhi line hapar Akalis murdered several of their co-religionists whose political views they did not approve, and the Akali Dal became a more definitely military organisa tion acting directly under the orders of the

murder of her mother, and by her herolo rescue democratic help, but in other parts of India the by Mrs. Starr. Coupled with the slow rate of Councils did well in the riccumstances progress of the operations in Wasiristan, these continued inoidents provoked some comment.

There was also a sensational revival of the pre-war anarchical societies in Bengal, but the range of their achievements was small

### India in 1924

Mr Gandhis premature release from Yerowda The rise of sectarianism in religion which iall in consequence of an operation for aphabet in consequence of an operation for aphabet in the consequence of an operation for aphabet in the consequence of an operation of the consequence of the consequence of an operation of the consequence of th pair in consequence of an operation for applying the been noticed for some years was separately pendicilist comporarily revived the derooping the fore. The Asial movement, now noming hopes of the extremists much proper of the contract of the Asia second of the Mahara would organize another huge suit Government; of the passage of the most of the passage of the pass would organize another luge and vovering an movement was rapidly shattered. The breach between him and Mr Das steadily widened and the beiler of Hindu politiclans in Mr Gandhis common sense diminished though their esteem for his character remained as high as ever Moreover the feeling between Hindus as ever moreover the rectific between minutes and Mahomedans which had suddenly appeared the previous year darkened the whole face of the country With the abolition of the Khila the country With the abolition of the Khila fat by Mustapha Lomal in March the reason d'estre of the famous pact between Mr Gaudhi and the Alla was destroyed and animosity no longer felt the restraint of political expediency The Hindu conversion and organization move monts of Shuddhi and Sangathan were opposed hy exactly parallel Mahomedan movements

Tabligh and Tanzim runnours were frequent
that some mysterious All India Mahomedan clique was planning aggressive action against Rindins and excitences was prosent account seems that in and excitences was prosent from the frontier from the Frontier from the Funds the United Provinces, Dthil Calcutta, the Central Provinces and Hydrabad which broke out during the autumn season of religious festivais la September Mr Gandhi decided on a 21 days fast, which he successfully accomplished, partly as an expection for his share in the bad feeling and partly to draw the attention of the country to the urgency of the problem Simultaneously a conference of re presentatives of all communities including the Metropolitan and other English visitors was Metropolitan and other English visitors was called at Delhi to decide what steps could be taken to bring about a better state of affairs The conference passed some excellent resolutions but ou the very day when Mr Gandhis fast ended riots again broke out and what gave the matter a grave aspect was that the date of the riot had been predicted and it was commonly said that they had been carefully plauned for that very day

### Reforms Imperilled.

The year saw the final collapse of non-co-peration Though Mr Gandhi and a dwind ling band of followers clung to khaddar and the init band of interestining to state and the triple boycott, lawyers returned to their practices, schoolboys and students finally despaired of national education and the best brains of non co-operation followed Mr. Das into the Councils The programme announced oby Mr. Das was to wreck the Reforms. and in this ambition he was reasonably near success. Obstructive tested effected the non-co-operators, India participated successfully reagastion of the Ministers in the Central in the Empire Exhibition at Wembley India Provinces and Bengal and left these two provin was also represented for the first time in the precise be administered by Governors without to lympic Games.

Underground the revolutionary movement continued A series of assume nations took place in Bengal, and Mr Das incurs if bitter critteism by associating himself with the tribute to the mandates of an incompanion of the continue of the conti marderer of an inchensive Engliman in Calcutta

# Religious Agitation.

centrolng round the abdication of the Maharajah of Nablus seemed to have passed its most dan gerous phase but still gave the Punjah Govern ment much anxiety A series of processions of Akalis into Nabha State finally led to the inevit able afray, in which some fifty casualties were recorded but from this point there were signs of growing opposition to the Akalis among the Sikha and the announcement of Sir Malcolm Hailey on assuming control of the province that Government was determined to preserve reace and order was widely supported

That the Sikhs were not alone in desiring more democratic control of religious justitutions was shown by two agitations, one at the fam us Salvite shrine of Tarakuswar in Bengal and the other at Valkom in Travancor: At Tara keswar the demand was that the Income of the temple property should be administered by a trust and not regarded as the private concern of the mahand while at Valkom the trouble was caused by a demand of the untouchables that they should be allowed access to temples. Both incidents created great interest in various parts of the country

### Inquiries

The investigations of the Tariff Board appointed by Government to inquire which indus-tries were suited for the application of the efficial policy of Protection were continued. It was decided to give protection to coal and steel as two staple industries without which India could never become a great industrial country

Another luquiry of great importance was that conducted by the Lee (ommission under the chairmanship of Lord Lee of Fareham The Coramission which was appointed to luvest! gate the working of the Reforms, issued a report which had as favourable a reception as could be expected. The report made certain recom mendations for increasing the speed of Indianisation and provincialisation and also proposed some slight increases in the pay of officials

The third attempt to clinib Everest came very near to success A beight 600 feet from the top was reached, but in an effort to accomplish the last stretch Mallory and Irvine were killed It was not established whether they had or had not reached tha top

# The Government of India.

was not congress but trade. The twwerznest of India represents the slow evolution from constitions established to meet trading regulrements, no Beptember 24, 1999, a few years before the less the of Queen Elisabeth and Atbar, the merhants of London formed an association for hants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorpo-ation. The Government of this Company in England was vested in a Governor with a Geneal Court of Proprietors and a Court of Direc-ors. The factories and affairs of the Company sors. The isocorres and amains of the company on the East and West Coast of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort 8t George), Bombay and Calcutta (Fort William), by a Braidant or Canada and Calcutta (Fort William), hy a President or Governor and a Council conny a Frontier of Governor and a Council Con-sisting of the scnlor servants of the Company The three Preaddencies were independent of each other and subordinate only to the Directors in England.

### Territorial Responsibility Assumed.

The collapse of government in India conseane compass of government in linux conne-quent on the decay of Moghul power and the intrigues of the French on the Rast Coast forced the officer of the Company to assume terri-torial responsibility in spite of their own de-sires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India In these changed circumstances the system of In these changed circumstances the system of soverment by mutually independent and un-wieldly councils of the merchants at the Frest dency towns gave rise to grave abuse. Farliament intervened, and under the Regulating Act of 172, a Governo-General and four Frestdency of the Frestdency of Fort William (Bengal), and the repression of the Prestdency over Madres and Bombay was for the first time catablished in wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent victors consent of the Governor-General of Bengal in Council, except in cases of imminent of the Council of Council and Counci siminatration of each of the three Presiden-ies in a Governor and three counciliors, includ-ing the Commander in-Chief of the Presi-kency Army The count of the Governor-sement-in-Council was somewhat extended, It it was again by the Charter Act of 1793 pre-Under the Charter Act of 1833 the Company was own was compelled to close its commercial insteas, 1919

The impulse which drove the British to India as not conquest but trade. The Government India representate slow evolution from continue established to meet trading requirements of the entire civil and military administration on those established to meet trading requirements of the entire civil and military administration on the of the entire civil and military administration on the of the entire civil and military administration of the control to be extended over the subordinate government of the mature and extent of the control to be extended over the subordinate governments. After the Minitry, there was passed, in 1886, an Atter the Minitry, there was passed, in 1886, an attention of the company to the Crown This Act made to the company to the Crown This Act made to the control of the control of the entire civil and military administration of the entire civil and military administ India, but the Governor-General, as represent-ing the Crown became known as the Viceroy Ing the Crown occame known as the vectory The Governer-General is the sole representa-tive of the Crown in India, he is assisted by a Council, composed of high officials; each of whom is responsible for a special department of the administration

### Functions of Government

The functions of the Government in India are perhaps the most extensive of any great administration in the world it claims a share in the produce of the land and in the Punish and Bombay it has restricted the allenation of land from agriculturists to non-agricultur-ists. It undertakes the management of landed ists. It undertakes the management of landed cetates when the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great easie, It manages a wast forest property and is the principal mannfacturer of sait and option it owns the bulk of the railways of the country, and directly manages a considerable portion of them, it has constructed and maintains and office the forest of the famine of them. and directly measure of them, it has constructed and maintains most of the important Irrigation works, hower and manages the post and telegraph systems, it has the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and included the motion of t It lends money to municipalities, rural boards, and agriculturies and ossalonally to owners of historic estates. It controls the mile of experiment of the control of the c the Indian states which collectively over more than one-third of the whole are of India and comprise more than one-fifth of its popu-lation. The distribution of these great func-tions between the Government of India and the provincial administrations has fluctuated and was definitely regulated by the Beform Act of

### THE REFORMS OF 1919.

Great changes were made in the system of was the outcome of an inquiry conducted in fovernment in British India by the Government of India Act, 1919, which, together with the rules framed under the -almost as important [Act of Binks (Mr Montagu) and the Vicetory the rules framed under the -almost as important [Act of Binks (Mr Montagu) and the Vicetory in their previsions as the Act itself—came into anholded 1 a their Report on Indian Constituent of the Act in the Act

The recommendations in this report were supplicable to the commendation of the report were supplicable to the research of the research of the winder out 1018-10, and which issued that Reports in the spring of 1019 A third Committee was appointed during the latter year to make recommendations for the modification of the system of administration of indian after in the United Kingdom, and or mains arises in the United Kingdom, and issued their Baport while be Gavernm at of India Bill was under examination by a Joint Belect Committee of both Houses of Parliament. The Joint Select Committee in their turn issued an exhaustive Report on the Bill, which was passed in a form practically identical with that recommended by the Joint Com mit'ee end received the Royal Assent on the 23rd December 1919

The Divisions.—British India for administrative purposes is divided into 15 pro Vinces, each with its separate Local Govern vinces, each with its separate local overtiment or administration in him of the provinces—the three Presidencies of Madras Bombey and Bengal, the United Provinces of Agra and Ondb, the Punjab, Bihar and Orl-sa the Central Provinces, Burms, and Assam—the Local Covernment consists of a of Agra and Oodh, the Punish, Bhar and Orde, the Central Frontiers, Burnes, and of Makam—the Local Government consists in a between the Central and Provincial Government Course than consists in a between the Central and Provincial Governments have four members, and two or more Ministers in low almost complete control over the 1222 Durans, which was excluded from the administration of their silocated the control of the control over the control o original selems was brought into line with it and to far line ment was provided into line with it and to far line ment was pe sed, constituting Burma a Governor's Province, with a Governor's Province wit

Dyarchy —In these nins provinces the executive Government is a dual organism which owes its unity to the Governor One had of the organism consists of the Governor and his executive Council all of whom are uppointed by the King 1 his body is responsible for the administration of those subjects which are reserved The other half of the executive organism is the Governor acting with the ad vice of Ministers who are appointed by him, bold office during his pleasure, and must be lected members of the Provincial Legislative Council To the Governor acting with Mi nistars is entrusted the administration of transferred "subjects.

The Object—Tho framers of the Act of 1919 had a twofold object in view Their of 1919 had a twofold object in view Their primary object was to devise a plan which would render possible the introduction by anocessive stages of a system of responsible of the previous system under which the Object was to devise a plan which provided the provided

The Provinces.—Starting from the promise that it was in the provinces that the first substantial stem must be taken towards the disvelopment of a system of responsible government, the framers of the Act at 1919 provided for a statutory demarcation of the functions to be carefuled by the Governments respectively. In their daministrative capacity. No attempt in the substantial covernments respectively, in their daministrative capacity is attempted to be provinced to the find the substantial control of the provinces in general and of individual provinces but the rules under the Act provinces for the substantial control of the provinces in general and of individual provinces but the rules under the Act provinces for the substantial control of t or including provisoes but the rules under the Act provise specifically for the exercise of this right in certain specified provincial matters, and the theory npou which the Act proceeds assumes that a convention will be established and rigorously observed which will confine incervention by the Indian Legislature in provincial saffairs to matters so specified

the exignousness and inelesticity of its own revenues, having been exempted from this contri-bation. The aggregate sum thus due from the provinces to the Government of India at the provinces to the Government of India at this context is Rs 983 lakhs, of which Madras contributes Rs 984 lakhs, of the Provinces Rs 240 lakhs, the Pupibb Rs 987 lakhs, the Pupibb Rs 988 lakhs, the Pupibb Rs 988 lakhs 188 lakhs to Bs 988 lakhs to Bs 988 lakhs 188 lakhs lakhs lakhs lakhs 188 lak fixed proportions from the quota of the several provinces.

Of the 94 constituencies in Bengal, all but the Characteristics of the State representing the University and Commerce and Industry are arranged on a teriform of the University and English (i.e., each constituency consists of a group of electors, having the presented qualification which estitle them to a vote in a constituency consists of a group of electors, having the presented qualification which estitle them to a vote in a constituency of the state of income or property values. Generally speaked the state of income or property values. Generally speaked the state of th area. The normal area for a "Muhammadan" or "non-Muhammadan" constitueory is a district (or where districts are large and populations, half a district) in the oses of rural constituencies, and, in the case of urban constituencies, agroup of adjacent numberpal towns 80m0 large towns form urban constituencies by the owners, and the Oity of Calcoutta provide eight separate constituencies, six "non-Ruham madan" and two "Muhammadan" the latter of course, being coterminous with the former

of course, being covermmous wan are former Throughout the electoral rules there runs a general classification of the various kinds of constituencies into two broad categories, those which are designed to represent special interests, such as Landholders, Universities, Planters or Commerce being described as 'special' constituencies, and those which are based on a racial distinction—Muhammadan, European, Sith, etc.—being known as 'general' general' Sikh, etc.—being known

POWERS OF PROVINCIA LEGISLATIVE COUNCILS.

In origin the legislative authority in British incompiled the right of the Councils to voic or India was a meeting of the Governor-motions thus makesised for their discussion. General (or, in the case of the Presidencies the other results of the Act of 1909 were of Madras and Bombay, of the Governor) with his Executive Council, "for the purpose of a the means of selecting non-official members legislation." When met for this purpose there of all Councils (although the method adopted with the council of the decident of the council of the case province of a non-official (slough the method adopted in unable, and those few all nominated by the Governor, as the case province of a non-official (slough the council of the council of the case) province of a non-official (slough the council of the council of the case) province of a non-official (slough the non-official saley arising or of the discussion of the part of the council of th confined strictly to the discussion and ensurements of legislative measures. In course of time the number of "additional" members, and the proportion of these who were non-official Indi copertion of these who were non-official India, were steadily increased, the principle of section was gradually substituted the principle of section was gradually substituted or nomina-term of the commitment of

of income which form the ones of alternative of income or property values. Generally speaking, both in rural and urban areas the franchise is based on a property qualification as measured by the payment of a prescribed minimum of land by the payment of a prescribed minimum of an evenue or of its equivalent, or of income tax, or of ministral taxes, but in all provinces retired, penaloned or discharged officers and men of the regular army are entitled to the vote, irrespective of the amount of their income or property. The actual number of voters registered in each province on the rolls prepared under the new Act are shown in the following table —

	1920	1923
Madras	1.258.156	1,288,02
Bombay	548,419	680.47
Bengal	1 021,418	1.044,166
United Provinces	1.847 278	1,509,12
Puniab	505.361	627 51
Bihar and Orissa	327.064	858,50
Central Provinces	144 787	152,58
Assam	203,191	224,06

### POWERS OF PROVINCIA LEGISLATIVE COUNCILS.

quently created

Old System —But although the Legislative Councils (which, originally created in two pro-vinces only in addition to the Governor-General's Legislative Council, existed in 1919 in nine provinces) had steadily sequired a more and more representative character and a large share more representative character and a large share of the normal functions of a legislative assembly as generally understood, they still remained in theory up to the passing of the Act of 1919 mere accretions to the Executive Government of the preventions for the purpose of advising on, and preventions for the purpose of advising on, and the preventions of the purpose of advising on, and control of the purpose of advising on, and the prevention of the purpose of advising on, and control of the purpose of the purpo Act of 1892 had given power to discuss the joint of the provincial Councils as been given as a to divide the Council upon it countries as to the council of the Indian council of the Coun

The Champes—The most important chang-es sads by the Act of 1919 in the powers of the Provincial Councils were—

(6) the power to vote (and consequently to withhold) supplies,

(ii) a greatly enhanced freedom of initiation in the matter of legislation, and

(664) power to frame their own rules of procedure in matters of detail, subject to the Gover nor's concurrence.

A further right which the Councils will acquire after four years from the time of their commence after four years from the time of their commencement is the right to elect their own President At the outset the Fresident At the outset the Fresident is nominated by the Governor, but from the start every Commel has Governor, but from the start every Commel has come for the formerly was as office President of his Lexislative Council in o Gonger has any direct connection with its proceedings. The first-named of these newly acquired powers is of sufficient importance to require a detailed at the proceedings of the property of the comment of in the terms of the Act itself ( section 72D)

720 —(1) The provisions contained in this section shall have effect with respect to business and procedure in governors' legislative councils

(2) The estimated annual expenditure and revenue of the province shall be aid in the form of a statement before the council in each year, and the proposals of the local government for the appropriation of provincial revenues and other moneys in any year shall be submitted to the vote of the council in the form of demand. for grants. The council may assent, or retuse its assent, to a demand, or may reduce the amount therein referred to either by a reduction of the whole grant or by the omission or reduc-tion of any of the items of expenditure of which the grant is composed.

### Provided that-

(a) the local government shall have power, in relation to any such demand, to act as if it had been assented to, notwithstanding the with holding of such assent or the reduction of the amount therein referred to, if the demand relates to a reserved subject, and the governor certifice that the expenditure provided for by the de-mand is essential to the discharge of his res ponsibility for the subject , and

(b) the governor shall have power in cases of emergency to authorise such expenditure as may be in his opinion necessary for the eafety or tranquility of the province, or for the carrying on of any department , and

(iv) Salaries and pensions of persons ed by or with the approval of His Ha by the Secretary of State in Council; and

(v) Salaries of judges of the high court of the province and of the advocate-general.

If any question arises whether any proposed appropriation of moneys does or does not relate to the above heads of expenditure, the decision of the governor shall be final

Executive and Legislature—In the light of these facts it is now possible to explin more exactly the relationship between the provincial executive and the provincial legislature. The final character of the former has already been mentioned, and the corresponding bitmeasion of provincial subjects into "reserved" and "transferred" consequence. The rules under the act prescribe a list of 20 subjects which are transferred to the administration of the Governor acting with Ministers, the more important of which are Local Self Government, Medical Adwnica are Local sest Government, Medical Ad-ministration, Public Health, Ednostion (with certain reservations). Public Works, Agricul-ture, Excise, and Development of Industries. The "reserved" subjects comprise all those in the list of "provincial" (as distinct from "esa-cal") subjects which are not transferred.

trai ? subjects which are not transferred. Machinery—No change has been made by the Art of 1919 in the mashinery and methods of administration by the Governor in Council decisions are taken at the Council Board, as before, by a majority rote, and the Governor is entitled, as before, to overrule such a vote mortain specified circumminators it he disagrees with it. For such decisions the Governor in Council remains, as before, responsible to the Secretary of State and Parliament, and on questions of the Council remains, as before, responsible to the Secretary of State and Parliament, and on questions of the Council remains of the Council Rut, the whole spirit of the Act and the scrietone of a large ity of the Legislative Council But, the whole spirit of the Act and the existence of a large non official elected majority in every Provincial Legislative Council is an important factor in determining the policy to be pursued by the official half of the Government in its administration of reserved emblocia. A further and not force the council of the Government, side by side with the Executive Government, side by side with the Excentive Council, of two or more Ministers appointed from the elected members of the legislature, who, though they are not charged by law with, and in fact are legally absolved from, any responsa-bility for decisions on matters outside the trans-ferred sphere, will necessarily be able, and in fact are expected, to make their common sets by their colleagues in the Excentive Council the colleagues in the Excentive Council and council as a second experience of the council as the council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second council as a second experience of the council as a second experience of the council as a second co (c) no proposal for the appropriation of any such revenues or other maneys for any purpose that it is not been as the second of the second that of the divergence of the maneys for any purpose that it is not been as the second of the second that of the Government to accommodate its shall be made except on the recommendation of other control of the governor, communicated to the occusion.

(3) Nothing in the foregoing sub-section shall require proposals to be submitted to the council relating to the following head of expenditure proposals to be submitted to the council relating to the following head of expenditure proposals to the Government of its decisions in the fase of popular comment to the Government of the decisions in the fase of popular possibility to Parliament in the last record of the control of the Government of the decisions in the fase of popular comment to the Government of the Government in the last record of the Government of the Governm

Transfer of Centrel.—With regard to trans-ferred subjects the position is very different Earer there has been an actual transfer of control force the British elector and the British Paris-ment to the elector and the Legislative Commil the supervision sand some to the elector and the Legislative Commil through experience and learning except through experience and from the British elector and the British Parlia-ment to the elector and the Legislative Council is the Indian province. The provincial subjects of administration are grouped into porticion, and just as each member of the Executive Council has charge of a porticiol consisting of a specified list of observed with class of a specified list of observed with classification of the province of the administration of those parti-cular transferred. departments, which are included in his portfolio. But his resonability cular transferred 'departments' which are included in his portfolio But his responsibility lies, not, as in the case of a member of the Exnee, not, as in the case of a member of the secondary council, to the Government of India, the Secretary of State and Parliament, but to the Provincial Legislative Council of which he is an elected member and from which he is selected by the Governor as commanding or ilkely to command the support of the majority of that body He holds office during the Gover of that body He holds office during the Gerer nor a piesaw, on his ability to retain the confidence contingent on his ability to retain the confidence latter Council, upon whose vote he is directly dependent for his salary Further, the control of the Legislative Council over transferred subjects, both as regards supplies and legisla-tion, is almost entirely free from the pertrections just noticed which necessarily quality its control over the reserved subjects. It is thus within the power of the Provincial Council to leads on the pursuit of a policy of its own shotes in the administration of transferred choice in the administration of transferred subjects by withdrawing its confidence from a Minister who departs from that policy and Minister who departs from that policy and bestowing it only on a successor who will follow its mandate, and this power is dependent on the provincial elector in virtue of his freedom to control the composition of the Leghistive Council by the use which he makes of his vote No doubt this statement requires some qualification before it can be accepted as literally

Prevision of Funds.—The terms of the Act leave the apportionment of the provincial revenues between the two halves of the execurevenues between the two halves of the excessive for the inancing of reserved and transferred ambjects respectively to be settled by rules, merely providing that rules may be made 'for the allocation of revenues or moneys for the "purpose of such 'administration' i.s., the "administration of transferred subjects by the "Governor soting with Ministers Probably the best description available of 'he method adopted by the rules for the bettlement of this matter is the recommendation of the Joint Sciect Committee whose proposals have been followed with one modification only to enable the Governor to revoke at any time, at the desire of his Council and Ministers an "order of allocation" or to modify it in accordance with their joint wishes. The passage is as

follows -

"The Committee have given much attention "The Committee nave given must assume to the difficult question of the principle on which the provincial revanues and belances should be distributed between the two sides of the provincial governments. They are of the provincial governments. They are confident that the problem can readily be solved confident that the problem can readily be solved by the simple process of common sense and reasonable give-and take, but they are aware that this question might, in certain circums-tances, become the cause of much tric-tion in the provincial government, and they are of opinion that the rules governing the si-are of these revenues and balances should be framed so as to make the existence of such be framed so as to make the existence of such friction impossible. They advise that, if the Governor, in the course of preparing either his first or any subsequent budget, finds that there is likely to be a serious or uncertacted difference of opinion between the Executive Conneil and his Ministers on this subject he should be empowered at once to make an allocation of revenue and halances between the reserved and transferred subjects which the reserved and transferred subjects which the existing Legislative Council. The top-mittee deposit and the subject of the council and the council of the council and the council of the counc No doubt this statement requires some qualities of the control force it can be accepted an illerally assumate, for, technically, the authority charged with the administration of transferred substitutions of the control of the contr

The Committee desire that the relation of of the Legislative Council to direct the policy the two addes of the Government in this matter of reserved subjects, but on the other hand matter that seah will be able to added and in-flacence for the common good the work of the cher, but not to exercise control over it. The lought should not be capable of being used as a means for enabling Ministern or a majority needs of both sets of his advisors."

## THE CENTRAL GOVERNMENT

The structural changes made by the Act of Champer, is the President of the Legislative 1919 in the system of government outside Assembly But after that period the Lower the nine "Governors" provinces 'are in Chamber is to elect its num President, and it comparatively minor scope, though the spirit elects its own Deputy Prevident from the outset, of the Act requires, as has already been shown, The normal lifetime of each Council of State is considerable modification of the relationship live years, and of each Legislative Assembly hitherto subsisting between the Provincial three years in the tither Chamber, or both simple hitherto subaisting between the Provincial Governments on the one hand and the Govern ment of India and the Secretary of State in Council on the other The only concrete changes made in the constitution of the Central Government are the removal of the statutory bar to the appointment of more than six members of the Governor General's Executive Council (which, however, has had the far-reaching consequence that three of the eight members in the Council are now Indians), and the reconsti tation in a much more enlarged, representative and independent form of the central legisla and independent form of the central legisla-ture. It has already been observed that this hody was, in origin, like all other legislative bodies in India, the Governor General's Exe-cutive Council with the addition of certain "additional members" appointed to assist the Executive Council in the formulation of legislation Despite its steady growth in size and the certain of the council in the complete and the certain of the council in the council of the certain of the council of the council of the local members, who of course under Lord Morley's Act greatly preponderated in number over the members proper i.e. the Executive over the members proper, te, the Executive Councilors, still persisted up to the passing nf the Act in 1919 That Act, however, has on tirely remodelled the 'Indian Legislature,' as it is now called which has become like tha Legislative Council in a Governor s province legislative Council in a Governor s province legislature with all the inherent powers refinarily attributed to such a body save such is are specifically withheld by the terms of he Act It consists of two Chambers The Council of State "contains 60 members, of Council of State "contains 60 members, of whom 34 are elected (including one member n represent Berar, who, though technically ominated, is nominated as the result of lections held in Berar) and 25 nominated, of whom not more than 20 may be officials 1 he Legislative Assembly consists of 14st sumbers, of whom 10st are elected (including n the case of the Council of State, one Berar n the case of the Council of State, one began bember, who, though actually elected, is tech ically a nominee) of the 40 nominated embers, 26 are required to be officials. The sembers of the Governor General a Executive sembers of the Governor General a Executive ouncil are not ex-officio members of either hamber, but each of them has to be appointed member of one or other Chamber, and oca and the only in the Chamber of which he is a mem or Asy member of the Executive Commer to a Provincial Council is the same and the only in the Chamber of the Chamb

five years, and of each Legislative Assembly three years hut either Chamber, or both simil taneously, may he dissolved at any time by the Governor General

Election—The both Chambers is direct, and aithough the number of electors a considerably smaller than for the Provincial Councils, it is a great advance nn the very restricted and for the most part indirect franchise established under the Act of 1009 for the nineameral central legis lature which no longer exists Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that for the Pro-vincial Councils already described except that, Vincial Councils already described except that, firstly, the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies, and past service with the colours is not per its a qualification for the franchise, and secondly, a qualification for the franchise, and securety, that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council The distribution of seats in both Chambers, and the arrangement os sease in ocul chambers, and the strangement of constituencies, are on a provincial basis, that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province, and these representatives are elected by constituencies covering an assigned area of the province

The following table shows the allotment of the elective seats — Legislative Council of

	Assembly.	State
Madras .	16	5
Bom bay	16	6
Bengal	17	6
United Provinces	16	5
Punjah Bihar and Orissa	12	4
Bihar and Orless.	12	3 2
Central Provinces	6	2

arger than the constituencies for the local property qualification—adopted as a rough and Councils, and just as it is generally correct to ready method of enfranchising only persons with any that the normal area unit for those rural is take in the country—the rules admit as qualiconstituencies for the latter which are arranged on a territorial basis is the district, it may be likely to connect the possession of some past said that the normal area unit in the case of administrative experience or a high standard to the Legislative Assembly is the Division (the intellectual attainment and the standard of the controlled by a Divisional Commission of the Legislature as now constituted, or controlled by a Divisional Commission of the Proposition (or of the Provincial Commission).

The Franchise —The general result of the first franchise arrangements under the Act is thus that there is in each province a body of electors qualified to vote for, and stand for elec-tion to, the Provincial Council, and that a selected number of these voters are qualified to vote for and etand for election to those seats in the Logislative Assembly which are assigned to the province The qualifications for candidature province The qualifications for candidature for the Legislative Assembly are the same in each province, mutatis mutandus, as for candi dature for the Provincial Connell, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency is insisted apon

The franchise for the Council of State differs in character from that for the Provincial Council and the Legislative Assembly The concern of the framers of the Act and rules was to secure

or of its predecessor, or of the Provincial Council, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature

Powers -The powers and duties of the Indian legislature differ but little in character within the central "sphere from those of the provincial Councils within their provincial aphere, and it has acquired the same right of voting supplies for the Central Government But as no direct attempt has yet been made to introduce responsible government at the centre, the step in that direction having been avowedly confined to the provinces, and as consequently the Executive Government of India remains legally responsible as a whole for the proper fulfilment of its charge to the Secretary of State and Parliament, it follows that the powers conferred on provincial Governors to diaregard an adverse vote of the Legislative Council on legislation or the framers of the Act and rules was to secure vote of the Legislative Council on legislation of for the membership of this body a character as supplies are, as conferred on the Governove of the Council of the Counci

### THE INDIA OFFICE.

rigidity which formerly bound their procedure ministrati and that of the Office in general But provi functions, slone now exist which will undonbtedly as titue goes on have a material effect on the activities of the Office as it is now constituted. A High I Commissioner for India has been appointed for the purpose of taking over as the direct agent of the Government of India, that portion of India Office functions which is of the mature of agency, as distinct from administrative super vision and control The process of separation of staff and functions for the purpose of this transfer will necessarily be somewhat slow, but a substantial beginning has been made by hand lag over to the direct control of the High Com-missioner the large departments which are concerned with the ordering and cupply of stores and stationery in England for Government use in India, with the payment of pensions to retired members of Indian services resident in the United Kingdom, and with the assistance of Commission,

The Act makes no structural changes Indian etadents in England Concurrently in the part played by the India Office in with this change, it is now possible to defray the administration of Indian affairs. Slight from British revenues the salaries of the Secre afterations have been effected in the tary of State and of the Parliamontary Under the administration of notices acture. Signs from Drinks revenies the sancies of the perfect both the perfect of the secretary of State s Council and come of India Office claff and general maintenance of the Secretary of State s Council and come of India Office claff and general maintenance relaxations, have been made in the statebory which is attributable to the exercise of its administrative as distinct from purely agency

> In due course the apportfonment to British estimates will be the cost of the India Office as it exists after the transfer of innetions to the High Commissioner has been completely effected, then the salaries of the High Commissioner and his staff will be the only expenses in the United Kingdom chargeable to Indian revenues. Until that time arrives, bowever an estimate was the only basis for settlement, and for five years from 1920-21 the cost of the India Office years from 1920-21 sale cost of sale and as year payable from British revenues has been fixed at 136,5001, which includes the salaries of the Secretary of State and of the Parliamentary Under Secretary and a contribution of 40,0004. which has for some years been made by the Treasury towards Indian expenditure, as the result of the recommendations of the Welby

### THE FUTURE.

The Act of 1910 and its provisions are will enable 'the progressive realisation o essentially transitional It is intended, not responsible Government in British Indis at to set up a new and permanent constitution, as integral part of the Empire "This festers but to make such changes in the law as of the Act was olerly expressed in the Freamble

but although the Preamble finds no place in the faw as amended by the Act of 1919, that law more contains provision for the appointment, after a period of 10 years' trial of the law in its amended form, of a Parliamentary Commission when the property of the purpose of inquiring into the working it to the purpose of inquiring into the working of the years of the years of the purpose of inquiring into the working of the years of the

## PERSONNEL AND PROCEDURE.

their venure of omce, but check has been it at five year. There are seven Executive Mem-bers of Council These Members hold respec-tively the portfolios of Education Health and Lands Home, Finance Commerce, Industries and Labour Law The Vicercy acts as his own member in charge of Foreign affairs. Rail ways are administered by a Chief Commissioner. ways are administrated by a Chief Commissioner, with the assistance of a Railway Board and and are for administrative purposes grouped under the spis of the tommerce Department. The brack of the tommerce Department is the spis of the tommerce Department. The Department is the spis of the tommerce Department in the Secretary of State to the United Kingdom the spis of the Commission of the Commission of Secretary of State to the United Kingdom the Secretary of State to the Secretary the Secretar with the assistance of a Ballway Board and over-rule the views of a Local Government, Secretarios are often, though by no mean must ordinately be referred to the Vieoroy selaulavly, members of the Indian Civil Any matter originating in one department Service The Government of Indian has no which also affects another must be referred [Oil Service of its own as distinct from that to the latter, and in the event of the Department of the Eventual Government, and officers ments not being shie to agree, the case is referred to the Covernment of India are formed to the Covernment of India are formed in the Trothons, or, in the case of oil meet periodually as a Chimeto-ordinarily Specialists, recruited directly contract.

The Governor-General and the "Executive" once or twice a week—to discuss questions members of his Council ars appointed by the which the Visercy destres to put before them, or Cowm. No limit of time is specified for which has member who has been over-rised by the their tenure of office, but custom has fixed it Vicercy has saind to be referred to Council at hey spars. There are even Executive Mem. If there is a difference of opinion in the Council ties decision of the majority ordinarily prevails, that the Vescry can over rule a majority if he considers that the matter is of such grave importance as to justify such a stop Each depart mental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Underscheduler of Secretary of State io the United Kingdom but with these differences—that the Secretary can be such as the secretary can be s the decision of the majority ordinarily prevails,

## THE DIVISION OF FUNCTIONS

The keynote of the scheme is effective provincial autonomy and the establishment of solid policy maintained by local Government as immediate measure of responsibility in the Provinces all of which are raised to the status of Government in Connect Take American Scheme 2. of Governors in Council This demanded a sharp division between Imperial and Provincial functions The following subjects are reserved to the Government of India, with the corollary that all others wet in the Provincial

- tion and silens, and pilgrimages beyond India.

  8 Relations with States in India.

The gradual crolution of the Indian con-situation is faily tressed in the article on "The Government of India," which proceeds this sales are the tress of the Indian process of the Indian Con-tage of the Indian Contact of the Indian Con-tact provent of the Lagislature, as well as the product power of the Lagislature, as well as the product power of the Indian Contact of the Indian Con-ral for the discharge of his responsibilities, which are fully set out in the Ant, are repro-duced below—

21 (1) Every Council of States shall continue for five years, and every Legislative Assembly for three years, from its first meeting

### Provided that-

(a) oither chamber of the legislature may be soonerdiscoived by the Governor-General and
(b) any anch period may be extended by the Governor-General if in special of cumstances, he so thinks fit, and

(e) after the dissolution of either chamber the (o) after the classification of either channer the Governor-General shall appoint a date not more than six months, or with the sanction of the Secretary of State, not more than nine months after the date of dissolution for the next session of that chamber

22 (1) An official shall not be qualified for election as a member of either chamber of the Indian legislature, and, if any non-official member of cither chamber accepts office in the service of the Crown in India his seat in that chamber shall become vacant

(4) Every member of the Governor General's Executive Council shall be nominated as a member of one chamber of the Indian legislature, and shall have the right of attending in and addressing the other chamber, but shall not be a member of both chamber

24 (3) If any Bill which has been passed by one chamber is not, within any months after the passage of the Bill by that chamber, passed by the other chamber either without amendments or with such amendments as may be agreed to by the two chambers, the Governor-General may in his discretion refer the matter teneral may in his discretion refer the matter for decision to a joint sitting of hoth chambers Provided that standing orders made under this section may provide for meetings of members of both chambers appointed for the purpose, in order to discuss any difference of opinion which has arisen between the two chambers

(4) Without prejudice to the powers of the Governor General under section sixty-eight of the principal Act, the Governor General may where a Bill has been passed by both chambers of the Indian legislature, return the Bill for reconsideration by either chambers

(7) Subject to the rules and standing orders affecting the chamber, there shall be freedom of speech in both chambers of the Indian legisos specen in ober diambers of the innan registrier. No person shall be liable to any proceeding in any court by reason of his speech or vote in either chamber, or by reason of anything contained in any official report of the proceedings of either chamber.

25 IRDIAN BUDGET,—(1) The estimated annual expenditure and revenue of the Governor-General in Council shall be laid in the form of a statement before both chemibes of the Indian legislations in each year.

(2) No proposal for the appropriation of any revenue or moneys for any purpose shall be made except on the recommendation of the Governor General,

(3) The proposals of the Governor-General in Council for the appropriation of revenues or moneys relating to the following heads of expenditure shall not be submitted to the vote of the legislative assembly, nor shall they be open to discussion by either chamber at the time when the annual statement is under conalderation, unless the Governor-General other-

wise directs (i) interest and sinking fund charges on loans .

(ii) expenditure of which the amount is

(ii) expensions of warm and approximately prescribed by or under any law, and (iii) salaries and pensions of persons a pointed by or with the approval of His Majes or by the Secretary of State in Council, and the salaries of blad commissioners as

(iv) salaries of chief commissioners and judicial commissioners, and (v) exponditure classified by the order of the

Governor-General in Council as—

(a) coclesiantical,
(b) political,
(c) defence
(4) If any question arises whether any
proposed appropriation of revenue of moneys,
does or does not relate to the above heads
the decision of the Governor-General on the
question shall be final

(5) The proposals of the Governor General in Council for the appropriation of revenue or moneys relating to heads or expenditure not specified in the above heads shall be sub-

not specified in the above heads shall be submitted to the vote of the legislative assembly in the form of demands for grants

(6) The legislative assembly may assent or retrorse its assent to any demand or may reduce the amount reformed to in any demand by the reducedon of the

the logislative assembly
(8) Novithstanding anything in this section
the Governor-General shall have power, in case
of emergency, to authorise ench expenditure as
may, in his opinion, be necessary for the safety
ortrangolility of British India or any part thereor
25 Regrassyry Fowers—(1) Where either
thamber of the Indian legislature refuses leave
to introduce or fails to pass in a form recommended by the Indian legislature refuses leave
to introduce or fails to pass in a form recomrecommended by the Indian legislature refuses leave
to introduce or in the Indian or interests of British India ee
any part thereof, and thereupon—
(a) If the Bill has already been nessed by the

any part thereof, and takerepore to the other chamber, the Edit shall confidence to the chamber, the Edit shall confidence to the chamber, the Edit shall confidence to the chamber, to the constant to the shall chambers, to the with become an Act of the chambers, to the with become an Act of the chambers, to the chambers, the chambers of the chambers of the chambers, and the chambers of t

ner-General , and

(b) if the Bill has not already been so passed, the Bill shall be laid before the other chamber, and, if consented to by that chamber in the form and, if consented to by that chamber in the form recommended by the Governor-General, shall become an Act as aforesaid on the signification of the Governor-General's assent, or, if not so consented to shall, on signature by the Governor General, become an Act as aforesaid.

(2) Every such Act shall be expressed to be made by the Governor-General and shall, as soon as practicable after being made, be laid before both Houses of Parliament, and shall as soon as practicable after being made, be laid before both Houses of Parlament, and shall not have effect untill the sreceived His Majesty's assent, and shall not be presented for His Majesty's assent until copies thereof have been laid before each Hunse of Parlament for not less than eight days on which that House sat, and upon the signification of such assent by His Majesty in Council and the not detailed the sate of t

may be) in the form recommended by the Gover- aforesaid, subject, however, to disallowance by Mr-General, and

27 SUPPLEMENTAL PROVISIONS -(1) In addition to the measures referred to in sub-section (2) of section sixty-seven of the principal Act, as requiring the previous sanction of the Governor-General it shall not be lawful without such previous sanction to introduce at any meeting of either obamber of the Indian legislature any measure-

(a) regulating any provincial subject, or any part of a provincial subject, which has not been declared by rules under the principal Act to be subject to legislation by the Indian legislature,

(b) repealing or amending any Act of a local legislature,

(e) repealing or amending any Act or ordin ance made by the Governor General

(2) Where in either chamber of the Indian (2) Where in these sugments of the same of or any clause of it, or the amendment affects Provided that, where in the opinion of the terminal provided that where in the opinion of the terminal provided that we have of amorganory extra the terminal provided the terminal provided that the terminal provided the terminal provided that the terminal provided the terminal provided that the terminal provided the terminal provided the terminal provided that the terminal provided the terminal provided the terminal provided that the terminal provided the te

## The Bombay Presidency.

Proper are the rich plains of Gujarat, watered by the Resbudds and the Taptil, whose fertility is no marked that it has long been known at the province is divided into two sections by the Western Ghata, a range of bills running parallel to the coast. Above Ghat are the Decoan Districts, south of these come the Karnatic districts. On the sea side of the Ghata is the Konkan, a rice growing tract, intercepted by

The population varies as markedly as soil and climate In Sind Mahomedans predominate Guiarat has remained true to Hindulem although long under the dominion of powerful Mahome-dan kings. Here there is an amplitude of caste divisions, and a people, who although softened by prospertby, are amongst the keenest trading by prospectly, are amongst the keenest trading races in the world. The Deccan peasant has seen seasoned by adversity, the saying fore-tiat the Deccan expects a famine one year in every three, and gets it, the peopletion is meet, per cont. The same state of the tradition of the land of the Lingsysta, a Hindu reforming sect of the twelfth enetury, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sindi, Gajarati, Marathi and Kanarese, with Urdin a rough leepes fromes easies and tribes number for bondred to main castes and tribes number for bondred. castes and tribes number five bundred.

### Industries

The principal industry is agriculture, which supports stry-four per cent. of the population. In Sind the soils are wholly alluvity industrial discounting the soil of the property increasing crops of whost and cotton. In Gajarat they are of two classes, the black cotton soil, which yields the famous Brossh cottons, the finest in India, and alluvity which under careful cultivation in Ahmedabad which under careful cultivation in Ahmedabad The principal industry is agriculture, which which under careful cultivation in Ahmedabad. The dominant soil characteristic garden incl. The dominant soil characteristic of the Deccar is black soil, which produces cotton, what, gram and suffict, and in certain tracter rich crops of sugarcance. The Konkan is a rice land, grown under the shundant rains of the subracatiane which is the subracatiane of the subra

The Bombay Presidency streetches along the gation, and the harrost is largely depressent west conex of India, from Sind in the Horith to upon the seasonal rainfall, supplemented by Esnara in the South It is embraces, with its well irrigation. A chasin of irrigation works, leadstories and Adea, an area of 187,074 square miles and a population of 20,767,664. Of this keregion of unsaling rainfall in the Chate, it lotal 88,455 square miles are in Native States, standard the Chate, the contract of the Presidency of the Presidency of the Presidency of the Presidency of the Chate of the Cha

## The Madras Presidency.

The Madras Presidency occupies the whole sonthern portion of the Penin-ula and, exclud ing the Native States most of which have now come under the direct control of the Govern ment of India, has an area of 141 075 square miles It has on the east on the Bay of Ben gal, a coastline of about 1 200 miles on the west, on the India Ocean, a coast line of about 450 miles In all this extent of the coast, however, there is not a single natural harhour of any importance, the ports, with the excep-tion of Madras, and perhaps of Cochin, are merely open roadsteads. A platcan, varying in height above sea-level from about 100 to in beignt above sea-level from about 100 to about 800 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency on either side are the Eastern and the Western Chats, which meet in Ranforn and the western Grans, when more the Nilgiris The hight of the western moun tain-chain has an important effect on the rain fall. Where the chain is high the intercepted rain-clouds give a heavy fall, which may amount ram-chondagave a heavy tail, which may amount to 150 inchos on the seaward side but compara-tively little rain falls on the landward side of the range Where the chain is low, rain clouds are not checked in their west ward course In the central table land and on the east coast the rainfall is small and the heat in summer excessive The rivers which flow from west to east, in their earlier course drain rather than irrigate the country but the deltas of the Godavari Kistna and Canvery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to he untimely

## Population.

The population of the Fresidency was returned at the census of 1881 as 421764,185, an increase at the census of 1881 as 421764,185, an increase the control of the province to increase their condency has been fee the more densely populated portions of the province to increase their numbers while the sparsely inhabited tracte have still further declined in density. Hindus act sount for 89 per cent of the population, Maho Theorem 1998 per cent of the population, Maho Theorem 1998 per cent of the population is of the Dravidian rease and the principal Dravidian ian guages, Tamil and Teingu are spoken hy 18 and 6 million persons respectively. Of every thom sand people, 410 speak Tamil, 377 speak Teingu, and Deople, 410 speak Tamil, 377 speak Teingu, Minduskam, 37 Oriya, 38 Conances and 28 Ribudaskam,

## Government

The Madras Presidency is governed on the system generally similar to that obtaining in Bombay and Bengal There are associated with the Governor four members of the Executive Council in charge of the Reserved Smiters expected and these Ministers in charge of the Transferred Subjects Madras administration differs for other major provinces. There is no intermediate local authority between the Collector of the District and the authorities at head quarters, Commissioners of Divisions being paismown in Madras,

## Finance.

Like other provincial administration to development of the Madras President has been largety impeded in recent year type of defects, the Madras Government succeeded that March in presenting a balanced budget. This schievement was only possible as a result last March in presenting a balanced budget. This schievement was only possible as a result of rastic economics recommended by a special or drastic economics recommended by a special schiemes of development Madras labours each of the schiement was only possible as a result under an aente grievance with regard to the amount of her contribution to the Central Revennes under the Maten Award and Sir Charles Todhunter, the then Finance Member, was constrained to explain last March that the history of finance in the Province under alarms and one of alternative hope and black despair. For the year 1024 25, the provincial Government have bindgetted for a revenue of Rs 1674 77 lakhs and an expenditure of the whole of the revenue and in addition of a sum of 48 lakhs of loan money on capital exponditure the money of the provincial for the decision of code in the Presidency during the money.

### The Floods.

It has not been possible as this section of the Year Book goes to press to estimate correctly the extent of the damage wrought by the flood in South India in June 1934. Betimates vary from 75 lakhs to a crose Fortunately there was an serious loss of life, although hundreds Triebinopoly were awept out of existence and thousands rendered honeless. Apart from Government measures, fands for relieving the distress of the villagers rendered homeless were started in various parts of India with a pounded on a greacent measure to the appeal or help, hunt the response from the other provinces was not quite enouraging. The Boods In June 1924 were preceded by similar disasters in 1922 First of all South Chanca suffered from Boods which wrocked 12,300 homes and carried away many hridges. The next disaster was at the other extreme of the Fre didency, in Ganjam and Vilsagpatam, where a cyclone on a scale unknown since 1878, hroke right of the province of the Preddency, in Ganjam and Vilsagpatam, where a cyclone on a scale unknown since 1878, hroke my the railway in many jucca, brasched tank in all parts of other provinces and corried from timewell where the river Tampaparti had overflowed its banks, destroyed 11,650 buildings and damaged about 450 kirch and write so of the Presidency.

### Lecal Government.

While the Madras Government has been straightening out its own finances by economics, they have been setting right those of the local

.

bodies by giving grants on a scale which has the St. Joseph's College. Trichinopoly the not been reviewary equalised. The genderices of deveraged College [Kunbakosan, the Government and the control of the college of -DTV00CY

Industries.

The principal industry of the province is agriculture in which 68 per cent of the population is engaged. The principal food crops are rice, cholam, ragi and kamhu. The industrial rice, cholam, ragi and kambu. The industrial scope are octors, angar cane and ground nate A special feature of the agricultural activities the planting community have built up contributing substantially to the economic development of the province They have organised themselves as a registered body under the title of "The United Plantics" Association of Sonth of "The United Figures Association of contact India," on which are represented the coffee, tos, rubber and a few other minor planting adnots. There are some 22 cotton units in the presidency which employ 35 000 operatives almost and authority of the control of the cover 120 and consist at oil mills rope rubber and tile works. The aggregate value of the sea borne trade of The aggregate value of the sea notice rings or the Presidency has been showing a steady increase and is now in the neighborhood of Ra 75 cores per annothing as in other provinces the forest resources are exploited by Government There are close upon 19 000 square milks of reserved for the

Education. The Presidency s regiond in the sphere of

## Law and Order.

The Superior Court or Civil and Criminal In superior Court or CVM and Ornaming Indicial work in the Presidency is the High Court at hadrae which consists of a Chief Justice and eleven pulse indges The existing law provides for a maximum of 20 High Court Indges For the administration of criminal justice there are 25 Session Judges in the moresail, Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy there are the District Magistrates, the Subordi-nate Magistrates and Honorary Magistrates The administration of civil justice is carried on by 24 District Judges, 29 Subordinate Judges and District Munsiffs In the Presidency Town by M. District Judges, M. Subordinate Judges and District Minnairs. In the Presidency Town there are a City Civil Court consisting of an Judge and Smail Causes Court consisting of a Chief Judge and two other Judges. Madras is a litticious province and the records show one sait for every 86 persons. The Police depar-ment is under an approve of the Presidence. four deputies in four ranges of the Presidency a Superintendent being stationed at each District The samethened strength of the perma nent police force is about 30,000

## Nation Building

Since the advent of the Reforms, there has been an increase of one per cent every year in the allotment of funds to the Transferred De The Presidency a ractord in the aphore of adecation has been power of continuous progress and catation has been power of continuous progress. There are at present about 40,000 public institution, ranging from village primary schools of the president and a decrease of one per cent that the progress of the total strength legislate 2000 000 Silkers, their total strength legislate 2000 000 continuous control of the provide cultexiton for boys, being market to provide cultexiton for boys, being market to provide cultexiton for boys, being market to the Depressed Clauses The being market to the Depressed Clauses The being market to the Depressed Clauses The being the control of the state of the provide cultexiton for the state of the provide cultexiton for the state of the provides are the present the provides and the present control of the state of the present control of the state of the state of the present control of the Reforms.

## The Bengal Presidency.

The Presidency of Bengal, as constituted on the let April 1919, comprises the Burdwan and Presidency divisions and the district of Darjes-ing, which were formerly administered by the Lieutenant-Governo, of Bengal, and the Rajabain, bacca and Chittagong divisions which by the partition of the old Province had been placed onder the administration of the Lieutenant-Governor of Eastern Bengal and Assam The area of the Presidency is 82,97 square miles, and it possesses a population of 47 569,145 persons, neinded within this area are the twn Indian States of Cooch Behar and Tripura, which are under the general edpervision of the Governor of Hengal The area of the British territory in 26.28 amare miles. Bengal enumeries the Governor of Eastern Bengal and Assam The is 76,438 equare miles. Bengal comprises the lower valleys and detas of the Ganges and Brahmaputra, and in the main consists of a great alluvial plain intersected in its southern portion by innumerable waterways In the north are the Himalayan mountains and sub montane treets of Darjeeling and Janaiguri, and on the south-east the hills in Tripura and Chittagong, while on the west the Chota Nagpur plateau is continued by an undulating tract running through the western portions of Midnapur, Bankura, Burdwan and Blibhum The general range of the country however is very low, and a great fertile plain extends sonthward from Jaipaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cuitivation and the Bay of Bengal

## The People

Of the luhabitants of the Presidency 20,489,124 or 53 15 per cent are Mahomedans and 20,899,148 Hindus. These two major religions embrace all, but 2 78 per cent of the population Christians, Roddhists and Animists sombined number 1,278,873

or engal is spoten by uncer two per can of the engal is spoten by uncert wo per can of the engal is spoten and find and Urdu by 5 per cent. Orlys-spoaking people number 288,372 and Nepal is the tongue of 98,060 persone principally residents in the Darlecting and Jajasqurd districts. The great majority of the speakers of the Bunda surguages are Santala in West and North Engal

### Industries

According to the returns of the Census of 1921 nearly 37 millions or over 77 per cent of the 1921 nearly 37 millions or over 77 per cent of the population derive their support from pasture and agriculture, and of these more than 30½ millions agriculture, and of these more than 30½ millions Servants and field labourers. The area under lute in 1923 is estimated at £,444,408 acres against 1,550,000 in 1923. Bengal is the most important rhos-producing area in Northern India, and it is computed that about 55 per cent, of and it is computed that about 85 per cent, of the cultivated area of the Presidency is devoted to fits production to their crops include barley, wheat, pulses and oil seeds, the area devoted to the last named in 1923 being 1,463,700 across Beggs: is produced both from the sugar-cane and offered to the last named in 1923 being 1,463,700 across Beggs: is produced both from the sugar-cane and offered to the last named in 1923 being 1,463,700 across Beggs: is produced both from the sugar-cane and offered to the last name and the sugar is produced being the sugar is produced being the sugar is produced both from the sugar-cane and offered to the sugar is produced by the sugar is the sugar

### Manufacture and Trade

The main industries in this part of India in addition to the agricultural industry are the lute my industry, into the industry (largely an Asam Industry and coal mining The free mills in and around Calcutta constitute the around the manufacturing industry of the principal manufacturing industry of the Presidency From 1st April to 31st December Presidency From 1st April to 31st December 1921 all june mills worked four days per week From 1st Jannery to 31st March 1923, multiple shift mills worked four days of 13\(\frac{1}{2}\) hours each per week, single ahlif mille five days per week, single ahlif mille five days per week, and one day of 10 bours = sech and one day of 10 bours There were 83 mills at work during the year 1032-24 with 48,004 looms and 1025,345 spindles The average number of persons employed daily was 3,23, '66 The tabour apply of mills during the year has been fair 'tu there inwe been many days lost through strikes at different mills. The days nost through series a unorms have a value of the exports of Baw Jute by see from Calcutta during 1922 28 increased from Rs 13,71 00 lakha to Rs 21,66 70 lakha. The quantity exported was more than in the preceding year by nearly 100 000 tens and amounted to 555,000 tens. The Jute cess benefited the Calorita Improvement Trust to the extent of Rs 9 72 lakhs, while Rs. 8 24 lakhs were collected in the preceding year The experts of raw and manu-factured Jute represented mere than half of Calincurred July represents the received and those with the exception of cotton were India a premier ex-ports in that year. Other principal Industries were cotton twist and yarn, allk yarn and cloth, seeze ootton twist and yarn, silk yarn and oloth, hand-made coloh, sugar, molasses and paper Rieven cottou mills were at work during 1928-34 employing daily on an svenge 11,943 persons The silk weaving industry continues working during 1922-24 which employed 188 hands The mannfacture of tea is carried on an extensive scale in Darjeeling and Japaigrat The capital employed by joint stock companies in the industry in India amounted to rearive 1824 curves and the daily away 1922. The continues of t Indian Mines Act worked in Bengal was 2823. The total output for Bengal was 4,825,808 tons against 4,255,642 tons raised in 1981, while the output of all the mines in Bengal, Bihar and Orisas, and Assam amounted to 17,582, and the same than the same that the same than the same than

## Administration.

The present form of administration in Bengal dates from January 1921 In 1912 the Govern ment of the Province underwent an important change, when, in accordance with the Proclama tion of His Majesty the King-Remperor at Delhi the Province was raised from the status of a Liestenant-Governor to that of a Governor-in-Ocuncil, thus bringing it not line with the Presidences of Madras and Bombay In 1921 Presidencies of Madria and Bombay In 1921 unies the Beform Boheme, the Local Govern meant was reconsultated, ourtain of the department being placed under the control of members of the Legislative Council. There are nography from members of the Secutive Council, who are in charge of the "reserved subjects, and three Ministers, who are in charge of the "transferred subjects," but in 1924, owing to political reasons? Short work only few ministers. and these had to resign owing to the refusal of the Legislative Council to vote their salaries On their resignation, the transferred subjects were carried on by the members of the Excou tive Council The working of this system and the division of the administration into these two classes of subjects is fully described in the sections to which reference is made.

sections to which relevance is made.

Bengal is administered by five Commissioners, the divisions being those of the Presidency, Bur drawn, highest being those of the Presidency, Bur drawn, but have been been and the presidency of the Presidency of the Collector as Collector he supervises the instability of the Presidency and is the beed of all the Departments counceted with it, while as District Magistrate he is responsible for the administration of criminal justice in the distribution of the presidency of the Presidency Commissioner Commission trict. The immediate superior or and limitation of the Magistrate is the Divisional Commissioner Combetween the local officers and the Government In certain revenue matters they are, in their turn, subject to the Board of Revenne in Calcutta, in other matters they are under the direct control of Oovernment.

### Justice.

The administration of Justice is entrusted to the High Creat of Calcutta which consists of the Chief Justice who is a Bartister and 15 Puisse judges including one additional indge who are Barrister, Civilian or Vakina Below the Righ Court are the District and Additional Judges, the Small Causes Court and Shor dinate Judges, the Small Causes Court and Shor dinate Judges and the Mussiffs. Of these officers the District and Additional Judges and october the instant and authorisis Jungos and a certain number of subordinate Judges are also codowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only Criminal Justice is administered matters only Oriminal Justice is administered by the High Court, the Court of Session and the Courts of the various classes of Magistrate On its appellate side the High Court disposes of appeals from the order of a Court of Session, and spycial from the cure of a Court of Semich, and it also confident from the F W and for the cutting modifies or annuls sorticates. Relevant Departments. has few Presidency Magistrates, including a Tomponary Magistrate, two Municipal Magistrees.

hac, grain (puise and flour), seeds, hides and skins | trutes and also a number of Honorary (raw), and the six leading imports are cotton Magistrates and it possesses a Court of Small seeds, metals and ores, mechinery and mill- Causes with Judges who dispose of cases of work, rugar, railway plant and rolling stock, the class that are usually heard in County Courts in England.

### Local Self-Government.

By Bengal Act III of 1884 which regulates municipal bodies in the interior and its sub-sequent amendments the powers of Commissioners of municipalities have been increased and the elective franchise has been extended Municipal expenditure now comprises a large number of objects, including veterinary insti-tutions and the training and employment of tutions and the training and complete and the training and complete and Sanitary Inspectors and female medical practitioners. The Commission era also have large powers in regard to the waterers also have large powers in regard to the same amply and the regulation of buildings. The municipal Government of Calentia is governed by a large large and large large and large by Act III of 1923 This Act, which re-placed Act III of 1899, makes the Corporation paramount in matters relating to municipal administration The Act provides for the appoint-of connellors is 85, with 5 addermen, elected by the connellors are nouncilors. Ten of the connellors are nouncilors are nouncilors are nouncilors are nouncilors are nouncilors. The connection of the connection Union Committees have been formed which deal for the most part with the control of village roads, sanitation and water-supply

Bengal Act V of 1919 introduced a new system of self government by the creation of village subtorities varied with the power and duties necessary for the management of communal village artains and entrusted with powers of self taxatiom. The new village authority, to be called the Union Board, will replace the existing Chankidari penelogoit and the Union Committee and will deal with the village police, village roads, water supply, the village police, village roads, water supray, sanitation, primary schoole and dispensaries. The Act also empowers Government to create the control of the rial of perity crimical and civil cases arising within the union. The Act has been extended to all Districts in the Presidency corp. Darjosing, control of the rial of the Control of the Presidency corp. Darjosing, and Maida and in 1925 over 2,000 Union Boards were sanctioned, of which nearly 1,400 were actually constituted.

For the education of Mahomedans, there are senior madrasas at Cal-cutts, Dacca, Chittagong and Hughil, and one junior madrasa at Hajshahi which are managed by Government. There are also certain Government institutions for technical and industrial education. All institutions for technical and industrial education (except B E College, the Industrial education (except B E Collegs, the Almanulah School of Engineering, Dacoa, the Government Communical Institute and the new moder the control of the Director of Industries A large proportion of educational work of every grade is under the control of various missionary bodies, which are assisted by Government grants-in-said.

The municipalities are required to expand a certain proportion of their ordinary income on education. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a first grade Art College and a high school at Burdwan, a high school at Burdwan, a high school at Burdwan, a high school at Burdwan and a high scho

In 1923-24 there were in the Presidency -Arts Colleges 42 Becondary Schools Law Medical Colleges Ringrg. College Training Colleges

## The United Provinces.

The United Provinces of Agra and Oudh lie in practically the centre of Upper India. They are bounded on the north by Tibet, on the passes of the Control India Agrae, and the Bangor District of the Central India Agrae, and the Bangor District of the Central India Agrae, and the Bangor District of the Central Provinces, and on the west by the State of Gwalson, Dholpur, Bharatpur, Sirmor, and Jobbal, and by the Punjab. Their total area announts to 10,256 square miles, to which may be added the area in the control of the Central Provinces, the Control of the both of which lie within the United Provinces, 5,079 square miles and the newly-created independent State of Benares with an area of 870 aquare miles, giving a total of 112,244 aquare miles. The total population is 46,510,668

The Provinces, originally termed the North-western Provinces and so amalgamated in 1877, receiving their present designation in 1902, in olde four distinct tracts of country portions of the Hinsaleyas, including the Kumson two of which are mitterly in the hills and one is half in the submontane balt, the sub-Hims-layan tract. The great Gangetic plain, and portions of the hill systems of Central India including Bundelkhand The Gangetic plain, which through the submontane submitted in which through the submitted in the submitted in which through the submitted in the submitted in the which through the submitted in the submitted The Provinces, originally termed the Northwhich though somewhat liable to run abort of water in extremely dry years, is of great benefit in all ordinary years and years of limited drugght. The first two of these tracts are infer-tile and supports every sparse population and the Central Indian pisteau is almost equal ly infertile, though better populated. The soil of the Gangetle plain, bowever, possesses an extreme fertility and here the density of popu-lation rises from 519 persons per square mile in the west, to 549 in the centre and 718 in the east, which gives the Provinces as a whole a: in the weet, to 549 in the centre and 718 in the east, which gives the Provinces as a whole a greater population pressure on the soil than any other Provinces in India. In the south there are low rooky hills, hroken epurs of the Vindiyan mountains, overed with stunted trees and jungle, and in the North the lower alopes of the Himslayse, oldthed with dense forced, affording the proving the province conditions of the second the second that the province content of the province consists of level plain, and the province consists of level plain. part of the provinces consists of level plain, teeming with highly-cultivated fields and water-ed by three rivers—the Ganges, Jumna, and Corre

## The People.

The population is mainly Hindu, 85 per cent. per cent. the total of all other religions being all the course of the c per cent., the total of all other religions heing

The principal industry is agriculture, which supports no less than 75% of the population The soils of the Provinces fall into three groups, the valley soils of the Himalayas, the main allovium and the Central Indian alinvium, the chief obseracteristic soil of the Central Indian alinvium is the black of with Central Indian alluvium is the black soil, with a lighter variaot, though here also there are light leams and gravel. The Himalavan soils are of local origin and vary with the nature of the rock from which they have been formed, are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being, naturally, the most productive. The soil generally yields excellent crops of rice, millet, make, lineed, exton, wheat, segarana, pulber, harlow and poppy, rice being segarana, pulber, harlow and poppy, rice being segarana, pulber, harlow and poppy, rice being the greater part of the first through any could read the segarana, pulber, harlow and poppy, rice being cluster part of the first how a soil of the greater part of the first through any local price of the greater part of the first through the segarana and Gorakhpur Divisions, whilst the Agra Division receives about 25 to 30 inches annually only Drought seriously affected Bunded thand and the agra Division, in the past, but improved drainage, and irrigation (a processery to be made and the agricultural preperty of the Provinces is now high, though to varies with the rainfall Land is held mostly on the probwart tenure in Bunded khand and Kumano on semindari tenure in Sunded khand and khand and kumano on semindari tenure in Sunded khand and kumano on semindari tenure in Sunded khand and khand and kumano on semindari tenure in Sunded khand and kumano on semindari per cent of the total area in Oudh.

## Manufactures

The Provinces are not rich in minerals, Coal exists in Southern Mirsapur, iron and copper are found in the Himalayan Districts, and there were mines of importance there formerly, but increased difficulty of work ing them as veins became exhausted resulted in the closure of most of them. Gold is found in minnte quantities by washing in some of the rivers in the Hills. Limestone is found in the Himalayas and stone is largely quarried in the Mirzapur District. Cotton is ginned and spnn

brokiery is manufactured in Lucknow, where the Each District is in charge of a District noted obtions work of silk on cotton or mushle of the control of the tries are those of paper making (Lucknow) dye-ing, leather-work and fireworks. The chief centre of European and Indian industry is Cawncentre of European and Indian Industry is Cawnpore, which, cituated in most advantageous
position on the Ganges, possesses tanneries
cotton, woulden and other mills, which have
a large and ever increasing output (the woulding
mill is the largest in India). There are cotton
factories at Aligari (tamons for its locks), Meerat
and Barelliy, Mirrapur (which produces also
excellent carpets), flardoi and Hathras have
octtom mills Excellent furniture is made at cotton miles Excellent furniture is made at Bareilly, at Allahabad there are stone works, at Rosa there is a lerge English distillery, with patent still

The largest trado ceutres are Cawnpore, Allababad, Mirzapur, Bonares, Luokuow, Meerut, Aligarh, Hathraa, Muttra, Agra, Farukhabad, Moradabad Chandausi, Barelly, Sabaranpur, Munnfarnagar, Chaziabad, Khnrja, Gorakhpur, Chazipur, Pilibhit and Shabiadanpur,

## Administration

The Province was notil the close of 1920 administered by a Lieutenant-Governor chosen from the ranks of the Indian Civil Service Under the Reform Schome the Province was raised to the status of a Governor Inconcil, the Governor but gassisted by two members of the Covernor but gassisted by two members have been considered as the Minister in charge of the Transforred Subjects and two Minister in charge of the Transforred Subjects medium for the transaction of public business is the Secretariat, the Staff of which consists of 7 Secretary 1s. In charge of the Chief Secretary 1s. In charge of the Transforred Subjects and Folice Departments, the administered by a Lieutenant-Governor chosen Revenue, Appointment, General Administra-tion, Political and Police Departments, the Finance Secretary desic mainly with the Finance Department the Revenue Secretary is in charge of the Revenue Judicial, and Forest Departments, the Education Secretary Jooke Finance Secretary deste mainly with the Rinance Department the Revenue Secretary is in charge of the Revenue Judicial, and Forest Department, the Education verteary looks to the Education verteary looks to the Education verteary looks to the Education and Industries Department, the Education verteary looks to the Education and Industries Department, and are also Chief Coremannent, Municipal, Medical and Public Health Department. The other two Secretaries belong to the Public Worke, Ontone Secretaries belong to the Public Worke, Ontone Secretaries belong to the Public Worke. Ontone Secretaries the Secretaries belong to the Public Worke. Ontone Secretaries and Secretaries of the Secretaries and Secretaries of the Secretaries of

Kumsom The Districts are grouped together in Divisions, naving an average area of nearly 15,000 square miles and a population of from 5 to 15,000 square miles and a population of from 5 to 15,000 square miles and a population of from 5 to 15,000 square miles and a population of 280 900 Each Taksti in the charge of a Takstidar, who is responsible for the collection of revenue, and also exercises judicial powers. Takstid are divided into pargenas which are units of importance in the settlement of land revenue. Shall not settlement of land revenue and exercises judicial powers. Takstid are divided from the results of the particular of the settlement of the settlement of the particular of village accommants, there to a \$L.Mtl. These officials supervise the work of the patterns, or village accommants, there the villagers and Government For Judicial purposes (revenue and criminal), the District Officer as chartil, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates). ## THE FINANCES OF THE UNITED PROVINCES

As explained in the chapters on the new constitution of India, under the Reform Act of 1919, the financial position of the Provinces underwent a remarkable change. The Provinces are for all practical purposes financially independent of the Government of India, subject to a fixed annual constitution, which it is intended shall be gradually reduced to vanishing point when the position of the Central Government permit. As the finances of the Provinces thus become of greater importance, the position is set out in some detail in the following pages —

# Burma.

The Province of Burma lies between Assam on the North-West and China on the Rurth-East, and between the Bay of Bengal on the West and South-West and Slam on the Bouth Bast Its area, including the district of Putao constituted in February 1914, is approximately 263,000 square miles, of which 184,000 are under direct British Administration, 16,000 are nuad ministered and 63,000 belong to semi indepen-dent Native States. The main geographical feature of the country is the series of rivers and sature of the country is the series of rivers and Billis running fan like from Northu 8 south with fertile valleys in between, widening and fattening out as they approach the Delta Differences of elevation and rainfall produce great variations in climate. The coastal tracty of Arakan and Tenasserim have a rainfall produce and the series of the series but this is compensated by a bracing cold season. To the north and east of the dry some lie the Kachin hills and the Shan plateau. The average clevation of this tableland is 3,000 feet with peaks rising to 0,000 Consequently it enjoye a temperate climate with a rainfall of about 70 inches on the average. Its area is over 50,000 cquare miles. There is no other region of similar area in the indian Empires over 34,000 cquare miles. There is no other region of similar area in the indian Empires over 34,000 cm and aptive for European colorisation. The machine to make the scenery of Burms exceedingly varied and pictures one.

#### The People

The total population of Borms at the cenese of the state of the state

The Barmane, who form the bulk of the popu And Durmane, who form the outs of the poon atton, being to the Tibetas group and their language to the Tibeto-Chinese inmily They are essentially an agricultura people, 80 per cent of the agriculture of the country being in cent of the agriculture of the country being in their hands The Burmese, and most of the hill tribes also, profess Budchism, but Ani alem, or the worship of nature spirits, is almost universal. The interest taken by the Bur-mese in the course of the war, their response to the call far recruits and their scenerous contributions to war least and charftable fends

handkerchief bound round his forchead, a loose jackes on his body and a long attric or long it lied round his waste, reaching to his ankies. The Burmese women, perhaps the most picasing type of womanhood in the Rast, lead a tree and open life, playing a large part in the breasched conomy and in petty trading. Their dress is somewhat similar to the men's minus the silk and the silk of the large silk of the

#### Communications.

The Irrawaddy, and to a less extent the Chindwin, afford great natural thoroughbares to the country. At all seasons of the sear that the country and the seasons of the sear of the seasons of the season service.

The Burma Railways Company has a length of 1,668 miles open line The principal lines are from Rangoon to Mandalay from Sagaing to Mytkyina, the most northern point is the system, the Rangoon Prome line, and the system Markaban line, which serves Moulmein on the further bank of the Salween River,

Agriculture is the chief industry of the pre-vince and supports nearly three-fourths of the population. The nets total cropped area is 16; million acres of which more than half as million acres are cropped more than once. Irri-gation works supply water to nearly 1; million acres. India is very largely dependent on Burms for her supulse of kercesne, beamine and petrol which rank second to rice in order of importance. Task wood is exported in large quantities from Burms to India.

Porests play an important part in the la-ductrial life of the Province The forestrees vice cover 30,000 square miles, while unclassed forests are estimated at about 115,000 square unlies Government extracts some 107,000 thus | miles Government extracts some 107,000 than of teak annally, private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief extract over \$44,000 tigs Other timber extracted by Hernsess amounts to over \$21,000 tigs and firewood over \$24,000. tons

universal. The interest saken that the Burnes is a supersal to the war gave a great impedius to the control to the war that responsible to the sale of the war that responsible to the control to the control to the control is giving way to an intelligent loyalty to British rule.

In appearance the Burness is usually somewhat short and thick set with Mosgo'han professioners, it is designed to the control to the

132 Burma,

tioned a scheme by which Government guaranteed advances made by the Bank against stocks of these metals. The scheme came to an end carly in 1923

In addition further help was given to these industries by the remission from the lat January 1921 to the 14th February 1923 of fees, sends and coyalite due from the and wolfram concessions. Notwithstanding these concessions, many mines have been closed down, the sends and sends and the sends and

## Manufactures

There are 862 factories, over three-fifths of which are cognated to milliog rice and over successful are sawmills. The remainder are substity outon gioning mills, oil mills for the attraction of oil from groundants, and oil sofficeries connected with the petroleum industry. The average daily ounder of operatives is nearly \$8,000 At the Census of 1921, 1933,729 or \$8.48 per cent of the total population were engaged outside agriculture and production

As is the case in other parts of the Indian Implies, the isaported and factory made article is rapidly outsing the home-made and indigenous Birk at Amarapura in the Mandalay District a restrict his second carving is still famous and many assists in giver still remain the finish of whose parts is a mentiones very fine. Research and indicated to the second carving is still famous and many assists in giver still remain the finish of whose parts in the second carving is still famous and many assists in giver still remain the finish of whose parts in the second carving and the parts of the second carving and the continuous of all band made and lodgeous in dustries is the lacquer work of Pagan with its esionate pushers in these grown and yellow breasts on a grown of the making of because figures. The artists have gone back to nature the second carving the second

#### Administration.

Burna, which was at that time administered as a Lieuteaunt-Governorthy, was deliberately excluded from the operation of the Beform Act of 1919. It was felt that the Province differed so markedly from the other Provinces in the Indiana Empire that its requirements about the Indiana Empire that its requirements about the Indiana Empire that its requirements about the Surna Reforms Committee, which in 1925 recommended that all the essential provisions Burna Reform Act should be applied to the Province This recommendation was accepted and the proposals became I are as a second of the Beform Act should be applied to the Province This recommendation was accepted and applied to the Province This recommendation was accepted and the proposals became I are not a second to the Provinces recreated under the Act of 1919 (q v) The main difference in the size of the electronse Under the franch is accepted, the rural electorate is estimated in the size of the electronse Under the franch is accepted, the rural electorate is estimated by the proposal of the Indiana Committee of the Province and the Proposal of the Province of the Indiana Committee of which 79 are elected and the balance nominated. Owing to the special status of women in Burne, female franchise

at 1,500,000 and the trian declarate has been put as high as a million, though that is probably an eraggeration. The Legislative Council consists of 10d members, of which 78 are elected and the balance nominated. Owing to the special status of women in Burms, female franchise was adopted from the beginning. Burms is divided administratively into Dypor Burms (Including the Shas State of the Millia) and Lower Burms. The Millia and Lower Burms. The Millia and Lower Burms. The State of the States, subject to the supervision of the Commissioner, N. E. P. Division, and the Superintendents in the case of the Northern and Southern Shan States, which were formed into a Pederation on the 1st October 1922, and are designated the F. S. States; and to the supervision of the Commissioners of the adjoining Divisions in the case of the other States. The Civit, Criminal and Revenue administration is vested in the Cule the State, subject to law administration is vested in the Cule the State, subject to the wardministered is the sumonary law of the State.

Under the Governor are eight Commissioners of divisions, three in Upper and five in Lower Burma

I

All village beadmen have limited magisterial powers and a considerable cumber are also invested with civil jurisdiction to a limited extent

extent
In pursuance of the policy of decentralization steps were taken in 1917 to restore to the
village headmen the power and influence which
they possessed in Burmese times before the
contralising tendencies of British rule made them
practically subordinate of floors of the administra-

#### Public Works.

This Department is administered by two Chief Engineers who are also Secretaries to Government in the Public Works Department There are nine permanent Superistending Engineers (i.e., 7 for Brildings and Roads and 2 for Irrigation) and 79 Executive Engineera and Assertant Executive Engineera In addition there are 2 temporary posts of Superintending Engineer (1 for Irrigation and the other in coancetion with Communications in the Province) There are also a Consulting Architecture of the Communication of the Province of the P

#### Police

The Police Force is divided into Civil, allilitary and Rangoon Town Police The drat twn are under the control of the Inspector General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an affect of the Commissioner of Police, Rangoon, an affect of the Country Inspector General, Administra them to the Country Inspector General, Administra the datal of the Civil Colice, and four other Deputy Inspectors. Rango, one for the Railway and Criminal in vestigation Department and one for the Millitary Police

tary zono
A special feature of Burma is the Military
Folice. Its officers are deputed from the
Indian Army The rank and file are recruited
from natives of India with a few Kachine,
Karcans and Rhans The experiment of overuit
ing Burmose on a small scale has been successful
The organisation is military, the force being
divided into battaclions. The object of the force
is to supplement the regular troops in Burma
Thoir duties, apart from their military work,
the Drivide escorts for specie, prisonors, set.,

#### Education

At the head is the Director of Public Instruction with an Assistant Director, both belonging to the Indian Educational Service There are nine Inspectors of Schools drawn from the Indian Inducational Service, while the Burma Educational Service provides eight Assistant Inspectors A University for Burma has been esta blished in Rangoon

A remarkable feature of education in Burma is the system of elementary education evolved, generations ago, by the genius of the people Kearly every village has a monastery (hopomyrikvaung), every monastery is a village school and every Burman boy must in ac-ordance with his religion, attend that school, shaving his that the phoneyit kyaungs the bows are taught reading and writing and an elementary sative system of arithmetic The result is that there are very few boys in Burma who are not able to read and write

#### Medical

The control of the Medical Department is vested in an Inspector General of Civil Hospitals Under him are 41 Civil Surgeons. Thore is also a Director of Public Health, two Assistant Directors of Public Health, are pector General of Prisons three whole time Superintendents of Prisons a chemical Exception of the Limits Lawium.

Ther duties, apart from their military work, is to provide scorts for specie, prisoners, etc., in July 1915. The Director is a senior member and guarda for Treasuries, Jails and Courts of the Indian Medical Services.

## THE FINANCES OF BURMA

In sommon with the other Provinces of India, the financial mrangements between the Government of India and the diovernment of Burnau underwant a remodelling in consequence of the reconstitution of the Province on the lines of the other Indian Provinces. The Provinces obtained substantial financial independence. The present produced is to the the following statement — BETMARME REFERENCE FOR 1924 25

# Bihar and Orissa.

Bihar and Orism lies between 19"-02" and dans form less than one-tenth of the total popularity of N latitude and between 82"-31" and lation they constitute more than one-fifth of 88"-26" E longitude and includes the three pro- unknown properties. Animists 88-26 E longitude and incindes the three pro-propriate positions of Elbar, Orless and Chota Nagyur, and account for 5 2 per cent. These are inhabitants is bounded on the north by Nepai and the o'the Chota Nagyur plateau and the Santal Darjeeling district of Bengai on the east by Parganas, the latter district being a continuation Rengal and the Bay of Bengai, on the south by of the plateau in a north-castory direction Bengai and the Bay of Bengai, on the south by the Bay of Bengal and Madras, and on the west by the United Provinces of Agra and Outh and the Central Provinces

The area of the British territories which constitute the Governorship of Bihar and Ozises is 83,181 square miles inclusive of the area of large rivers. In addition to the districts phical lines there are five Civil Divisions with bead-quarters at Pathe Muzzfarpur (for Tirhut), Bhagaipur, Cuttack (for Orisaa) and Ranchi (for Chota Nagpur)

#### The People

The head-quarters of Government are at Patns The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Banktpore is known as ' Patna, the old town being called "Patna City"

The Province has a population of 37,661,665 persons which is very little less than that of Trance and rather more than that of the Bombay Presidency The province is almost entirely Presidency The province is almost entirely rural, no fewer than 963 per milie of the population flying in villages. Even so with 340 persons

#### Industries.

The principal industry is agriculture, Bihar more especially North Bihar, being the "Garden of India." Rice is the staple crop but the spring crops, wheat, barley, and the like are of considerable importance. It is estimated that the normal area cultivated with rice is 15, 220, 720 considerable importance. It is estimated that area of large rivers. In addition to the districts when provide the provider and the court of the cour serious famine was in 1895-99, our there was a perious shortage of foodstuffe in the south of the Province in 1919 In any year in which moneyon currents from either the Bay of Bengal or the Arabian Sea are unduly late in their artival or crass shru put yedge the middle of September. the agricultural situation is very grave. It may the agricultural situation is very grave. It may be said that for Bihar the most important rainfall is that known as the Astig, due towards the end of September or up to middle of October. Rain at this time not only contributes materially to an increased outturn of the rice crop hot also provides the moisture necessary for starting the spring or rabi crops,

#### Manufactures

Opinm was formerly, with indigo, the chief manufactured product of Bihar, but in conse-quence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobocco Company have creeted one of the largest eigarests facstop living in villages. Even so with 340 persons in more indeced product of Bilbar, but in conseper square mile, Bilbar and Oriesa is more indeced to the greenment with the Uniness blackly populated than Germany. There are dovernment the Fatna Factory has been closed, manuely, Patsan, Gaya and Bhagalpur During the last thirty years the population of Patna, the capital designate, has been steadily diminated the capital designate, has been steadily diminated in the capital designate, and the capital designate, and one of the largest classified in the capital designate, and one of the capital designate, and one of the capital designate in the void and as a result tobacco is the capital designate, and one of the capital designate in the capital designation of the capital designate in the capital designation of the capital designate in the capital designation of the capital designate in the capital designation of the capital designate in the capital designate in the capital designate in the capital designate in the capital designation of the

<sup>.</sup> The figures given in this paragraph relate to British territory only.

in the world and numerous subskilary industries are springing up in their vicinity. The most consumer is a subskilary industries are springing up in their vicinity. The most consumer is a subskilary industries and subskilary industries are springing up in their vicinity. The most consumer is million of indis, Agricultural implements, Lid. Knield Cable Company of Dolla, Reamelled Inowave Limited and Indian Steel Wire Products Industries in the Industries in t facture of shellac the latter of which is exported from India to the value of ten crores annually

#### Administration.

The Province on first constitution was as a ministered by a Licotenant-Governor-in Council, thus being indique in India as the only Lieu tenant Governorably with a Council Under the Exform Act of 1919 it was raised to the status of a Governorable, with an Executive status of a Governorable, with an Executive provincial administration are fully explained in the section The Provincial Governorable, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred the Council Coun The Province on first constitution was ad

Buildings and Boads branch and a non-pro-lessional Assistant Scoretary, in the Irrigation branch ander him. The Electrical work of the Province is carried out by an Electrical Engineer and a star of subordinates.

# Justice.

The administration of justice is controlled by the High Court of Jedicators at Paiss. In the administration of city fustice below the High Court are two District Judges as the Paiss. In the administration of city fustice below the High Court are two District Judges as the High Court are two districts and the High Court are two paissons and the High Court are two paisson

erment as proprietor in managed by the Court of Wards The passing of the Bengal Tenancy Act (VIII of 1885) safeguarded the rights of the cultivators under the Permanent Settlement Act. Further, the Settlement Department under the supervision of the Director of Land Records supervision of the Director of I and Records makes periodical survey and settlement operations in the various districts, both permanently actual in the lormer, the rights of the undertenants are recorded and streeted, while in the latter there is the re-estimated of rate. In the re-settlement of rate in the re-settlement of rate of the re-settlement of rate of the re-settlement of rate of the re-settlement of rate in the re-settlement of rate of the re-settlement of rate of the re-settlement of rate of the landowing but also for all the tenants. A settlement can be ordered by Government on application made by ratyses.

The tenures of Orissa are somewhat different. Under the ramindars, that is, the proprietors who took settlement from Government and pay revenue to Government direct, is a class of sub est out in detail I all these respects Bihar of the same plane as the other Provinces in India.

The Public Works

The Public Works Department in the Province of Bihar and Orises counsists of two caps, anthorities They have a variety in names, such as makedam, paddem, measures, gentlember at the branches, etc.—(i) the Boiletings and Rosdu and (3) Irrigation which also deals with holders pay their revenue through the another in the Rosdu and (3) Irrigation which also deals with holders pay their revenue through the another and the same of the states within which their kneed as The Public Works Department in the Prowhose of Bibar and Orless consists of two separate branches, etr.—(1) the Buildings and
Boads and (3) Irrigation which also deals with
Rilways. Each has a Chief Regineer, who is
also Secretary to the Local Government with
also Secretary to the Local Government with
Buildings and Roads branch and a non-proBuildings and Roads branch and a nonBuildings and Roads branch and Roads Buildings and Roads Buildings and Roads Buildings and Roads Bui

Both Orissa and Chota Hagpur have their own Tenancy Acts

#### Police.

The Department of Police, Proces and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assis-tants. The Commissioner of Engine and Salt is also Inspector-General of Hegistration.

Railway Police and the Military Ortuinal Investigation Department

#### Education.

vecattles, (g v /

# Medical.

hes. A Criminal Irrestigation Department is a she bees formed for the collection and administration of laformation relating to protect the collection and collection of laformation relating to protect the collection of laformation relating to protect the collection of laformation and collection of laformation of the class and other serious relating to the collection of the class and other serious relating to the collection of the class and other serious relations of the collection of the class and other serious relations of the collection of the class and other serious relations of the collection of the class and other serious class and collection of the class and cl saries in lexis The total income or use disposi-saries maintained by Government and Local Bodies including that of the private aided insti-tutions amounted to Rs 22,87,411

The position of education in the Province, the position of education and the tables attached the section Education and the tables attached the section Education and the tables attached education and the tables attached education and the tables attached the section Education and the tables attached education and the tables attached education and the section of the tables of the administration. In the construction of the indiana A preceding these are treated at Patra. An institute for these are described tuden the Indian Uni relation than also been established as Ranchi.

be population of The People
be population of the province is a compa
vely new community. Before the advent
be Aryana, the whole of it was peopled by
detection in the Aryana than their like
look parts of India because of the rugged
or of their home. But encessive waves
manigration flowed into the province from
tides. The senty inhabitant were driven
the inaccessible forests and billing where
the inaccessible forests and billing where
the the production of the comparison of the
top opulation of the C P being found in
sumbers in all parts of the province; st tribus and the C P being found in a numbers in all parts of the province, ionizely in the south-east. The main divisions of the new consers are indicated by the advisions of the province Hinds,

When Sir Richard Temple became first Chief Commissioner of the C P the province was land-locked The only road was that leading in from Jubbulpore to Nagpur The British adminis-tration has made roads in all directions, the two trunk railways between Bombay and Calcutterun across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength hy a phenomenal growth of the oc-perative credit movement. The land tenur is chiefly on the semindarl, or great landlord system, ranging, with numerona variations, from the great Pensemindari, or great landlord system, ranging, with numerous variations, from the great Fendatory chief-ships, which are on this basis, to holdings of small dimensions. A system of tand legislation has gradually been ultivated in pto protect the individual cultivator Berar is settled on the Bombu ryotwari system About 16,400 square mire of the system about 16,400 square mire of the total forcet are being one first in the total forcet area being one first of the whole Province The ranged nature of the greater part of the country mikes forcet conservacer part of the country makes treed too greet tion difficult and could Radinding forest and waste 55 per cent of the total land is occupied for cultivation, in the most advan-ced districts the proportion is 80 per can and in Berar the figure is also high. The culti-lation is a second of the cultivation of the culti-tation of the cultivation of the culti-tation of the cultivation of the C.P. Whest comes next, with 29 per cent, then pulses and cereals used for food and oil seeds, with 45 per cent and cultion with 145 per cent in Berar fowar covers 37 per cent then wheat and oil seeds. In agriculture more than half the working population is female ter part of the country makes forcet conservapopulation is female

#### Commerce and Manufactures

Industrial life is only in its earliest develop-ment except in one or two centres, where she introduction of modern enterprise along the rallway routes has laid the foundations for great inture developments of the natural wealth of the province. Negpur is the chief centre of a managem in an passe of the province, the province Naspur is the chief centre of a seekasty in the south-east. The main divide hasy cotton spinning industry The Empress as the new consent are indicated by the Hills, owned by Parsi manufacturers, were managed divisions of thes province. Hind, opposed there in 1877 and the general property with in by the Hindustani-speaking peof of the cotton trade has led to the addition of the North, prevails in the North and Kast of management of many mills here and nother parts of the tabligh Berner and the west and course of province. The total amount of spun years of P. Hindis has the former of the cotton trade has been described by the second of the province of the cotton trade has been described by the second of the province of the cotton trade has been described by the second of the province of the cotton trade has been described by the second of the cotton trade has been described by the second of the cotton trade has been described by the second of the cotton trade has been described by the described by the cotton trade has been described by the cotton The largest numbers engaged in any of the modern Industrial concerns are employed in Ranganama unining which in 1923 employed 13,069 persons and raised 508,118 tons. Then collow cost unining with an output of 547,682 tons and 8,575 persons employed, the Jubbul-pore matrile quarries and slifed works, the limestons quarries and the mines for pottery clay, scapstone. Ac

The total number of factories of all kinds legally so described was 574 in 1923, the latest period for which returns are available and the number of people employed in them 64,067. like its also and seal-deversuses at Municipal coal seal-deversuses Municipal and and the Municipal Acts and the Municipal Municipal Acts and the Municipality of Naspur dates from 1864 Several revising Acts extend its scope and the CP Municipalities Act passed towards the ond of the year 1922 bas considerably increased the power of the Municipal Committees The CP Municipalities Act has recently been extended to Berar Viewed generally, municipal collegities Act has recently numbered to Berar Viewed generally, municipal self government is considered to have taken root successfully. The general basis of the Scheme is the Local Board to the Committee of the Scheme is the Local Board of each district. The largest cure on municipalities, there being 61 such bodies in the Province.

trios, the Legal Remembrancer and the two Chief Engineers, Public Works Department, charged in 1820 the Local Boards Buildings and Roads and Irrigation Branches The Deputy Commissioners of districts are the and normalized members other than Gervenness without the and District Ragin conditions of a district officer are the control of the Commissioner of the Commissioner are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each tell for forestment of the possible of the possible Each tell for forestment servants, nominisationer has controlled to the possible Each tell for forestment servants, nominisationer than the controlled the controlle

have power of taxation within certain limits and Local Boards derive their funds in allotzecute from the District Councils. The new Central Provinces Local Self-Government Act has now been applied to Berar The Boards are with few exceptions non officials

Bural education and sanitation are among the primary objects to which these bodies direct their attention, while expenditure on familie relief is also a legitimate charge upon the District Council funds

## Public Works

Public Works Department is controlled by two Chief Engineers, who are also Secreter tearles to the Government There are two Superintending Engineers for Roads and Buildings and three for Irrigation In 1892 a separate division of the Public Works Department was formed for the construction of roads and buildings in the Fendatory States, but it has since been abolished The expansion of the department and its work has been one of the department and its work has been one department of the past decade and a ball, largely owing to the demands of a progressive age in regard to communications and new buildings. The Irrigation Branch of the P W perpresents a completely new department. D represents a completely new departure it was formerly the accepted view that the irregular surface of the country would make irrigation canals impossible and that the S W mossoon was so regular that it would pay mossoon was so regular Cast it would pay better to relieve families than to prevent it Both conclusions have been reversed Fick of officers investigated projects for trigation when the Irrigation Commission was appointed (1901) and canal and stronge works have since been advanced with vigour The Zundulg. Waingangs, Maissandi, Karam and Mantled projects are amongst the more important achemes, while an extensive network of minor protective works is being constructed through out the Province

#### Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and whole of which including the Cantonments and the Municipallities, is under one force The strength is equal to one man per 9 square miles of area. The superior officers comprise an Impector-General, whose jurisdiction extends over Berry, three Depthy Impectors-General for assistance in the administrative control and supervision of the Folice force, finedding the supervision of the Folice force, finedding the insulative of District Superiodendents of Police, Assistant and Depthy Superiodendents and subordinate officers. On railways special Railway Police are emulyored under the and supportunate cancers. On ranways specimal Bailway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabed A Special Armed Force of 600 Hoshangabad. A Special Armed Force or gour men is distributed over the headquarters of slade. From the headquarters of slade. From the headquarters of slade. From the headquarters of the peace in whatever quarter by the Local Legislative Council in Saxon 1920 they may appear. There is a small force of make an important stage by giring Local Mosmed Police. The Central Provinces has Bodies power he introduce comprisery education running local as the term is understood in it into in the areas market that furnitations.

The District Councils in the Central Provinces of the parts of Ladia. The village watchman is awe power of taxation within certain the subordinate of the village headman and not a police official and it is considered located from the District Councils. The very desirable to maintain his position in this respect.

#### Education.

The Riversition Department of the Central Provinces and Bern'ls administered by a Director of Public Instruction, a Departy Director, four Inspectors and two Inspectorsees who in their turn are assisted by seven Assistant Inspectors and four Assistant Inspectors and four Assistant Inspectors and four Assistant Inspectors and English Department of Contract Inspectors and Education Contract Inspectors and Education Inspectors and Inspectors and Education Inspectors and Inspectors and Education Inspectors are division for proceeding advancing to the Inspector and Education Inspectors and school year 1022 28 For administrative pur-poses schools see further divided according to their management into schools under public management and schools controlled by private results of the schools which the schools value by Government and (b) schools controlled by Local Bodies or Bearda. The latter con-sist of (a) Schools which are aided by grants from Government or from Local and Municipal Funds and (b) unsatied schools. All schools conform in their courses of study to the standards under public management and all added schools conform in their courses of study to the standards prescribed by the Kduestian Department or by the High School Edmention Board They are subject to inspection by the Department and to the general rules governing schools of this type. They are recognised by the Department and to the general rules governing schools of this type. They are recognised by the Department and to otherwise eligible. Unaided schools do not follow the rules of the Department, nor are they subject to inspection by the Department, nor are they subject to inspection by the Department, nor are they subject to inspection by the Department, nor are they subject to inspect the Department, nor are they subject to me, and they subject to me, and the Department are present as unaffiliated as any of the proceeded examinations without the previous sanction of the Department. sanction of the Department.

As an experimental measure the inspection and administration of Board Vernacular schools have been transferred to the District Councils at Bhandara, Balaghat, Amraoti and Hosban-

Higher education is at present given in five colleges. In Nagayar Morris College teaches upto the M.A. standard in Arts and up to the Final LL-B standard in Lew Hisloy College is affiliated up to the M. A standard in Arts The Vistoris College of Science teaches up to the M.Se standard in Science Up to the B Sc the M.Se standard in Science Up to the B Sc the M.Se standard in Science. Up to the HSc standard it works in conjunction with Morris College and Hislop College. In Jubbulpore Robertson College teaches up to the BA and E.So standards. The King Relward College, compable of accommodating 350 standards with spaceous grounds and well built hostels for two bundred boarders, is now established at Amaroti. It teaches up to the E.A. degree in Arts and the Intermediate degree in Science in Arts and the Intermediate degree in Science College at Jubbulpors, and Normal Schools at Magpur Theories a Technical Institute at Amaroti, which is controlled by the Dept of Industries. There is also an Agricultural College at Nappur moder the Department of Agricultura College at Nappur moder the Department of Agricultura College at Nappur moder the Department of Agricultura at Nagpur under the Department of Agriculture

at Nagpur under the Department of Agriculture Collegiate Education is now under control of the University of Nagpur to which the Onliges of the province are affiliated. The Nagpur University Act of 1923 provided for a University which "to the first instance, will be of university which "to the first instance, will be of university which "to the first instance, will be of subsequently and without further legislation understake wider functions as necessity arises and rands permit." In this connection the speech with which the Hombie the Minister first produced out that from the first the third that the subsequently and the state of the subsequently and the subsequently are the subsequently and the subsequently may at any moment without the online and the University may at any moment without when it finally, the bill is so drawed that the University may, at any moment without further Legislation, supplement or replace collegists instruction by instruction of its own. It may take over the management of existing colleges with the consent of their managing bodies, whether devertment or private, or it bodies, whether Government or private, or it may institute and maintain colleges of its own. The second important point of difference between the Nagpra Act and other University Acts subsequent to the publication of the Calcutta University Commission a Report is with regard to Intermediate Education. The Bill identities follows the recommendations of the Cautral Provinces University Commistee of 1918 and of the Sedier Commission in freeing the Eigh Itigh schools from the control of the University it differs from the Sadjer Commission Report and subsequent University legislation in adopting the High School Certificate Examination as the standard of admission to the University and in placing Intermediate Examination as the standard of admission to the University as provided in the Art in accordance with other recent University legislation in India and is to consist in the Art in accordance with other recent University legislation in India and is to consist of a Dutri, all Andendro Council and as Excent two Council with the Governor of the province as Excentice Chancestor Council Control and as Excent schools from the control of the University

the Hincs of the United Provinces Intermediate and High School Macasion Act. He sim is to free the High Schools of the Province from the free free the High Schools of the Province from the view to substitute for the University a Board of Secondary Reducation for the regulation and control of Secondary Reducation between Secondary and University Schools on the Secondary School Secondary and University School Secondary Secon of the Board will be drawn from men experienced in university affairs and that of this one-third not less than two-thirds shall be teachers in the University or in colleges affiliated thereto the same time teachers engaged in school work will be adequately represented on the Board

Medical The medical and sankary services of the province are respectively controlled by an inspector-General of Civil Hospitals and a Director of Public Health The medical depart-Inspector-General of Olvil Hospitals and a Diesector of Public Result. The medical department has made much progress amon the year most has made much progress amon the year most has made much progress and the progress of t Act the seem or excessed no overmine in 1913 search(one) the opening of peripatelle disponsaries in unbealthy areas. There is set the present time one such disponsary at each district to the Province There are also 2 peripatelle dispensaries in the Wardha District and I in Hatte Zamindari of Baisghat district which are contributed by the District Conneil, Wardha and the Kamindar of Hatta respectively

#### Finance

The main source of Government income in the province has always been the land revenue, but under Mahratta rule many petty imposts were added to all branches of trade and industry and life in general. Thus there was a special tax on the marriage of Banias and a tax of a fourth of the proceeds of the sale of houses. The scheme of Provincial finance was introduc-ed in 1871 72. Special settlements under this system have been necessitated in view of the special ofrommatances of the province and the recurrence of famine, which at the end of the 19th century caused a severe economic strain upon the province. The wave of prosperity which has spread over the country in the past of a Chirri, all Academic Council and an Expect tive Council with the Governor of the provinces a Excelled Chancelor.

As a circulary to the Contral Provinces Chirtychity, Ast the Central Provinces Eight in and of expanditure has indreased excess-sorior and of expanditure has indreased excess-pondicity.

# North-West Frontier Province.

The North-West Frontier Province, as its same denotes, is situated on the north west frontier of the Indian Empire It is in form averser or the indian Empire It is in form as irregular skip of country lying north by east and south by west and may generally be described as the tract of country, north of Bakachitzan, lying between the Indus and the Durand boundary line with Afghanistan To the north it extends to the mountains of the Hindn Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Alghanistan, until the Bulaiman Range eventually closes the south of the Province from Baluchistan The greatest length of the province is 408 miles, its greatest breadth 279 miles and its total its greatest breauth 219 mises and its most area about 88,000 equate miles. The territory falls into three main geographical dividents the following the following the following the following the butteries of Haaras, the narrow strip between the Indias and the Hills, containing the Districts of Feshwar, Kohat, Banu and Dera Ismail Khan, and the rugged morndalnum sections on the north and west. Bann and Dera famali Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan Hasara and the four districts in the second division contain 15 418 square miles. The mountain regions, north and west, are occupied by tribes subject only to the po-litical control of the Chief Commissioner in ha capacity as Agent to the Governor General The area of this tract is roughly 25 500 square The area of this trace is roughly 25 500 square miles and in it are sitested, from north to south the political agencies severally known as the Malakand, Kbyber, Rurram, Tochi and Wana Agencies Rach of the Deputy Commissioners of the five administered districts is responsible for the management of political responsible for the management of political responsible for the management of political results across the frontier A few hundred miles of the trans-border Territory are internally administered by the Prolitical Agent and the property of the province of of the provinc the tribes observe the conditions on which allowances are paid to many of them

1818 The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. warfare occurred with the border tribes. The most serious phases of these disturbances wise the war provoked by the segression of Alghanistical in 1918 and the protracted punitive operations against the Wastris in 1919-1920. These have resulted in the establishment at Rasman, a post tion dominating the Mahead Wastri equative of a permanent carrison of 18,000 angular department of the contract of mobility The effect of this measure has been a marked improvement in the internal peace of the Tribaf area

The division of the Frontier Province from the Punjab has i requently peen discussed, with the double object, in the carlier stages of those debates, of securing closer and more imme-ulate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the esta steer contentions in the personnel and united by the content of the personnel and the best of the content of the personnel content of the personne allowances are paid to many of them

The area of the Province is a little more than half that of Bonisay fundating filed and Aden) and amounts to more than a time fifth an attention to more than a time fifth an it has of England without Wales. The density of population throughout the Province equals 180 persons to a square mile, but in the more are 260 persons to a square mile, but in the more are 260 persons to a square mile and in the trans-lades pains tract the number is 166. The key to the history of the people of the R.W. F. P. He is in the recognition of the fact than the recognition of the fact that the state of th

administration of the Province under the Punjab High Court, at Labore The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reorms initiating and providing for progress along that line. The Hindua struct that a separate Pathan Province on the Frontier would cause a dangerous sentimental Livision from the rest of India, with leanings towards the allied recall elements of sade British India. The answer to elements offside British India The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border The Committee a de-liberations ended in disagreement, the two Hindu members writing each a separate report favour able to the Hindu viewpoint already explained and the majority of the Committee comprised of all its other members recommending advance on a Provincial basis Their principal recom mendations were for.

Retention of the Settles Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India .

Early creation of a Legislative Council for the Settled Districts and appointment of Member of Council and Minister

Appointment of a second Indicial Commis-sioner and reform of the junicial administra-tion in various directions, including inter-change of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one

If (concluded the Majority) the Pathan nationality is allowed self-determination and given cope for that self-development within the Indian Empire under the Referent Scheme after which it is now striving we are secured that with a contented Frontier population India can face with caim resolution the future that the Frontier has in store for her

No action on the report has yet been taken and an important reason for the delay is under stood to be the sharp accentuation of commu nal bitterness throughout the Frontier region as a result of political agitation at Kobat leading to a murderous and incendiary out break between the members of the two communities there last Spring

#### The People.

The total population of the N W F P (1921) is 5.076,476, made up as follows --

Hazara	622 345
Trans-Indus Districts	1 628,991
Trans-Border Area	2.825.136

This last figure is estimated There are only 561 2 females per 1,000 males in the towns, and 872 2 females per 1,000 males in rural

phenomenon On the other hand, the issuale population has to face many trials which are unknown to men. The evils of unsatilled said-wifery and early marriage are among them Both the birth and death-rates of the Province are abnormally few The birth rate in the administered districts, according to the last available effects reports, is 23 7 and the death rate 21 7 The birth rate was 17 per cent below rate 21 7 The birth rate was 17 per cent below the average for the preceding quinquennium—in Hazara 15 per cent below it—a figure indicating the unusually low vitality of the people after a proceeding severe epitiemie of maisria. The tien reduces the net result

he dominant language of the Province is Pathtu and the population contains several lingual strata. The most important sections of the population, both namerically and by social position are the Pathans They own a very large proportion of the land in the ad-ministered districts and are the ruling rate, of the tribal area to the west There is a long or the whole are to the west freez is a tong list of Pathan, Bainch, Rajput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 8 per cent of the total and Bikhs to a few thousands. The occupational cleavage of the population confuses ethnical divisions.

Under the North West Frontier Province Law and Justice Regulation of 1901, custom Law and Justice Regulation of 1901, constone governs all questions regarding successfully betrothal, marriage, divorce, the separate tion, family relations such as adoption and guardianship, and religious tragge and institutions, provided that the outston be not sontrary to justice, equity or good consciences in these matters the Malmondan or Hindu law is applied only in the absence of special onutom

#### Climate, Flora and Fauna

The climatic conditions of the N-W.F.P. which is mainly the mountainous region, but includes the Peshawar Valley and the riversin tracts of the Indus in Dera Ismail Khan District, are extremely diversified The district is one of the bottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely westeries is subjected in substituted and influenced of cold in winter. The air is generally dry and bence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the S -W Mossoon season, when moisture is brought up from the Arabian Son and the Bay of Bengal the other in winter, when storms from Mesopo-tamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources wrocepran Tails and moveral. Both Sourcesself of supply are precarious and not infromesself either the winter or the summer rainfall falls almost entirely. The following description of the Daman, the high ground above the Latter, thretching across Dera Immail Khan to the mountains on the west, occurr in an account. This disproportion of the excess cannot at present be axisiated in the N-W F P any more than in other parts of Northern India where thale any other Parts of Northern India where takes in other parts of Northern India where takes any other Parts of Northern Contract of Northern India where takes any other Parts of Northern India where takes any other Parts of Northern India where the Northern India where t

a dog bark nor see the smoke of a single fire "
With the exception of the Kunhar River, in
Haman, which flows into the Jhelms, the
whole territory drains into the Indus. The flora of the Province varies from the shrubby jungle of the south-eastern plains to barren hills, pine forests and fertile mountain valleys Tigers used to abound in the forests but are now quite extinct, leopards, byenas, wolves, jackals and foxes are the chief carnivora Bear, deer and moneys deer and monkeys are found, a great variety of fish is cansht in the Indus.

The mountain scenery is often magnificent The frontier ranges contain many notable peaks of which the following are the principal

Takht-i-Sulaiman, Sulaiman Range, in Dera Ismail Khan, 11,292 feet

Pir Ghai, Sulaiman Range, in Mahsud Wa-siristan, 11,583 feet

Sike Ram, in the Safed Koh, in the Kurram Agency, 15,621 feet. Kagan Peaks of the Himalayas, in the Ha

zara District, 10,000 to 16,700 feet. Istragh Peak (18,900 ft.), Kachin Peak (22,641 ft), Tirich Mir (25,426 ft.), all in the Hindn Kush, on the northern border of Chitral Agency

### Trade and Occupations.

The population derives its subsistence almost wholly from agriculture The Province is practically without manufactures. There is no considerable surplus of commercial pro-ducts for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade routes which connect the trans-border tribal terri torios and the marts of Afghanistan and Cen tral Asia with India, but the influence of rail ways is diminishing the importance of these trading interests. Special mention may be made trading interests. Special mention may be made of the railway comparatively recently opened linking Bahuchistan, in the south-west of the N WF F, via Nushki with south-cast Persia. The line connects with the north west railway system of India and extends 343 miles to Duzsystem of India and extends 343 miles to Dur-dap, within the Persian borrier Two weekly trains run each way said the feelight carried targo-ter and the said of the said of the said of the els and of toe, sugar and piece-goods from the Indian side Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders; for Powistables) from the trans-frontier area have one of the said of the travelling traders; and now, instead of doing their trading in towns near the border, earry it by train to the and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India. The approaching comple-tion of a railway through the Khyber Pass will similarly, in course of time, develop both the similarly, in course of time, develop both the manner and amount of transport communi-cations and trade. The new roads in Waxirstan are already largely nitheed by the Tribal inhabi-tants for motor traffic. Prices of agricultural profuse have in rocent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and been deprived of access to Indian markets and pressibles. On the other hand, high prices are a hardeling to the non-agricultural classes. The

effects of recent extensions of irrigation have been important. Land tensions are generally the same in the British administered districts as in the Punjab The outire sited area of the land amounts to 32 per cent, and unountivated to 63 per cent.

to 68 per cent

The work of civilisation is now making steady progress, both by the improve ment of commission of the co to 68 per cent and 7 per cent females of the tase figures see are returned as literates The trained edition of edition exists even for India. Those is not notably low, but they are it by the high literacy amongs 28 d whom 18 2 per cent are return The inauguration of a system of it. The inauguration of its system of its sy told railway 

#### Administration

The administration of the North West Frontier Province is conducted by the Chief Commissioner and Agent to the Governor General in Council His staff consists of— (1) Officers of the Political Department or

- the Government of India (2) Members of the Provincial Civil Service
- (3) Members of the Subordinate Civil Service (4) Superintendents and Assistant Superintendents of Police
- (5) Officers recruited for the service of de-partments requiring special knowledge— Militis, Engineering, Education, Medicine and Forestry

Chief Commissioner & 1

Administration.	GOVERNOR.	

The province of Assam was originally formed in 1874 in order to relieve the Lettenant-Covernor of Bengal of part of the Lettenant-Covernor of Bengal of part of the control of the Covernor of rrovince of Eastern Bengal and Assam as then constituted was again brokes up on the lat of April, 1012 the Eastern Bengal Districts of Burdwan and the Fresidency to form the Presidency of Bengal under a Governor inconcil Birth, Chota Nagrur and Orisas were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner

Under the Indian Reforms Act of 1919 the Province was raised in return to that of adminis-tration by a Governey-in-Council and was thereby ranked, with certain minor provisions to suit its undeveloped character with the major provinces of India.

The capital is Shillong, a town laid out with The capital is Sminong, a town last out was great taste and judgment among the pline woods on the alopes of the Shillong Range which rices to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

### Baluchistan.

Relachistan is an oblong strotch of cornery from the statific agriculture and profer a compring the extreme waters comper of the ludian Empire I its divided into three main divisions (I) British Balculatan with a area divisions (I) British Balculatan with an area of 9,476 square miles consisting of tracts assigned to the British Government by teatly security has been accompanied by a marked in 1879, (2) Agency Territories with an area of 44,845 square miles composed of tracts which of 44,265 equare miles composed of tracts which have, from stime to time, been acquired by lease or otherwise brought under control and placed or otherwise brought under control and placed Native States of Kalat and Las Bata with an area of 78,484 square miles. The Province cumbrases an area of 184,688 equare miles and according to the census of 1921 it contains 799,555 inhabitants

The country, which is almost wholly moun tair ous, lies on a great belt of ranges connecting the 3afed Koh with the hill system of Southern to 3 said don with the first system of converse Persia. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a leature of Central Asia. Regged, barren, sun burnt mountains, rant by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight But this is redeemed in places by level valleys of considerable size in which irrigation enables. much cultivation to be carried on and rich crops of all kinds to be raised

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1889, the outpreak of the First Afghan War in 1820; it was travemed by the Army of the Indus and the State of the Indus and the Indus and the Indus and the Industrial Indu The founder of the Baluddistan Province as in now exists was Sir Robert Sanderman who broke down the close border system and welded the Baluch and Brahm Links into a close confederacy. In the Afghan War of 1879 Fightin, Storarud, Sib, Lawara Valley and Thai Chotiali were handed over by Yakrub Khan to the Rittlan Government and retained at Sir Bobert. Sandeman's streamous insistence.

#### Industries

Baluchistan lies outside the monsoon area Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and soamly Shahrig, which has the heaviest rainfall, records no more than 11½ inches in a year In the highlands few places receive more than to inches and in the plains the average mixefall is about 5 inches, decreasing in some cases to 3 The majority of the indisposus papelasion are dependent for their livelihood and the second of the

the cuttivator was forumate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked ortension of agriculture which accounts for the increase in the numbers of the purely cultivating classes: The Mckran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing

Education is imparted in 84 public schools of all kinds, with 4,016 scholars. There is a dis-tinct desire for education amongst the more enlightened headmen round about Questa-Pishin and other centres where the Local Government with its officers stays at certain seasons, such as with its of meers may at certain season, such as Sibi and Ziarat, but on the whole education or the desire of it has made little or no advance in the outlying districts. The mineral wealth of the Province is believed to be considerable, but the Province is believed to be considerable, but cannot be exploited until rallways are developed Coal is mined at Khost on the Shid-rishin rallways and in the Bolan Pass The output of coal in 1922 23 was 9 8154 tons and of coal dats 50 650,4 tons Chromite is extracted in the Zhob District near Hindo bagh. The Chromo dutynt feil off owing to poorer demand Linnestone is quarried in small quantities.

### Administration

The head of the local administration is the officer styled Agent to the Governor General and Chief Commissioner Next in rank comes the Revence Commissioner who advises the Agent to the Governor General in financial Agent to the Governor teneral in manufactures and generally controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Frovince The keynote of administration in Baluchistan is self-government by the ston as hancemean is sen-government by the tribemen, as far as may be, by means of their Jirgas or Councils of Eddra along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a orime. The district levies which normally the aggressor or the vindresser primarions of a crime. The district levies which someally of a crime. The district levies which someally invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscalescent work. In addition, the contract of the contraction of sees useries seves there are ordinarily two irregular Corps in the Province, the Zhob Levy Corps and the Mekran Levy Corps. The Province does not pay for itself and receives large subsidies from the Imperial Govern-ment.

Agent to the Governor-General and Chief Com-missioner, The Hon'ble Mr S E Pears, 0.5.1. c.t.m., 1,0.5,

M. L. Fetrar, O I E , O B.E., I A

Commandant and District Superintendent of Police Major E J E. Poole, N.0

Senior Medical Officer and Civil Surgeon, Major F A Barker, I.M.S

### COORG.

Corg is a small petty Province in Southern India, west of the State of Kysore Its area is 1,582 square miles and its population 174,976. Coorg came under the direct protection of the littlish Government during the war with Solitan Tipps of Seringspatian In May 1824, owing Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with bis headquarters at Bangalore In him are combined all the functions of a local government in the complex of the Commissioner of Coorg In Coop his chief anthority is the Commissioner whose headquarters are at Morean and Wheel Commissioner whose headquarters are at Morean and these datales extend to every branch of each of the Commissioner whose headquarters are at Morean and Wheel Commissioner whose headquarters are at Morean and these datales extend to every branch of sisting of 15 elected members and Swe rounding the growth of coffee Although owing to over production and insect petts coffee no longer compute the control of the control of the service competition of Brazil The bulk of the output set in the wester competition of Brazil The bulk of the output is exported to France.

Rendent and Chief Commissioner, Coory-Vacant

### AJMER MERWARA.

Ajmc-Mervars is an isolated British Protoco in Rajpetan. The Agent to the Governor censely it had putan administers it as Chief Commissioner. The Province consists of two small separate districts, Ajmer and Merwars, with a total are of 8 711 square miles and a population of 501,305. At the close of the Pindari war Daulat Rao Sciudia, by a treaty, dated June 25, 1818 coded the distri to the Pindari Print of the Commission o

### Aden

Empire after the accession of Queen Victoria its acquisition in 1829 was the outcome of an outrage committed by the local kachil chief upon the passengers and crew of a British bug galow wrecked in the nell-hourhood Various acts of treachery supervened during the negoti ations regarding the buggalow outrage and Aden was captured by a force sent by the Bombay Government under Major Baillie The act has been described as one of those opportune poli tical strokes which have given geographical continuity to British possessions scattered over the world

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as Gibraltar does, being a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground This is nearly covered at one part at high spring tides, but the canseway and aqueduct are always above, though some times only just above, water. The bighest times only just above, water The bighest peak on the wall of precipitous hills that sur rounds the old o stor which constitutes Aden is ronnas the old c ator which constitutes Aden is 1,775 feet above see level Rugged spurs with valleys between, radiate from the centre to the circumference of the crater A great gap has been rent by some volcante disturbance on the sea surface of the circle of hills and this opens to sea surrace of the circle of nins and this opera to the magnificent harbour The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shakh Othman, 89 square miles in extent was subsequently purchased when, in 1882, it was found necessary to make provision for an over flowing population

Attached to the settlement of Aden are the Islands of Perim, an island of 5 square mikes extent in the Straits of Bab-el Mandeb, in the extent in the Betaits of 18a-cel Mandee, in the entrance to the Arabian Sea, Sokotra island at the entrance to the Guif of Aden, in the Ara-bian Sea, acquired by treaty in 1885 and i 882 miles in extent, and the five small Kurla Muria islanda, ecded by the Imam of Masaja in 1854 for the purpose of landing the Red Sea cable, and otherwise valuable only for the guano deposits lound npon them. They are of the Arabian coast about two-thirds of the way from Aden to Maskat The whole extent of the Aden sottle Maskat The whole extent of the Aden settlement, including Aden, Little Aden, Shaikh Othman and Perim, and subject to post-war. 1021 commas showed Aden, with Little Aden Shaikh Othman and Perim te have a population of 8-5.71 The population of Ferim in 2 075 largely dependent on the Coal Depot maintained there by a commercial firm. That of Sokotra s 12,000, mostly pastoral and migratory inland fishing on the coast.

### Strategic Importance.

Aden s first importance is as a naval and Aden a first importance is as a naval and instruction of strategic importance. This, the laspect was ably discussed by Colone! A M guns Murray, in his "imperial Outpoats. He argue points out that Aden is not a naval base in the sums sense that Gibrakur, Malta and Rong Kong strength of the colone of the colone

Aden was the first new territory added to the in 1839 because of its uscluinces as a harbour of refuge for British ships and from a strategist s point of view this is its primary purpose and the rauson ders of its forts and garrison Aden under firtish rule has retained its ancient pressige as a fortress of impregnable strength, invulnerable by sea and by land, dominating the entrance to the Red Sea, and valuable to its owners as a commercial emporium, a port of call and a cable centre. The barbour extends 8 miles from east to west and 6 from north to south and is divided into two bays by a spit of land The depth of water in the western bay is from S to 4 fathoms, across the entrance 44 to 5 fathoms with 10 to 12 fathoms 2 miles outside Distillations with 10 to 12 inthonis 2 times outside. The bottom is sand and mid. There are several islands in the inner bay. Strategic or nirtle of the Red Sea was rendered complete by the annexation of Perim and Sokoira, which may both be regarded as outposts of Aden, and are under the political jurisdiction of the Resident.

The Arab chiefs of the hintorland of Arabia are pearly all stipendiaries of the British Govern are hearly an appendiance of the British Govern ment Colonel Wahab and Mr G H Fitzmanrice, of the Constantinople Fmbassy were appointed in 1902, as Commissioners to delimitate the frontier between Turkish Arabia and the British protectorate around Aden A convention was signed in 1905 settling details the frontier line being drawn from Bhaikh Murad a point of the Red Sea coast opposite Perim, to the bank of the river Bana, the eastern limit of the bank of the river Bana, the eastern limit in Turkish claims, at a point some 29 miles north east of Dthala and thence north-east to the great desert The area let within the British Protectorate was about 9 000 square miles. The arrangement gave to Turkey Cape Bab-el Man dob which forms the Arabian bank of the eastern channel part Portin into the Red Sea. England took this gatepost of the Red Sea. but the garrison was withdrawn in 1906 Lord Morloy explaining this step as being in accord ance with the policy stated in the House of Lorda in 1903—that His Majesty's Government had nevor desired to interfere with the internal and domestic affairs of the tribes on the British side of the boundary, but had throughout made it plain that they would not assent to interference of any other Power with those affairs. Affairs in this respect have been disarranged considerably by the war

### **British Policy**

There has been much criticism of a policy under which Aden has falled to advance with the same progressive strides which have marked the development of other British dependencies It is said that the former Persian possessors of it is said that the former Persian possessors of Aden buth its wonderful water tanks, and the Araba made an aqueduct 20 miles long, while the British have done nothing except mount guns to protect their coal yards. Trade, it argued, Bourishes breasse this it a natural emporium of commerce, but not because of the actiention its needs get from Governquent. Lord Echerts, writing on this point lew years gaid.

\*\*Except Section 11: The soil of the point of the make use of a dependency like Adan for settlah purposes of political necessity without attempt-ing to extend the benefits of civilized Governmeant to the neighbouring native tribes, espe-cially when those tribes are living under the aegis of the British Crown The Persians, the Tarks and even the Arabs did more for Aden in their time than we have done during our seventy years' occupation Aden has always their time than we have done during our seventy years occupation. Aden has always suffered under the disadvantage of being an appanage of the Bombay Presidency, with which it has neither geographical, racial nor political affinity. Probably the best solution of the matter would be to hand over the place to the Colonial Office, relieving the Government to the Colonia Unice, relieving the Government of Bombay of a charge which is only looked upon as an incubes." This question is still under discussion but some important steps have been taken in the past few years to satisfy the commercial needs of the port

### Trade.

The trade of Aden is mostly transhipment The trade of Aden is mostly transhipment the port seving as centre of distribution. The total seaborns trade in the official year 1923 24 was Ea, 14,01,83,971 as compared with the proceding year's total of Ea 18,90,42,158 abowing an increase of Ea, 10,91,813 Merchan dise decreased by Ea 22,20,30 but Treasure increased by Ea 22,20,30 but Treasure increased by Ea 25,20,30 but Treasure increased by Ea 35,1616 The trade with the interior or Arman, assumed the process of the Compared to the Com

#### Language

The language of the settlement is Arablo, but several other satisfic tongues are spoken The Shakkin. The Somalis from the Artican coasts and Arabs do the hard labour of the port. So far as the settlement is concerned the other industries are sait and cigarette manufacture. The crops of the triballow country adjoining are jowar, assamin, a little sotion, madder, but the control of the triballow country adjoining are jowar, seasmin, a little sotion, madder, but the control of the triballow country adjoining are jowar, seasmin, a little sotion, madder, but the control of the country of t bills, wheat, madder, fruit, coffee and a considerable quantity of wax and boney are obtained. The water supply forms the most important problem. Water is drawn from fousources-wells, aqueducts, tanks or reservoirs and condensers

#### Administration.

The administration of Aden has been continuously under the Government of Bombay In 1920, the political control of Aden, which was exercised during the period of the war by the High Commissioner of Egypt, was retransferred to the Political Resident Aden, who was to be to the Political Resident Aden, who was to be directly responsible to the Foreign Office in 1921, this responsibility was taken over by the Colonial Office with whom it at present remains. The stuture of the Protectorate has been the subject of no little discussion and various proposals have been put forward At one time the dies that it should be transferred to the Colonial Office was seriously entertained. The proposals met with warm disapproval, from the important Indian community in Aden whose views were supported in India. There is constant friction between India and the Colonial Office over the status of Indians in the Dominions and some of the Crown Colonies and the hawsern

ness of the Colonial Office in protecting their rights is much resented. Therefore transfer to the Colonial Office was opposed as transfer to an unknowing and unsympathetic administration On the 11th July 1922 the Underscreency of State for the Colonies stated in the Rouse of Commona that there was no prespect of the Colonial Office taking over the control of Aden in the near future. The administration is conducted by a Resident, who is assisted by four Assistants. The Resident is also ordinarily military Commandant and has hitherto dinarily military Commandant and has htherto usually been an officer selected from the Indian army, as have his assistants. The Court of the Resident is the Colonial Court of Admiraty under Act XVI of 1891, and its proceeding as such is regulated by the provision of the Colonial Courts of the Admiratry Act 1890 (Coren In the withermost as generally accessed to coren in the withermost as generally accessed. force in the settlement are generally speaking those in force in the Bombay Presidency, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal busing of the Port Trust has been the deepening of the harbour, so as to allow vessels of all sizes. to enter and leave at all states of the tide. Aden police force consists of land and harbour police who number 320 and \$4 respectively
There are hospitals and dispensaries in both
Aden and Perim in addition to the military
institutions of this character. The garrison institutions of this character. The garrison comprises a troop of engineers, three companies of garrison artillery, one battailion of British infantry, two companies of sappers and miners and one Indian regiment. Detachments from the last named are maintained at Perim and Shalkh Othman respectively

### Climate.

The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in peng rrom 75 in January to 98 in June, with variations up to 102 The fulls between the monsoons, in May and September are very oppressive Consequently, long resi dence impairs the factities and undermines the constitution of Europeans and even Indians suffer from the effects of too long an abode in the settlement, and troubs are not preside in the the settlement, and troops are not posted in the station for long periods, being usually sent there one year and relieved the next. But Aden is exceptionally free from infectious diseases and epidemics and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maladies common to tropical countries The annual rainfall varies from 1 inch to 81 inches, with an irregular average of 8 inches

KOB, OIB., DEO Assistant Residents 1 Major C C J Barrett, 0.8 7., C.I.E Aden. , B R Reilly, o.B.R ,, H M. Wightwick (on leave) ,, . G P Murphy 5 Lient, M. C Sinclair J. L. M. Barlow .. Perim.

Political Resident, Lieut General T E Scott,

### The Home Government.

The Home Government of India represented for sixty years the gradual evolusented for sixty years the gradual evolufor the following the sentence of Proprietors. In 1784 Prailment extallabled and the General Court of Directors and the General Court of Proprietors. In 1784 Prailment extallabled and the sentence of Proprietors and revenue of India Brade of Courton, with full power and authorized the sentence of the sentence allowance of 2500 for any member who was at the time of appointment rely to control and direct all operations and concerns relating to the civil and military government, and revenue of India Brade of the Council to Indias, and since 1917 government, and revenue of India Brade of the Council to Indias, and since 1917 the india precursor of the Secretary of State of India. With modifications this system inents to the establishment are made by the indeed notice of Council in 1888. When the Muthur, Globowed Secretary of State In Council, and are subject to and its powers were exercised by the Fresident, the inneal procursor of the Beccutary of Ratio factor of the Procursor of the Beccutary of Ratio factor of the Procursor of the Procursor of Ratio factor of the Procursor of Ratio factor of Procursor of Ratio factor of R forwing on all matters relating to India. He inherited generally all the powers and duties which were formerly wested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the Government and revenues of Judia.

### The Secretary of Stata

Until the Beform Act of 1919 came into force the Serretary of State had the unqualified power of giving orders to every officer in India, including the Governor-General, and to superin including the covernor-General, and to spperin tend, direct and control all acts, operations and concerns relating to the government or Securitary of State with the Governor-General in Council to express statutory change was made, but Parliament ordained through the Joint Select Committee that in practice the con-ventions governing these relations should be modified, only in exceptional circumstances should be be called upon to intervene in matters of purely ladian interest where the Government and the Legislature of India are in agreement of the wide powers and duties still vested in the Secretary of State, many rest on his personal responsibility, others can be performed only in consultation with his Council, and for some of these the concurrence of a majority of the members of his Council voting at a meeting is required. The Act of 1919 greatly modified is required the act or 1919 greatly modified the rigidity of the Isw maintained for sixty years as to the relations of the Secretary of State with his Council, and he has fuller power than in the past to prescribe the manner in which husiness is to be transacted Though in practice the Council meets weekly (save iu vacation periods) this has ceased to be a statutory requirement, the law now providing that there shall be a meeting at least once in every mouth

### The India Council

The number of members of the Council was The number of members of the Council was a communice of indust anisat consisting or seven reduced by the Act to not less than cight and members of each House arrange profess fall of the communication of public advantage to be communicated. In seven reading a fall of the communication of public advantage to be communicated. In seven creating the seven received a communication of public advantage to be communicated.

Secretary of State in Council, and are subject to the ordinary Home Civil Service rules in all respects.

In the past the whole cost of the India Office has been borue by the revenues of India, except that the Home Government made certain cept that the Home Government made contain grants and remissions in lieu of a direct contri-bution amounting to £50,000 a year The total uct cost including pensions has been about £250,000 per annum In conformity with the spirit of the 1919 Act, an arrangement was made whereby the salary of the Secretary of State is placed on the Home estimates and the cost of the controlling and political functions exercised in Whitehall is also met from British revenues, while agency functions alone are chargeable to Indian revenues

### The High Commissionership

The financial readjustment has been accompanied by a highly important administrative change provided for by the Act, in the creation of a High Commissioner for India in the United Kingdom with necessary cetablishments. From October 1st, 1920, the late Sir William Meyer became the first High Commissioner, and took over courted of the purchase of Government Stores in England the accounts section connected, therewith, and the Indian Endentued the Students of the Indian Endentued Commissioner. The further development of the functions and powers of the High Commissioner have included such agency work as the payment of The financial readjustment has been accomincluded such agency work as the payment of Civil leave allowances and pensions, supervision Civil leave allowances and peaceum, supervision of 1 O 8 and Forest probationers after first appointment, the making of arrangements for conficers on deputation or study leave, repatriation of deputation or study leave, repatriation of deputation or study leave, repatriation of the publications, etc. The decical staff of the Stores Deputational has been staff of the Stores Deput off the Thames in Belvedere Road, Lambeth The High Commissioner and the rest of the staff

High Commissioner and the rest of the star transferred, have separate office secommodation at 42, 44 and 46, Growvenor Gardens, 5 W 1. Auother highly important change was the setting up by Parliament of a Joint Standing Committee on Indian affairs consisting of eleven

## The Indian States.

The area onclosed within the boundaries of India is 1,773,108 square miles, with a population of 315,182,837 of people—nearly one fifth of the human race. But of this total a very form of the human race. But of this total a very first of the state of the total a very first of the vary in size from petty states it is 152,827 variety of country and jurisdiction. They vary in size from petty states it is 128,221 to a variety of country and jurisdiction. They vary in size from petty states it is 128,221 to a variety of the very large to the vary first of the very large to the very large very large to the very large very lar

### Relations with the Paramount P wer

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise India, that it is impossible even to summarise them But broadly it may be said that as the British boundartes expanded, the states came under the Inducero of the Government and the rulers were confirmed in their posses stons. To this general policy however there was, for a brief period, an important departure During the regime of Lord Dahousic the Government Introduced what was called annexation through larse. That is to say, when there was no direct hir, the Government considered whether public interests would be considered whether public interests would be considered whether public interests would be secured by granting the right of adoption. Through the application are proposed to the proposed to the proposed to the proposed to the gross miscovern ment of its rulers. Then came the Mutin, It was followed by the transference of the dominions of the Bast India Company and the proposed to the proposed t toward the Indian States In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions, and while we will per mit no aggression on our dominions or our rights to be attempted with impunit, we shall allow no encroachments on those of others We shall respect the rights dignity and honour of the Native Princes as our own, and we desire that they, as well as our own subjects, as the standard of the Native Princes as our own subjects, as the standard of the stand We shall respect the rights dignity and honour

sessions On many oceasions the Government of India has had to tolerence, to prevent gross misgovernment, or to carry on the administration during a iong minority, but always with the undeviating intention of restoring the territories as soon as the necessity for inter-cention passed Almost all states possess the right of adoption in default of helps

### Rights of Indian States.

The right and solutions of the ladius states as thus described by the Imperia Gazetteer The Chiefs have, without exception, gained protection against changers from without and a guarantee that the protector will respect their rights as mirrs. The Para mount Power sets for them in relation to force will respect their rights as mirrs. The Para mount Power sets for them in relation to force of the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control capting to an Indian State must be handed ever to it by its authorities they cannot be arrested by the police of British India without the permission of the ruler of the State The Indian Princes have therefore a sustenian power which the same time scruyulonaly respects their ternal authority. The sucreal as lottevenes when the internal peace of their territories is seriously threatmed. Finally they part is seriously threatmed. Finally they part is administration of its own dominions, and thus secure a share in the commerce, the rail ways, the ports, and the markets of British India. Except in have cased applied to may fittled in the property of the public of the public offices of the British Guita dinburk they levy their own customs and their subjects are admitted to most the public offices of the British Gortenment

### Obligations of Indian States

toward the Indian States In the historic toward the Indian States are Proclamation of Queen Victoria it was set out that "We desire no extension of our pressal triperiorial possessions, and while we will per mit no aggression on our dominions or our rights to be attempted with impurit, we shall allow no encroachiments on those of others of the Native Princes as our own, and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government. Since the issue of that proclamation there has been encoractement on the area moder Johnson of the British every question of dispute with the subject of the Richish every question of dispute with the subject of the British every question of dispute with the proclamation there has been encoractement on the area moder Johnson of the Richish every question of dispute with the process of the proclamation there has been on the subject of the British every question of dispute with the process of the process

ning set forth in his minute of 1860, that the aing set forth in his minute of 1860, that the Government of india is not presided from stepping in to set right such serious abuses in a Maitre Government as may threaten any part of the country with anarchy or disturb-ance, nor from assuming temporary charge of a Naitre State whea there thall be sufficient reason to do so "Of this necessity the Gov-ernor-General in Council is the sofe justice subject to the control of Parliament. Where subject to the control of Parliament Wheelers the law of British India confers intridiction over British subjects or other specified persons in foreign feeritory, that power is excetised by the British courts which possess it The subjects of European Powers and the United States are on the same footing Where cancinents with in an Indian State, jurisdiction both over the cancinness and the overline of the continuence of the cancinness and the overliness of the subrelia power station is exercised by the subrelia power.

### Political Officers.

The powers of the British Government are exercised through Political Officers who, a rule, reside in the states themselves. In the states the Government is represented by a Boeldent, in groups of states by an Agent to the Governor-General, assisted by local to the Governor-General, assisted by focal Bosidents or Political Agenta These Officers form the sole channel of communication between the lodian States and the Government of Isdia and its Foreign Department, with Indian States They are expected to advise and assist the Bulling Chiefs in any administrative or other matters on which they navy be consuited Political Agents are similarly temployed in the larger States ander the Provincial Governments but in the petty states exactored over British India the duties of the nuactors over primin latis the duties of the Agent are usually entrusted to the Collector or Commessioner in whose district they lie All questions relating to the Indian States are under the special supervision of the Su preme Government, and in the personal charge of the Colvegor Comment. of the Governor General

### Closer Partnership

Events have tended gradually to draw the Paramount Power and the Indian States into

these ways there has been a steady rise in the character of the administration of the Indian States, approximating more closely to the British ideal Most of the Indian States have also come forward to bear their share in the burden of Imperial defence Following on the spontaneous offer of military assistance when war with Russia appeared to be invitable over the Penighth incident in 1886, the states have raised as portion of their forces that the property of the property of the Penighth Indian Company (Penight Penight Penig states have raised a portion of their forces up to the standard of the troops in the Indian Army These were until recently termed Imperial matter than the state of the state Prince and Princess of Wases in 1905-08 and of the King and Queen in 1911-12 have tended to seal the devotion of the great feudatories to the Crown The improvement in the so the trown The improvement in the standard of native rule has also permitted the Government of India largely to reduce the degree of interference in the internal affairs of the Indian States. The new polloy was authoritatively laid down by Lord Minto, the theat Vicercy, in a speech at Udalpur in 1909, when he sail —

'Our policy is with rare exceptions, one of non interference in the internal affairs of the Native State. But in guaranteeing their internal independence and in undertaking their protection against external aggression in naturally follows that the Imperial Government has assumed a certain tegres of responsibility for the general scandings of their administration of the control o Events have tended gradually to draw the Paramount Power and the indian State into closer harmony Special care has been devoted to the education of the sons of Ruling Chiefa, first by the employment of tations, and afterwards by the establishment of special colleges for the purpose. These are now established at Ajmere, Enjied, Indere and Lahore. The imperial Calcet Corps, whose head Lahore. The imperial Calcet Corps, whose head Lahore. The imperial characters But the hore. Three greet Hindu dynasties followed, those of the Fallavas, Chalukyas and Yadavas, In 1994 the irruption of the Mahomedans under Alexud-dia Khiliji commenced, and thence forward till the time of Aurungshet, the history of the State is a contrased story of trangets against the first of the Commenced and the story of the State is a contrased story of trangets against after the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages of the fall in languages of the State is a first the fall in languages of the State is a first the fall in languages. And John hor over the fall in languages, and thus founded the present House. Dering the struggle between the British and the French for mastery in Rolls, the Nisam finally threw in his forthermort of the number of the state is trong. It is the state of the State is tronged to the fall in the state of the State is tronged to the fall in the State is the state of the State is tronged to the state of the State is tronged to the fall in the State is the State in the State is the State in the State in the State in the State is the State in the S Fatch Jung, G.C.S.L.

THE BERIES.—A most important event in the history of the State occurred in November 1902, when the Assigned Districts of Berar the history of the State occurred in November 1002, when the Assigned Districts of Berar were leased in perpetuity to the British Government These districts has been administered by the British Governments on behalf of the Company of the State bad contingent on its old footing as a separate force was interpollers and unncoessity, and that similarly the sedministration of Blerar and the point of view of the Nisam the precarious and fluctuating nature of the surplus was finan-cially inconviente. The agreement of 1902 re-affirmed His Righness sovereignty over perar, which ingless of being indistillely 'assigned to the Government of India, we have been precared to the surplus was the con-tinuous properties. leased in perpetuity to an annual reuse or zo lashs (nearly £107,000), the restal is for the present charged with an annual debit towards the repayment of losses made by the Govern-ment of India. The Government of India were at the same time authorised to admitster Berar in such manner as they might think desirable, and to redistribute, reduce, re-organise desirable, and to redistribute, reduce, re-organise and control the Hyderabad Contingent, due provision being made as stipulated in the treaty of 1863, for the protection of His Highness' dominions. In accordance with this agreement the Contingent ceased in March 1868 to be a separate force and was re-organised and redistributed as an integral part of the Indian Army, and in October 1908 Berar was transferred to the administration of the Chief Commissioner of the Central Provinces.

ADRIEMPERATION -- The Nizam is supreme in the State and exercises the power of life and death once his subjects. The form of government was changed in 1919, an Executive Created being changed in 1919, an Executive Created being changed in 1919, and Executive Created being changed by the 191

FIRANCE —After many violentindes, the financial position of the State is strong. For the year 1920-21 receipts amounted to Es. 504 lakhe and expenditure to Ra, 428 lakha,

lakbs and expenditure to Rs. 488 lakbs.
PanDUCTION AND INDUSTRY—The principal industry of the State is agriculture, which maintains 771 per cent of the population. The common system of land tenure is ryoward as no reliable figures are available to above the population. The common system of land tenure is ryoward to the provincial properties of the provincial provinc on the growth of cotton, and comprise three spinning and weaving mills and ginning and pressing factories in the cotton tracts.

COMMUNICATIONS -One hundred and thirty-COMMUNICATIONS—One hundred and thirty-even miles of the broad gauge line from Bonnhay to Madras traverse the State. At Wadi, not this section, the broad gauge system of the running East to Warangal and Bouth-East toward Beawade, a total inegation of South-Eastward Beawade, a total inegation of South-Eastwar Ins. Rorth-West to Manmad on the Great Indian Pulminuis Company's system of South-Eastward South-ter and South-Eastward South-ter and South-Eastward South-E as far as Gadwal, a-distance of 100 miles. There are thus 471 miles of broad gauge and 500-) or metre in the State. The Barai Light Baliway owns a short extension to Latur The roads are generally inferior

generally interest.

military rank under the Peshwa Baji Rac-ia 1786 the Peshwa granted deeds to Puar, Holker and Scindia, empowering them to levy "Chauth" and "Sardesmukhi" and retain half the amount for payment to their troops. In 1736 Banoji Scindia accompanied Baji Rao to Delhi where he and Mulhar Rao Holker distinvuished themselves in military exploits Ranoji fixed his headquarters at the ancient city of Ujjain, which for the time became the Capital of the Scindia dominions. During the time of Mahadji Scindia and Dowlat Bao Scindia Gwa-Mahadil Scindis and Dowlat Bao Scindia Gwa-ine played an important part in shaping the interplayed an important part in shaping the property of the state of the hands of the British in 1780, reverses which led to the treaty of Sabai (1782), Scindia a power trunained unbroken. For the first time he was now recognized by the British as an independ out sovereign and not as a vassed of the Feshwa.

In 1790 his power was firmly established in elhi While he was indulging ambitious hopes Delhi he fell a prey to fever which ended his remark ahle career on 12th February, 1794 Himself a military genius, Mahadji Scindia's armies reach ed the zenith of their glory under the disciplined training of the celebrated French adventurer— De Boigne Mahadii was moceeded by his grand nephew Daulat Rao in whose service Perron, a Military Commander of great renown played a leading part. The strength of Scindia's Army was, however, considerably weakened by the reverses, sustained at Ahmednager, Assaye, Astrgarh and Laswari Daulat Rao Scindia died in 1827 Till his death he remained in undis-puted possession of almost all the territory which belonged to him in 1805

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his dombse in 1843 intrigue and party spirit were rampant and the Army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpore and Pannihar Jankoji Rao was succeeded by Jiaji Rao, whose adherence to the British cause during the dark daye of Mutiny, when his own troops de serted him, was unshakable In 1861 he was ore ated a Knight Grand Commander of the Most Ex alted Order of the Star of India and in 1877 was made a Councillor of the Empress Subsequently he received other titles and entered interesting and entered into entry he received other titles and entered interesting for mutual exchange of territories with the British Government. He died on the 20th June 1886 and was succeeded by his son Maharaja Madho Rao Scindia.

The present ruler is Lieutenant-General H H The present ruler is Lieutenant-General H H Maharaja Si Madho Rao Schula, Alijah Baha dur, so vo, so.s.i, o.s.s., a D C to the King Ho succeeded in 1886 and obtained powers in 1894 In 1901 he went to China during the war, he holds the rank of homorary Lieutenant General of the Ethia Army and the honorary legrees of LED, Cambridge, and Do.s., Oxon He is also a Donat of the Order of St John of Strusslein in England The ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India

Gwalior Light Railway runs for 250 miles from Gwalior to Sheepur and Gwaller to Ekrind, from Gwaller to Sheopur and from Gwaller to Shivpur. The main industries are sotton ginning, which is done all over the work, etc. The State maintains three regiments of Imperial Service Cavaby, two battalions of Imperial Service Cavaby, two battalions of Imperial Service Infantry and a transport corps. Lashkar, the Capital city, is two miles to the south of the ancient city; and the fort of Gwalior Annual income about 2 crores and expenditure about 175 lakhs.

Indere —The founder of the House of the Holkars of Indore was Malhar Rao Holkar, born in 1683 His solderly qualities brought litm to the frost under the Pealwa, who took him into his service and employed him for his conquests When the Marakha power was awakened at the bettle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a military commander. He was succeeded by his grandson On his death with ont issue his mother Ahilya Bai became the Ruler and her administration is still tooked upon with admiration and reverence as that model ruler She was succeeded by Tukoji Holkar who indeed had been associated with her to carry the military administration and had in the course of it, distinguished himself in va rious battles Tukoji was succeeded by Kashi rao, who was supplanted by Jeswant Rao, his step brother, a person of remarkable daring and strategy as exhibited in a number of engage ments in which be had taken part. The brilli ant success he obtained at the battle of Poona against the combined armies of Peshwa and Scindia made him a dictator of Poons for some time and he declared in consequence the inde-pendence of Holkar State During 1804-5 he had a protracted war with the British, closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights Jaswant Rao showed signs of insanity from 1808 onwards and snc cumbed to that malady in 1811, when he was succeeded by his minor son Malhar Rao II During the Regency which followed, the power of the State was weakened by various causes the most important of which was the refractory conduct of the Military Commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these commanders, with Featura in 1817, some of these commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Peatwa, while the Regent, mother and her Ministers were for friendalip with the British Army and this rease hattle between the British Army and this reductory portion of the Holkar Army while reluctory portion of the Holkar Army while reluctory portion of the Holkar had delay. Holkar had to come to terms and to cede extensive territo-ries and rights over the Bajput Princes to the Pres and righte over the happen rinces to the British, but the internal soversignty remained unaffected The Treaty of 1818 which embodied these provisions still regulates the relations between the British Government and the State

Majosty Maharajadhiraja Tribisubasa Bir Bikram Jung Bahadur Shum Shere Jung, accended the throne on the death of his accended the throne on the death of his country is the Minister who, while enjoying complete monopoly of power, couples with his official rank the exalted title of Maharaja. Next to him comes the Commander-in-Chief, who ordinarily succeeds to the office of Minister

The present Minister at the head of affairs of Nepal is Maharaja Sir Chandra Shum Shere Jung Bahadur Bana, 40 cs. 40 cs.

Bice, wheat and maise form the chief crops in the low lands. Mineral wealth is supposed to be the low lands. Mineral wealth is supposed to be great, but, like other sources of revenue, has not been developed. Communications in the Star of rupees per annum The standing army is estimated at 45,000, the high posts in it being filled by relations of the Minister. The State is of considerable archeological interest and many of the sites connected with scene of Buddha's life have been identified in it by the remains of Inscribed pillars

British Envoy -(Offig ) W H J Wilkinson,

### NORTH-WEST FRONTIER STATES.

The Indian states of the North West dered in 1895. A war was declared by Umra Frontier Frovinces are Amb. Chitzat. Bit that and Fhulers The total area is about the Agent of Glight, was a state of the Agent of Glight, which was the Agent of Glight, was a state of of Glight of Glight and Glight of G that of Phulera is unknown

Amb —Is only a village on the western Bank of the Indus in Independent Tanawala.

Chitral —Rans from Dir to the south of the Hinda Kush range in the north, and has an ares of about 4,500 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with tits neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establish ment of a political agency in Glight, the ruler of Chitral received an annual subsidy from the British Government That subsidy was increased two years later on condition that the ruler, Amam ui Mulk, accepted the advice of the Bri tish Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Risam-ul-Mulk was succession. The eldest son Nizam-ul-Hulk was Polytical Apent for Dir, Swat and Chitral recognised by Government, but he was mur-

dered in 1890. A war was declared by Umra kban of Jandul and Dir against the infidels and the Agent at Gligit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched

The three valleys of which the State consists are extremely fettle and continuously cultivated. The internal administration of the country is conducted by His Highness Sir Shnjaul-mulk, #01#, the Mehtar of Chitral, and the foreign policy is regulated by the Political agent at Malakand

Dir -The territories of this State, about 5,000 square miles in area, include the country drained by the Panjkora and its affluents down drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overload of the country, ciacoling allegiance from the petty chiefs of the class. Dir is mainly held by Yasufasi Pathans, the old non-Pathan inhabi-tants being now confined to the npper portion of the Panjkora Valley hown as the Bashkar

### STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency instance 5 Cookin represent ancient Mindu dynamics. In the chiefain miles, of the chiefain miles, of there its States of Transpore and called the Toulinan, Bangauspails and Sander,

Name.	Area sq miles.	Popula- tion.	Gross Revenue in lakis of rupees.
Travancore	7,625	4,006,062	200-79

The State maintains a Polite force of 208. The principal products are cotton, wheat and grain. The capital is Radinapur fown, a complete father deemire. for North rn Gujarat and Cutch

#### INDIAN STATES UNDER LOCAL GOVERNMENTS

More than a half of the total number of the very various units counted as Indian States in India are under the Government of Bombay The characteristic feature of the Bombav States is the great number of petty principali-ties, the peninsula of Kathiawar alone contalus nearly two bundred separate States The recognition of these innumerable jurisdic tions is due to the circumstance that the early Bomhay administrators were induced to treat the de facto exercise of civil and criminal juris diction by a landholder as carrying with it a quasi-sovereign status. As the rule of suc occasion by primogeniture applies only to the larger principalities, the minor States are con tinually suffering disintegration. In Bombay as in Central India, there are to be found every where the traces of disintegration and disorder wance the traces of disintegration and disorder left by the offsteenth century. In no part of the left by the offsteenth century. In no part of the left by the offsteenth century. In operation is such as the control of the district of principal is such as the control of the district of the district between the control of the control o

sinian admirals of the Deccan flects, still remain A few aboriginal chiefs Bhits or Kolis, exer-oise an enfeebled authority in the Dangs and the billy country that fringes the Mahi and the Narbada rivers

The control of the Bombay Government is exercised through Political Agents, whose positions and duties vary greatly In some positions and duties vary greatly In some of the more important States their functions are confined to the giving of advice and the exercise of a general surveillance, in other cases they are invested with an actual share in the administration, while States whose in the administration, while States whose rulers are minors—and the number of these is always large—are directly managed by Government officers Some of the States are subordinate to other States and not in direct relations with the British Government, in

#### Political Agent J W Smyth, 108 Administrator V K Namioshi

Kolaba Agency — This Agency includes the State of Janjira in the Konkan, a country covered with spurs and hill ranges and mnry intersected by creeks and backwaters The ruling family is said to be descended from an Ahyssinian in the service of one of the Nixam Shahi Kings of Ahmednagar at the end of the Sham kings of anmediagar at the end of the fifteenth century. The most noticeable point in its history is the successful resistance that it alone, of all the States of Western India, made against the determined attacks of the Marathas The British on succeeding the Marathas as masters of the Konkan, refrained from interfering in the internal administration irm interfering in the internal administration of the State The chief is a 5mni Mahomedan, by race a Sidi or Abyasinian, with a title of control of the State of internal affairs. About that year the mal-administration of the chief, especially in matters of police and criminal justice, became flagrant, Political Agent.—R G Gordon, I Cs., in police and criminal patice, became flagrant, those branches of administration were in concentration and fill part of the pa Folitical Agent The last ruler, H H Nawab for the losses which British merchants had Bid Bir Ahmed Khan, Goll & Ided on 2nd May sustained since 1786, and to permit the establishment in factories at Malyan and Kothapur 1922, and was succeeded by his son Bidi Muham mad Khan, horn on the 7th March 1914 The area of the State is 377 square miles, and the population 98,530 The average revenue is 7 lakhs The State maintains an irregular military The State maintains an irregular military force of 236 The capital is Morud on the mainland, the name of Janjira being retained by the island fort oppolie The Chief is entitled to advantle salute of 11 guns In recognition of services rendered in connection with the war the last ruler s salute was raised on the 1st January 1918 to 13 guns personal and 13 permanent within the limits of his own State from the 1st January 1921

Kolhapur Agency — Kolhapur is a State with an area of 3,217 square miles and popula with an area of 3,51 regular mines and popular tion of 838,726 Subordinate to Kolhapur are nine feudatories, of which the following five are important Vishalgarh, Bayda, Kagai (senior), Kapsi and Ichalkaranji. The ruling house traces its descent from a younger son of a come traces its discent from a younger son of Shivali, founder of the Maratha power The prevalence of piracy from the Kolhapur port of Malvan compelied the Bombay Government to send expeditions against Kolhapur in 1765, and again in 1792, when the Bala agreed to give compensation

Internal dissersions and wars with neighbouring States gradually weakened the power of Kolhapur in 1812 a treaty was concluded with the British Government, by which, in with the British tovernment, by Which, in return for the cession of certain ports, the Knihapur Raja was guaranteed against the attacks of foreign powers while on his park he engaged to abstain from hostilities with niter States, and to refer all disputes to the arbitration of the British Government The principal articles of production are rice, jawar and sugar cane and the manufactures are and sugar cane and the manufactures are cotarion of the cotton and woollen cloths, pottery and hard ware. The State pays no tribute, and supports a military force of 690. The nine feudatory estates are administered by their holders, except in the case of two whose holders are minors Kolhapur proper is divided into five pethas or talukas and four mahals and is managed by the Maharaja who has full powers of life and death. The Southern Mahratta, Railway passes through the State and is connected with Koihapur City hy a liue which is the property of the State

Benares	875	859,574	23

kanal, owe their origin to favourites or dis-tinguished servants of the ruling sovereigns of Orissa The State of Ranpur is believed to be the most ancient, the list of its chiefs covnee most ancient, the list of its chiefs covering a period of over \$,500 years. It is noteworthy that this family is of Khond origin, and furnishes the only known instance in which, amid many vicisatudes, the supermacy of the original settlers has remained in tact. The States acknowledged the superainty of the paramount power and were under an implied obligation to render assistance in an impage on ongation to reduce assistance in resisting invaders, but in other respects neither the ancient kings of Orissa nor their successors, the Mughals and Marathas, ever interfered with their internal administration. All the States have annals of the dynasties that have States have annals or the quasicontended over them, but they are made up in most part of legend and fiction and long genealogical tables of doubtful accuracy, and contain the few few feetures of general interest. The tain very few features of general interest British conquest of Orless from the Marathas, which took place in 1803, was immediately followed by the submission of ten of the Tribu tary States, the chiefs of which were the first to onter into treaty engagements.

The States have formed the subject of frequent legislation of a special character. They were taken over from the Marathas in 1808 with the rest of Orissa, hut, as they had always been tributary states rather than regular districts of the native governments, they were exempted from the operation of the general regulation system This was on the ground of expediency only and it was held that there was nothing in the nature of British relations with the In the nature of British relations with the proprietors that would preclude their being brought under the ordinary jurisdiction of the British cours, if that should ever be found advisable In 1882 it was held that the States did not form part of British judia and this was accepted by the Secretary of State. The staple crop in three States is rice Zhe.

forcets in them were at one time among the best timber producing tracts in India, but until lately forcet conservancy was practically unknown The States have formed the subunknown The States have formed the sub-ject of frequent legislation of a special character. The relations with the British Government are governed mainly by the sanads granted in almilar terms to all the chiefs in 1894. They contain ten clauses reciting the rights, privileges, duties and obligations of the chiefs, providing for the settlement of boundary disputes, and indicating the nature and extent of the control of the Political Agent and Commissioner Political Agent and Commissioner C L Philip

on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Raja has full powers within the State. A unit of Imperial Service Sappers is maintained. The capital is Tehri, the summer capital being Prataphagar, 8,000 feet above the sea level

4gent to the Governor-General The Governor of the U P of Agra and Oudh.

Benares .- The founder of the ruling family of Benares was one Mansa Ram, who entered the service of the Governor of Benares under the Nawab of Oudh in the early eighteenth century His son, Balvant Singh conquered the neighbouring countries and created s big state out of them over which he ruled till 1770. Raja Chet Singh succeeded him, but was ex-pelled by Warren Hastings in 1781 In 1794, owing to the mal administration of the estates which had accumulated under the Raja of Benares an agreement was concluded by which the lands held by the Raja in his own right were separated from the rest of the province of which he was simply administrator. The direct control of the latter was assumed by the Government, and an annual income of diverge dovernment, and an annal moons of one lash of rupes was assued to the Raja while the former constituted the Domains the Wilhin the Domains the Raja had revenue powers similar to those of a Collector in a British District, which were delegated to certain of his own officials There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Beparas. On the 1st of April 10:1 these Domains became a State consisting of the pargament of the parameter of the conditions, of which the most im-portant are the maintenance of all rights acquired under laws in force prior to the rights acquired under tasks in tote prior of transfer, the reservation to Government of the centrol of the postal and telegraph systems, of pleasry criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with excise The present ruler is Lieut Colonel H H Maharaja Sir Prabhn Narayan Bingh

Bahawalpur -This State, which is about 800 miles in length and about 40 miles wide, Solv hales in length and about so make wice, is divided lengthwise into three great strips. Of those the first is a part of the Great Indian Desert, the central tract is chiefly desert, not capable of cultivation, identical with the Bar or Fat nplands of the Western Punjab, and the third, a fertile alluvial tract in the river valley, is called the Sind The ruling family claims descent from the Abbaide Khalifas of The tribe originally came from Bind, and assumed independence during the dis-memberment of the Durrani empire. Ou the rise of Ranjit Singh, the Nawab made several applications to the British Government for an engagement of protection These, however, were declined, although the Treaty of Labore in 1800, whereby Ranjit Singh was confined to the right bank of the Sutlei, in reality effected his object. The first treaty with Bahawalpur was negotiated in 1838, the year after the treaty with Banjit Singh for regulating traffic on the Indus It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej During the first Aighan War the Nawab rendered as-sistance to the British and was rewarded by a grant of territory and life pension. On his death the succession was disputed and for a time the State was in the hands of the British The present Nawab is Capt H H Ruku-ud-Dania. Nasrat-i Jang, Hafix-ul-Mulk, Nawab Dania, Nasrat-i Jang, Hafix-ul-Mulk, Nawa Sir Sadiq Mohamad Khan Bahadur Abasi V or casely monama. Anab sanadur Aban V. E 0 VO, who was born in 1904 and succeeded in 1907 During his minority the State was managed by a Council of Regency which coased to exist in March 1924, when H. H. the Nawab was invested with full power His Highness is now assisted in the administration of his State by four Ministers and a Chief Minister, Major Nawab Malik Talile Mehde Kban, 0,8 k O.BE. The chief crops are wheat, rice and millet The Lahore-Karachi branch of the Northwestern State Ballway passes through the State Ballway passes through the State The State supports an Imperial Seveter combined Mounted Rifes Infanty in addition to other troops. The capital is Bahawaipur, a walled town built in 1748

Agent to the Governor-General, Punjab States -Lieutenant-Colonel A B Minchin, C.L.E., I.A

Chamba —This State is neclesed on the west and north by Kashmir, on the east and south by the British districts of Kaspra and Gurdappra, and it is shut in on almost every side by lofty hill ranges. The whole country is monatalmons and is a swortner record of opper plate macriptions from which its chronicles have been completely considered the control of copper plate macriptions from which its chronicles have been completely.

caronauses nave been completed Founded probably in the sixth century by Marti, a Surajbansi Rajpot, who built Brahmanura, the modern Barmanur, Chamba was ex tendeds by Merri Varma (68°) and the town of chamba built by Sahli Varma about 930. The state maintained its independence, until the Morhal conquest of India.

Faridket —The ruling family of this sandy level tract of land belongs to the Sidhu-

the same stock as the Phulkian houses. Their occupation of Faridket and Kot Kapura dates from the time of Akbar, though quarrels with the surrounding Sikh States and internal dissensions have greatly reduced the patrimony

The present Builing Prince, Farrand i Saadat Nishan Hasarai-Kassar I Yind Brar Bans Raja Har Indar Singh Bahadur was born in 1915 and succeeded his father in 1919 Under the orders mar indar Singin bankonr was down in 1915 and succeeded his taker in 1919. Under the orders of the Government of India the saministration of the State has been entrusted to a Council of Administration consisting of a President Sardar Bankour Sardar India: Singih B A and four member The State has an area of Saguaro miles with a population of 150,01 and has an annual income of 18 lakhs Ruler is entitled to a sainte of 11 gans and a visit and return visit from the Viceroy The State Forces consist of State Sappers and Household Troops (Cavalry and Infantry)

Jind -Jind is one of the three Phulkian States (the other two being Patials and Nabha) Its area is 1,268 square miles, with a popula tion of 308,183 souls and an income of 25 lakhs

tion or cocycle some and an income of 125 lating. The history of Jind as separate State dates from 1763, when Eaja Gajast Singh, the maternal sread-ean of the famous Phu, established his principality. He was succeeded by Raja Bhag Bingh, who greatly sensited Lord Lake in 1806. His grand-son Eaja Sangat S'ngh was succeeded by the nearest male collisteral Kaja Sarup Singh by the nearest male collisteral Kaja Sarup Singh in 1837 In the crists of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 500 square was rewarded with a grant of nearly condequate miles of land, known as Dadri territory. He was succeeded by his son Maharaja Laghbir Singh, who gave hish to the British Government on the occasion of Kuka outbreak (1872) and the Rud Afghan. War (1878) The present the Rud Afghan. Var (1878) The present ruler Maharaja Ranbir Singh was born in 1879 succeeded in 1887, and invested with full powers in 1899 The State rendered exemplary services in the Great European War It supplied 8,673 men to the Indian Army and plied 8,878 men to the Indian Army and Imperial Service Troops and doubled the strength its Imperial Service Infantry The total contribution amounted to nearly 80 lakks, in gifts of cash, materials, animals and loan His Highness enjoys a sainte of 15 guns The capital is Sangrur, which is connected by a State Hallway with the North-Western Rallway The principal executive Officer of the State is called Chief Minister

Ruler — Lieut - Coi His Highness Farzand I Dilband Rasikh ui Itikad, Danist-i inglishla Raja-i-Rajgan Maharaja Bir Ranbir Singh Rajendra Bahadur G C I E , K C S I , etc

Kapurthala -This State consists of three detached pieces of territory in the great plain of the Juliundur Doeb The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans-Sutlei and also in the Bari Doab In the latter lies the village of Ahlu. whence the family springs, and from which it takes the name of Ahlnwalia When the Jul lindur Doab came under the dominion of the British Government in 1846, the estates north of the Study even maintained in the interest and a study of the premier hill-State of the Penjah promession of the Ahinvalla Eats, conditional jving in the upper reachest of twe Beas which on his paying a commutation in each for the drains nearly all its area. It has an interesting management in which he had previously history of considerable length which Ranky remit-

been bound to Ranjit Singh. The Bari Doab estates are held by the head of the house as a jaghir in perpetuity, the olvil and police juris-diction remaining in the hands of the British diction femaning in the manus of the british authorities. For good services during the Mutiny, the present Maharaja si grandiather was rewarded with a grant of other States in Outh The present Ruler is H. H. Maharaja Sir Jagatijit Singh Rahadur, 6 0.8 1, 6 0.1 8, who was born in 1872 and succeeded in 1877 granted the title of Maharaja as an hereditary distinction in 1911 The rulers of Kapur-thala are Sikhs and claim descent from Rana usus are sikns and claim descent from Bana Kapur, a member of the Rejput House of Jaksaimer Only a small proportion of the population however are Sikis, the majority being Mahomedaus The chief crops are wheat, sram, malke, oction and sugarcane The town of Sultanpur in Alb State is Amons for hand of Sultanpur in Alb State is Amons for hand with the superior of Sultanpur in Albana State is Amons for hand the superior of Sultanpur in Albana State is Amons for hand the superior of Sultanpur in Albana State is a superior of Sultanpur in Albana State is a superior of Sultanpur in Albana State is a superior of Sultanpur in Albana State in Sultanpur in Albana State is a superior of Sultanpur in Albana State in Sultanpur in Sultanpur in Albana State in Sultanpur in Sultanpu Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it A branch railway from Juliundur City to Jerozepur passes through the State thals maintains a battalion of Imperial Service troops and a small force of local troops. The capital is Kapurthala

The Southern Shan States are served by the Burma Railways branch line Thazi to Heho (37 miles) which it is proposed to extend abortly to Tayaw in the Yawnghue plain

Tannggyi, the headquarters of the Southern

Shan States, is connected with Thasi hy a well-graded motor road. The States vary much in size and importance. The largest State is Kengtuag with an area of 12,400 square miles and population 208,755 The smallest State is Namtok with an area of 14 square miles and

The Sawhwas of Kengtung, Hsipaw and Yawnghwe and Mongnai have salutes of nine gune while the Tawngpeng Sawhwa has a personal sainte of the same number

## Administration

Under the Burma Laws Act, 1898, the Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the sanad of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British India Tho customary law may he modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and appoint of the state of proceedings of such officers. The Chiefe are bound by their sanads to follow the advice of the Superintendents appointed hat subject to certain modifications which have been made in the customary law relating to oriminal and civil justice have more or less maintained the semi independent status which was found existing at the annexation of Upper Burma

In 1920, Sir Reginald Craddock, Lieutenant-Governor of Burma, proposed a scheme for the sanotion of the Secretary of State under which the Chiefs of the Northern and Sonthern Shan States have agreed to federalise the departpreviously largely dependent on contributions from the Provincial Funds Under this sohome no interference is contemplated in the internal management of the States and the Chiefs continue to collect their taxes and he responsible for law and order, maintain Courts for the disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superin-tendents But the Federation is responsible for the centralised Departments of Public Works, Medical, Forests, Education, Agriculture and to a small extent Police In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Proviocial Government surrenders to the Federation all provincial revenue previously derived from the States and makes an annual contribution to enable it to maintain its

services at the same degree of efficiency formerly enjoyed. The Federation on the other hand pays a fixed proportion of the revenue to the Provincial Treasury as tribute in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub entity of the Burma Government, is self-contained and responsible for its own progress. The Chiefs express their views on Federal and general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawhwa and four elected representatives of the lesser Chiefs The Superintendents and the Commissioner of the North-East Frontier Division to whom the North-Rast Frontier Invision has been entrusted are ex-off-to members of the Cunnel The scheme was sanctioned and brought into force with effect from Cetober 1922 The first meeting of the Council of Chiefs was formally opened by His Excellency the Governor Sir Spencer Harcourt Butler, Golf, K.C.S.I., 108, in March 1923

Karenni
This district which formerly consisted of five States now consists of three as two have been amalgamated with others. It has a total area of 4,280 square miles and a population of 63,860. It lies on the south of the Southern Shan States between Slam and the British district of Tonngoo The largest State is Kantarawadi Toungoo The largest State is Kantarawadi with en area of 3,000 square miles and a population of 38,630 and a revenue of nearly 1½ lakins of rupees More than half of the inhabitants are Red Karens An Assistant Political Officer is post, dat Lolkaw stubject to the supervision of the Superintendent, Southern Shan States, who excitoss in practice much the same control over the Chiefs as is excited in the Shan States though commally they are more independent than their Shan acighhours Mineral and forest rights however in Kerenni, belong to the Chiefs and not to the Government In the past substantial contributioos from Provincial revenues have been made to the karenni Chiefs for education and medical service The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing to

The principal wealth of the country used to be in ite test timber and a large silen popula-tion was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear

11 guns.

The administration of the State is now conducted by H H the Maharaja assisted by a ducted by H H the Maharaja assisted by a Darbar, which consists of a President, who is a member of the Indian Civil Service. his services being lent to the State by the Assam Government, three ordinary and three additional members, who are all Manipuris The staple crop of the country is rice Forests of various kinds

sover the great part of the mountain ranges Khasi and Jaintis Hills —These pett Enast and Jainine Hills These aprix chiefdips, a chiefdips, and the state of a boat 3,000 in minimum and a population of 136,000, are included under the Government of Assam Most of the States have treates or engagement with the British Government. The largest of them is Khyrim, the amaliest

He is entitled to a salute of is Nonglwai, which has a population of 246 Most of them are ruled by a Chief on Stem the Steake is now con controlled The succession was originally The succession was originally constituted from the heads of certain clans but in recent the elective basis. The constitution of a Khasi State has always been of a very democratic character, a Siem exercising but little control over his people. Among many of the north east frontier tribes there is little security of life and property, and the people are compelled to live in large villages on sites selected for their defensive capabilities. The Khasis seem, however, to have been less dis-tracted by internal warfare, and the villages, as a rule, are small

## UNDER THE GOVERNMENT OF THE CENTRAL PROVINCES.

The Central Provinces include fifteen fenda tory States subordinate to the Government with an area of \$1,178 square miles and a popu lation of 3,086,900 One of the States, Makral, lies within Hoshangabad District, the remainder are situated in the Chhattisgarb Divi alon, to the different districts of which they were formerly attached. Their relations with Government are controlled by a Political Agent The States vary greatly in size and importance Sakti, the smallest, having an area of 188 square miles and Bastar, the largest, an area of 1802 square miles They are administered by here ditary chiefs, who hold on conditions of loyalty and good revenuents at forth in resease and and good government set forth in patents and acknowledgments of fealty, but are nominally free from direct interference save in the case of sentences of death, which require His Excellency the Governor's con-rmation But, as a fact, the Government has exercised a very large amount of control, owing mainly to the frequency with which the States have been taken under direct management, because of either the minority or the misconduct of the chief

The States pay a tribute to Government which amounts in the aggregate to about 21 lakha

Statistics relating to the chief States are contained in the following table -

State	Ares	Popula- tion 1921	Revenue (approxi mate) in Lakhs
Bastar Jashpur Kanker Khatragarh Nandgaon Raigash Sirguja	8q Miles. 18 062 1,968 1,481 981 871 1,486 6,055	464,407 154,156 124,928 124,008 147,906 241,634 877,679	8 10 5 8
Right other States	5,377	432,182	10
Total	31,176	2,066,900	44

13,062 square miles and a population of 483,810 The family of the Raja is very ancient, and isstated to belong to the Rajputs of the Lunar race. Up to the time of the Marsthas, Bastar occupied an almost independent position, but a tribute was imposed on it by the Nagpur government in the eighteenth century At this period the constant fends between Bastar and the neighbouring State of Jeypore in Madras kept the country for many years in a state of anarchy The chief object of contention was anarchy The chief object of contention was the Kotpad tract, which had originally belonged to Bastar, but had been ceded in return for assistance given by Joppere to one of the Bastar chiefs during some family discen-sions. The Central Provinces Administrasions The Central Provinces auministra-tion finally made this over to Jeypore in 1885 on condition of payment of tribute of Es 3,000, two thirds of which sum was remitted from the amount payable by Bastar By virtue of this arrangement the tribute of Bastar was, until recently, reduced to a nominal amount The cultivation of the State is extremely sparse, Blee is the most important crop The State is Rice is the most important crop. The State is under Government Management, The Superin-tendent of the State (Mr W A Turner, J P) is an extra Assistant Commissioner of the Central Provinces oo deputation who has two Assistants under him After a recent period of disturbance the State has returned to complete tranquillity and precautions are being taken to remove all causes of unrest by better appar-vision over the minor State officials and a very considerate forest policy The chief town is Jadgalpur on the Indravati River The famous fails on the Indravati called the Chitrakots are 23 miles away from Jagdalpur

Sirguja -- Untli 1905 this was incinded in Chota Nagpur State of Bengal The most important feature is the Manipat, a magnifi cent tableland forming the southern barrier of the State The early history of Surguisbarrier is obsoure, but according to a local tradition is Palamau, the present ruling family is said to be descended from a Baksel Baja of Pala-mau. Public Works — In 1904, a food spill channel above Striagar was constructed with a view to minimising the constant risk of foods, and it was hoped that the danger would be still turther reduced by the carrying out of a scheme for towering a part of the bed of the Jhelum, which has since been taken in hand Good progress has been made with irrigation, but the most important schemes of recent years have been those for an electrical power station on the Jhelum River and for a Railway into Kanhini I was proposed to supply from this

power station electrical energy for various State schemes (including the Juelum dredging scheme) and for private enterprise and pos-sibly for working the proposed Kashmir Railway ire working the proposed Kashmir Rail-way The works were completed about 1907, and the scheme according to the latest reporta-is working very satisfactorily. The proposal for a railway to Kashmir had been held in abevance for the present

## THE CHAMBER

The Report on Indian constitutional reforms by Mr Montagu and Lord Chelmsford stated that it was desired to call into existence a per manent consultative body which would replace the conference of Princes which had periodi cally met at the invitation of the Vlcaroy After pointing ont the need for regular meetings of the Council the Report said — We contem or the Council the Report said — we contemplate that the Viceroy should be president, and should as a rule preside, but that in his absence one of the Princes should be chairman Therules of husiness would be framed by the Viceroy after consultation with the Princes, who might from time to time suggest modifications in the

It was further suggested in the joint report that the Council of Princes should be invited annually to appoint a small standing commit tee, to which the Viceroy or the Political De tee, to which in vicety of the Polician like partners might refer decisions affecting the Native States, particularly questions dealing with outcom or usage. The Joint Report also made recommendations for the appointment of commissions to inquire into dispute in which Native States might be concerned and into access in misconduct, and for arranging for joint deliberation on masters of common interest between the Council of State and the Council of Princes.

At the end of January 1919 a Conference of the Ruling Princes was held at Delhi, to consider this scheme The subject which gave rise to the longest discussion was the proposal in the Reform Scheme to divide the Native in the renorm Scheme to divide the Native States into two categories, those possessing 'full powers' of internal Government and those not having such powers Some of the Frinces held that membership of the Council of Princes should be limited to the rulers en joying full powers, whilst others considered that some measure of representation ought to be given to the smaller States, and the Conference came to no agreement on the matter The proposal to institute a Council of Princes roc. ived, however, general support, and it was suggested that the new House should be called the

Narendra Mandal (House of Princes)
The recommendations of the Conference were
then placed before the Secretary of State, and in the next Conference held in November 1919 In the heat conference near in Accember 1919 Lord Chelmsford propounded a general scheme for a Chamber of Princes approved by His Majesty's Government The Conference after debatter the question passed a resultrian warmly debating the question passed a resolution warmly acousting the scheme and expressing an earnest hope that the Chamber might be brought into existence during the ensuing year On the occasion of the formal languiration at the Chamber of Princes Lord Chelmsford, describling how he consisted the advice and criticism of the Codification Committee of Princes which between forty and fitty Its proceedings have added been appointed by the Conference and how hitherto always been conducted in privace,

Education -In education Kashmir is still ackward In the State as a whole only 2 in backward In the State as a whole only 2 in every 100 persons can read and write The number of educational institutions including

two Colleges is 726

Revident — Sir J B Wood, K.C.I.E., KOV.O.,

Polytical Agent at Gilgit-Major D L. B. Lorimer, CI.E

## OF PRINCES

with their assistance the drafts of the Constitution of the Chamber with the first Regulations and Rules of Business, and the draft resolution concerning Courts of Arbitration and Commis-sione of Enquiry were moulded into practical shape, explained that difficulties had arisen in the selection of a suitable Indian designation for the Chamber which would for the present be known by the English title of the Chamber of Princes He also said that another point on which the published constitution differed from the wording favoured by the Committee of Princes was the absolute prohibition of the discussion in the Chamber of the internal affairs of individual States and the actions of individual Rulers. The main function of the Chamber was to discuss matters affecting the States generally or of com mon concern to the States and to British India or the Empire at large As regarde the question of direct relations between the Government of India and the important States, a recommendation had been made to the Secretary of State for the transfer of the more important States for the transier of the more important states in the Bombay Presidency, according to a scheme prepared by a special Committee, to be carried into effect at some future date when the could tions appear to be favourable. A scheme would also chortly be placed before His Majesty a Government for the oringing of the important States of the Punjah into direct relations with the Government of India as soon as the necessary arrangements could be made Gwallor State would soon be brought into direct touch with the Central Government through a Resident who would be independent of the Central India Agency and some of the Bajoutana States, which were formerly in relations with a Local Resident, were now in direct relations with the Agent to the Governor General in Rajputana

The Chamber was formally inaugurated by the Duke of Connaught on February 8th, 1921, and has quickly developed a vigorous life Ite Presidential duties are entrusted to an elected Chancellor, now H H the Maharajah of Bikaner and its detailed business is attended to by an chicked Standing Committee of six members lids meete twice or thrice a year at the head quarters of the Government of India and one of its most important function, is to discuss with the various Departments of that Government matters in which the Administrations of both the States and British India are concerned Important questions of this class which have recently received attention are the division of revenue from Customs and Posts and Telegraphs and the control of the Police on railway lines running for considerable distances through State territory The Committee reports to the Chamber, which meets annually The number

# Indian States' Tribute.

Many of the States pay tribute, varying it amount according to the direcumstances of each case, to the British Government. This tribute is frequently due to exchanges of territory of settlement of claims between the Governmente but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual receipts in the form of tribute and contributions from indual States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no metral purpose to enter opposition except the contribution of the States of Kathawar and Gujarat pay tribute of some kind to Baroda, and that Gwallor claims tribute from some of the smaller States of Cathal India —

It was need at the Coronation Durbar of 1911 that there would in future be no Massacana payon successions.

# Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguese possessions in India consist of the province of Gos. situated within the culif of Cambay, and the little island of the province of Gos. situated within the imits of the Bombay Presidency, on the Feninsula. All these three territories constitute Arablan Sea Coast, the territory of Daman what is called the State of India.

Gos forms a compact block of territory sur-rounded by British districts. Savantwadi State lies to the north of it the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kanara The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 miles. The territory has a total man Conques square miles and consists of the Velhas Conques tes, or Old Conquests, comprising the island of Gos, sequired by the Portuguese in 1510, and the neighbouring municipalities of Salsette Bardes, and Mormingao acquired in 1843, and of the Nosse Computests, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepem, Canacona, Satari and Sanguem ac quired in the latter half of the 18th century quired in the latter half of the 18th century. The small island of Angediva cituated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 16th The whole country is hilly especially the eastern portion, the predomination of the provided included the fig. the predomination of the case of the provided included the fig. the predomination of the case and coultheast, jut off westward and spread cases the country in a succession of Supra and come and sommense, jut our westward and spread across the country in a succession of spure and ridges. There are several conspicuous isolated peaks, of which the highest, Sonsagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats, and the prin cipal eight, which are all navigable, are in else eipal eight, which are all navigable, are in cise of some importance. Go possesses a fine harbour, formed by the promoutories of Barden bour, formed by the promoutories of Barden mitties lies the cade, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest thipping from September 1997. accommonance the largest snipping from Sep-tember to May, but Aguada is virtually closed during the south-west monsoon, owing in the high winds and sea and to the formation of sand bars across the estnary of the Mandovi river, which opens into Aguada Mormugao is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines A breakwater and port have been built there and the trade is consider able being chiefly transit trade from British territory The international transit of Mormn-gao port, in 1923, was Bs. 2,98,95,280

tion) This gives a density of 343 persons to the square mile and the population showed an increane of 8 per cent since the census ten years previously In the Velhas Conguistas the majority d the population is Christian In the Novas Coquistas Hindus are more numerous than Christian quistas Hindus are more numerous than Christans. The Moalems in the territory are numbered in a few thousands. The Christians still veilargely adhere to caste distinctions, claimig to be Brahmans, Charados and low out which do not internarry. The units, which do not internarry the Units are largely Marabah and do not differ from the are largely Marabah and do not differ from the of the adjacent Konkan districts of Bomby. All classes of the people with the exceptions Europeans, use the Konkani dialect of Marhi with some admixture of Portuguese words. 'he when some summittee of Foreigness words. The official language is Portinguese, which is common ly spoken in the capital and the principal was as well as hy all educated people. Nearly with Christians profess the Roman Catholic retion and are spiritually subject to an archinop whe has the titles of Primate of the Es and Patriarch of the East Indies and exerce ec l'Arianch of the East Indies and exercé ec cleatatical juriediction also over a great frion of British India and the provinces of sean (China) and Timor (Ocania), with setons in foreign countries and Mosemblque-form guese East Africa). Propriy in the fiftory of the Fortuguese India, there are thefores of Gos (Archiciloses) and Daman, best stope of Gos (Archiciloses) and Daman, best stope spread out of the territory (The distings of Daman and Din are subject to a Bop who bears the titles of Bishop of Daman anArchbibears the filles of Blahop of Daman and with-hop of Cranganore) There are merous churches in Gos, mostly built by 1 Jesuita and Franciscans prior to the extince of the religious orders in Portuguese terry. The churches are in charge of secular prie Hindu and Mahomedans now only perf freedom in religious matters and have theirs! places of worship In the early days optinguese rule the worship of Hindu gods in blie and the observance of Hindu usages is strictly forbidden and rigorously suppress

#### The Country

One-third of the entire territory on is stated to be under cultivation. The sity of the soil varies considerably according quality, soil varies considerably accordife quality, situation and water supply Tfelbas Conquistas are as a rule better cuitof than the Novas Conquistas. In both the divisions a holding of fitness or sixteen accepted be considered a good sixed farm, and majority holdings are of smaller extent for sixple proholdings are of smaller extent for sixple proaces neing chiefly transit trade from British controls. The international transit of Mormingso port, in 1923, was Ba. 2,98,95,280

The People.

The total population in the whole Go territory was 5,98,058 at the comme of 1921 (subject to entrolled at the comme such a see in combinate products are applied Hilly s and inferior products are applied Hilly s and inferior solis are set apart for the cultivation of cereals and several kinds of fruits and vegetables are outlivated to an important extent. The condition outsivased to an important extent. 156 countries of the agricultural classes in the Yelhas Con quistas has improved during recent years owing to the general rise in the prices of all classes of agricultural produce and partly to the ourrent of emigration to British tarritory. Stately forests are found in the Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration Iron is found in parts of the territory, but has not been seriously worked Manganese also exists and was worked to an important extent a few years ago

#### Commerce

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in borses with the Persian Gulf It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant

The commerical movement in 1923 has been as below -

	168
Imports	1,64,28,900
Export*	39 89 171
Re-exports	4,11 492
Transit	2,98,95 280

Total Rs 5,06,69,843

Few manufacturing industries of any moment tist and most manufactured articles in use are that an most manuscurred accross in use six ported Exports chiefly consist of coose is, betel nuts, mangoes and other fruits and w produce A line of railway connects Mor gao with the Madras and Southern Mahratta is with the maures and the state of the stat Railway administration, and the bulk of thade of Mormugao port is what it brings difrom and takes to the interior The tele-"Wrom and takes to the interior The tele-ges in Gos territory are worked as part of them of British India, and are maintained them of British India, and are maintained meThe Gos territory was formed; subject to dexing famines and the people now suffer because in times of drought They are theophied, though at great cost, with rice frodtish territory

#### The Capital

Nios, the present capital of Portuguese Indimprehends, Panjim and Ribandar, as w the old city of Gos, and is six miles in co. Old Gos is some five miles distant

of Portuguese India. The appearance of the city, with its row of public fulldings and elegant private residences, as seen from the water is very picture-sque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular buildings the esseen wing of which accommodates the barracks, and immense quadrangular buildings are the Cathedral and various shurches, the viceregal palace, the High Court and so on The square in the lower part of the town is adorned with a life-sized statue of Albuquerque shand ing under a canopy ing under a canopy

#### Historyl

Goa was captured for the Portuguese by Aifonso de Albuquerque in 1510 Albuquerque promptly fortified the place and established time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East There was constant fighting with the armies of the hijspur kingdom, but the Portuguese beld their own and gained the surveying territory now known as the Velhas Conquistas

The subsequent history of the town is one of estentation and decay flox reached its summit of prosperity at the end of the six-teenth centry. The accounts of travellers show that the flox of those days presented a seem of military, ecolesiastical and continer as the seem of military, ecolesiastical and continer in the British capitals of India. But the British capitals of India But the British capitals of India But the Cornellidate it by a preselytising organisation which throws the missionary efforts of every which throws the missionary efforts of every old Goa, as the ruins of the old capital are called to-day, had a bundred churches, many of them of magnificent proportions, and the The subsequent history of the town is one of them of magnificent proportions, and the Inquisition which was a power in the land The result showed how rotten was this basis and how feebly cemented the superstructure reared npon it

#### Modern Times.

There was frequently recurring fighting and in 1741 the Marsthas invaded the neighbourhood of Gos and threatened the city itself. An army of 12,000 men arrived from Portugal as the critical moment. The invaders were beaten of 12,000 men arrived from Fortugal as the critical moment. The invaders were besten off, and the Novas Conquistas were added to the Fortugues possessions. In 1844 the shelter given by Gos to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bounbay in 1655 the Ranson G Satari, in the Novas Conquistas, revolted. In 1871 the native array in Gos muthined and based of the satisfactory of the Constitution in co Old Goa is some five rules distant arrow we warm of the control two dip? Paniim occupies a narrow brother came from Lisbon to deal with the strip is leading ap to the Cabo, the cape did a gazant was a compared to the control of the control

garuing the administration of Portuguese India nuder an Organic Charter (Carta Organica) in force since 1st July 1919 This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos 7008 and 7030, dated 4th and 16th October

The territory of Portuguese India is ruled by one Governor General, residing in the Capital of the State, at Panlim seess Nova-Goa, is divided into three districts Gos. Daman and Din The last two are each under a Lieut enant Governor The district of Gos is under the direct superintendency of the Governor General.

Subordinate to the Governor General the ollowing Secretariate are working Home and Pollical, Finance, Customs, Education, Homeston, on the Collection of the Collection of the Collection of the Collection of Colle

As the principal organ of administration next the Governor General, and in collaboration the him, are working two councils—Legistive and Executive The Executive Rescutive The Caronit as composed or 1 mm oversion of the Caronito Caronito Morale, Astorney-General and four flag of Services, and one non-mixed amount of the Caronico Caronico and Caronico Ca case or morals, attorney-teneral and four lefs of Services and one non-official member pointed yearly by the Governor General bloot to the approval of the Executive Power ess chiefs in the present year are the Secrey General, the Director of Public Works, the occor of Agriculture and Forests and the tector of Finances

The Legislative Council is constituted by the mber of the Executive Council and by nonall members. These members are elected side members are elected and the member are elected side and Mormugao, one by that of Eardes, by the Novas Councilsts (comprising sub-districts of Peruem, Pondá, Sanquelim, pem, Canacons, Sanguir e Satari), one he district of Daman and one by that of the subpem, Canacons, Sanguir e Satari), one he district of Daman and one by that of the subtime of the submaterial and th one extreme elected by the Commercial and natial Associations, one citizen elected by highest tax payers, one oitizen elected be Associations of Agriculture and of Land-ers, one citizen elected by the Attorneys as Communities and one citizen elected by Associations of Class.

from Lisbon The Rames again broke out in 1901 and again in 1912, troops being again in 1912, troops being again in 1912, troops being again in 1912 and agai

At Daman and Din the corresponding body is composed of the local Governor as President, the Delegate of the Attorney General, the Chief of the Public Works Department, the Health Officer, the Financial Director of the district, the Chairman of the Municipal Corporation, two members elected by 40 highest tax payers of the District and one member elected by Microbants, Industrialists and Farmers of the district.

Under the provisions of the above quoted Decree is also officiating in the capital of Por-tuguese India a special tribunal to take cog-nitance and decide all litigious administrative matters, fiscal questions and accounts. It is named Tribunal Administrative Pescal s de Contas and is composed of the Chief Justice as Precident, two High Court Judges, the Fiscal Additor, and the citizens who are not Govern Auditor and the citizens who are not govern ment officers nor beings to the administration, bodies of corporations, whether they may be Legislative Council two of whom are advo-cates and the third a merchant, industrialists or landowner or a highest tax payer. In the decision of matters of account the Director of Finances also also on the special tribunal

Under the presidency of the Governor-General the following bodies are also working -

Technical Council of Fubble Works—Its men are all engineers on permanent cut in the are all engineer on permanent cut in the area and in the army or navy, the Director of Fin ances, the Attorney General, the Chief Health Officer and a Secretary being a clerk of the Public Works Department appointed by the Director of Public Works.

Council of Public Instruction -This is com-Council of Public Instruction—This is com-posed of six members appointed by Government and seven elected from among the professors, there being one elected by the Medical College of Nova Goa, two by the Lycens of Nova-Goa, one by the Municipal Lycens of Maput, and Margão, two by the Corporation of the Teachers of Portuguese Primary Ins-truction, and one by the Teachers of Marathi and Guperathi Primary Instruction

There is also Financial Council composed by the Fiscal Auditor and by the Judges of both Civil and Oriminal Jurisdictions of the Judicial division of Ilbas.

der the Presidency of the Gorenor of district there is District Compoil, which was built on the Secretary General, and with five Judges and one Attorney General, pleagast a first the Attorney General; Pleagast and Halmon, during of Justice at Paulin, Merchand Manney, Hachth Offsort, the Rapineer next to the Courte of Justice at Mornugão (Vasco da Gama), Pronda, Diu and Nagar-Avell.

## PORT OF MORMUGAO.

Mornugho is situated toward, the north of Agnada Bar, on the left Bar of Juary River in Lai 15° 25° N° and Long 73° 47° E, about 225° miles sonth of Bombay and 64° miles sonth of Panlim, the Capital of Portuguese India The Port of Mornugho is the natural onlite to the sea for the whole area and offers the shortest route both passenger and goods traffic The distance from Aden to Mornugale is about the same as from Aden to Mornugale is about the same as from Aden to Bombay The Port is provided with light is easily accessible all the year round and at any hour of the day or night even without the sort, and the season of a Pilot Pilotage is not compulsory, but when usual pilot flag is hotsted, as qualitated nor will board the vessel and render qualitated morn will board the vessel and render

#### DAMAN.

The settlement of Daman lies at the entrance to the Gulf of Cambay, about 100 miles north of Bombay It is composed of two por tlons, namely, Daman proper, lying on the stons, namely, Daman proper, lying on the coast, and the detached parana of Nagar Aveli, separated from it by a narrow strip of British territory and bleected by the B B & C I Rail way Daman proper contains an area of 22 square miles and 22 villages and has a population 1921, leading a population 1921, leading a population 1921, leading a population 1921, leading a population of 1921, leading a population of 1921, leading a leading a population of 1921, leading a leading The native Christians adopt the European costume, some of the women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal

The soil of the settlement is moist and fer tile, especially in the Pargana of Nagar Avoli, but despite the ease of cultivation only one-

twentieth part of the territory is under tiliage The principal crops are rice, wheat, the inferior cereals of Gujarat and tobacco. The settleremain of utilists and topscore in Section ment contains no mirerals. There are stately forests in Nagar Avell, and about two-thirds of them consist of teak, but the forests are not conserved and the extent of land covered by each kind of timber has not been determined. Before the decline of Portnguese power in the Rast, Daman carried on an extensive Commerce especially with the east coast of Africa In those days it was noted for its dyeing and weaving

The territory forms for administrative purposes a single district and has a Municipal thamber and Corporation It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor-General functions, subordinate to the Governor-General of Goa. The judicial department is administered by a judge, with an establishment composed to the subject of the subject of

#### DIU.

Diu is an island lying off the southern ex-tremity of the Kathiawar Feninsula, from which it is espected by a narrow channel of these portions, namely. Din proper (island) of three portions, namely. Din proper (island) the village of Gogla, on the Feninsula, separated by the channel, and the fortrees of Simbor about 5 miles week of the Island I thas a small but excellent harborn, where vessels can safely ride at another in two fathorns of water and owing to the great advantages which its posi-tion offers for trade with Arabia and the Per sian Gulf, the Portuguese were fired at an early period with a desire to obtain possession

of it This they gained, first by treaty with the Sultan of Gnjarat and then by force of arms Diu became oppulent and famous for its commerce it has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth, from north to south, two miles The area is 20 equare miles. The population of the town of Diu, from which the island takes its name, is asid to have been 50,000 in the days of its name, or the bland, according to the cause of 1921 is 18,644, of whom 220 were Christians.

## FRENCH POSSESSIONS

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots They aggregate 208 square miles, and had a total population in 1928 of 272 427 or plots The first French expedition into Indian waters, The first French expension has annual wavers, with a view to open np commercial relations, was attempted in 1003 It was undertaken by private merchants at Rouen, but it failed, by private merchants at Rouch, but it failed, as also did several similar attempts which followed In 1642 Cardinal Richellen founded the first Campagnic d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having

twice attempted, without success, to establish itself in Mackagascar, Colbert's Company again took up the idea of direct trade with India and its Fresident, Caron, founded in 1608 the lang has duty unsuited for a bead establishment has ested the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, specil ly retook Trincomalee, and Caron, passing over to the Coromandel coast, in 1673, selized 8t Thomes, a Fortupose town adjoining Madras, session of Rolland He was, however, com pelled to restore it to the Dutch in 1674.

## PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its appital is the head quarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 123 by the Villipuram Pondil. To the Communication of the Coromandel Coast, 105 miles from Madras by road and 123 by the Villipuram Pondil. To the Communication of the Country branch of the South Indian Radiway The area of the Settlements is 115 square miles times by the Ragitian. The Interest of the Country of the Ragitian Country of the Settlements is 115 square miles times by the Ragitian.

under Admiral Boscawen in 1748 was unsucunner admins somewen in 1748 was infini-cental. The second, under Eyre Coote in 1761, readed in the capture of the place, which was restored in 1765 it was again besieped and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The fortifications were demolished in 1770 The place was again restored in 1785 under the Treaty of Vernallies of 1783 It was captured a fourth time by Colonal Title 1881 It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816

The Settlement comprises a number of instanced pieces of territory which are out off the settlement of arthurness of these and a latter and the special Agent at Pondicherry itself is a British Consular Agent accredited to the French Government, who is usually an officer of the Indian Army

The town is compact, neat and clean, and is divided by a canal into two parts, the Villa blanche and the Ville noire The Villa blanche has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visi-tor of continental boulevards, and the houses being constructed with courtyards and embel-lished with green venetians. All the cross streets lead down to the shore, where a wide streets isad down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holdays as a goursal promenade for the population Their is no real harbour at Pondicherry, ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual measule boats of this coast. Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

#### CHANDERNAGAR.

Chandermagar is altuated on the bank of the Hooghly, a short distance below Chingura Population (1923) 25,135. The town was permanently occupied by the French in 1985, though previous the state of the property station on the East Indian to the state of the property of the property of the state of the property of the pr

#### KARIKAI.

Karikal iles on the Coromandel Coast between ; in the municipality of Karikal half the number Karlkal lies on the Coronandel Coast between the Tanjors District of Madras and the Bay if Bengal. The settlement is divided into an commune, containing 110 villages in ill, and covering an area of 3 square miller to the Governor at Pondicherry The poon atton has in recent years rapidly decreased in

of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

esides many amailer channels. The capital of the settlement is situated on the north bank of the river Arasalar, about 11 miles from its mouth. It has a brisk trade stion has in recent years rapidly decreased. In 1888 it was 95,055, in 1891, 70,525, in 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901, 1, 1901,

# The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that been contained the Indian Frontier Problem, which has bound olarge in the discussion of Indian questions, has always borns a two fold obaracter—the local lane and the international issue. For simple, the international issue is the international issue and the international issue and the frontier which stretches the international issue. a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face But the tendency of recent times has been for the international aspect to recede and for the local aspect to grow in importance, until now it may be said, with as much truth as characterises all generalisations, that the local issue dominates, if it does not absorb the situation

The Local Problem.—The local problem, in its hreadest outlines, may be height proceeding to discuss it in detail. From the Arabina Sea on the West to the confines of Nepal is a wild and tromblous sea of the high est mountains in the world The thin valleys in these immense rages are poorly populated by hardy, brave, militant mountainers, readered the factor and the more difficult by professing the martial Moslem faith, accentnated by the most litter fanaticism But epsews at the popu is it is in excess of the supporting power of the country Like mountaineers in all parts of the world, these brave and fearless men have of the world, these brave and fearless men have sought to ske out thier arrivous agriculture by raiding the rich plains of Hirdustan We may find a fairly close paralle to the attention in the position of the Highlands of Sociand Unit after the rebellion of 1745 the English Govern ment of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments and what lessons it teaches those who are called

Towards Afghanistan —Far otherwise is it with the section of the frontier which stret-ches from Baluchistan to the confines of Nepal That has, for three quarters of a century, been the eccese of almost ceaseless military operations, which have constituted a devastating drain on the Indian exchequer One seeks in vain for a clear and definite policy guiding the actions of the Government of India One explanation of these inconsistencies is found in the existence of two schools of thought Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupa tion of the whole country right up to the con-fines of Afghanistan, or at any rate, for military fines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were conscious of two considerations. They saw that compation up to the Afghan frontior only meant the shifting of the fruntier problem farther North. Instead of the differing tribes, we should have to meet the Afghan true of the first of the first of the first of the control of the first o of Abdurrahaman Khan the Amir'e writ ran but of Abdurahaman Khan the Amire writern but lightly on the southern confines of his kingdom Under his successor. Habbullah Khan, who polloy was generally who and successine control the organization of the tribal gatherings which invoired us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifict, Lord Morley Nor did it enable Rahibullah to deal effectively with the condition of the confidence of the con career in the famous Highland regiments and of that arch pacifist, Lord Morley Nor did it in rendering military operations easier by the canish Halbonian to deat effectively with a construction of Wate's road The High rising against his own Governor in Kines Career and Caree ie called the Durand Line, because it is the line demarcated by Sir Mortimer Durand as the upon to face, in its local aspect, the Indian British Planipotentiary, would simply have frontier problem So far as the area with which meant that in time of trouble we should have we are dealing was concerned, two policies to deal with Afghanlaten instead of a tribe we are dealing was concerned, two policies to deal with Afghanistan instead of a tribe were tried. In Balnohistan, the genius of Sir or two, and with the irreconcilable tribeamen Robert Sandeman devised the method of enter along our difficult line of communications. Bobert Sandeman devised the method of enter long late and the method of enter long late military devised the method of enter long late military devised the method of enter long late military devised the method of the principal representation of the principal representation of the principal control of the method of the principal chiefs, through whom indepoted when the principal chiefs, through whom indepoted when the principal chiefs, through whom indepoted whom the principal chiefs, through whom indepoted whom the principal chiefs, through whom indepoted in the principal chiefs, through the policy of the principal chiefs are presented to the principal chiefs and the principal chief when sandeman et all chiefs and the passes down which for contains a property of the principal chief when sandeman et all chiefs a principal chief when sandeman et all chiefs a principal chief when sandeman et all chiefs a principal chiefs are principal chiefs. must use the covenment of India expansion of finata in Central Asia. The easiest from the time when Sandeman set hie mark on passes, and the passes down which for centuries the land. Not that the country was entirely from the time of Alexander the Great Invades peaceful Occasional India raids or raings have swept from Perals and Central Asia to necessitated occasional indittary operations, loot the fat plains of Rindustan, traverse this and the Gomai Pass was involved in the region. Therefore it was deemed easemble of the country of the cou

of opinion was a series of wavering compromises, which like all compromises was profoundly nn satisfactory. We pushed forward posts bere and there, which irritated the Tribesmen, and made there, which retained the tribesmen, and made there, which many cases in the controlling them. These advanced years were in many cases inadequately held and rarely were they linked with their supporting over by adequate means of communication. We preserved between our administrative with a changing the controlled with Archanistan an irresultant belt of interesting the controlled with Archanistan an irresultant belt of interesting the controlled with Archanistan an irresultant belt of interesting the controlled with Archanistan an irresultant belt of interesting the controlled with a changing the controlled with frontier, and the Durand Line which demarcated our frontier with Atghanistan an irregular belt of land called The Independent Territory, in which meliber we nor the Atghan Government exercised jurisdiction. This was left uniterly under the certain been asked why we did not follow the precedent er Balochiran and "Sandemanies" the Independent Territory. That is one of the personnels topics of Frontier discussions. It is nevert important to bear in mind that there were essential differences between this zone and attempt the did not be the same and the same article in Bullenhistan and Balnohistan Sir Robert Sandeman found a strong tribal system existing in Beluchistan, and strong trinal system existing in Bettelhistan, and he was able to enter into direct engage ments with the tribal oblish. There is no such tribal originated in the Independent Terri tory. The tribal dilefs, or mainte, exercise a very presarious antionity, and the instrument for the collective expression of the trihal will is not the dileft, but the figal, or tribal connoli, of the most democratic character, where the voltes of the young men of the tribe owten the the same influence, in time of excitement perhaps more influence, than the voice of the wiser greybeard isaugence, than the voice of the meet grayoearu.

The hitter fruit of this policy of compromise was craped in 1897, when following a minor owtheast in the Tochl Valley the general assessment and into a rising which involved the whote of the North West Froutier from the the whois of the North West Frontier from the comait to the borders of Nepal A force over thirty the usend strong had to be mobilised to the third the strong that the strong the strong that the strong the strong that the strong unable effectively to deal with the situation, though peace was made. The emergency thus created synchronised with the advent of Lord Curson as Viceovy He deals with it in master ful fashion in the first place, he separated of the strong the strong the strong the strong the Panish, which had hittheth been remonstile Punjab, which had hitherto been responsible for its administration and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force known as the Funjab Irregular Frontier Force This was the revivai of a scheme as old as the viceroyalty of Lord Lytton, though no other Viceroy had been able to carry it through, in the face of the strong opposition of successive Funjab Governments. The area so separated was constituted into a separate administrative some ander the direct surfootby of the Govern face of the strong opposition of successive lumins in the constituted into a separate as separated was the day of rectioning had ceme and store constituted into a separate as separated was the day of rectioning had ceme and store sone under the direct authority of the foveran makes of india, exercised through a Chief Commissioner. The Lord Curron withdraw the advanced and india, exercised through a Chief Commissioner. The Lord Curron withdraw the advanced and indiaty posts and conscitrated the Regular revoiled applicate the idea of Assaruliah, the architectural products of the Chief Commissioner in the conscience of Assaruliah, the architectural products of the Chief Commissioner in th

Close Border School, which would have us remain out of the difficult mountainous some and meet the difficult mountainous some and meet the streemen on the plants it they salled forth miles, recurided from the tribemen there. The extreme advocates of this school would seven have had us return to the line of the Indus Twe Two Pottes—The result of this conflict of opinion was a series of waveing comprender, policy. The construction of the Upper Swat which like all compromises was profundly an which like all compromises was profundly an object of the Indian Army Later which like all compromises was profundly an object of the Indian Army Later which like all compromises was profundly and the control of the Upper Swat which like all compromises was profundly and the control of the Upper Swat control of the Upper Swat Canada (Severands developed into the Swat Canad the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line

of the most peaceth in the whole border in:

Lord Curson's Success.—Indeed by every
reasonable standard the Curson policy was
successful. It did not give ns complete peace
There were occasional punitive expeditions
demanded, such as for instance the Zakia Khel demanded, such as for instance the ZAKEA Anc-and Mohmand expeditions, and the Wastris, and in particular the traculent Mahsud Wastris never ceased radius But in comparison with what had gone before, it gave us relative peace. It cultured throughout the Wastris with white to distribute the property of the property of the total control of the comparison of the con-action of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the the immense preoccupations of the war the immense precompations of the war It broke down under the strain of the wanton invasion of India hy the Afghans in the hot weather of 1919 On February 20th the Amir Habbullah Khan was assassinated in his sleep near Jelahad Although he does not figure so prominently in frontier history as his iron father Abdurrahaman Khan he nevertheless has high claims on the favourable verdict of history None anticipated that any successor to Abdur-rahaman Khan could hold in the leash of a single ransman khan come nord in the least of a shaper State the fractions, fanatical tribes who make up the population of the Afghan kingdom Yet this Habibullah did On occasion his attitude tens i antibusa did On occasion nis autruite seemed to be equivocal as when armed gather-ings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade to assemble in Aignan territory and to invade the Independent Territory, causing the Zakka Khel sud Mohmand expeditions. But we must not indge a State like Aighanistan by European standards, the Amir bad often to bow before the fanatical elements amongst his own people until they had, burnt their ingers my contact with the British troops At the outset of the War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him In truth, the position of the Amir when Turkey entered on the war, of the Amir when Threey entered on the war, and called Moelems everywhere to arms on the side of Germany was extraordinarily difficult, he received Turkish, German and Austrian missions in Kabul from which British representmissions in Kabul, from which Bruisn represents attree were still excluded. Both he kept Afghanistan out of the war, and with the complete defeat, of the Central Powers and their astellites, his policy was justified up to the hilt Indeed, his success was the cause of his assassination. The irreconciliable elements in the Kingdom saw

brushed him saide and installed the son of great administrators in the Trarist capital, Habibullah, Amanulis Khan, on the throne were not adverse to paying off on the Indian Brut Amanulis Khan son found it was a thuray Borderland the score against forast Britain for bed on which he law, and encouraged by the bed on which he lav, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical orime, set his troops in motion in April 25,1919, and presching a johad promised his soldlery the traditional loot of Hindustan The Indian Army traditional look of ringuestal the insulations, was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten Dacca was selsed, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our ocair, and there was nothing to prevent our oc-cupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a govern ment in Afghanistan, but it is quite another to set np a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze With one or two exceptions the Tribal Militla could not stand the strain of an appeal from their fellow tribeanen, and either melted away or joined the rising This has often been described as the failure of the Curson policy, which was based on the tribal militia But there is another aspect to this isane, which was set out in a series of brilliant articles which was attended and our aspect to too is saint, which we attend to the control of th

Russia and the Frontier -On the other hand, if it be admitted that the Carson policy was sound, and that its anocess was marked-a proposition with which we are in general agree-ment—it can also be claimed that the Curzon policy owed no small measure of its anccess to polloy owed no small measure of its auccess to extraneous events The greatest externai force in moulding Indian frontler polley was the lung struggle with Russis. For nearly three quarters of a century \*\* veiled warfare for predominance in Asia was warged between Great Britain and Russis There are few pages in British foreign polley less attractive to the sindent of Imperial safairs Russia was one formed in Central safairs through the same conditions as those which faced England in odd Eagland and Safair and Safairs old East India Company from a trading corporthe sear latin complety rous a remain corporate problem. The latin Frontier Problem, with themselved (control aids were impeasible neighbours to Confronted with an inferior civiliastion, and with neighbours who would not it her alone, Rumsia had to advance True, the advector of the higher control of the lating the control of the lating the control of the lating the control of the lating of within the ramies, and some of the lating of within the cose of States bordered by the control of the lating of within the cose of States bordered by the control of the lating of within the cose of States bordered by the control of the lating of within the cose of States bordered by the control of the lating the lating the cost of the lating the lati

the Crimean War, and for what the Russians thought was depriving them of the fruits of their coatily viotory nver Turkey in 1877 87 Trenit was a long and unastisfactory guerila enterprise between the hardiest spirits on both aldes accompanied by periodic passies in the British Press such time the Russians moved florward, which induced the collning, ster the Russian occupation of Mery, of the general force form "Mervousness" This external force involved the Government of India in the humilayouve the covernment of latter in the highli-lations of the Aighan War of 1828, with the tragic destruction of the rediring latent force between Kabul and Jelakbad, slightly relieved by the heroic defence of Jelakbad and the firmness of General Pollock in refusing to with draw the punitive army until he had set his mark on Kabni by the razing of the famons Bala Hissar fortress It involved as in the second Afghan War of 1878, which left the baff ling problem of no stable government in Afghanistan There was a gleam of light when Adburrahaman Khan, whom we set up at Kabui to relieve ue of our perplexities, proved himself a strong and capable ruler, if one ruthless in his a strong and capable Tuier, it one rithines in his methods But in the early eighties the two States were on the verge of war over a squabble for the possession of Fenjide, and then men began a teries of boundary delimitations and agreements which clarified the sibation, without however finally settling it. The old controversy broke out in another form when intrigues with a broke out in another form when intrigues with a Burlat mont, Dorlied, during Lord Curson's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Thote An expedition to Linas rent the veil which had so long concelled the mysterious city and dispersed the minamm of this intrigue. But it was not until the conclusion of the Angle-Russian agreement seed to be considered to the Agreement were Lord Grey, the Foreign Secretary and Lord Hardings, formerly British Ambassador in Petrograd, but it had been desired by their predecessors, whose efforts were to by their predecessors, whose efforts were ed by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd It was not until Russia was chastened on the battlefields of Manchuris by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement This embraced the whole frontier some There were many unsatisfactory features in the Agreement, many unasurancory restures in the Agreement, especially in regard to Persia, for which we had to pay a considerable price in the attitude of Persians in the War But spain taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries which but it is the way to be a superior of the two countries which but it is the superior of the two countries which but it is the superior of the superior of the two countries which but it is the superior of the superior o prome seminous or the interest of side we obtain tries, which put an end to the period of excursions and alarms up to the ontbreak of the War Henceforward Bassia caused to be a material factor in the Indian Frontier Problem, with the exception of a brief period when the Red Army was brotted out as another bogsy,

influence recede than some other takes its place Long before the signing of the Anglo-Russian Agreement the shadow of the German meason had begun to appear on the horizon Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Bussian expansion in Man marked a reacure of Education transmion in Man-churta, brought to an end by the disastrons issne of the war with Japan The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul Hamed, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinopie His theatrical tour through Psiestine which was generally treated in Europe as an exhibition of opera bonfic, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia Later it fructi fied more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haidar Pasha, opposite Constantinople, to a port in the Persian Guif Now snocessive British Statesmen of both parties Now snocessive British Statesmen of both parties had declared that the acquisition of a certiforial foot-hold in the Persian Gulf by any power-Bussia and the port of Bunder Abbas being then in view—would be regarded as an uniffendly ast. There followed a replica of the period of alarums and excursions which had disfigured our relations with Bussia Undanufed, even our relations with Russia Undshibted, even when their endeavour to secure Bittish oo operation in the enterprise failed, and when the Revolution in Turkey which set the Committee of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise They pushed the Anatolian railways as far east as Bonrgoin, and constructed a line northwards from Eaghdad to Samara They sent a mission to explore the potentialities of the port of Kowelt in the Persian Guif, and set the Turks in motion to subordinate the Shelkh set the Turks in motion to subordinate the Shekho of Kowcit to direct Turkish novertgardy, with of Kowcit to direct Turkish novertgardy, with from Basra to Kowcit, or the vicinity of Kowcit to the desired the dependent of the Markov of Kowcit to the work in plercing the Amanue and Taurus ranges by a series of tunnels, and laid the milks on the other aids of the mountains scross the Enphrates to Ras al-Ain Behind this rail way sativity stood a grandlose policy, which is indicated in what became known in Germany as "B B B"—Berlin, Byzantium, Baghdad Throughout the progress of these schemes, which did not stop short of Baghdad, hat were directed through a port in the Persian Guif, at India, the Germans were auxious to secure

had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany Nevertheless the railway did not stand still during the war Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistics was signed

Inthete when the Armistics was signed The Significance of the Baghada Ealiway —The real significance of the Baghada Ealiway —The real significance of the Baghada Ealiway was little appreciated in Oract British. It was constantly pictured as a great trunk tine, which would short-circuit the traditional British and goods traffer from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of true, in order to escape the hot weather in India and the return traffic is obliefly concentration of the carriage of the service and some of the service and and the return traffic is obliefly concentrated in Gotober and November From April to India and the recent trained is onleftly concentrated in Getober and November From April to June the heat in Mesopotamia is suppositing To innacine that the passenger trains from India would turn from the easy and comfortable, as well as fattly especiations so route from Bombey to Maruellies and thence by the sesticat range to Maruellies and thence by the sesticat range to Calais. and London for such a land route was an amazing chimers. The Baghiad ronte would have in-volved a see voyage from Bombay or Karachi to Koweti or Baara, then a journey across the burning plains of Mesopotamis and Asia Minor to Haidar Fasha, then across the Straits to Constantingle, and finally right across Europe Constantingle, and finally right across Europe stances have been a costly freek journey in comparison with the sea route. Then as for the commercial aspect of the line, the natural port of the Middle Earl is Basra. The sea freight from England or Germany to Baars is about one pound sterling a ton, before the is about one pound sterling a ton, before the freight from Baars to Baghiad was from thirty shillings to two pounds a ton. To imagine chimera The Baghdad ronte would have in shillings to two pounds a ton To imagine again that merchandise would desert this ronte for a land and sea route, which would have involved a double break of bulk at Constantinople and Haldar Pasha, is again a chimera, the freight charges could not have been less than fifteen to tweety pounds a ton

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constan designed to make the Power seated at Constant thopte—and that Power the Toutons were resolv-ed should be Germany—complete master of Ania Minor and The Middle East, and the route selec-ted, often criticised, was the best for the rapid movement of troops to the strategic centres. As a commercial fine, the Bailway, if completed, would have served three zones. The western area of Turkey in Ania at Haidar Pasha. The rich lands of Anabolia at Alaxandretts. The as India, the Germans were anxious to secure area of Turkey in Asia at Haidar Pann. The the co-operation of Greak Britain, if they could rich lands of Anabolia at alexandretts. The do so on their own terms, that is to say without eastern zone at Basra. The Germans, affecting the enterprise as a dominant German in the subsequent engagements with Turkey of the war the protracted negotations with which placed them in maritime command at London which had this end in view ended in a Alexandretta. They began to inaugurate a definite agreement between the two Powers commercial position in the Persian Guil through Under this agreement the Guil section of the the establishment of a subsidised line of steamen thas west to have been Reitha and the other run by the over the proper corresponding. The line was to have been British, and the other run by the great Hamburg-America corporation, portion German. But this agreement which They strove to notain an actual footing in the

Gulf through the German bouse of Wookhau Ala, producing military exploits of an almost We doubt in their alleged designs on Kowelt, which on the water have borne a more definite relation to the commerce of the Gulf than Plushing to Antwerp or Cushave to Turkiave to Hamburg, Allebys scattered the Turks like chaff But that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East These considerations have no more than an academic value now Germany has been defeated The Turks, now they are emerging from an isolated military despotism based on Angers, are controuted with the immense problem of re-building their bankrupt State, deprived of the most lotelligent section of the old population—the Greeks and the Armentans, old population—the treese and the Armenians, by massacrs and expulsion—are a very uncertain factor. The completion of the through line is indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great the ultimate construction of the through line is only a matter of time so we have placed these authoritative charac teristies on record for the guidance of opinion when the project of the through route is revived, as it must be

Turkey and the Frontier—The position of Turkey and the Indian frootier was never of Turkey on the Indian frootier was never of Frontier and Indian frootier was never of Frontier and Indian frontier and Indian from Indian f they were substantially left alone, and the they were substantially left alone, and the administration it is understood never paid its way For a brief period Midhat Pasha raised the etatas of Mesopotamia, and after the Revolution that fine soldier Natim Pasha became a power in the land Bot speaking broadly Turkey reloaded in Mesopotamia broadiy Turkey revoled in Mesopotamia because it was no-one sloterest, even that of the Arsb, to turn ber out When however Germany developed ber BBB' policy, Turkey was used as a stalking horse 5 he moved a small force to the Feminsula of Al Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal eugerainty exercised, or rather claimed, over the Sheikh of Koweit into a de facto suzersinty, exercised by military force. These efforts faded before the vigorous action of the British Government which con cluded a binding arrangement with the Sheikh of cluded a kinding arrangement with the Shelkh of Kowet, and the position of the Turies at Al Katz was always very precarious. On the outbreak in the Committee of the war however the elutation changed of the war however the elutation changed by the sound and carefully-executed expedition to the Baars and its etrategic historiand discount of the same and the transport was developed into the Insane enterprise to expure Baghad by comp de snats, with very liadequate forces, and still more inadequate was developed into the insane enterprise to relate the committee of the snats of the committee of the snats of the committee of the snats of the snats of the committee of the snats of the committee of the snats of the snats operations of the most extensive and unproduced by a snats, with described and the committee of the indian Empire, and operations of the most extensive and unproduced in the committee of the indian Empire, and with General Mandes occuration of Baghad After the Russian debdels we found ourselves the snats of the snats of

the aftermath of the war left us in an indefinite the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerilla warfare to the Mosul Zone, and by edirring up Minor. The signing of the Treaty of Lausanas in 1923, and its enbesquent radication by the Turkish National Assembly, promise to remove these difficulties. The Turks recognised that the Arab states were outside their zone of administration and the boundaries between Turkey potamia under King Pisul wars fort to be determined by the League of Nations. Therefore Turkey, we have reason to bope, will cease from Turkey, we have reason to bope, will cease to be a factor in Indian frontier policy

France and the Frontier—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy policy It is difficult to find any sound pulsay behind the efforts of France to obtain a coaling behind the efforts of France to obtain a coaling cening the efforts of France to obtain a costing station at Maskat, in the Persian Guit, and her long opposition to the steps necessary to extir pate the siave trade, and bold in check the immense traffic in arms which was equipping all the tribesmen on our North West Frontier with rifes of precision and a large supply of ammunition We can find no more definite ammunition was an ind no more comme purpose in it than a seneral pin pricking policy, a desire to play the part of Russis, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cossions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention These embarrassments of abstention These emearns meme were slowly removed one by one after the conclusion of the Anglo-French Enteote Far otherwise was it in the East The consolidation of French authority in Freoch Indo-China was the prelade to designs for the expansion of this authority at the expense of Siam and to find compensation there for the velled British protectorate of Egypt eners for one vened Strillan protectorate of Egypt There had earlier been mutterings in Burma We were established in Lower Burma in the thirties, and in the eighties the foolish and tyrannical King Theebaw, in Upper Burms, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his

and later when Major Marchand marched perienced soldiers as admirable. The tribal series of africa to Fashoda, the imminence of millitia, the keystome of the Curron system, hostilities made statemen on both sides sak had for all practical purposes disappeared. themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the and an agreement was negotiated between the two Powers, which secured the independ enne and integrity of filam. That agreement has been consolidated by wise and progressive rule in Slam itself, under its own independent severellar who is imbored with a strong friendship for the strong friendship friendship for the strong friendship fri between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey All these external influences have disappeared There is no such prospect of their revival as justified us in taking them into consideration in the measures which are forced on the Govern ments responsible. The Indian frontier question has therefore developed from an Imperial into a local question-a condition on which we must local question—a condition on which we mus-isy fast hold, because people are tenacions of old ideas, especially when they are nearly a century old, and no proper understanding of the present postion is possible, unless our consideration of it is governed by this essential fact, that the from is governed by this essential fact, that the from the question is purely local But whilst these world changes were taking place, others werein progress which powerfully influence the difficulties of the situation. The tribeaman was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first class ghitting man Knowing every inch of the inhospitable country in which punitive open thousands of necessity take place he has fung of trouble. Even when armed with a jessif, and when every cartridge had to be bushanded with jealous care, the tribeaman was a respectable antagonist. Now the tribeaman are every antagonist Now the tribesmen are every where armed with magazine rifice, either imported through the Persian Guif when gun-running was a thriving occupation, stolen from running was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources They have an abundant tupply of ammunition Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Fathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan wor 1919 The Afghan regular army was of little account. The

what was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular ironeer positions were garmsonen by require troops, but this was only a temporary measure, It may be said that the crux of the situation was in Waziristan This sector of the Frontier has always been the most difficult of the whole, has always been the index diment of the warre, because of the intractable character of the people, Besides, possessing a bolt bole into Afghanistan, they had in the past evaded effective punishment In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan now formally recognised in the Treaty of 1921 as a completely independent in the freavy of 1 321 as a completely independent state, there were many who urged the desirability of complete withdrawal, even to the line of the Indus This extreme school gained little support Our position in Queta on the one side and Peebawar on the other is fully consolidated, and no good case can be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziris are absolutely intractable, that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions, and that the only solution of the question was the occupation of dominant points in Wasiristan, as far north as Laddha, and linking these posts with our military bases, and particular with the termini of the Indian frontier railways, by good motor roads

This controversy has not ended yet, indeed one feels inclined to say that it never will end one feets inclined to say that it mever will end it has resulted in a typically British compromise The present policy has been apily described as the "half forward" policy There has been no withdrawal in the ordinary sense of the term, but the limits of the Washistan occupation have been fixed at Ramzak, not at Laddha. The network of consequential roads is being pushed forward the limits of the Washistan occupation have been fixed at The Indian rail bead, which for so long terminated to the present the sense of the sens dars and the old tribal militia is material The Militia were armed and equipped by the Indian military anthorities, if they disappeared they took their arms and ammunition with minusa. We found this to our cost in the they took their arms and ammunition with events following the Afghan War of 1919. The ten, and constituted a powerful relatorement the tribestness who rose at the call of the fihad, then, and therefore fifthey desert they do not appetelly in Washtan, were of great account. They gave our troops the hardest fighting they against us Many of these thanessairs have have ever had on the Frontier, their maximum already done good work in the punishment of giltp and fire discipline were described by ext | tribal raids

## I -THE PERSIAN GULF.

From what has gone before it will be seen | Government to an unusual activity in the From what has gone before it will be seen that the keynote of this discussion of Indian frontier policy is that the external menace has disappeared, and that it is now a purely have been proposed by this motion is more powerfully influenced by the motion is more powerfully influenced by the proposed b consion of the land by the sea route, and the appearance of anarchy in the interior the importance of the Guif declined. The Indian importance of the Gulf declined The Indian Government trendand there primarily to preserve the form the work it quictly and efficiently the control of the property of the control of the on the Arah coast. In return for these services Great Britain claimed no sellish advantages. The waters of the Gulf were kept free to the navigation of the alips of ell nations, and though Great Britain could have made any territorial soquisitions she pleased she retained possession of only the tiny station of Bassidn Left to hernel Great Britain desired no other policy, but for a quarter of a century the Gulf when the Component affairs France when the Component affairs France when the Component affairs France when the Component C on the Arah coast In return for these services which was equipping the tribes on our land reference, were designed to the Anglo-Punian frontier with we come of receiving and quantities of amountion. Our provision and quantities of amountion of amountion of amountion and the provision of amountion of the provision of a superior of the provision of the provis gradually removed by agreements following the Anglo-French Entente Russia sent one of her finest cruisers to show the flag "in the Gulf, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Ahbas This menace declined arter the signing of the Anglo-Bussian Agreement, and disappeared with the collapse of Bussian power following the Ecvolution Then Trikey, either acting for herself, or as the avant course? of Germany, under whose domination she had of Germany, under whose domination she had passed, began to stir. She threatened the Sheikh of Bahrein hy the armed occupation of the penineulu of al Katr, and moved troops to enforce her suseralate over Koweit, the best port in the Fersian Gnif, and a possible terminum of the Baghdad Bailway Further to comolidate her interests, or to take out a low of Germany and the heavily subsidized allia of Germany and the results since to the Gnif. where they comported themseives as the instruments of imperial policy rather than as and Larat, with Builden and the structure of the second the agency of the firm of Wonklaus, to greenent, and the capture a territorial footing on the lained or crabblabing their at British on the second the second the second three second to the second to the second three second to the second three second to the second three second to the second to the

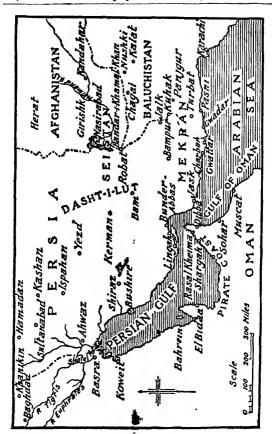

#### Counter Measures.

The first effective steps to counter the influences were taken during the vigorous vice-royalty of Lord Curson, who visited the Guli during his early travels and incorporated a masterly survey of its features in his monumental work on Persia He appointed the ablest men he could find to the head of affairs, estahilshed several new consulates, and was instrumental in improving the sea communications with the Gulf ports The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion assard ogainst foreign interprets to the control of a writer of nanhallenged authority. The American Navai writer, the late Admirul Mahan, placed on record his view that 'Concession in the Permian Gulf, whether hy formal arrangement (with other Powers) or hy neglect of the local commercial interests which now underthe commercial interests which now underthe most benefit of the property of the pr Sinky any other Power as a very grave measor to British interests, which we should certainly resist with all the means at our disposal. The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great appearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now more than they were before these external influences deveioped—a local question, mainly a question of police They are therefore set and more briefly than in earlier editions of the Indian Year Book, and those who desire a complete narrative are referred to The Indian Year Book for 1923, pp 178-183

#### Maskat.

Masket, which is reached in about forty-eight hours from Karachi, is ontside the Pemian eignt nours from Asracm, is onessee the Perman Gull proper It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gull, but its natural strength and his-torical prestige combine to make it insepar-able from the politics of the Gull, with which it has always been intimately associated

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Ahbas on the Persian and tars, win funder a nost of the remain above Zantibar was separated from it hy agreement, and the Persians succeeded in establishing their authority over the possessions

The relations between Britain and Maskat of similar size in the world. The importance have been intimate for a century and more It was under British auspices that the separa tion between Zanzibar and Masket was effected, the Sheikh accepted a British subsidy in retarn for the suppression of the slave trade and in 1892 scaled his dependence upon us hy concluding a treaty pledging himself not to cede any part of his territory without our con-

## British Consul Meter R G Hinde The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper we pass the Pirate Coast controlled by the six Trucial Chiefs The Ill name of this territory has now ceased to have any meaning but in the early days it had a very real relation to the actual conditions The pirats were the boldest of their kind and they did not hesitate to ettack on occasion, and not always without to ottack on occasion, and not aways wishout success, the Company's ships of war Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of eugagements, beginning with 1806 a across of engagements, organized with 1600 and cudding with the perpetant treaty of 1805 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves The relations

altogether the traffic is slaves. The relations of the Truciel Chicks are controlled by the controlled the state of the Truciel Chicks are controlled to the traffic Coast area year on a touch the state of the Truciel Coast is sucreasing through the rise of Dehal Formerly Lingah was the outrepot for the trade, but the exactions of the Belgian Checken and the traffic Chicken Chicke this traffic from Lingah to Dehai The Trucial Chiefs are—Debai, Ann Thabee, Shargab, Alman, Um-al-Gawain and Ras el-Kheyma

#### Rahrein.

North of the Pirate Coast lies the little Arch! pelago which forms the ohiefship of the Sheikh of Bahrein Of this group of islands only those of Bahrein and Maharak are of any eize, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth baif a million pounds sterling. The anoborage is wretched, and at certain states of the tide ships have to ile four miles from the shore, which is not even approachable hy boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrein is famous But this notwithstanding the trade If the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds, makes the Sheikh the richest ruler in the Guif.

In the neighbourhood of Bahrein is the vast hurying ground which has hitherto baffed archaeologists. The generally accepted theory is that it is a relie of the Phoeniciane, who are known to have traded in these waters Political Agent. Major C K Daly

of Kowsit lies solely in the most that it is the one possible Guli terminus of the Baghdad Raliway This is no new discovery, for when the Enphrates Valley Raliway was under dis-cussion, General Chemey selected it under the alternetive name of the Grane—so called from the resemblance of the formation of the Bay to the resemmance of the formanon of the May to a pair of horne—as the sea terminus of the line. Nowhere else would Kowett be called a good or a promising port. The Bay is 20 miles deep and 5 miles hroad, hut so challow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds, and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the meriners of Koweit are noted for their holdness and hardihood

#### Rasra

In a some Basra and Turkish Arabistan can hardly be said to some within the scope of the frontiers of India, yet they are so indissolubly associated with the politice of the Gulf that they must be considered in relation thereto. Basra is the inevitable of the Gulf that they must be considered in relation thereto. Basra is the inevitable on the Shatted Arab, sixty miles from its mouth, twoursely situated to receive the whole water-home trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness of the date groves on other size of the date groves groves groves of the date groves groves groves groves groves groves groves groves groves g shah and Hamadan

Koweit.

In the north-west corner of the Gulf lies the part which has made more stir than any place! potamia under King Feisal When the war

was over we found ourselves committed to form can conveniently be shortened. In order immense, underiged and burdensome responsition buylate the inconvenience of introducing billies in that kind. The sound concepts which is mediments into the body of a Tracty about bilities in that land The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad, then the great military enterprises necessitated by the fall of Kut-al Amara carried nor frontier north to Mosul and the mountains of Knrdistan, east to the Persian boundary, and west to the confines of Trans-Jordania Amongst ardent Imperia-lists, there was undonhtedly the hope that this lists, there was unconnectly the more man care minimense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any the Arabs rose in a revoit which showed that any such domination could only be maintained by force of arms and that the cost would be proof gloss. Under these circumstances King Falsal, was imported from the Hedjax and Installed on the throne under the aegis of Great British Btill, we were committed to the support of the new kingdom, and that most dangerous condition arose responsibility without any real power unless King Felsal was to be a mere poppet, immense expenditure and indefinite military commitments in these circumstances there was an insistent demand for withdrawal from the land British policy moved slowly towards that end, but a definite step was taken in 1923 The Secretary of State for the Colonics amoun-ced this policy in a statement which is repro-duced textually, for the purpose of reference Addressing the House of Lords on May 3rd be

Your Lordships will remember that the Your Lordanips will remember that the Cabinet have been discussing this matter for some time, and decisions have now been taken Sir Percy Cox has accordingly been authorised by His Majertys Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships This announcement was drawn up in consultation with King Feissl and his Government, and has their cordial assent. It is being published at Baghdad to-day

#### The announcement is as follows -

"It will be remembered that in the antumn of last year, after a lengthy exchange of views it was decided between the Governments of His Britannic Majesty and Hie Majesty King Feisa; that a Trusty of Alliance should be entered into between His Britanic Majesty and His Majesty the King of Iraq This Treaty, and His Majesty the King of Iraq This Treaty, ano His Majesty the King of Iraq This Treaty, which was signed on the 10th October, 1923, and the term of which was to be twenty years (subject to periodical revision at the desire of at his periodical revision at the desire of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature. and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder

' Since then the Iraq Government has made great strides along the path of independent and stable existence and has been able success and stable existence and use soon and fally to assume administrative responsibility, amin so assume somminataire responsibilities of this and some article being equally anxious that respect a commercial apparage of Bombay the commitments and responsibilities of His His people have not much in common with Majesty's Government in respect of Iraq should have not been some a possible, it is considered that the period of the Fresty in its present salar hottless which followed the war, and they est that the period of the Treaty in its present salar hottless better than 10 remain in close

to niviste the incorrence of introducing amendments into the body of a Treaty already signed, it has been dedded to bring about the necessary modifications by means of a protocol which like the Treaty itself, will be subject to ratification by the Constituent Assembly

"Accordingly a protocol has now been signed by the parties in the following terms

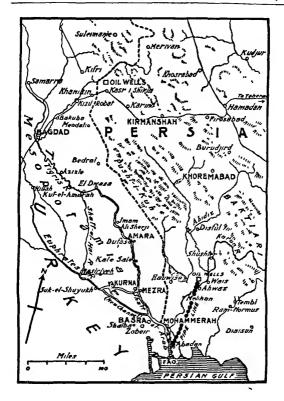

' It is understood between the High Contracs is unuersoon between the High Contrac-ting Parties that, notwithstanding the provisions of Article 18, the present Treaty shall terminate upon Iraq becoming a member of the League of Nations and in any case not later than four or manous and in any case not sater than four years from the ratification of peace with Turkey Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Farties and negotiations for that inbject shall be entered into between them before the expiration of the above period

It will be noticed that under this protocoi the Treaty in its present form le to terminate on the entry of Iraq into the League of Nations or in four years, whichever may be earlier

The position of Iraq as regards the League is that when the Treaty has been ratified Hie Britannic Majesty will be bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible His Majesty's Government will be in a position to take this step on the fulfil ment of the two following essential conditions ment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organio Law There is every reason to hope that both these conditions will be fulfilled at no distant date.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between King Feisal's State and Turkey, the important frontier because the inture of Mosul was in dispute, should be settled by the Lesque of Nations, should Great Britain and Turkey be on ahic to come to agreement by direct negotiation These direct negotiations were opened at Cons tantinople hut no agreement was reached, so the question was opened before the Council nf the League in September 1924 Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in The Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed zone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties As the matter remains at the close of the year the provisional houndary is heing abserved and the Council of the League is inquiring into the whole issue

It is important to remember that there is a countiderable difference between the vilayet Basra and the other portions of King Feisal's State Basra has for long been in the closest commercial contact with India, and is In many

touch with India and through India with the key of the Gulf. Bunder Abbas is of some British Government. If we are correct in the importance as the outlet for the trade of Kerman supposition that Basra is destined to be the and Youd It is of still more importance as great port of The Middle East, then its future possible uswal base. To the west of the towo under an Arab State, with no experience of between the Island of Kishim sod the mainland. under an Arab State, with no experience of administration in such conditions, is one of the greatest interest which can hardly be regarded as settled by the policy underlying the declaration which is set out above

#### The Persian Shore

The Persian shore presents fewor points of permanent interest. The importance of Bu shire is administrative rather than commercial It is the headquarters of Persian authority, the residence of the British Resident, and the cen residence of the British Resident, and tho cen-tre of many freely consult. It is also tho main enterpoit for the trade of Billers, and competen-wretched and dangerous, the road to Shiras passes over the notorious kotale which preclude the idea of rail councetion, and if ever a railway to the central tableland is opened the commer data value of Bushire will dwindlo to insignioffs of Statistic will dwindle to insign frames, the control of th

lie the Clarence Straits which narrow until they are less than three miles in with an arrow mind they are less than three miles in with, and yet con-tain abundance of water Hore, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf The great obstacle is the climate, which is our 1he great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, les another sheltered deep water anchorage, Elphinstone's Iniet, where the climate con-ditions are equally vite But between these two points there is the possibility of controlling the Gulf just as Gibraltar cootrols the Mediterracear For hany years Bundor Abbasioomed large in public discussions as the possible was water port for which Russia was seeking On the Mckran coast, there is the cable station of Jask, and the possible port of Chahbar

## II -SEISTAN.

The concentration of public attention on the lotriguo was particularly active in Selstan in Ferdian Guif was allowed to obscure the rotative the carry years of the century Having Rosalimportance of Selstan Yet it was for maco | Red Khorasaan her agents moved too Selstan Yet. region have been only partly developed under Persian misrule. It offers to an aggressive rival, an admirable strategic base for future military operations, it is also midway athwart the track of the chortest line which could be ine track of the chortest line which could be built to connect the Trans Caplan Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Selstan would be strong Whilst the gaze of the British was be strong white the gaze of the British as concentrated on the North-West Frontler, and to possible lines of advance through Kandahar to Qoetta, and through Kahni to Peshawar, there can be little doubt that Russian atten tion was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India

Ferdan Gulf was allowed to occure the control of the second of Seistan Yet it was for many importance of Seistan Yet it was for many importance of Seistan Yet it was for many pears a serious preoccopation with the Govorn and through the agency of the Belgian Customs ment of India. Seistan lies midway overhand of control of Russia, Ferdan and the serious pears of the second of Russia, Ferdan and the serious of Russia, Ferdan and Serious of Russia, ance of Selstan has waned

The natural conditions which give to Seistan this strategic importance persist Meantime British influence is being consolidated through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it has now been provided with fortified posts, dak now been provided with fortuned posts, dak hungalows, wells, and all facilities for caravan traffic The railway was pushed out from Spessand, on the Bolan Railway to Nushit, so as to provide a better starting point for the caravans than Quetta. This line was extended mough Sentan, it the day came when she loved her armines against India to Dutadho, on the Persian Frontier, during the war as a military measure hat the war as a military measure that the war as a military measure that the comports only two trains a week.

Railway Position in the Middle East.

#### III -- PERSIA.

From causes which only need to be very the repsyment of the 1911 loan and should briefly set out, the Persian question as affecting the planta from the Persian Government as account. Reference is made in the introduction to this section to the fact that the control of the section to the fact that the control of the section to the fact that the control of the section to the fact that the control of the section to the fact that the control of the section to the fact that the control of the section to the fact that the control of the section of the fact that the control of the section of the fact that the control of the section of te raise the tribes in opposition to Great Britain, in the South, and after the fall of Knt-al-Amara, when a Turkish Division penetrated Western Persia, they exercised a strong influence in Teheran With the defeat of Turkey and the Teheran With the defeat of furracy and vary Central Powers this influence disappeared but at that time there was no authority in Perda beeldes that of the British Government, which had strong forces in the North West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were —

To respect Persian integrity , To supply experts for Persian administration .

To supply officers and equipment for a Persian force for the maintenance of

order.
To provide a loan for these purposes
To co-operate with the Persian Government
in railway construction and other forms of transport. Bota Governments agreed to the appointment

of a joint committee to examine and revise the Oustoms tariff

Persia. The loans was for £5,000,000 at 7 per cent.
Tedeemable in 20 years. It was recurred on the revenues and Outcoms' receipts assigned for P. D. MacGregor, I.M.S.

It is greater detail will find it set out in The indian Year Book for 1921, page 138 st see It has been criptained that most Persians construed it into a guarantee of protection against all external enemies. When the British troops in the north-west retired before the Bokhevins, the Persians had no use for the Agreement such the soun became a dead instrument. It was finally rejected and the advisers who were to have assist ed Persia under it withdrew

The South Persian Rifles were also disbanded. The score of the second Thenceforth Great Britain withdrew entirely

Sir Percy Lorraine assumed office as British Minister at Teheran in December 1921.

H B M's Consul Grassal and Agent of the Government of India in Khornesn.—Lient.—Colonel H B Haworth

The second agreement defined the terms and Colonel H B Haworth conditions on which the loan was to be made to H B M 's Consul in System and Rain:—B. J

## IV.—THE PRESENT FRONTIER PROBLEM

There yet remains a small part of British Aghan, Tariar, Turkoman, Persian, Indian, India where the King's writ does not run the Control of t

#### Frentier Policy.

The policy of the Government of India to ward the Independent Territory has abbed and flowed in a remarkable degree. If has independent Territory has abbed and flowed in a remarkable degree. If has flowtoned between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribermen enterly to hele own recurrency punishing enterly to hele own recurrency punishing the school of the policy in the policies lay the mennee of a Behind both the policies lay the mennee of a Behind both the policies lay the mennee of a Besistan invasion, and that coloured our from the policy until the Angle-Russian Agreement. This inflowed what was called BH and Retire lactices, in the balf century which ended in 1884 there were nearly a score of punitive experiences, extension of which help behinder and the sample of the magnitude of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the military measures which were taken to meet the sample of the sam

#### New Province.

As a first step Lord Curson took the control of the bribes under the direct becomes of the proper control of the tribes under the direct by the control of the bribes under the direct by the control of the proper control of the province and pased it in concerns Lord Curson created in 1901, the North-West Frontier Province, and pased it in charge of a Chief Commissioner with an intimate frontier control of the Commissioner with an intimate frontier considered afterwards, but which the considered afterwards, but which had slipped for lack of driving power North Lord Curson owithdraw the regular torons so far as possible from the advanced posts, and placed these fortakees in charge of trible levies, but the control of the province confidered afterwards, but which had slipped for lack of driving power North placed these fortakees in charge of trible levies, the considered afterwards, but which had slipped for lack of driving power North placed these fortakees in charge of trible levies, officered by a handful of British officers. The success of the province of the province confidered afterwards, but the province of the province o

Pass, and to Thai at the mouth of the Kurram Valley These railways have been completely by fines to Tonk and Banni. By the means the stating power of the same the power of the property of the property of policy of economic development neglected. The railways gave a powerful stimulus to trade, and the Lower Swat Canal converted fractious tribeamen into euccessful agriculturists. This policy of economic development is receiving a great development through the completion of the Upper Swat Canal (a First works awaiting attention For many years this poffer was completely instigled by results.

#### A New Policy

It saved us from serious complications for It saved us from serious compileations for condity twenty years, although the position could never be said to be entirely satis factory particularly in Wastristan, peopled by the most sections raiders on the whole border-line with a boit hole into Afghandistan when preseed from the British aide II endured throughout the war and did not break down until the Amir of Afghanistan songht refuge from his internal troubles in a lehad iodinge from his internal troubles in a lahad against India In this intanae enterprise the Afghans placed less reliance in their regular troops, which have never offered more than a contemptible resistance to the British forces, than in the armed tribesemen and the second of the contemptible resistance to the British forces, than in the armed tribesemen and the second of the contemptible resistance to the British forces, than in the armed tribesemen and the second of the tribesemen and the tribesemen armed the tribesemen and the tribesemen armed the trouble throughout the strong the tribesement and the second tribesement and the tribesement armed tribesement and the second tribesement and tribesement a the actual hostilities with Alphanistan, but later, it was necessary to take measures against a leading malcontent and destroy his fort at horar But the Mahmads and the Wadris hroke tute open hostilities. There to country the with the belt funds and the waste and by the districts of Bannu and Dehra Ismail Khan on the east Amougat them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent armed with modern descriptions of the season of the s over menture assumes cover in They rejected our terms and extry enseures were taken against them The fighting was the most severe in the history of the Frontier The Mahands fought with great tenacity Their shooting was amazingly good, their tactics were admirable, for amongst good, their cookes were summatic, ind single their ranks were many men trained either in the Militia or in the Indian Army and more than once they came within measurable distance of considerable snocess. They were sweited by the fact that the best trained troops in the by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing their losses were the heaviest in the loss intovy of the Borderiand and when the Mahanda made their complete submission in Bophemia 1921 they were more severally chastened thas at

A New Chapter.—As the result of the greatly retard that consummation. My desire atghan War of 1919, Indian troutier policy is to bring it about by gradual degrees and was again thrown into the melting pot above all without the constant aid and presence There was much vague discussion of the position of Eritish troops." The Curton policy, though n the course of the months which followed the it was not pursued with the steadilastness in Afghan War and the troubles in Wastistan would have followed if he had remained in contradict of the course of the months of the course of the way. The Budget then presented to the country evealed a serious financial position. It showed hat despite serious increases in taxatinn, hat despite sorious increases in taxatinn, he country had suffered a series of deficits, which had been financed ont of borrowings and the series of the ser he heaviest charges on the exchequer were hose under Military Expenses, and that there was an indefinitely large, and securingly mend to the foot in a ctual practice of the discussion is really founded on the discussion is really founded on Wastristan In essentials it is the agod conversed to the discussion is really founded on Wastristan In essentials it is the agod conversed to the discussion is really founded on the discussion is really founded on Wastristan In essentials it is the agod conversed to the discussion in the disc reversy—small we deal with this part of the frontier on what is known as the Sandeman ystem, namely, by occupying commanding posts within the country itself, dominating the sibesmen har interfering little in their own ufairs, or shall we revert to what was known the country transport.

no extrum and timestancoury scoutier rising swar is settlemely irregular irregular and no inform, except acts in 180%, was a compromise between the 'occupa- no british officers and no inform, except acts are settlement of the contract of the regular troops so to the old Militis, he finds his own ritle as a sa possible to cantoments in rear whites the contract of the regular troops so to the old Militis, he finds his own ritle as a ras possible to cantoments in rear whites the results the old Militis, he finds his own ritle as a ras possible to cantoments in rear whites the roots of the regular troops so to the old Militis, he finds his own ritle as a ras possible to cantoments in rear whites the roots of the results are rearranged in the results of the results y militia, recruited from amongst the tribes-nen themselves. The cantonments for regular roops were linked so for as possible with the adian railway system, so as to permit of rapid winforcement. But it must be remembered hat like all Frontier students, Lord Curson did nat like all Frontier students, Lord Curson did not regard this as the final pollcy He wrote the Memorandum formulating his ideas It is of course inevitable that in the passage of time the whole Wairri country up to the Durand like will come more and more under our women to decide what these posts should be made the world can resist or of Waziristan should be retained, it was no ching to say that commanding posts that the whole wairri country up to the countries of the countrie

round thave convert in the man remained in south real, gave us moderate—or rather it should be said bearable—frontier conditions until the said bearable—frontier conditions until the said bearable and remained the tribal militia, on which it was based, could not withstand the wave of fanatchism, and other conditions set up by the Afghan invasion of 1919 The Khyber militia faded away, the Waziri militia either mutinied, as at Wana, or deserted The pillar of the Curson system fell, in the military phrase of the hour, it could not stand the teet of religious fanaticism or an Afghan War The very word Militia became anathema

glastures He said it had been decided to retain commanding posts in Wastristan, to open up the country by roads, to extend the main Indian railway system from its them terminus, Jamrud, through the Khyber to the frontier of Afghanistan and to take over the duties of the Militia by regular troops. That immediate policy was soon modified to far as the close horder system, as modified by the passes open, as modified by the passes open, and punishing the tribes ment of the passes open, and punishing the tribes on hy expeditions will be the passes open, and punishing the tribes on hy expeditions when their radius proper has the passes open, and punishing the tribes on hy expeditions when their radius proper has the passes open, and punishing the tribes on hy expeditions when their radius proper has the passes open. immediate policy was soon modified so far as nen by expeditions when their raiding propen itles become unbearable

The Curron Policy—The Curson policy, dopted in 1899, to clear up the aftermath of
the serious and unsatisfactory Frontier rinking sider is necessary irregular was what have been

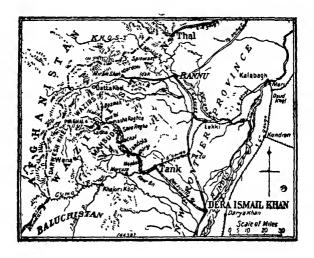

Called Khassadars and Sconts The Khas
he serious and unsatisfactory Frontier rinking sider is necessary irregular irregular. He has under user own nearmen, secure the immusity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they describ the day of trouble, they lose sher pay but the Government loses no rifes, nor does it risk muthay or the lose of battle, and Ludius affices. But the applications

#### V.-WAZIRISTAN.

We can now approach the real frontier ques-ion of the day, the future of Wastriatan What ollows is drawn from an admirable article suitched to the January number of "The ournal of the United Service Institution of Adia," written by Lt.-Col G M Routh, D B O Geographically Wastriatan is a rough paral-slegaram averaging 60 miles from East to West and 100 from North to Bouth. The western

half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water shed between the India and the Helmand Rivers and correone inons and the Heimand Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary On the east is the Indus North is the watershed of the Kurram River running East and W

## WAZIRISTAN

Wesiristan from the Kohat District. South is a signag political boundary from the Durand signar political boundary from the Durand the running between Wana and Fort Sande-man in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medicy of ridges and ravines straggled and contended in bopleas clearray. The more inhabition portions lie well up the alone at beights of one to air thousand feet. Here are our outspects of Wans and Ladias some three in the centre of the restrict districts. The latter within the centre of the restrict districts. The latter within the smiles of grazing district, the latter within five miles of important villages of Kaniguram and Makin

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sandy desert in the Marwat above Pesu.

Where irrigation or river water is obtainable where irrigation or river water is obtainable outlivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pesu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall

Imhabitants -The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful ueighbours. The name originates according to tradition from one Wair, two of whose grandsons were the actual founders of the race. Of the four main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Waxirs and Batanni, only the first two are true Wasirs. Their villages are separate though dotted about more or less indiscriminately, and inter marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some might political comes like the Aghan war of 1919 joined them together, as materially atted our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to malks or headmen. No one except perhaps the Mula Powindah till his death in 1913 could speak of any portion of them as his following

Policy — The policy of the British was at first one of nou interference with the tribes Even new only part of the country is administered Gradually it was found that more and more now only part of the country is administered foradually it was found that more an more supervision became necessary to control radius provided the country with Regular, followed by building posts and brick towers to be held by Millitia. These posts were a first placed at the points where raiders usually debouched The Political Officers, at first supported by Regulars, built up from 1696 and wards a force teams 5,000 Millita with Enths in place at the points where raiders usually debouched the points where the property of the comme 5,000 Millita with Enths in place at the comme food Millita with Enths in the place at the comme food Millita with Enths in the place at the points where control no carian allowances were made to the tribes for good behaviour, prevention of the same for tribal escorts as necessary Gradually, also for tribal escorts as necessary Gradually, as cocasion required, pools were completed than the comprehensive expedition of 1896. In the comprehensive expedition of 1896. In the comprehensive expedition of 1896. British arms were shown in avery remote valley in the vain hope of taming the Mahmuds.

It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919, they were held by Militia. Roads and communi-cations were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale

A Programme—Lt. Col. Bouth their cut-lined a possible policy for Wastristan We give it textually, because we believe it substan-tially reflects military opinion in India.

To the unprejudiced mind it appears more practical to grasp the uettle firmly and dominate the inhabited tracts. Why should not the read practical to grasp the uetile firmly and dominate the inhabited tracts. Why should not the road now being made to Ladha be continued 35 miles north to the Tochi road at Datta Khal and 25 miles south to Wans? Why should we not should be south to Wans? Why should we not should be south to Wans? Why should we not should be south to Wans? Why should we not should be should be south to Cit-Indea sones? The Basmak district round Makin 6,000 feet up is both healthy and fertile. The same applies to the Shawal valley laying behind Pir Gul, the national peak near ladha rising to a height of 11,555 feet above the sea. The Wans plain, the should be s worsing westwards and our recruitive appearance tious stretching their very temporary tentacles eastwards seems to suggest better lateral communications. The broad gauge at Kohat might without undue cost be extended to Thal and thetice to Idak was Spinwam. From here till further extension proved desirable, a motor road through Basmak, Makin and Dwatot to link up with that now surveyed to Ladah sounds possible to the looker ou Eventually such communications, road, rail, or both, could continue to Wana, Fort Sandeman and Quetta di Hindu Bagh, a strategic line offering great defensive possibilities substituting Basmask, which resembles Outcammed, and healthy uplands for the deadly fever spots now occupied from every lact of smploying the stribension on the extension of the extension of the work of the country as well as providing healthy accessible hill stations to place of the proverbally comfortless cantonments which now exist in this part of the Frontier and thence to Idak via Spinwam From here exist in this part of the Frontier

exist in this part of the Frontier.

The Compromise—The new policy, which has been called "the half forward policy," was announced in 1923 If was a compromise between the two extreme schools of thought. This involves the completion of various reads and along the Denjak border, the hadding on certain posts, Jandola and Rasmak, by Regular troops until this road programme is completed, and thereafter the location of Scotta, who are medico resourced with the product of the product with the reads within Washinston, assisted by Exaculary, the product within the product within Washinston, assisted by Exaculary, by their own leaden.

The Besult —With a definite decision on vising from the two posts of Mansai and the question of policy the intense interest in Bansaik, which though outside Mahsaid territory the Frontier controversy waned, though mutistrings are beard from time to time. The greater road links the Toch with Razmak and Janobia pasco which eaused during the year is also a The result of this policy, it was declared, would justicated not retemethed which actually be to rob the Mahsaids of the inaccessibility were applied. An official exposition of the which has been the root cause of that persis Government Folicy amounced that the Govern tone in barbarism which made them a by word meut were determined to bring the Mahaud country, the heart of Wazirlstan, under control

### VI —AFGHANISTAN.

The relations of Alghanistan with the Indian in the relations of Alghanistan with the Indian in the relation of Alghanistan to a Russistan invasion of India. All other considerations of the world, and nothing has been intuiting the been left undown. were ut secondary importance. For usariy three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor It was in order to prevent Africanistan from coming under the influence of Russia that the first African the influence of Russis that the first Atphan War of 1888 was fought—the most melaneholy spleade in Indian frontier history. It was because a Russian envoy was received at Kabul whitst the British representative was turned back at All Masjid that the Afphan War of 1876 was waged Atter that the whole of British policy toward Afphanistan was to build up a strong independent State, Irealy to British, which would set as a builter against to Edition, when would not as a buffer against Russia, and so to order our frontier policy that we should be in a position to move large forces up, it necessary, to support the Aighans in resisting aggression.

#### Gates to India.

A knowledge of the trans fruntiar geography in India brought brame to ber administrator and the latest the passes to India-through Aghanistrator passes to India-through Aghanistratan, the historic route to India, along which successive invasions have poured, and hy way of Seistan IV was the purpose of British policy to cause them, and of Russianto or firthin policy to cause them, and of Russianto or the san du action. come them, and of Mussia to endos volt to feed them at any rate half open To this end having mashed her trans Persian railway to Samar-rand Russia thrust a military line from Merv to the Rushklinsky Post, where railway material in the Kuchinary Took metal and a very control of the Kuchinary Took metal and the control to the Kuchinary Took metal are not to the Kuchinary Took metal as in the control to the Kuchinary Took metal as in the transport of the

The Besult -With a definite decision on vision from the two posts of Mansai and amongst Pathaus At the same time the Khassadar system gives the tribe a stake in Military compation was for financial reasons; the administration of law and order, white impracticable and its place would be taken by the construction of a hundred and forty miles a system of internal control based on Boonts of road provides the channels through which and Khaessdarr, and partity by cotternal super ic villastion may gradually penetrally the control of the channels through which are the channels through the channels throu

which modern military solence can achieve to add to tte natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or the direct route through Seistan

Further east the indian railway system has been carried to Jamrud and is being pushed up to the Khyber Pass A first class military road sometimes double, sometimes trable, threads the Pass to our advanced post at Landi Kotal, and then descends until it meets the Afghan and then descends until ft meets the Aighan trouter at Land Khana. Later, a commencement was made with the Loi Shilman Ralimay, which, starting from Peshawar, was designed to penetrate the Mullagori country and provide an alternative advance to the Khyber for the movement of British troops for the delones of Kabul. For unexplained reasons, this line was suddenly stopped and in now the facts in the air. In this wise the two Powers prepared for the Karaliman-Chamit-Kabul inc

#### Relations with India.

Relations with India.

Between the advanced posts on either side stands the Kingdom of Atghanistan. The end of British policy has been to make it strong of the strong of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the strong of the strong of

of trouble between Afghanistan and ourselves and 1919, when the Afghan claims and action months undernarrated section led to war under the head lived Habhnilah Khan would have months the modernarrated section led to war under this anthority for a progressive policy. That section was finally surveyed and the frontier determined theority after he modernarrated actions the section of the modern termined theority after he was reading the sequence with india property of the McKahon award closed the old feud with persis over the distribution of the waters along the section of the Helmand in Scietan It was confidential at the section of the section o gether with two hundred thousand trihal levies. and to leave fitty thousand regulars and irre-gulars and a hundred thousand levice to maintain order in Kahul and the provinces. But if Alghanistan were made etrong, it was not made friendly heliumphayme Than not made friendly Abdurrshaman Khan distrusted British policy np to the day of hie death All that can be said is that he dis death All that can be said is that us dis-trusted it less than be distrusted Russia, and if the occasion had arisen for him to make a choloe, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely againet all foreigners, except those who were necessary for the supervision of his arsenals and factories the shpervicion of his areenas and factories. He refused to accept a British Resident, on the official that he could not protect him, and british affairs were entrusted to an Indian internal prolaimed his decire to additional, who was in a most equivocal position and the state of the state of the state of the state of India and prolaimed his decire to additional policy of rirendship I agent, who was in a most equivocal position of India and prolaimed his decire to additional the state of India and prolaimed his decire to additional his own representative at the Court of India and prolaimed with the dissatisaction arbitrates to state which the own representative at the Court of India and Indiant the India and India an of St James

Afghanistan and the War —These re-istions were markedly improved during the reign of His Majesty the Amir Habibulah Khan It used to be one of the trite saylage of the Frontier that the System which Abdarrah man Khan had built np would perish with him, for none was capable of maintaining it Hahlh ullah Khan more than maintained it He visited India soon after his accession and so Visited incus soon after his accession and so quired a vivid knowledge of the power and resources of the Empire He strengthened and consolidated his authority in Afghanistan itself At the outset of the war be made a declaration of his complete nentrality. It is believed—a considerable reticence is preserved over our relations with Afghanistan-that he warned the Government of India that he might be forced into many equivocal acts, but they must trust him, certainly his reception of Turkish, Austrian and German missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction But a fuller knowledge in-duced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jehad, or holy Islamio war But he committed no act of hostility as soon as it was asfe to do so he turned the members 

reactionance with has harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come, they anticipated it by enhorning one of his aldes to murder him in his sleep. His brother, Naerullah Khan, the nomines of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother selzing power revoited at the idea of the brother seising power over the corpes of the nurdered man His cone. Hayst and Amanullah, were not dipposed Kabul, controlling the treasury and the avenal and enpoored by the Army Nasrullah found it impossible to make head sagainst him and withdrow The new Amir, Amanullah, at once communicated his accession to the Government. of india and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced, he had to deal with the war party in Afghanistan, he was confronted with the dissatisfaction arising from the manner in which the murderers of Hahibuliah had been dealt with , the fanatical element miles had been dealtwist, the language exasperated by the imprisonment of Nasrullah, and the Army was so incensed that it had to be removed from Kabul and given occupato be removed from Kabul and given occupa-tion ted liverities thoughts A further-element of complexity was introduced by the political situation in India The signation against the Bowist Act was at its height The disturb-ances in the Punjah and Ginjara had taken place Afghan agents in India, of whom the most prominent was Ghulam Hyder Khan, the Afghan postmaster at Peshawar, flooded Afghanistan with exagerated accounts of the Indian unrest. The result of all this wise that difficulties was to mute all the disturbing elements in a war with India On the 25th April his trops were set in motion and elemi-April his troops were set in motion and elmul-taneonely a stream of anti British propaganda commenced to flow from Kahul and open in-trigue was started with the Frontier tribes, on whom the Afghans placed their chief reliance

Speedy Defeat —The war caught the Army in India in the threes of demobilisation and with a large proportion of the seasoned and with a large proportion of the seasoned troops on service abroad Nevertheless the regular Afghan Army was rapidly dealt with Strong British forces moved up the Khyber and selzed Dacca. Jelalabad was reas uncompromising emphasis of the situation they despatched representatives to a conference at Easthand on the 26th July On the 6th August a Treaty of Peace was signed which is set out in the Indian Year Book 1923, pp 136 197

Post War Relations—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards During the hot weather of 1920 there were prolonged discussions at Mussouris hetween Afghan Representatives and British officials under Sir Henry Dobhs These were private, hat it is believed that a complete agreement was reached Certainly after an interchange of Notes which certainly arter an intercurange on roces wanted revealed no major point of difference it was agreed that a British Mission should proceed to Kahni to arrange a definite treaty of peace This Mission crossed the Border in January 1921 and entered Kahul where a peace treaty was The main points of the Treaty are set out in the Indian Year Book, 1923, pp 197, 198-199.

Since the signing of the Treaty the relations between the Government of India and Afghaniatan have been good A difficulty arose in December 1923 and January 1924 when a gang of desperadoes, whose object was the murder or kidnapping of British officials and Ruglishwomen found harbourage in Afghanistan. hut when this was broken up the incident closed A British Minister is established in crosso a British Minister is established in Kabul, as well as the representatives of other Enropean States The representatives of other Arighanistan are established in India and in London, and at some of the European capitals. The various embidiary agreements under the Treaty have been carried into effect British Representative Major Humphreys.

### VII -TIBET.

Recent British policy in Tibet is really another Récent British policy in Tibet is really another phace in the long-drawn-out duel between Great British and Bussis in Central Asia. The scaling of the scaling communication with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogie on a mission to the Tashi-Lama of Shigates,—the spiritual equal, if not superior, of the Duisi Lama of Lhasabides and the superior of the Duisi Lama of Lhasabides was to establish facilities for trade, to open up friendly relations with a Power window was giving us trouble on the frontier window of the superior of t derstanding between the two countries. After where Hastings' departure from India the subject slopt, and the last Knighthman to find the subject slopt, and the last Knighthman for 1904, was the unofficial Manning. In 1885, under the inspiration of Coliman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibedans, but it was abandoned in defenence to the oppopulation. but it was abandoned in defrence to the opporition of the Chinese, whose suzershirty over Thet was recognised, and to whose views until the war with Japan, Britlah statemen were inclined to pay excessive deforence. But the position on the Thetan frontier continued to be most unsatisfactory. The Thetans were aggressive and obstructive, and with a view to putting an end to an intolerable situation. A Convention was necessitated between where consisting an end to as infortable situation, a Convention was negotiated between Great Britain and China in 1890 This laid down the boundary between Sikkim and Tibet, it admitted a Britain protectorate over Sikkim, and paved the way for arrangements for the continct of trade scroes the Sikkim-Tibet contradict of trade acroes the sikkim-Tibet contradict of the formation of trade acroes the sikkim-Tibet contradict of the formation of trade acroes the sikkim-Tibet contradiction of the sikkim-Tibet c

#### Russian Intervention.

This was the position when in 1899 Lord Curzon, Vicercy of India, endeavoured to get into direct touch with the Tibetan anthorities. into direct touch with the Thecan authorities. Three isters which he addressed to the Daial Lama were returned unopened, at he build with the Tax of Russia. His emissary was a Siberian Dorjieff, who had established a romarkable assendancy in the counsels of the Daial Lama After a few year residence at Lhaza Dorleff went to Russia on a condinatial Lhasa Dorlieff went to Russia on a confidential mission in 1899. At the end of 1900 he re-turned to Russia at the bread of a Thestan mis-sion, of which the bead was officially described in Russia as "the senior Transite Khomba at tacehed to the Dalal Lama of Theth" This mission arrived at Odessa in October 1900, and was received in andlence by the Twar at Livadia. Dorlieff returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan mission, where as bearing of an autograph letter from the Dalai Lama they were received by the Taar at Peterboff They were excepted bome through Central Axis by a Russian force to which several Intelligence a Küssian force to which several intelligence Officers were attached at the time it was rumoured that Dorjieff had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the pro-tectorate of Russia. This rumour was after-wards officially contradicted by the Russian

was the British representative, but after months of the state of the s was therefore decided that the mission should advance to Lhasa, and on August Rd, 1904, Lhasa was reached There Sir Francis Young bushand negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890, to open trade marta at Gyantee, Garcok and Yatung to pay an indemnity # 2500,000 (seventy-Pue lakin of rupess), the British to remain in occupation of the convention of the British of the companion of the convention of the property of the property of the property of the British Trade Agent at Gyantee should have the right to proceed to Lhasa to discuss commercial questions, if necessary

or the Chumhi Valley until this indeamity was paid off at the rate of a lath of ropes a payer. In a separate instrument the Thesans agreed that the British Trade Agent at Grant Sparate should have the right to proceed to Lham to fall temporal power and preserve him as a spread that the British Trade Agent at Grant Sparate should have the right to proceed to Lham to discuss commercial questions, if necessary to the content of the Content

ment had little in common The Dalai Lame expected to resume the temporal and spiritual despottem which he had exercised prior to 1904. The Chinese intended to deprive him

while discharge the polition and the first beginning of the province of the pr ment of a British Trade Agent at Gyantse

Chinese Action

The sequel to the Angle Ransha Agreement to the sequence of the State of the

China is to have no right of active intervention | Tibetan army had occupied some towns on the in the internal administration of Tibet, and confines of the Sacchan marshes, hottlitted agreed to the constitution of a conference to were suspended and an armistic was concluded. as the internal administration of "floct, and agreed to the constitution of a conference to diseque the relation of the three countries. This Convention mot at 8 thins when 81 Heary MoMahon, Foreign Secretary to the Government of India, Mr Ivan Chen representing China, and Mr Long Chen Shatra, Prince Minister of the Dain Lama, threshed out these distincts of the Dain Lama, threshed out these issues, Whilst no official pronouncement has been made on the subject it is understood that a Convention was initialled in June which resognised the complete autonomy of Tibet proper, with the right of China to maintain a Resident at Lhasa with a snitable guard A semi-autonomous sone was to be constituted in semi-autonomous sone was to be constituted in Eastern Tibet, in which the Chinese postton was to be relatively much stronger But this Convention, it is understood, has not heen ratified by the Chinese Government, owing to ratified by the Chinese Government, owing to live of the late and the difficulty of defining Outer and Inner leaves to discuss with him the position and three of the last vestiges of Chinese in Russla and the collapse of Government assersinty When the Chinese province of Chinese lates and the collapse of Government assersinty When the Chinese province of Chinese Covernment at Pekin was unable to finance Covernment and the Covernment at Pekin was unable to finance Covernment at Pekin was

From what has gone before, it will be seen that the importance which formerly attached to the political condition of Tibet was much less r local than an external question, and was in fluenced by our relations with Russia and China rather than with our relations with Tibet Bussia having relapsed into a state of consider able confusion, and China having relapsed into ante continuor, and crima naving relapset mo a state of absolute confusion these external forces have disappeared, and Tibet no longer tooms on the Indian political horizon The veil has been drawn afresh over Lhasa, and ven has been drawn aircan over Libras, and affairs in that country pursue an isolated course, with this considerable difference. The Daial Lama is now on terms of the greatest cordislity with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in Central Asia brought about by the Revolution in Russia and the collapse of Government in China, and Mr Boll C M. G I C S, Folitical

#### VIII — THE NORTH-EASTERN FRONTIER.

The postNon on the northern frontier has been in the main Indian outpost against Tibes, been considered as if the British line were con-posed to the state of the British Indian state of the State of sikkim and Bhutan From Cultrat to Gligit, now the northernmost posts of the Indian dovernment, to Assam, with the exception of the small wedge between Kashmir and Nepsi, where the British district of Kumson is thrust right up to the confines of Tihet, for a distance of nearly fifteen hundred miles there is a narrow or hearly attent hundred miles there is a harrow strip of native territory between British Irdia and the true frontier. The first of these fron-tier States is Kashmir. The characteristics of this State are considered under Indian States (\*\*); it is almost the only important Native State in India with frontier responsibilities and t worthly discharges them through the agency of its efficient Indian State troops—four syments of infantry and two Mountain Batteries, compreed mainly of the Esiput Dogras, who make excellent fighting material One of the most important trade routes with Tibet passes through Kashmir—that through Ladak passes through Asanhur—that through ladax Then we come to the long narrow strip of Nepsi This Gurkhas State stands in special relations with the British Government. It is for all practical purposes independent, and the British resident at Klatmandh exercises no influence on

tury the Chinese marched an army to the con-fines of Khatmandu—one of the most remarks able military schievements in the history of Asia Under the firm rule of the present Frime Minister Nepal has been largely free from Internal disturbance, and has been raised to a strong bulwark of India. Nepal is the recruitstrong bulwark of India. Nepai is the recruiting ground for the Gurkha Inhautry, who form anch a splendid part of the fighting arm of the Indian Empire Beyond Nepai are the smaller States of Bhutan and the state of the State of Chinese aggression. In Thet, the Government incident of India in 1910 strengthmend their relations with Bhutan by increasing their subskly from fifty thousand to a lakh of rupoes a year, and taking a guarantee that Bhutan would be seen of the State of the St of these States.

#### Assam and Burma

We then come to the Assam border tribes— the Dafins, the Miris, the Abors and the Mishmis. resident at Khatmande exercises no influence on the learning matchine in Repal is also peculiar. The Maharat births, who comes from the Secold Rajurd clan, the Abors and the Mishma, this births, who comes from the Secold Rajurd clan, the Abors and the Thirth the Benedit of the Births and Dirths, who comes from the Secold Rajurd clan, the binest blood in India, takes no part in the administration All power vests in the Prime Abors and Dr Gregorson by the Minyrong administration All power vests in the Prime Abors in 1911 made necessary an expedition Minister, who occupies a place equivalent to the Dihang valley of the Abor country on the that in the Mayors of the Palace, or the R Troutier A force of 2,500 and about 400 Thomas of Papan The present Prime Minister, military police was employed from October Sir Chandras Bhamsher, has whited Rajund, 1911 to April 1912 in sudduing the stellar and fine given complexeous evidence of his ten or three small actions the matched when the the British Government, delvered up. The cost of the expedition was

Ra. 31.60,000. At the same time friendly is a considerable trade with China through missions were sent to the Mishma and Miri Bhamo. On the Bastem frontier of Berna counsiries. Close contact with these forest-clad are the Bast States, with an area of firly thousand teoch-infested hills has not encouraged any sand square miles and a population of 1,500,000, desire to establish more intimate relations with these States are still administered by the them. The area cocupied by the Nagasares removed throat from Minipur The Nagasares, midance of Buyernson the continuous and Assistant proposed by the independent withese. The like the state of the states are and Assistant proposed by the independent withese. The Dain Bluis is a tract of mountainous country link with China, but this idea has been put from the Assam boundary to the northern trade which would justify the insays expension of the control of the control of the control of the direct military and included in the Mytkyma and Bhamo devided in the Mytkyma and Bhamo devided in the footier south of the interest of Burms. Over the greater part of Karenni States lie on the frontier south of the tiss area, a labryinth of hills in the north, no Shan States. The five this area, a labyrinth of hills in the north, no direct administrative control is at present in the strength of the most of the seem of Burna. The relations between the Indian Rachina, Cylinskindon is asid to be progressive formment and the Tonasserim Division ing and steps have been taken to prevent slam are axcellent.

#### PROVING OF WILLS.

In British India if a person has been appointed executor of the will of a deceased person, it is always a drustile to prove the will as carly as possible of the will as carly as possible of the will is in a vertacular it has to be officially translated into English A petition is then prepared praying for the grant of probate of the will All the property left by the deceased has to be dis-closed in a schedule to be annexed to the peti sioned in a schedule to be annexed to the peti tion. The values of immovesble properties are usually assessed at 161 years purchase on the nett Municipal assessment for setate the nettern of the period of the setate of the 3 %, between Ea 10,000 and Es 50,000 the duty payable is 24% Over 50,000 rupoes the duty payable is 3% In determining the amount of the value of the extate for the pur poses of probate flaty the following items are allowed to be deducted.

Debta left by the deceased including mort-gage encumbrances

Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest.

The particulars of all these items have to be stated in a separate schedule. It is the practice of the High Court to send a copy of these schedules to the Revenue authorities and if subclules to the Revenue authorities and if the properties particularly immovesable properties have not been property valued, that the properties have not been property valued, that the properties have not been property valued, the properties of the properties of

# Railways to India.

The prospect of linking Burope and Asia by a railway running eastwards through Asia Minor has sacinated mer's minds for generations. The plans suggrested have, owing to the British connection with India, always lain in the direction of lines approaching India. How the Ad years ago a beleet Committee of the House of Commons at for two years to consider the question of a Euphrates Valley railway. The Shah of Peris applied to the Perish of the Commons of the Perish of the Commons of t century A proposal was put forward in 1895 for a line of 1,000 miles from Catro and Port Said to Kowelt, at the head of the Persian Gulf. While these projects were in the air, German While these projects were in the sir, German enterprise ricipped in and made a small beginning by constructing the Anatolian railway sestions there is a second railway sestions there of the Boathoras, opposite Constantinopie, and serve the extreme western and of Asia Minor And upon this foundation was based the Turkith concession to Germans to build the Beachada Railway.

Meanwhile, Russia was pushing her railways from various directions into the Central Asian from various directions into the Central Asian teeritory running along the borthern frontiers of Feens and Aspanistan to the borders of Feens and Aspanistan to the borders of Frame-Fernska railway, connecting India, across Pursis, with the Russian lines between the Black Sea and the Caspina Sea came to the foorfront after the conclusion of the bistorio Angilo-Emusian agreement reparding Persis.

The German agreement regarding Perus.

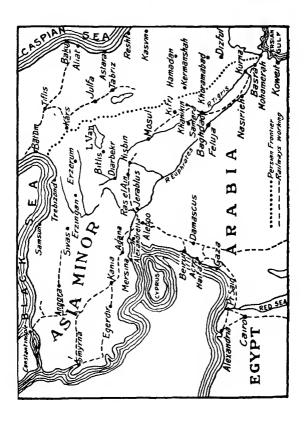

The German punbed forward that Baghada and the German punbed forward that Baghada and the German punbed forward that Baghada and the German was the German of the grand aim to over-throw the British Engine. The outvest of the great war and the success of the Germans in investigate Turkry into it saw the final stages of the construction of the railway pressed forward with passionate energy Thus, before the overthrow of the Turks and Germans in Anis Minor and of the Germans in France the railway was doubled and in use from Section and Alexen and the Comman for the Comman of t

pass through which the Persian road crosses the frontier of that country A line branches of in the neighbourhood of Kirli in the direction of Motul. A line also runs westward from Bachdad to Februa, on the Euphrates. With the Turkish Nationalists in courtrol of Ana-

the Turkish Nationalists in control of Anastrolia any question of the completion of the through Baghdad Line is indefinited v delayed. The Trans-Persian into to join the Russian Cancasian system and the Indian railways restaured proportions of practical importance in the winter of 1011. Both the Russian and the Indian railway systems were by then well developed up to the point likely to be termino of a Trans-Persian into The Russian et al. (1998) and the Russian of the Russian of the Russian and the Indian railway systems between the Russian frontier in the Cancasma During the water than the Russian frontier in the Cancasma During the water frontier in the Cancasma During the water than the Russian into the region cast and south east of Lake Uramba. The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the water and the control of the much extended and improved during the war An details have been published of proposals for the continuation of the Russo-Indian link under the restored conditions of peace. A new agreement which was negotiated between agreement which was negotiated agreement with was pectally provided for England and Perus specially provided for British assistance in the development of Perusas natural resources and particularly for the extension and improvement of Perusas roads auticable for motor trains but the agreement eame to naught

There remains the possibility of linking the Bussian and Indian railway system by way been made in recent years that the Bussian line from Merv to Herat, on the northern frontier of Arghanista, should be linked to the Indian line which proceeds from Guetta to the Afghan border on Chaman. The distance between the border on Chaman. The distance between the railway beads is about 250 miles But there have always for strategic reasons been strong military objections to the railway across Alphanistan and after the death of the late Amir Habibullah the Afrian Government and the strategic reasons to the strategic for the strategic f amir manufusian the aignan Government faily opposed any suggestion for carrying the lodian or Bussian railway system within their borders What the present Alghan Government think about the matter was not shown up to the time this article was written, but the strange situation in Contral last and beyond the

# The Army.

The great spoy army of India originated in the small establishment of guards, known as boons, carolled for the protection of the factories of the Rasi India Company; but spoys were first emissed and disciplined by the French, who appeared in India in 1865 Before this Joseohments of soldiers were sent from England to Bombay, and as early as 1865 the first for-tified position was occupied by the East India Company at Armagon, near Masulipsatus Madras was acquired in 1840, but in 1864 the gardson of Port St. George consisted of only ten men. In 1861 Eombay was occupied to the men. In 1861 Eombay was occupied as the second of th

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the Franch capturing Madgas in 1746. Following the Franch capturing Madgas in 1746. Following the Franch example, the English rateed considerable sepoy forces and largely increased the military establish ments. In 1748 Major Stringer Lawrence landed at Fort 8t. David to command the forces landed at Fort 8t. David to command the forces India was then precarious and the French nucle Duplets were contemplating fresh stacks it became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organization and discipline of his small force, and the garrison was given a company formation. The new commandant at once set about the organization and discipline of his small force, and the garrison was given a company formation. The of which Lawrence subcequently became Commander-in-Chief in Madras the European companies were developed into the Madras Fusiliers aimiliar companies in Bengal and Bombay became the lat Bengal and at Bombay became the lat Bengal and at Bombay became the lat Bengal and at Bombay formation. The Market Stringer of the South Foot, which arrived in 1784.

Struggle with the French.—From this time for a sentury or more the army in Indiawas engaged in constant war. After a prolouged war with the French, whom Duplets had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Olive, their rivals, and the power of England was established by the battle of Plansey in Bengal, and at Wandowsah in Southern India, where the French were finally defeated in 1761. A number of independent States, which was the properties of the Plansey in Empire, some ruled by Mahratta Princes and others by Mussimma solo and the Struggle ensued with Mysore A prolonged struggle ensued with the defeated of the Mysore A prolonged struggle ensued with the detail of Mysore A prolonged struggle ensued with the detail and death of Tipu and the capture of Seringapstam in 1769.

Reorganization of 1794.—In 1796 the native armies, which had been organized on the Presidency system, were recognized. The European issues were 13,000 strong and the natives numbered some 7,000, the infantry

battalions each. In Bengal regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

Danies were raised.

In 1708 the Marquis Wellesley arrived as Governor-General firmly impact with the nacestaty of destroying the last vestiges of Franch influence. In pursuance of this policy be reduced Mysors, where Tipu was intriguing with the French, and then turned his attention to the Maintata States, in which Bindhis had established power over the Mughai Empsors at Delhi by means of a large regular army officer Perron. In campaigns against shidhla in Findustan by a British Army under General Lake, and in the Deccan against that prince and the Raja of Berar by an army under General Lake, and in the Deccan against that prince and the Raja of Berar by an army under General Wellesley, atterwards Duke of Wellington, the power of these Childs was broken in the branch of the Childs of the Childs was broken in the same and the Raja of Berar by the destroyed, and the Childs of the Maintain Subsequently Holkar also was reduced, and British power established on a firm footing.

Mating at Vellore—The Indian Army

Mutiny at Vellore—The Indian Army had been from time te time subject to incidents of mutiny which were the precursors of the great catedyms of 1857. The most serious of these outbreaks coourred as the fort of Vellore in 1806 when the native tworps suddenly broke out and suite two the standard to the contract and soldiers quartered in the fort, while his striped flag of the Suttan of Mysors, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Coionel Gillespie, who galloped over from Arcot at the head of the 19th 1ght Dragoons, blew at the head of the 19th 1ght Dragoons, blew at the head of the 19th 1ght Dragoons, blew mutineers. This retribution put any suppress of any further outbreaks in the sum a stop to any further outbreaks in the sum as top to any further outbreaks in the sum of t

Overseas expeditions—Several important overseas expeditions were undertaken as the several content of the several

In 1814 the Nepal War took place in which the brave Gillesple, who had distinguished limesif in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a ston tresistance,

In 1817 hostifities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the field and i India was turned into a wast camp. The Mahratta Chiefs of Foons, Nagpur, and Indorrose in succession, and was beaton repositively at Kirth, Sitabaldi, and Mahishour Thee was the last war in Senthern India. The title of the last war in Senthern India.

war rolled to the north never to return In the Punjab, to which our frontier now extended, our army came into touch with the great military community of the Siths.

In 1824 the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was the translation of red at the segment of regular and 8 of tractive infantry, 6 regiments of regular and 8 of tregular cavalty. The Madras and Bombay armies were constituted on similar lines, though of lesser strength.

First Afghan War and Sikh Wars—

The conquest of the Punjab extended our frontier to the country inhabited by those turbulent tribes which have given so much strouble during the past elixty years while they have furnished many soldiers to our army To keep order on this border the Punjab Fron tier Force was established, and was constantly agaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much arduous work.

The India s Muting—On the eve of the muting in the state of the muting in the state of the state

powder to ignition in 1897 a new certridge was introduced with page of a giased texture which it was currently reported was greased with the fat of swine and ozen, and therefore unclean alike for Muhammadans and Hadeux This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Bidrial sgriatons exploited this grievance, which that flour was introd with home-dust and sugar refuned with the blood of ozen.

Disafection culminated in mutiny at Benaupur and in an orthreak at Barnelspees where sepoy Mangal Pande attacked a Enropeas officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavahy. These men were tried and sentenced to long terms of imprisonment, their fetters being rivested on parade on the 9th May. Next day the troops in Meerut rose, and, added by the moby the fetter of the moby of the property of the pr

Bon Delhi is the historic capital of India. On his time worn wells broad the prestige of a theorem or the production of the prestige of a theorem of the prestige of a theorem of ammunition. Yet Delhi was beld only by a few native battailons, who joined the mitineers. The Europeans who did not encoced in escaping were massecred and the Delhi Emperor was prodaismed supreme in India. The capital constituted a success to which the troops who mitined in many pisces docked to the standard of the European who was the production of the European Delhi but the city was not captared until the middle of September In the meantime music my had spread. The massecres of Gawagora: and Jhanel took place, and Lucknow was besieged nntil the relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Truth See 's operations in 1858 ended in the effects of the Raul of Jhanel took place of the second of

deficit of the Bani of Jhamsi
Minor Campaigns—During the period
until 1879, when the Second African War begund,
there were many minor campaigns including
the Chins War of 1880, the Ambeyla Campaign,
and the Abysenian War Then followed the
Afghan War in which the leading facure was
Lord Roberts. There were expeditions to
Egypt and China, and Frontier Campaigns of
which the meet important was the Trian Campaign of 1887. There were also the predomptporasions of Burma, several campaigns in
Africa, and the expeditions to Linass. But
antil 1914, since the Afghan War, the army of
India, except that portion of the British garfrom which was sent to South African 1899, had
little severe figb-ing, although engaged in many
ardicous enterprises

Beorganisation after the Matiny.—In 1857 the Rast India Cempany ceased to exist and their army was taken over by the Crown At this time the army was organised into three armies, etc. Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organisations took place during the following years, such as the linking at three Regiments together and the raising of Class Regiments and Companies In 1895 the next large reorganisation took place This was the abolition of the command system Four Commands of the Command were found of the command system Four Commands were formed vis Punjab, Bengal, Madras and Bombay.

Lord Kitcheser's Scheme —This system lasted until 100s when under Lord Kitcheser's re-organization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjah, Bombay and Bengal Commands

In 1907 Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of some powers by Heutenant Generals of Commande led to delay in the despatch of Commande Law and Southern—each under a General Officer who was responsible for the command, Impsection and training of the treops but was given no administrative responsibilities

Early in the War both Army Commanders took the field and were not replaced until 1021 and 1917 when both the field and the field and the field and the field and 1917 when both the field and the fiel

# Present System of Administration of the Army in India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the military administration in India.

The Becretary of State's principal adviser on indian military affairs is the Secretary in the post is filled by an officer of the Indian Army of high rank, he is usually a Lieutenant-flower of the Indian Army of high rank, he is usually a Lieutenant-flower of the Indian Army of high rank, he is usually a Lieutenant-flower of the Indian Army of high rank he is usually a Lieutenant-flower of the Indian Army In order that he may keep in touch with the current Indian affair, he Millitary Secretary is current Indian affair, he Millitary Secretary is the officer. In addition, by a practice which has obtained for many years, a retired Indian Army officer of high rank has a seek upon the Secretary of State's Ouncil.

The superintendence, direction and control of the dvil and military government of Indias is vested in the Governor-General in the media to the Governor-General in the media of the Governor-General in the media of the superintendent of the superintendent of the Governor-General in respect of Army administration the same authority and functions as they exercise in respect of other departments of the Government, in the first phase of the representative institutions conferred upon India by the Montagnetic Reforms Scheme, Army expenditure and the direction of military polary have been excluded from the control of the Legislateure.

The Commander-in-Chief —The next subority in the chain of administrative arrange muter in 11 the chain of administrative arrange muter in 12 the chain of administrative arrange muter in 12 the commander-in the Vicercy's Executive Council All the work connected with the administration of the Army, the formulation and execution of the Army, the formulation and execution of the Army, combatant and non-commander, in a state of efficiency, and the supreme direction of any military operations based upon India are centered in one authority,—the Commander—their and Army Member In addition, he administers the Royal Indian Marine and the Royal Air Force in India.

Army Readquarters—The organisation of the Army headquarters is touched now the three principal Staff Officers, the Chief of the General Staff, the Adjutant-General in India, and the Quartermaster General in India, whose primary day is to assist the Commander-in-Chief in the executive side of his administration to the Chief of the Chief of the Chief of the Readquarters Staff, narely, the Military Secretary, the Director-General of Ordnance and the Engineer in-Chief

The Director of Medical Services in India, who was independent before the war, is now included in the Adjutant-General a Branch

The Army Department—The principal Staff Officers and the other independent heads of branches at Army Headquarters have two spears to the control of the cont

The Staff of the Army Department consists of a Secretary who, like the Secretaries in the civil departments, is a Secretary to Government of India as a whole, possessing the constitutional right of access to the Veccoy, a deputy Secretary, an Establishment Officer and two Assistant Secretaries.

The Army Department deals with all army services proper, and also the administration of the Royal Indian Marine and the Royal

Air Force in India, in so far as questions requiring the orders of the Government of India
are concerned The Army Department has no
direct relations with commanders or troops
or the staffs of formations subordinate to Army
Headquarers it has continuous and intimate
relations with aimy Headquarters in all administrative matters. The Army administration
strative nations are all the staff of the Commanders of the
Member in the Council of State and by the
Army Secretary in the Legislative Assembly

The Military Council—Is composed of the Commander in-Chief as President, and the following members, namely The Chief of the General Staff, the Adjutant-General, the Adjutant-General, the Recentery to the General Staff, the Adjutant-General, the Staff of the General Staff, the Adjutant-General, the General Staff, the Adjutant-General, the General Staff of the Staff of the Staff of the General Staff of the Financial Advisor, Military Finance, representing the Pinance Department of the Government of India It is mainly an advisory body, constituted for the purpose of assisting the Commander in-Chief in the performance of this administrative duties. It has no collective responsibility. It meets when convened by the Commander-in-Chief for the consideration of assess of sufficient importance and difficulty to require extantiation in conference. The heads require extantiation in conference The heads required extantiation in conference The heads arrives attend when required.

#### Military Territorial Areas.

Indian Territory is divided in foor commends, such under a General Officer Commanding in Chief The details of the organisation are given in the table on p 218 and it will be seen that the Commande comprise 14 districts that of the Northern Command, with its headquarters at Murree, coincides roughly with the Funjab and North West Frontier Frovince, the Southern Command, with headquarters at Foons coincides roughly with the Bombay and Madras Frostier stone and part of the Central Frotinces, the Restricted and part of the Central Frotinces, the Restricted conditions from the Central Frotinces, the Restricted conditions from the Central Frotinces, the Restricted conditions from the Western and Part of the Central Frotinces, while the Western and the United Provinces, while the Western Command whose headquarters have for the moment been placed provisionally at Queets overs Sind, Rajputans and Baltuchistan

The General Officer Commanding-in-Chlef of each Command is responsible for the command, administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements

Apart from the four Commands, the only formations directly controlled by Army Head quarters are the Wastristan and Burms districts and the Aden brigade Wastristan will ultimately be merged in a Command, while Burms and Aden, mainly because of their geographical situation, sannot conveniently be included in any of the four Command areas

The distribution of the troops allotted to the Commands and districts has been determined by the principle that the striking force must be mady to function in war, commanded and constituted as it is in peace. With this gnd, in

view, the Army in India is now regarded as comprising three extegories of troops

- Covering Troops,
   The Field Army,
- (2) Internal Security Troops.
- The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a screen behind which mobilisation can proceed undistorbed The force normally consists of 12½ infantry brigades with a due proportion of other arms.

The Field Army consists of 4 Divisions and 5 Cavalry Brigades The Field Army is India's striking force in a major war

#### The Staff.

The staff is organised in three branches

- (a) The General Staff Branch .
- (b) The Adjutant General's Branch,
- (c) The Quartermaster General's Branch
- The General Staff Branch deals with military policy, with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external

The Adjutant General's Branch deals with all matters appertaining to the raising, organising and maintenance of the military forces, the peace distribution of the army, discipline, etc.

The Quartermaster General's Branch is concerned with the specification, provision, in spection, maintenance and issue of supplies, i.s., foodstaffs, forage, fuel, citching, armaments, ammunition, equipment, etc.

There are other minor branches of the Army Readquarters staff, administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the three Principal Staff Officers

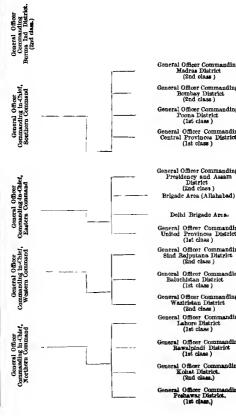

#### These are

- (1) The Military Secretary, usually a Major-General, who deals with the appointment, promotion and retirement of officers holding the King's Commission, and the selection of officers for staff appointments.
- (2) The Director-General of Ordnance, also a Major-General, who controls the Ordnance factories.
- (3) The Engineer-in-Chief, also a Major-General and head of the Corps of Royal Engineers in India.
- In addition to the above, the Army Readquariers staff include certain technical advisors, of whom the most important are the Major-General, Cavalry, and the Major-General, Royal Artillery

#### Regular British Forces in India.

The British cavalry and British infantry units of the army in India are units of the British service Ro individual British service unit is lecased permanently in India. Units of the British Army are detailed for a tour of foreign

Plan Showing Chain of Command Commander-18-Chief

General Officer Commanding Madras District (2nd olass)

General Officer Commanding Bombay District (2nd class)

General Officer Commanding Kohat District. (2nd class.)

General Officer Commanding Peshawar District. (1st class.)

service, of which the major part is as a rule apent in India In the case of British infantry battalions the system is that one battalion of a regiment serves in the United Kingdom and the other overseas. The tour of overseas service of a British battalion is usually 16 years In the case of British cavalry the same arrangement cannot be applied, as one unit only comprises the regiment. The normal tour of overseas the regiment The normal cour or overseas duty for a regiment of British cavalry is 14 years In the United Kingdom, in peace time, units are maintained at an establishment smaller than that required for war In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from the United Kingdom

British Cavalry — There are 6 British cavalry regiments in India The establishment cavalry regiments in india the escapionismical of a British cavalry regiment is 27 officers and 571 other ranks. Thus the present total establishment of British cavalry in India is 162 officers end 8,426 other ranks

British Infantry —The present number of British infantry battalions in India is 45, each with an establishment of 28 officers and 882 other ranks, or a total of 1,260 officers and 39,690 other ranks

In 1921 en important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks Battalions had alweys commostant reases nectations had anways maintained a quota of indian followers, but up to 1921 the combatant personnel was entirely Drittah In 1921, on the abolition of the Machine Gun Corps, eight machine guns were included in the equipment of e British interty battalion The peace establishment of Indian combatant personnel is fixed et one Indian officer and fortyone Indian other ranks The Indian platoon, as it is called, is transferred en bloc to enother British battalion when the battalion to which it was originally ettached proceeds on relief out

Royal Artillery —Indians are employed as drivers and artificers in the Royal Horse and Field Artillery and in medium hatterles, end as drivers, gunners and artificers in the Pack Artillery In the Frontier Garrison Artillery they are employed as gunners end artificers and in the Indian Cosst Artillery as gunners

The peace organisation of the artillery at the present day is as follows

Royal Horse Artillery - One hrigade, consisting of headquarters, three batteries and three ammunition columns, and one unhrigaded battery and ammunition column Each battery is armed with six 18-pounder guns

Royal Field Artillery Higher and Lower Batablishment Brigades,—Sovan brigades on the higher establishment, each consisting of headquarters and four batteries. Three brigades on the lower establishment, each consisting of headquarters and four batteries. Of the seven psadquarters and four batteries. Of the seven brigades on the higher examinations, four officers, and the second of the second of the second of the second of the with six 18-pounder guns, and two betteres each with six 4.5" howtsers. Three brigades consist of three batteries, each armed with six 18-pounder guns, and one battery with six 4.5" personal required for batteries.

howitzers Of the three brigades on the lower establishment two consist of three batteries, each armed with aix 18-pounder guns, and one battery with aix 4 5" howitzers, and one brigade of two batteries armed with six 18-pounder guns, and two batteries armed with 4 5" howitzers Two guns in each battery are immobile

Royal Field Artillery, Reinforcement Brigads — The reinforcement brigade consists of three batteries, each armed with four 18-pounder guns, and one battery with four 4.5" howitzers. In war this brigade will be broken up to form the 3rd Divisional ammunition column

Royal Field Artillery, Ammunition Columns — Two Divisional ammunition columns are maintained for the artillery of the first and second divisions, and one brigade ammunition column for the covering force brigade on the frontier

Pack Artillery - Six brigades, each consisting of headquarters, one British and three Indian batterics, also one unbrigaded battery and one section. The British battery and two Indian batteries per hrigade are armed or in process of being ermed, with four 3.7" howitsers, the remaining batteries are armed with four 2.75" guns

Melum Artillery—Two brigades, each consisting of one horsedwarm and two tractor drawn batteries in addition, there are the tractor-drawn batteries, two armed with 6' howitzers and one with 60 pounder guns on a lower establishment, each with only one section makes of the state of the two Medium Brigades the hird battery (armed with each of the two Medium Brigades the third battery (armed with 60 pounder guns) is unbrigaded in each brigade, therefore there are three tractor-drawn and one horse-drawn battery is armed with 60 pounder guns, in the other, with 6' howitzers Medium Artillery -Two brigades, each oon

Coust Artillery —One headquarters and two companies at Bombay and Karachi, end one independent company at Calcutta

Frontier Gerrison Artillery — One corps manning twelve posts The posts are Kohat, Samusa, Thai, Chaman Bannu Dardoni, Peshawar Hindubagh, Malakand, Shagai, Chakdara, Fort Sandeman

The corps is responsible for manning armament allotted for the defence of these

Hatton Coast Artillery—One corps, with detachments at two coast defence stations, Bombey, and Karachi. The role of this corps is to assist the coast defence companies of the Eoyal Garrison Artillery stationed at Rombey and Karachi in the less technical duties connected with the manning of the defences an partial section at beadquarters performs launch and boat duties for the outlying forts at Bombay

#### Engineer Services.

The Engineer in-Chief — The head of the Corps of Royal Engineers in India is directly responsible to His Excellency the Commander in-Chief The Engineer in-Chief is not a Staff Officer, but the technical adviser of the Commander-in-Chief on all military engineering matters, resonable for:

- Engineer operations and engineer services during war and peace
- (2) The preparedness for war of the engineer ing services
- (3) The supply of engineer stores during war and peace
- (4) The execution and maintenance of all military works.
- (5) The constructional efficiency, accuracy and economy of all projects and designs submit ted by him
- The Organization —The Engineer organisation of the Army consists of two main branches ris, the "Sappers and Miners and Pioneers and the Military Engineer Services

The composition of the Corps of Sappers and Miners is as follows

King George's Own Bengal Sappers and Miners, with headquarters at Boorkee Queen Victoria's Own Madras Sappers and Miners with headquarters at Bangalore, Royal Bomhay Sappers and Miners, with headquarters at Kirkee Burma Bappers and Miners, Head quarters and one Depot Company

The personnel of the Corps consists of Royal Rugineer officers Indian officers holding the Viceroy's commission, a creatin number of Brittan non-commissioned officers, Indian n

Field Troops are mounted units trained to accompany early, and are equipped to carry out hasty bridging, demolition and watersupply out hasty bridging, demolition and watersupply make the control of the company of the company of the company of the company of the containing highly qualified "tradesmen" and are trained to carry out technical work in connection with field workships Army Troops companies are somewhat smaller units than field companies, they are required condens of Chief Engineers, e.g., heavy bridging work, large water-supplies, electrical mechanical installation. The Bridging Train comprises a antificient number of pontoons to make a number of footing bridges.

The Hilliary Engineer Services are divided into 8 branches, etc., Buildings and Reads, "Referrica and Mechanical" and He's branch is the sub-division which is in charge of a law of Englandistant officer (Military or Civilian upper gaberdinate), who is amisted by one or more relate.

Sub-overseers (lower subordinates civilians) Two or more sub-divisions are grouped under a Garrison Engineer. The unit in the Hectrical and Mechanical branch is the power station ice factory, water-supply, group of road rollers or workshops, and one or more units are grouped under a Sub-divisional officer, who is supervised by a Garrison Engineer. The Score hands for every sub-district there is a storekeeper, and for every sub-district there is a Earrack Master (Commissary, Deputy nr Assistant Commissary, ranking from Major to Lieutenant) or an Assistant Barrack Master (warrant officer), assisted by two nr more Barrack Engesants, who deal with the supply of section of the control of the

The Military Engineer Services control all military works in India, Burma, the Persian Guilt and Aden, except in the case of a few small outlying military stations, which are in charge of the Public Works Department. They control all works for the Boyal Air Force and for the Boyal Indian Marine and they are charged with all charges for the Indian Horth Section of the Charges, and the Chief Commissioner and Agent to the Governor-General They also control civil works in Bangalore, under the Mysore Government, and in Aden

#### Royal Air Force in India

The Royal Air Force in India is controlled by the Commander in Chief in India as part of the defence services of the Indian Empirer The Air Force hudget is incorporated in the Army estimates The Commander of the Air Force, the Air Office Commanding in India is an Air Vice-Marshai, whose rank corresponds to that of a Major General in the Arm

The headquarters of the Air Torce is alossly associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in three branches, namely, air staff, personnel, and technical and stores The system of staff organisation is similar to the staff system obtaining in the Army Broadly speaking, the duties assigned to the three dividens mentioned are those which are performed by the General Ready and the Charles of the Committee of th

The Wing Commands.—There are three Wing Commands in India, namely, at Penkawa, Essigur and Queeta. The Wing Commander is an officer with Art Force rank corresponding is an officer with Art Force rank corresponding to the rank of Lieutenant-Colonel in the Army Takema to the Army the Command of the Army Takema to the head quarter contained in the Army Wing Conductors exhabilishment outsides, as you will be a supported by the Command of the Army Army Command of the Army Army Command of the Army Command o

The Squadrons—Of the six squadrons, five are extended along the North-West Frontier from Quetta to Hisaipur and one is stationed at Ambaia. The squadron is the primary air force unit and it consists, normally, of a headquarters and three flights of aeroplanes A flight can be detached temporarily but not night can be detached temporarily but appearancely from its squadron, as repair facilities, workshops, and stores cannot economically be organised on anything lower than a squadron basis. The squadron headquarters comprises the officers and other ranks required for the command and administration of the squadron as a whole, it includes the workshop and repair units, the armonries and equipment stores of the squadron The number of seroplanes in a squadron varies with the type of planes in a squadron varies with the cype of aeroplane of which the squadron is composed, but, speaking generally, all squadrons on a peace basis have twelve aeroplanes, i.s., four in each of the three flights.

Of the six squadrons, two are equipped with De Havilland 9A aeroplanes and are allotted distant reconnaissance and bombardment duties, the other four, which are allotted to army co-operation duties, have Bristol fighter aeroplanes. The establishment of officers in a squadron consists of six officers in the head quarters and fitteen officers allotted to flying duties This allows a reserve of one officer for each of the operative flights

The Aircraft Depot -- May conveniently be described as the wholesale store and pro vision department of the Royal Air Force Technical stores from the United Kingdom are received and, in the first instance held in the Aircraft Depot It is also the main work shop and repair shop of the Force, where all engine repairs, mechanical transport repairs, and aircraft repairs of any magnitude are car ried out. The Depot is located at Karachi, the chief reason for selecting this place being, first that the climate of Karachi permits of European artificers working efficiently for the greater part of the year, and, secondly, it is contemplated that the projected Cairo Baghdad-India air ronte will enter India at Karachi If this anticipation is realised, it will obviously be convenient to have in existence there a farge Air Force maintenance establishment

The Aircraft Park -Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment, intermediate between the squadrons and the Air craft Depot It receives stores from the depot and distributes them to the squadron The stocks held in the park are, however, usually limited to items necessary at short notice for operations, and the quantities held are kept as low as distance from the depot and local conditions will admit. In war, the Aircraft Park is intended to be a mobile formation In peace, the Aircraft Park is located at Lahore New aeroplanes, received from the United Kingdom, are erected there, but no major repairs are undertaken

Composition of Establishments—The personnel of the Royal Air Force in India consist of officers, non-commissioned officers and airmen of the Boyal Air Force of the United Kingdom, and Indian artificers and mechanics belonging to the Indian technical section The nfficers are employed on administrative, flying and technical duties, but all are required to be capable of flying an aeroplane A proposal is now under consideration to employ non-commissioned officers as pilots, but at present non-commissioned officers and airmen are employed solely on technical work. The only flying personnel who are not officers are aerial gunners and a certain number of wireless operators. The non-commissioned officers and airmen are employed both with squadrons and at the Aircraft Depot and Park The personnel of the Indian technical section are employed entirely at the Depot and Park on technical trades, and consist of carpenters, fitters, fabric workers instrument repairers, machinists, etc.

The total establishment consists of 218 officers, 1,757 British non-commissioned officers and airmen and 138 Indians.

In India, as in the United Kingdom, the Air Force has a medical service of its own

#### Regular Indian Forces.

findian Cavairy—The present number of Indian cavairy regiments is 21, arranged in seven groups of three regiments each In addition, there are seven stations which form suitable permanent locations for regiments allotted to internal security duties. One of these staso internal security duties. One of these sta-tions is allotted to each group, with the result that one of the three regiments of each group will always be located in a permanent regimental centre. A group depot will be formed in the station on mobilisation and will be made rea-ponsible for the training and provision of rein-forcements for the whole group.

The peace establishment of an Indian cavalry regiment comprises

14 British officers

18 Indian officers. 504 Indian non-commissioned officers and

men Indian Infantry and Pioneers.—The stablishment of the Indian Infantry is con-

stituted as follows Battalions. 20 Infantry regiments consisting of 107 3 Ploneer regiments consisting of 12

1 Independent Pioneer battalion (4th 1 Hazara Pioneers) 20 10 Garkha regiments consisting of

34 140

Reserves for these units have to be sufficient to provile for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation

The conditions of the new reserve, which were introduced in August 1923, are as follows

(a) There are two classes in the reserve Class A and Class B, A reservit is eligible to serve in Class A np to 8 years combined army and reserve service, and in Class B up to 15 years combined service.

- (5) Service in the reserve is compulsory the annothment a man engages to serve at least 5 years in army service, and to serve up to 15 years in combined army and reserve service, if required to do so
- (c) Reservists will be trained for not more than 1 month annually in the cases of Class A, and bieunially in the case of Class B During training the reservist will receive the full pay of a serving soldier
- (d) While not under training, the reservist will receive pay as follows

Class A, Rs 7 per mensem

Class B, Rs 4 per mensem

(e) A reservist will be discharged from the service after 15 years combined army and re serve service, when he will receive a pension of Rs 3 per mensem, or, if he destree it, a gra tuity of Rs. 300 in lien. A reservist who is invalided from the reserve is granted a gratuity varying between 3 and 6 months pay and good conduct bay according to service.

The establishment of the infantry reservists (including Gurkha battalions and the Independent Pioneer Battalion, 1-4th Hazara Pioneers) is fixed at present as follows

Infantry		28,448
Gurkhas		2,000
Pioneers		1,395
Independent Pioneers		81
	Total	29,924

The Signal Service—The Corps is organised on the same lines as a Supper and Miner Corps, with a headquarters and depot for regular training personnel, and detached Sid units for the various army formations. The head of the corps is the Signal Officer in-Chief, who is attached to the General Staff branch at Army Headquarters as a technical advisor on questions connected with signals, and is also described to the General Staff branch at Army Headquarters as a technical advisor on questions connected with signals, and is also

responsible for the technical inspection of all signal units A chief signal officer with similar functions is attached to the headquarters of each Army Command

The headquarters and depot, termed the Signal Training Centre and Depot, are located at Jubbulpore, and are commanded by a Lieutenant Colonei, assisted by a staff, British and Indian, organised on very much the same lines as the headquarters of a Corps of Sappers and Minors

The various types of field units and the number maintained are

Cavalry Brig	rade Signal Troops	4
Divisional 8	gnals	7
Corps Signal	5	2
Signal Parks		2

In addition, there are an Army Signal School and a Wireless Training Section, which carry ont the training of regimental signaling instructors and of personnel for wireless units, respectively

Revel Tank Corps.—Six Armonred Car companies arrived in India in 1921. Two more companies are due to arrive in 1924 1925. Eight Armoured Car companies is the total establish ment at precent in view To complete the organisation, a Tank Corps Centre is maintained at Ahmednagar for the training of Tank Corps personnel, and for the administration of the Corps

The smallest tactical unit is the sub-section of two cars. Two sub-sections constitute a section. The section is commanded by a captain or a subaltern, and is self-contained and capable of independent action. Three sections contained and company. The company is commanded by a major. In addition to the swelter had in company reserve to replace active cars temporarily out of action. Each car is armed with a Vickeys machine que.

The establishment of a Tank Corps Company and of the Tank Corps Centre are shown below

Tank Corps Centre Armoured Car Company	9	45 144	15 37	1 2	4	9	1 <b>2</b> 10

Medical Services —The military medical services in India are composed of the following categories of personnel and subordinate organizations

- (s) Officers and other ranks of the Royal Army Medical Corps serving in India,
- (5) Officers of the Indian Medical Service is military employment,
- (c) The Indian Medical Department, consisting of two branches, viz, (i) assistant surgeons and (ii) sub-assistant surgeons
- (d) The Queen Alexandra's Military Nursing Service for India
  - (s) The Indian Troops Nursing Service
  - (f) The Indian Hospital Corps

Of these categories, the officers and men of the Royal Army Medical Corps, the assistant surgeons of the Indian Medical Department and the Queen Alexandra's Military Nursing and the Queen Alexandra's Multiary Auraing Service for India are primarily concerned with the medical care of British troops, while the officers of the Indian Medical Service, the sub-assistant surgeon of the Indian Medical Depart-ment and the Indian Troops Nursing Service are concerned, primarily, with the medical care of Indian troops. The Indian Hospital Corps Indian troops. serves both organisations

indian Army Service Corps and the Mechanical Transport Service—The 1 dian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army It has developed from the Commissional Commission of the Service Commission of the Army It has developed from the Commis-sariat Department of an earlier period, and its sarias Department of an earlier period, and its immediate predecessor was the Snpply and Transport Corps, by which name the service was known up to a short time ago The Indian Army Service Corps is administered by the Quartermaster General, and is one of the prin cipal services included in the Quartermaster General's Department

The Indian Army Service Corps is consti-tuted in two main branches, namely (a Supply (b) Animal transport, and is supple-mented by the Mechanical Transport Service, which, in India, is constituted upon a special basis, but which is generically, a sub-division of Army Service Corps organisation the strength of the supply exhabitament at the present day is shown by categories in the

Officers with King a commission	141
Indian officers	20
British other ranks	381
Civilians	679
Followers	2,895
Total	4,066

The total number of mulce maintained under this organisation, including the depots and the detachments in Aden, Kashmir and the Persian Gulf, is 18,443, while the camel units are calculated to produce on mobilisation 12,480 camels here are also 750 pack and draught hones wheeled and pack transport are combined. The company on the lower establishment represents the pre-war "cadre," other companies between maintained in peace-time at full war establishment.

The strength of the personnel of animal trans-port units is shown by categories in the fol-lowing table

•	1928
Officers with King's commissions	75
British other ranks	79
Indian officers	196
Civilians	142
Silladar sarwans	2,560
Indian non-commissioned officers	
and drivers	13,524
Artificers and followers	2,162
Total	18,788

The mechanical transport establishment consists of the following

Heavy Lorries 4 service sections, that is to say, sections at strength sufficient to take the field on mobilisation, 6 cadre sections

Light Lorress 7 service sections 7 cadre

Apart from units and vehicles employed on the conveyance of military stores, the mecha-cies of the conveyance of military stores, the mecha-cles for armound on a management of the control, the sappers and miners, the signal corps, motor ambigance conveys for hospitals and field medical units, and vehicles for other minor maccliancous purposes. Mechanical transport of the conveyance of the conveyance of the con-trol of the conveyance of the conveyance of the batteries of medium artillery for drawing the sums and for other purposes. The organisa-sums and for other purposes. guns and for other purposes. The organisa-tion as a whole is completed by a central training school, a central stores depot, mobile repair units and workshops, of which the most imporunits and workshops, or which the mass important is the large heavy repair workshop constructed after the war at Chakala. Like the Indian Army Service Corps, the mechanical transport service is administered by the Director of Supply service is administered by the Director of Supply service. and Transport under the control of the Charter-master General Exclusive of motor bicycles master General Excusive of motor morphise the total establishment now provisionally con-templated consists of 1,858 vehicles, of which 1,088 will be actively employed in peace-time, while 770 vehicles will be apare and reserve.

The mechanical transport is at present not actually a part of the Indian Army Service Orrps. The officers of the service are mainly draws from the Royal Army Service Corps, since at present there are no facilities in India for trakeing officers in every branch of mechanical transport duties. The establishment of officers includes, however, a certain number of King's includes, however, a certain number of King's commissioned officers belonging to the Indian Army The British subordinates of the extreme the substantial subordinates of the extreme the comparison of the present provisional catallishments are chown in the following table

Officers with King's commissions	145

The Ordinance Services may be broadly described as the agency whose durit its to the to small arms, pure, amountain and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores.

The Remount and Veterlaary Services.

The Schooling are among the most important strice imposed on the remount service (1) The proming of the whole of the Indian Gavairy, (5) The provision of camels and draught bull locks for all units and services (3) The instanceance of 68,244 animals. (4) The emperation throughout India of all animals available of the control o

The department is organized on lines corresponding to the remount service in the United Einstein Fix composition is as follows. The Remount Directorate at Army Headquarters constitute of the Director and a Deputy Director & Remount Inspector, one stached to seath Oriectors of Remount Directors of Circles of the Circles

The Army Veterinary Corps, India—Insponsible for the veterinary care, in peace and "we, of mounted British troops, India—Insponsible artillers I A S C units, the remount department (excluding horse-breeding orientions), etc. The Corps now includes The optablishment of Royal Army Veterinary Corps. Officers, serving on a tour of duty in India Tips establishment of warrant and non-commissioned officers, India Unattached List All, veterinary assistants. The clerical establishment of the Army Veterinary Barvins and India Corps.

The Army Veterinary Corps, Iudia, is organised in 12 sections, attached in peace time to Class I Station veterinary hospitals at certain impertant stations

Terms of service in the Iudian srmy are

Cavalry, 4 years' service in army

Artillery, 4 years' service in army

8 & M Corps, 4 years' service in army

Indian Signal Corps, 4 years' service in army

Infantry and Pioneers (except Gurkha groups, the 4th Hatara Pioneers and trans-frontier personnel of the infantry 5 years in army service and 10 years in the reserve (Note This is the minimum period of service with the colours. 15 years in Colour and Reserve service must be done.

Gurkha groups, 4th Hazara Pioneers and the transfrontier personnel of the Infantry, 4 years' service in arms

Animal transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combetants of the Army Whetharty Corps, 8 years' service in army and in the reserve.

All-combatants in the Works Corps, 2 years service in army

Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in

Except in the case of those enrolled in the Works and of those who are non-combatants, all School masters, clerks, artificers, armourers, engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army. The period laid down for service in the army

The period laid down for service in the army may be extended. Combetants may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force

Prontier Militia and Levy Corps— These forces are "Civil' troops, i.e., they are administered and paid by the Civil authorities and not by the Army They are, however, officered by Officers of the Regular Indian Army These forces were raised for duty on the North-West Prontier and at present consist of the following —Kurram Militia, Tochi Scouts, South Wastriatan Scouts, Chitral Scoute Glosses, South Wastriatan Scouts, Chitral Scoute Glosses, Contex, Lob Levy Corps, and the McIcran Levy Corps, The various names show the localities in which cach force is situated

#### The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Smpire, the adoption of the best of the subject of the

The Auxillary Force comprises all branches of the service, cavalry, artillery, engineers, infantry—in which are included railway battallons, machine gun companies, and the B.A.S.O sections Units of the Auxillary Force are under the command of the local military authority, and the latter has the power of calling them one for service locally in a case of calling them one for service locally in a case of calling them one for service locally in a case of the companies of the local military authority, and the latter has the power they are Training is carried on throughout the year Pay at a fixed rate is given for seach day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bouns. Mea curol in the Auxillary Force for an ladelinic portion An enrolled person is entitled to claim his discharge on the completion of four

years service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory com mittee of the area

#### Indian Territorial Force

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst services. The force is intended to cater, amongst other things for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforce ment for the regular Indian army Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service over-seas. The force is the direct successor of the Indian section of the Indian Defence Force radian section of the Indian Percence Force created during the war It has been modelled on the old militia in England The essence of its acheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them after a comparatively short period of intensive training, to take their place by the side of regular units in war

The Indian Territorial Force consists at present of two main categories, provincial battalions, and the university training corpe battalions. The latter are recruited from the staff and students of Indian universities. They are trained all the year round, and are equipped with a permanent staff of British instructors of the corps is discharged. In the case of the university training corps battalions, it is not intended to enforce the liability to reader actual military service. Their purpose is main-bactual with the composition of the propersion of the composition of the composition of the composition of the propersion of the composition of the composition of the provincial battalions. and students of Indian universities. They are

The members of the proviscial battalions accept the full liability for service which has been mentioned. Seven such battalions were constituted in the first instance. The number has since been raised to twenty and, though the unit establishment has not been completely filled in all cases, the movement has already niled in all cases, the movement has already achieved a greater degree of success than might have been antidipated at so early a stage. It is in contemplation to diversity and extend the scope of the force by constituting some ancillary mint. Although for the present the infantry arm only has been created, the force by law may include every other army service

Men enrol in the provincial battalions for a period of six years, the period being reduced to four years in certain cases. On the com-pletion of the first period they can re-enrol, vormatrity, for further specified periods. During his first year, every man does twenty-eight days preliminary training, and during every year he receives twenty-eight days perio-dical training.

#### The Indian State Forces.

The Indian State Forces, formerly designated "Imperial Service Troops," comist of the mid-tary forces raised and maintained by the Eulers of Indian States as their own expense and for State service it has been the custom "in emergency for chart breaks to be lent to the total traces of the state service in the second in emergency for chart breaks to be lent to the India have on many occasions received military assistance of great value from this segree, But the rendering of such add is entirely at the discretion of the Bailing Princes and Chiefs, Government, on the other hand provide per manually a staff of British officers, temped the second of the States of States and when the Kuffing Princes in organising and training the troops of their States

of their States

After the war had ended, the Indian States like the Government of India, undertook size ne covernment of india, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three categories of troops, namely

Class A —Troops in this class are organised on the present-day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army

Class B -These troops consist of units which are, in most case, little inferfor in training and discipline to troops of Class A, but they are not organised on present-day Indian Army establishments. They have, as a rule, readned the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C.—These troops consist in the main of militia formations, which are not parasa-nently embodied. The standard of training, discipline, and armament, prescribed for time class, is generally lower than the standard prescribed for Class B troops.

The actual strength of the Indian State Forces, on the 1st October 1923, amounted to

Cavalry		7,499
Infantry		15,464
Artillery		718
Sappers		831
Camel Corps		784
Transport Corps		1,784
	Total	27,030

#### Officers.

There are two main categories of officers in the Indian Army, those holding the Yesty's Commission and those holding the Vigety's Commission The latter are all Indians (spars and have a limited status and power of letter and have a limited status and power of letter and holding the Vigety's the latter and the rules made the vector of the Indian Army Act and the rules made the vector of letter and the rules are the latter and the latter are all the latter are

King's Commissioned Officers for the Indian Army are obtained from two sources from among the cadets who pass through the Royal Military College, Saudhurst, and by the transfer to the Indian Army of Officers belonging to Indian Intil. The former is the principal disancel of recruitment, the latter being only means of the Indian Army of Officers belonging to Indian Intil. The former is the principal disancel of the work of the Indian wastage cannot be complete by means of calcita from sandhurst when a cadet has qualified at Sandhurst and has received his commission, he secones, in the first instance, an officer of the Unstached List, and is posted for a period of one year to a British battailon or regiment in India, where he receives a preliminary training in ha military dricks. At the end of the year, and in the Indian Army Administrative services and department of the army draw their officers from combatant units, as it has litherto been regarded as essential that every officer should, in the first instance, neceive a thorough grounding in combatant duties, and acquire at first hand an intimate howevings of the requirements of the combatant duties, and acquire at first hand an intimate howevings of the requirements of the combatant duties, and acquire at first hand an intimate

The promotion in rank of King's commission officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to cortain professional or the professional country of the contract of the contract of the contract of Lieutenant-Colonel is in normal course, attained at about 26 years service, pecuncition beyond this rank is determined by selection

Indian Officera.—One of the momentum decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indian eligible to hold a King e commission in the army it was proposed that Janks specially capable and the proposed that Janks specially capable and deserving Indian Hilliam (1998) as a cadet through the Boyal Military College, Sandburst, (2) By the selection of specially capable and deserving Indian regiments who had shall been promoted from officers or non-commissioned officers of Indian regiments who had shall been promoted from appointment as jemedar, (3) By the bestowal of honorary King's commissions on Indian officers who had rendered distinguished service, but whose age and lack of education precluded their being grant ed the full King's commission different who had rendered distinguished service, but whose age and lack of education precluded their being grant ed the full King's commissioned officers of the class described in the third category me tioned above The second of the sources of selection mentioned has since been aimost entirely abundoned ha

A further massure adopted by the Government was the establishment of the Prince of Waler Boyal Indian Military College at Dehra Dun, a Government institution for the preliminary education of Indians who desire to quality for a King's commission in the army through the Royal Military College, Sandhrast

The arrangements so far made enable a maximum of 70 boys to be in residence at the maximum of 70 boys to be in residence at the control of the far and the far and

#### Training Institutions.

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units

Staff College, Quetta

Senior Officers School, Belgaum School of Artillery, Kakul

Rouitation School, Saugor

Two Small Arms Schools, Pachmarhi and

School of Physical Training, Ambala.

Machine Gun School, Ahmednagar Army Signai School, Poona

Royal Tank Corps School, Ahmednagar

British Army School of Education, Belgaum Indian Army School of Education, Wel-

Army School of Cookery, Poons.

Two Army Veterinary Schools, Ambala and Poons.

Indian Army Service Corps Training Establishment, Bawalpindi

Their object is to ensure to all formations and units throughout the army a coustant supply of officers, warrant officers, non-commissioned officers and men, provided with a through up-to-date knowledge of various technical subjects, and with the ability to pass on this knowledge.

Army in India Reserve of Officers— Previous to the Great Wat there had been what was called the Indian Army Reserve of Officers, or arms of the Indian Army The war proved that for many reasons this reserve did not meet the requirements and in September 1982 sametion was given to reconstitute the I. A. B. O. The reconstitution proposed and sanctiousd was as follows —

- (a) The following gentlemen could be granted commissions in the Reserve
- Officers holding King's commissions who, having retired from H M s forces, were not liable for further service
- (2) Officials, other than Military Officers, serving under the Government of India
  - (3) Private gentlemen residing in India
- (b) Commissions would not usually be given to any one over the age of 28, unless be had pre vious commissioned service in the Regular Army, I.A.R. O or I D.F
- (c) The new Reserve would supply the Army in India and not only the Indian Army as before (d) The Reserve would be formed on a fixed establishment for each arm and branch of the Army
- (\*) In the Indian Army the officers would be posted to definite groups and units
- (f) Officers would be divided into two groups (f) those immediately available for service in emergency and (w) those who would not be avail able until the first group was exhausted
- (g) All officers would do periodical training of 30 days a year either with a regular unit or if that were impossible with the Auxiliary Force

(ħ) All officers would receive Rs 750 for each period of 80 days' training in lieu of pay and allowances.

The fighting races.—The fighting classes that contribute to the composition of the indian Army have hitherto been drawn mainly from the north of India, but the experience of the great wat have caused some modifies of the property of the p

Next in point of unmbers are the Gurkhas of Nepal, who were at the outbreak of war formed in twenty complete battalions, but these have been considerably increased. As fighters in the hills they are unsurpassed even by the Pathans of the North-West Frontier, but the Garhwalls are equally good mountaineers.

talneers

The professional military caste of india from time immemorial has been the Rajput, inhabiting not only Rajputans but the United Provinces and Outh. Of fine physique and martial bacing, these wardrons of Hindustan growed the backbone of the old Bengal Army, and have sustained the English Rajal in every compaling the projudices in no respect interfere with their martial instincts and efficiency in war. They furnish many battalions. The Gardwalls are Hill Rajputa, good and galiant soldiers, who have proved themselves equal to any other troops on the field of battle and they established an imperiabable record in the war both in Europe and all the Carlon and the control of the same and all the same and the s

Among those who have rendered signal and splant service in the war are the Mahrattas of the Decean and the Konkan, who have revired the reputation held by their race in the days of Shivaji, the founder of the Mahratta Empire It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

In addition to the castes that have been mentioned low caste men from the south and other parts of India have filled the ranks of the Pioneer regiments and Bappers and Miners, and done their duty well in every campaign in which they have been engaged.

Summary of India's Effort in the WarIn a despetch by the Commander-in-Chief
published in July, 1919, the whole operations
of the Indian Army during the war are reviewed. His Excellency gives in it the following
figures showing the extract of India's contribution in terms of the Indian Army, including reservist, was 194,000 Indian
ranks, calistments during the war for all branches of the service amounted to 791,000, making a total combatant contribution of 985,000
of this number 552,000 were sont overseas. As
regards non combatants, the pre-war strength
during the war and 591,000 were sent over
seas The total contribution of Indian personnel has thus been 1,457,000 of whom 948,000
have served overseas. Carnalies amounted
to 106,594, which incided \$5,560 deskib from
all causes. The number of animals sent overseas was 175,000 \*

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various dutice Royal Indian Marine Ships "DOTFREN," HADDINGS," NORTHERMON, TAMPINGS OF THE PROPERTY OF THE PRO

In addition to transport duties in Indian Ports, Officers were sent to Marsellies, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary Officers, Warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties

When the War Office assumed full control of Operations in Mesopotamia a large number of Regular and Temporary Officers and men were seconded to the Royal Engineers and General Sarvice respectively for duties in the Inland Water Transport work in that country, and these officers hald many important executive appointments in that unit.

The movements of all sea transports between India and the various theatres of War were controlled by Marine Officers

Trawlers were hullt in the Bombay and Calcutta Dockyards and Mine Sweeping Operations were carried out with these and Launches of Bombay and elsewhere, the Trawlers were also used for towing duties

Retired Royal Indian Marine Officers were employed on Naval Transport duties in England and France, and also in very responsible positions with the Inland Water Transport in France

Service in the War 1914-18.—The Royal Indian Marine, though a small Service compared with the Atmy and Navy, played a very active and conspicuous part in the Baropean War These are set out in detaile in the Indian Year Book for 1922 and earlier editions (q v pp 202 st seq)

PORT BLAIR.

Engineer and Harbour Master.

Indian finance has undergone such remarkable changes during the last few years that some general introduction of the present position is required Originally there was one budget for the whole of India, the provinces receiving fixed allowances with which to meet their expenses As the provinces grew in importance and in power it was obvious that these conditions could not continue, and there developed a long struggle between the Provinces and the Government of India, the former claiming a larger share of the revenues raised within their borders and greater freedom in the spending of them, and the Government of India, perhaps not unna turally, striving to retain its control But hy degrees the situation was improved into a working compromise Contracts were made between the Government of India insuring to the provinces adequate and growing funds, an important element in these contracts being the division of certain heads of revenue between the Province and the Government of India, so as to give the Province as the tax collecting agency an incentive to develop revenues to a reasonable extent to develop revenues to a reasonable extent Later, the provinces were given the product of certain fixed heads of revenue instead of the nutruct of divided heads, such fixed beads being decided by negotistion and agreement A change of his character went deeper than appears at first sight. When the Government of India was entitled to lail of any particular of India was entitled to half of any particular head of rownue it naturally spay a seadous eve on a spenditure charged to that revenue, and of that revenue. This gave focusion to fluct free remain This gave focusion to fluct interference with the provinces which was increasingly resuited. But when there was a deaner cmt between the revenue of the Government of India and of the provinces convolved. for interference and control were naturally fewer ace in serregards and control were naturally fewer it may be said that by the time of the passing of the Reform Act of 1919 a satisfactory adjust ment between the financial roles of the Govern ment of India and the Provinces had been reached and the real friction was small

The Clean Cut — Progress went very much farther in the Reform Act of 1919 By that instrument there was made what is for all practical purposes a clean out between imperial and Provincial finance. The Government of India took unto itself the whole product of those taxes which experience and usage have recognised as federal rather than State, which is a better description of the relations between the Government of India and the Provinces than Imperial and Provincial Such taxes are in Imperial and Provincial Such tarea are customs, income tax, posts, and telegraphs, reliways and the sait tax. It made over to the provinces, for their free are it taxes, such as land awarms, enthes, forests, taxes, such as land awarms, enthes, forests, taxes, and has land awarms, and his land awarms, and has land awarms, and

Uklimately the following decision was arrived at, with machinery for the gradual extinction of the provincial contributions, if ever the Government of India is in the happy position to be able to do without the funds, Meantipes all that needs to be said is that whilst the disparity of the contributions from the various province is a first sight justing, in practice sheet is no much disparity, and the insancial authorities to Bombay and the following the said to be supported to the said of the Ultimately the following decision was arrived of poverty

In the financial year 1921 22 contributions shall be paid to the Governor General is Conneil by the local Governments mentioned below according to the following scale.—

Name of Province.		Contribu- tions (In lakhs of ruposs)
Madras Bombay Bengai United Provinces Punjab Burms Central Provinces and Berar	:	848 56 63 240 175 64 22

From the financial year 1922 23 cowards a total contribution of 83 kahb, or such a mailer aum as may be desermined by the Governor General In Council, shall be paid to the Governor contribution of the paid to the Governor contribution of the paid to the Governor complete the Governor General in Council determines as the amount of the contribution a smaller sum than that payable for the preceding year, a reduction shall be made in the contribution of the contribu From the financial year 1922 28 onwards a wose last previous annual contribution exceeds the proportion specified below of the smaller snm so determined as the total contribution, and any reduction so made shall be proportionate to ench excess -

the finances were carefully handled and with ber, the Council of State, and acting on the sertials moderate increases in taxation the advice of his Financial Ministers, the Vicercy accounts were made to belance But dom 'certified' the higher Sait Duty under the special in 1918 a lamentable change same exceptional powers reserved for him in the course, the struction The wanton invasion of forenment of india Act of 1919. The effect belds by Alghanistan meant a war which cost in I this measure was seen when the next electron of the second of the contemptible, and Kahul lay npen to easy misure if it had been thought worth while to cosupy it, the effect of this attack was to set a large part of the North-West Frontier ahlaze and to thrust on the Government of India a senies of costly expeditions. When these were compared, there remained the necessity of establishing a new Frontier system to take the place of that which collapsed in 1919 the piace of that which consists in 1919. This appecially in the notificusly tronhlesone country of Waziristan, (q v Frontier) involved the occupation of certain dominating poets and of connecting them with each other and with the advanced military stations of India. by a series of very expensive roads. This abnormal expenditure dislocated the financial equilibrium of the whole country Nor is it possible to acquit the Finance Department of the Government of India in the difficult post war period of a relaxation of that close control war period on a reseasant of that there could not expenditure which in previous years had balanced the accounts even in the years of famine and plague. The result was that the accumulated deficits of the Government of India reached the very high figure of Rs 100 This led to two results

Retreachment and Texation.—Bowing to the insistent demand for retrenchment the Government of India appointed in 1922 a retremenment committee, on the model of the Geddes Committee which overhauled the extra regant post-war expenditure of the British vagnat post war expenditure of the British Government This committee is generally called after its chairman, the Incheape Committee It sat in 1921, and presented a report which restammended reductions in expenditure which amounted in the aggregate to Re 18 crores Then in the Budget of 1923 it sought for fur ther sources of revenue which would, according to the then estimates, produce funds which would permanently belance the accounts. The source of these additional funds was the The source of these additional funds was the Sak Tax, which it was proposed about be doubled from one rupee four annas to two rupees eight annas maund of 82 pounds. The brounstances were unusual The Sait Tax is always unpoular in India The public was so alarmed at the growth of expenditure and the increase in textsion that its representatives is the Legislatures were not disposed to piace the said of the said of the said of the said of the covern and the said the disposal of the Govern court will be at the disposal of the Govern further funds at the disposal of the Govern ment and in the possibilities of somony had labeline the possibilities of somony had been fully explored. Then the first Assembly elected seader the Constitution of 1919 was approximately approximately approximately approximately and voted increased taxes, direct assi, indirect, amounting to approximately a second of the fundamental fundamental forms and the second of the fundamental fundame

had a powerful influence in returning to the Legislative Assembly towards the end of the year a majority of Swarsjists and Indepen-dents who were on the whole hostile to the form of Government established in the Act of 1910

Equilibrium Established.—Fortunately financial equilibrium was established and a surpins realised in the Budget of 1923-24 As the Indian Budgets are framed before the financial year has actually expired on the Sist March, there are always adjustments in the accounts, there are saways adjustments in the accounts, The estimated deficit for 1922-38 was ever the actual figure, the deficit estimated was Ra 172 crores, the actual defect owing to reductions in military expenditure was Ra 1502 crores The Budget for 1928 24 Rs 1502 crores The Budget for 1923 24 was framed in the expectation of a surplus of Rs 21 lakhs The commercial history of the year however did not railse expectations, for the recovery of trade was slow The higher duty on sait did not yield the revenue anticl pated, and elthough this is not the official view we maintain that the double duty actually decreased consumption The revenue fell Rs 5 38 crores below the estimate On the other hand there was a considerable saving in expenditure, aggregating Rs 4 19 crores, with the result that the estimated surplus in the Budget was converted into a deficit of Rs 33 iskhs. The figures are set out in the following table -

Statement comparing the actual Revenue and Expenditure of the Central Government (Imperial Revenue and Expenditure before the Reforms) with the Revised Estimates for such year from 1913-14 to 1922-23.

issues affecting the financial stability of India which merit attention. They come most appropriately in a consideration of the Budget, and are therefore dealt with here rather than under the apocial heading of del in examining the bads of Indian credit, the Finance Member said—

"Broadly speaking it may be said that both in the provinces and in the Central Government the era of unbalanced badgets has now been hrought to an end we have got rid of greetheally allum cumbarrasements in regard to fasting debt and can face the necessity of meeting debt and can face the necessity of meeting few years with confidence. There is no longer any fear of nur being forced to undesirable expedients, such as currency inflation, in order to meet nur ontgoings. And if the time has not yet come at which we can replace the present statutory, but imperative, ratio of 22 gold to the Ropes by an effective ratic, this is due not to our inability to mention our currency in a sound condition but to a continuance of each of the contract of the world.

"The improvement in our position is happily redected in the improved market price of all 1928, the 5 per cent tarther loan 194-55 was 1928, the 5 per cent tarther loan 194-55 was 1928, the 5 per cent tarther loan 194-55 was 1924 it was quoted at He 88 10-0, on the 15th February 1924 it was quoted at He 98 The quotation as 1925 was 1925 which was per cent of the 1922 we were able for the first time since 1925 was 1925 which have needed give us good reason to hope that we may do even better in 1924 29.

#### III The Debt

Next the Finance Member dealt with the debt, and the general statement of the position is given below -

The total debt of the Government of India on the 81st March 1924 was constituted as follows: In India (Rs Lakhs) 8,58,79 LOADS Treasury Bills in the hands of the public 2.13 Total in India 3.60,92 In England (at Rs. 15)-[ABD 3.64.22 War Contribution 28,90 Total in England 8.93.12 Unfunded-Post Office Savings Banks 24,87 Cash Certificates Provident Funds, etc. 39,97 Total unfunded 78,35 8,27,39

444

The Capital value of the liabilities undergoing redemption by way of Terminable Railway Annuities, amounting, on 31st March 1924, tc 460,095,485 or at Rs 15 90.14 Total debt 9.17.58

"I have excluded Treasury Bills, amounting to 49 65 crores, held in the Paper Currancy Reserve, as these represent a Hability not entirely comparable to ordinary public debt (I, however, keley are included, the great total of the debt amounts to 9,67 18 crores The corresponding total on the Sist March 1923 was 9,29 55 crores including a similar total of the Court of

Of the total on the S1st March 1924, 11 88 crores are due to the discount at which some e loans were issued This liability is treated as an interest charge and is being extinguished by annual appropriations from revenue within the period of each loan. It should therefore the period of each loan 14 should therefore the period of each loan 15 should therefore the sexuided from our total debt figure, which of the period of the sexuided from our total debt figure, which of the period of the sexuided from our total debt figure, which of the period is sexually se

Sinking Funds -For some years the pro-Sinking Funda—For some years the provision of an adequate sinking fund for the red amption of debt has been under consideration in India The sum actually provided for the rednotion or avoidance of debt in the 1928-28 Budget was E4 52 corres, but this was reached in rather haphazard manner. On a careful examination of the position, it was found that a satisfactory sinking fund would amount a satisfactory sinking fund would amount of the satisfactory sinking fund would amount on the satisfactory sinking fund would amount of the satisfactory sinking fund would be satisfactory sinking fund would be satisfactory sinking fund to satisfactory sinking fund would be satisfactory sinking fund to satisfa eot aside

Rallway Finance —Another overdue reform effected in the Budget, and confirmed by subse-quent legislation was the separation of Rallway Finances from General Finances — The position arising from the confusion of these two inancial arrangements was described as "an alternation between raids hy the railways on the taxpayer and raids hy the taxpayer on the Railways.

The benefits expected to accrue from the separation of the two accounts are thus described -

"The taxpayer, instead of paying the whole of the expenses and taking the whole of the isoomings of the railways, will enter into a bargain with the Esilways to receive from them (a) a sum sufficient to pay in full the interest on the capital he has invested in the commercial lines, (e) an additional divided of five sixths of one per cent on that optical and (e) a share of one fifth of any surpine carnings that may be secured in addition. In return, the railways will be left to carry on their husiness with the Finance 273

from the narrow standpoint of their effect non the general revenues in a particular period of twelve months, that is in a particular Bedget period, proposale by the Railway authorities which, thongh excellent and desirable in them solves, might, under the present system, upset he apparent equilibrium of the Budget for the vear. The taxpayer will secure a regular and tracking continuous formations tracking continuous formations to reside the continuous formations to reside the proposition of the Budget was a state of the proposition of the Budget was and Irligation Works and also the Proposition of the Budget was a state of the Budget was a state of the Budget was settled for the Budget w receipts and expenditure, and the ranways will be able to spend money according to the real needs of the railway system, unimpoded by the necessity for conforming to the wagaries of Budget figures and the requirements of Budget accounting The Railways will become a real commercial undertaking managed on commercial lines, and the taxpayer will get the henefit of commercial accounts and management

"The main figures in the Railway Bndgel framed according to the proposed new plain expenses 65 23 coross interest and other charges 26 23 crores, leaving 1,33 48 lakin accepted 4,27 30 lakin as the net contribution to general revenues Under the old system the net contribution is 4 70 lake by

# IV The Budget of 1924-25

The financial position in the current year is improved by the rise in the Indian Exchange Even in making his calculations the Finance Member was able to take a rate of one shilling and four pence three farthings, instead of the former rate of one shilling and four pence in practice, although the actual figures will not be known until later, the rate has been much better than this The Budget provides for an aroundling of Br 104.5 receive this account. expenditure of Rs 104 57 crores, with a revenue of Rs 107 93 crores, giving a prospective surplus of Rs 3 36 crores

Bndget Certified—The disposal of this sur plus gave rise to much discussion. As is apparent from what has gone before, the doubling of the Sait Tax by "certification gave rise to acute controversy It was felt on many hands that the reduction of this tax to the former figure should be the first charge on the surplus the other hand, the Provincial Contributions to the Imperial Exchequer, which are explained in the first section press hardly on several Provinces, especially on Madras and the United Provinces, and it is recognised that the gradual extinction of these contributions is demanded as soon as the financial position allows The as soon as the manual position allows the Government of India chose a middle course, suggesting that the Sait Tax should be reduced to two rupees a maund, and the balance of the surplus, Ba 1 50 core, devoted to the reduction of provincial contributions

These proposals were not discussed on their erits it has been shown that the result of merits It has been shown that the result of jard to our sterling reinittances, and the abthe elections to the Legislative Assembly was to establish a majority hostile to the Government as constituted. This majority decided, factor a see-saw course, to refuse supplies, that a permission to introduce the necessary Finance shifting fund on external deci involves I Bilis, as a protest against the refusal of the Government to progress beyond the constitution of 1919. The Vicercy therefore had to "certify as and Means Budget figures are necessarily of 1919. The Vicercy therefore had to "certify interactive rether than exact, and in particular the Budget, and in so doing he fixed the Sait | must not be them as saying that in no circ merita

# The Finance Member explained -

"I have already referred to the satisfactory receipts from Post Office Cash Certificates in receipts from Fost Once Cash Certaincates in the current year and to the practical extinction of Treasury Bills issued to the public I want to draw special attention to three further points in these agores the amount of our proposed Enpee borrowings, the position in recard to our sterling remittances, and the ab-sence of any provision for new sterling bor rowing line last is a very satisfactory feature in view of the our our obligations for the future which the provision of interest and sluking fund on external debt involves I must, however, remind the House that our

#### THE LAND REVENUE.

former gives protection and legal security The datty of assessing the revenue of a district is latter pay for it according to the valoe of ble structured to Sertiument Officers members of bolding. The official term for the method it the indian Civil Service specially delegated by which the Land Service is determined is lor this work. The duties of a Settlement "Settlement." There are two kinds of settlements of the service settlement and Temporary (which was the settlement of the former the amount of revenue has been fixed in perpetuity, and is payable by the alternative and is proposed to the settlement was described and the settlement was described and the land. He has a staff of valoes and the settlement was latter of the settle vator. The Permanent Settlement was intro-duced into India by Lord Comwallis at the close of the eighteenth century. It had the effect intended of converting a ounber of large revenue farmers in Dengal into insulfords occu-tion. The control of the control of the Burger. The actual outlivators hecame the temants of the landfords. While the latter-booms solely reponsible for the payment of the twenne, the former lost the advantage of bedding from the State. This system has prevailed in Bengal since 170 and 10 them are prevailed in the control of the cont vator The Permanent Settlement was intro

The principle underlying the Land Evenue is conjected to a thorough economic survey or system in India has operated from time immerble behavior to the trigonometrical and topogramonial. It may be roughly formulated thus—place have revenue derived from the land is equivalent the Government is the supreme landord and the revenue derived from the land is equivalent the growth of the stretch of the land is equivalent the growth of the stretch of the stretc experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which close of the eighteenth century where it the control of the eighteenth century where it the control of the eighteenth century where it there is the control of the eighteenth century where it is not the control of the eighteenth century where it is not the control of the contr

Under the Temporary Settlement land tenures fall into two classes—peasant-holdings and landlord-holdings, or Ryotoseri and Lemas-dari tenures Broadly epeaking, the difference between the two in a fiscal sense is that in Ryot wari tracts the ryot or cultivator pays the revenue direct. In Zemundari tracts the land lord pays on a rental assessment. In the case of the former, however, there are two kinds of Ruotscars holdings—those in which sach individual occupant holds directly from Gov ernment, and those in which the land is held vanment, and chose in which the land is held by village communities, the heads of the village being responsible for the payment of revenne on the whole village area. This latter system prevails in the North In Madras Bombay, Burna and Assam, ryotwari tenure is on an Individual besis, and the Government enters into a separate agreement with every single occupant. The hasls of assessment on all classes of holdings is now more favourable. to the cultivator than it used to be Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land was levied on the anticipated yield of the land during the snuling period of settlement. How the actual yield at the time of assessment alone is condidered, so that the cultivator gets the who e of the benefit of improvements the product of the province of the product of the province of the product of the province of the product of th from a general enhancement of values the principle that improvements effected by private enterprise shall be exempt from assess ment is now accepted by the Government and provided for in definite rules

#### Incidence of the Revenue

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circum stances of the holding Under the Permanent Settlement in Bengal Government derive rather less than £3,000,000 from a total rental esti less than \$3,000,000 from a total rental esti-mated at \$213,000,000 Under Temporary Settlemants, 50 per cent of the rental in its virtually a maximum demand in some parts the impost falls as low as 35 and sven 25 per cent. and only rarely is the proportion of one-half the rental exceeded in regard to Ryot serviciness it is impossible to give any digure were traces it is impossible to give any agare that would be generally representative of the Government's share. But one-fifth of the gross produce is the extreme limit, below which the incidence of the revenue charge varies greatly About sixteen years ago the Government of India were invited in an infi-Government of India were invited in an influence of the control of

is to alter nothing, but to maintain and place on record that which exists."

The Two Tenures.

Under the Temporary Settlement land tonures fall into two classes—peasant-holdings and admired that the two classes—peasant-holdings as a volume, it is still the nuthoritative expensed and admired-holdings, or Ryetseart and Ressar-siltion of the principles controlling the Land Ressar-siltion to the controlling the Land Ressar-siltion to the Government of India. Revenue Policy of the Government of India, n a systes of proposition claimed to be es-tablished by this Resolution the following progressive moderation is the key note of the Government's policy, and the standard of 50 per cent, of the assets is more often departed from on the side of desciency than excess (2) in the same areas the State does not hesitate to interfere by legislation to protect the inter ests of the tenants against oppression at the bands of the landlords (8) in Ryotscari tracts bands of the landiords (3) in Tsyotheori tracts the policy of iong term settlements its belon extended, and the proceedings in connection with new settlements simplified and cheapened. (4) local-tration (of land) as a whole is neither immoderate nor burdensome, (5) over-assessment is not, as alleged, n general or widespread source of poverty, and it cannot fairly be regarded as a contributory cause of faults. It does not be the contributory cause of faults the same time the Government faults between the same time the Government of cours, to be imposed progressively and gredually, and not per sakum, (6) greater elasticity in revenue collection, suspensions and remissions being allowed according to seasonal variations and the circumstances of the people, variations and the circumstances of the people. variations and the circumstances of the people, (c) a more general resort to reduction of assess ments in cases of local deterioration

### Projection of the Tenante

In regard to the second of the five propositions noted above, various Acts have been passed from time to time to protect the intercents of tenants against landlords, and also to give greater security to the latter in posses elon of their holdings. The Oudh Tenancy and of their holdings The Oddn Trannoy Act of 1886 placed important checks on en hancement of rent and eviction, and in 1900 an Act was passed emphiling a Landowner to entail the whole or a portion of his estate, and to place it beyond the danger of allenation by his beirs. The Funjab Land Allenniton Act, to place it beyond the danger of alloration are in bis beits. The Funish Land Allendmin Act, passed at the instance of Lord Curson, em Bodied the principle that it is the duty of a Government which derives such considerable proportion of its revenue from the land, to interfere in the interests of the unitivating classes. This Act greatly restricted the credit of the outlivator by problibiting the allenation of the land in payment of debt. It had the credit of according the process it which the results of according to the province of larger latton affecting land tenure has been passed from time to time in other provinces and it has been called for more than once in Bengal, where under the Permanent Settlement (in the land the Permanent Settlement (in where under the Permanent Settlement (in the land the Permanent Settlement (in the land the Permanent Settlement (in the Permanent Settl where under the Permanent Settlement (in the words of the Resolution quoted shove), "so far from being generously treated by the Zemladars, the Bengal cultivator was rack rented, impoverished, and oppressed"

The literature of the subject is considerable

#### EXCISE.

The Excise revence in British India is derived from the mannfacture and sale of intoxica ting liquors, bemp, drugs toddy and opium. It is a common place amongst certain sections of tem perance reformers to represent the traffic in intoxicating liquors as one result of British rule There is, however, sbundant evidence to show that in pre-British days the drinking of spiri tuous liquors was commonly practised and was a source of revenne

The forms of intoxicating liquor chiefly con-The forms of intoxicating liquor chiefy consumed are country opirit, fermented pain juice, beer made from grain, country brands of run, handy, see, incouly mannicatured mait beer and imported wine, beer and spirits. Country spirits main source of revenue, except in the Maries Presidency, and yields about two-thirts of the total receipts from liquors. It is usually prepared by distiliation from the Mowers flower, molasses and other forms of unrefued sugar, molasses and other forms of unrefued sugar, fermented paim juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Admin istration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a epecial shop was annually granted This of course was a kind of control, but it only enabled Government to impose hapharard taxation on the liquor traffic as a whole by means of wend fees. It did not enable Government to graduate the taxation accurately on the still head duty principle nor to insist upon a stan-dard of purity or a fixed etrength of liquor Moreover for political and other reasons the extent of control could not at first be complete

be worked very cantiously Gradually, as the Administration began to be consolidated, the numerous native pot-stills scattered all over the country under the crude arrangements then in force began to be collected into Can tral Government enclosures called Distil leries, thus enabling Government to perfect its control by narrowing the limits of supervision, control by narrowing the limits of superwistor, and to regularize ite taxation by imposing a direct still head duty on every gallon kaned from the Distillery under Distillery arrangements it has also been possible to regulate and eupersies thoroughly the manufacture of its liquor and its disposal subsequent to leaving the Distillery by means of a system of transport passes, establishment supervision, improved distrintion and verd arrangements.

#### Various Systems.

The Out-Still System may be taken to incinde all systems prior in order of development to the imposition of Still head duty Briefly stated the etages of development have been-First farms of large tracts, Second farms of emaller areas, Third farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area. Fourth farms of similar right subject to control of means and times for dissubject to control of means and times are usefulling and the like The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and the wider of development from the lower different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Esche Administration in most provinces of British indic has progressed on uniform lines the key most like the possible to work must be a fixed dainy system possible to work must be combine the Escrings and fixed duty systems with the other of securities. extent of control could not at first be completed. There were tritles of shortgaines who regarded the privilege of making their own liquor in their private homes as a long established right of their private homes as a long established right of their private homes as a long established right of their private homes as a long established right of their private homes as a long established right of their private homes of their private homes and their private homes are also as a list turn been superscited by their own hards. The histoduction of any green amongst those peoples had to green any private and their properties and their private and their private homes and their private homes are also as a list turn been superscited by their own hards. The histoduction of any green amongst those peoples had to green any private and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes and the private homes are also as a private homes and the private homes are also as a private homes and the private homes are also as a private h

Salt. 278

iers in respect of manufacture The right of wend is separately disposed of The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum stillhead duty revenue in the monopoly area being guaranteed to the State during the term of the lease

The recommendations of the Indian Excise The recommendations of the Indian Ercise Committee of 1905-06 resulted in numerous reforms in British India, one of them being reduced the Indian Committee of Indian Committee of Indian Committee of the Indian Committee of Indian Comm revalls over the greater portion of British India The other significant reforms have been the revision of the Provincial Excise Laws and regulations, and the conditions of manufacture vend, storage and transport, an improvement to the quality of the spirit, an improved system of disposal of vend licenses reductions and re-distributions of shops under the guidance and control of local Advisory Committees and gradual onhancement of taxation with a view to checking consumption

Since the issue of the report of the Excise Committee 1905-06, no less than 213,000 square committee 1900-00, no less than 213,000 square miles of territory were trensferred from the out-still to the distilling system in 1005-06 39 per cent of the total excise area and 28 per cent of the population of that area were served by ont-stills, the proportions in 1012 13 were only 15 and 8 per cent respectively

Excise has now been made over entirely to Axine has now been made over entirely to the Provincial Governments, and the dottee vary from province to province The governing principle in fixing these rates is the highest duty compatible with the prevention of lilled dis tillation. In the Bombay Fresidency the issue of spirit to all country spirit shops has been rationed on the basis of consumption for the year 1920 21 From that consumption reduced to proof gallons 10 per cent, is deducted in the case of shops in Bombay City and 5 per cent claewhere and the ration is then fixed for each shop according to the issues in the corresponding month of 1920-21 This is the most important step taken by the new Government to reduce consumption wo large distilleries in the Presidency have been placed entirely under Government management, thus partially superseding the Contract Distilling avstem

Eap of the date, palmyra, and coccanut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma the sale of shop licenses is the sole form of taxation Country brands of rum, and so-called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in remains and winsares, are unamined the grant out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer for European and Eurasian consumption The uniform fee of S annas per galion is levied all over India at the time of issue.

Foreign liquor is subject to an import duty at the tariff rates, which are set out in the Customs Tariff  $(q \ v)$  It can only be sold under a license.

Since the war Brandy and Whisky have been mannfactured in considerable quantities at

The base used is the Mhowra flower It is

drunk in big towns as a substitute for German opirit, and is excised at tariff rates Drugs —The narrotic products of the hemp plant consumed in India fall under three main categories, namely, gania or the dry flowering tops of the cultivated female hemp plant tops of the cultivated ismass hemp plant chars, or the resinons matter which forms an active drug, when collected separately, and bhang, or the dried leaves of the bemp plant whether male or female cultivated or unculti-vated. The main features of the existing system are restricted cultivation under supervision, tem are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative dury before issue, retail sale under licenses and restriction on private possession Licenses to retail all forms of hemp drugs are usually sold by anction. The sale of distrashab been prohibited in the Bonnay Presidency accept Sindh from the 1st April 1822.

Cocept shad from the 1st April 1922.

Oplum —Oplum is consumed in all provinces in India. The drug is community taken in the form of pills, but in some places, chiefly on social and ceremonial occasions, it is drunk dissolved in water Oplum smoking also prevails cassoved in water Opium smoams also prevails in the City of Bombay and other large towns. The general practice is to sell opium from the Government Treasury or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned shops Further legislaor several sanctioned shops Further legisla-tion against opium smoking in clubs and dens is now under contemplation

The estimated opium revenue in 1924-25 is Bs. 4.33.60.000.

Reserve amounted to £25,000,000 On the outbresk of the war in Angust 1914 the Reserve was krawn upon to meet the demands for sterling remittances, and Government offer to sell £1,000,000 of Bills weekly

Since 1870 there had been no coinage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891 92.

A Royal proclamation was issued in 1918 establishing a hranch of the Royal Mint at Bombay It stated —Snhjest to the provision of this proclamation the Bombay Branch Mint shall for the purpose of the coinage of gold coins be deemed to be part of the Mint, and accordingly, (a) the Deputy Master of the Bombay Branch Mint shall comply with all directions be may receive from the Master of the Mint whether as regards the expenditure to he in curred or the returns to be made or the trans mission of specimen coins to England or other mission of specimen coins to England or other wise and (i) the said specimen coins shall be subject to the trial of the prv under section 12 of the Coinage Act, 1870, so that they shall be examined separately from the coins coined in England or at any other hearth of the Mint and the coincide of the coincide of the coincide of the Mint and ether officers and persons employed for the unrose of carrytine, or the husburs of for the purpose of carrying on the husiness of the Branch Mint may be appointed, promoted, suspended and removed and their duties assigned and salaries awarded and in accordance with and salaries awarded and in accordance with the provisions of section 15 of the Coinage Act, 1870 Pending the completion of the arrange-ments at the Branch Royal Mint, power was taken by legislation to coin in India gold moburs of the same weight and fineness as the modurs of the same weight and fineness as the sovereign Altogsther 2,109,703 pieces of these new coins of the nominal value of Rs 3,16,45,546, were struck at the Bomhay Mint The actual coinage of sovereigns was begun in August, 1918, and 1,229,572 sovereigns were coined dur-ing the year This branch the Royal Mine was closed in April, 1919, owing to difficulties in supplying the necessary staff

Act XXII of 1899, passed on the 15th September 1899, provided that gold coin (sovereign and half sovereigns) shall he a legal tender in payment or on account at the rate of fifteen rupees for one sovereign

With the receipt of large consignments of gold, the Bombay Mint made special arrangegoal, the Domosy mint made special arrange-ments for the refining of gold by the chlorine process and at the end of the year 1919-20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold. The Refinery turned out 16,62,486 fine tolas of refined gold in 1920-21

Nickel. The Act of 1906 also provides for the coinage of a nickel coin It was directed that the nickel one-anua piece should thenceforth be coined at the Mint and issue The notification also presthe Mint and issue. The notification also presented the design of the coin, which has a wavel edge with twalve scallops, the greatest diameter of the coin being 21 millimetres and the least diameter 19 8 millimetres. The desirability of issuing a half ann nickel coin was considered by the Government of India in 1909 that actor consultation with Local Government it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin The two-anna nickel coin was introduced in 1917-18, and the four anna and eight anna nickel coins in 1919 The eight-anna nickei is now being withdrawn from of collation.

# The Currency System.

The working of the Indian currency system much importance, and they continue to hulk which has commanded a varge amount of public at largely in all Indian accommis questions that attention since 1893, was forced to the front in 1920, as the result of measures taken to stabilise the exchange value of the rupee after the fluo Indian tunitions caused by the war These assumed so guare

so largely in all Indian economic questions, that we propose to give here a short summary of the Indian currency system in non-technical lan-

#### I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallio system, with sliver as the stand-ard of value and a circulation of sliver rupees and notes based thereon But with the opening of new and very productive silver mines in the United States of America the apply of silver exceeded the demand and it steadily receded in value The result was that the gold value of the rupes, which was nominally two shillings, fell continuously until it reached the neighbourhood continuously until it reached the neighbourbood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Govern-ment of India has to meet every year in London a substantial sum in the form of payment of laterest on the delt, the salaries of officials on interest on the debt, the salaries of officials on leave, the positions of retrieved officials, as well as large payment for stores required for fate enterprises. As the repose fell in its gold value the prise of the position of the properties of the position of the pos measures to raise and fix the gold value of the rupes for the purposes of exchange

Clasing the Mints—The whole question was examined by a strong committee under the presidency of Lord Herachell, whose report is commonly called the Herachell Report It was decided in 1898 to close the mint to the un restricted coinage of silver This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupses to the circulation Enpees remained unlimited legal tender and formed the standard of vaine for all internal transactions Since Government refused, and no-one else had the power to coin rupees, as soon as circumstan ces led to an increased demand for rupees, the ces led to an increased demand for rupces, the exchange vaine of the rupce began to rise. By 1898 it had approached the figure of one shilling and fourpenc. Meantime, in response to the undertaking of Government to give notes or rupces for gold at the rate of litteen rupces to the pound sterling, gold began to accumulate in the Paper Curroncy Reserve These purposes having been attained, a second committee was appoint-du under the chairmanship of Bir Henry Yowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy

## II THE NEW STANDARD.

The Fowler Committee rejected the proposal | Gold Standard Reserve Insamuch as the cost to re-open the Mints to the free coinage of silver | Of coining rupees was approximately elevenpence They proposed that the exchange value of the | halfpenny, and they were sold to the public at rupee should be fixed at one shilling and fourpence, or fifteen rupees to the sovereign They further suggested that the British sovereign should be made a legal tender and a current coin in India that the Indian mints should be in Indie snat the Indian mints should be thrown open both currestricted coinage of gold, so that the rupes and the sovereign should treely circulate side by side in India The goal which the Committee had in view was a gold standard supported by a gold currency Now under the condition which compelled the Government, of condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and fourpence, save by the fraction which covered the cast of shipping gold to India. But if the balance of trade turned against India, it was still penalties for the rate of exchange to fail To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set saide in a special reserve, to be called the

ovan one was proposed as profit manuch as the cost of coining rupes was approximately elevangence haffpenny, and they were sold to the public at one and fourpence, the profits were considerable, they were to have been kept in gold, so as to be freely available when required for the support of exchange

A 16 pence Rnpee —The Government of India professed to accept all the recommenda-tions of the Fowier Committee, actually only a portion of them was put in practice The om-oial rate of exchange was fixed at one and four-The sovereign and the half sovereign were declared nulimited legal tender in India. But after a first attempt when sovereigns soon oame back to the treasuries, no effort was made to support the gold standard by an active gold currency The gold mint was not set np The Gold Standard Reserve was established, but instead of holding the Reserve in gold, it was lavested in British securities These practices gave rise to conditions which were never cootempisted by the Fowler Committee Reference has ment of India, which at the time amounted to

about seventeen millions sterling a year These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India sold Bills against gold deposited in the Bank of England in London These Bills when presented in India were cashed at the Government Treaeuries. Now if the Secretary of State sold Council Bills only to meet his actual require ments, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of hullion or by the creation of credits It is a fact that owing to the failure of the policy of encouraging an active gold eirculation to enpport the gold standard, gold tended to accumulate in India in embarrassing quantities In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London end to obtain Connell Bills against it, than to ship the gold to India Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper namoed in sovereigns it was sometimes obeaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills Considerable quentities of sovereigns found their way into India and obreu lated freely, particularly in the Bombay Presidency, the Funjah and parts of the Central Fre

Sterling Remittance—This system worked until 1907-98. A partial failure of the rains in India in 1907, and the general financial strin gency all over the world which followed the American financial crisis in the antum, caused the Indian exchange to become weak in November This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve There had been very heavy

enining of rupees in India and the amount in the Reserve was ample But the Reserve was in securities not in gold, and was therefore not in a liquid form, nor was the time an opportune one for the realisation of securities Moreover the anthorities did not realise that a reserve is for use in times of emergency It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm np , meantime he would Binks, and it would arm up, meantmen en would insance himself by drawing on the funds in the Cold Standard Reserve But it was apparent that the stoppage of the sales of Coundls was not enough, there was an insistent demand for the export of gold, or the equivalent of gold The Government of India retused and exchange fell to one and threepence twenty-three thirty seconds Ultimately the authorities had to give way It was decided to sell in India a certain way it was decided to sell in indua a tertain quantity of sterling hills on London at one and threepence twenty nine thirtyseconds, represent ing gold export point and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve \_Bills the funds in the Gold Standard Reserve Bills to the extent of between eight and nine millions sterilag were sold, which regularised the postion and the Indian export rade recovered. Thus and the Indian outrency system It constited of silver rupees and rupen onces in India, with the covereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of recovering the result of the recovering that the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of recovering the recovering the rate of the recovering the rate of the recovering the rate of the sovereign and half sovereign unlimited asie of Council Bills at gold point in London, it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it committee, for these was now gold mint and only a similar gold circulation, some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India. It was described by one of the most active workers in its as "limping standard." to the extent of between eight and nine millions active workers in it as a " ilmping standard "

## III THE CHAMBERLAIN COMMITTEE

This brings us to the year 1918 There were ; in silver in order to facilitate the coining of many critics of the system Some hankered for as return to the open mints, others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpeuny rupes But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office These criticisms were

in silver in order to facilitate the colning or rupees, and at the unlimited sales of Council Bills at rates which prevented the Iree flow open to India, thus forcing token rupees into solid to India, thus forcing token rupees into the council of the Iree flow of the Iree flow on the Council of Iree of the policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lend on at low rates of interest to the London until store both more than the Iree of Iree o until at one point money was not available for losus even against Government securities and the hank rate was artificially high All shees things were done, it was contended, on the obiter dicts of a small Finance Committee of the India taken by the India Office These criticisms were called to the Court of the Court of

opinion was tocassed on the discussion through branch of the Gold Standard Reserve should be the action of the India Office in purchasing at his abeliabed, that Revence Connectisational be sold block of all was for cooling purposes from Resers

Tails is known is the Chamberiain Commission when the Chamberiain Commission were that it was unnecessary to support the Gold Standard by a gold currency, is that it was not to the advantage of India to the control of Austral, in which he urged that the terms into the day and the control of the control o case it was not to the avantage of infinite of an internal use of gold as currency is signoif the token currency by providing further courses the internal use of gold as currency is signoif the token currency by providing further by a thoroughly adequate reserve of gold and cases to the ourtency became necessary, include sterling, that no limit should be fixed to the ing the issue of an Indian gold color of a more own which should be held in gold, that the all-wise the half worresign

#### CURRENCY AND THE WAR

The report was in the hands of the Government | rupees of India shortly before the onthreak of the war Some immediate steps were taken, like the aboli tion of the silver branch of the Gold Standard Beserve, but before the Government could standard Beserve, but before the Government could deel entirely with the temporising recommendations of the Commission, the war broke out. The early or ton commission, the war proke out. The early effects of the war were precisely those anticipated. There was a demand for steriling remittance which was met by the sale of Reverse Concilis \$8,707,000, being sold up to the end of January 1915. There were withdrawals from the Post Office Sevings Banks, and a net sum of Rs 8 crores was taken away. There was some lack of confidence in the Note issne, and a demand for gold , Notes to the extent of Rs 10 crores were presented for encashment and the Govern ment were obliged to suspend the issue of gold But these were transient features and did not one cause were transient resultes and the not demand a moretorium, confidence was soon allow rupees to be cothed without loss. The revived and Exchange and the Note issue contributed strong. The difficulties which afterwards from contribute arose were from causes completely manual opposed by all students of the Indian currency. opaced by all structure or the induction of the area from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade too Aline and the decline; a heavy exponditure in India on behalf of the British Government, and a phenomenal rise in the price of aliver If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £8 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennum. The disburse ments in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the predious metals, owing to the import of the predious metals of the import of the predious metals of the import of the predious metals of the predious metals of the india silver nor hy media in prantion of the Note Issue, significant entire securities in the United Kingdom, chiefly Treasury Bills, and the issue of coined

But simultaneously there was a reduction in the ontput of the silver mines of tha tion in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27; pence per tandard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main did culties in India were not therefore the prevention of the rupes from failing below the tatio of 15 to one but to keep it within any limits and to provide a sufficiency to meet the demand to

Date of Introduction	Minimum Rate for Immediate Telegraphic Transfers
3rd January 1917	1 41

Rise in Exchange.—Silver for coining was purchased in large quantities, the following table about acquired by the Government of India in the last five years —

					In open Market (Standard Ounces)	From United States Dollar Reserve (equivalent in Standard Ounces)
1915-16					8,686,000	
1916-17					124,585,000	_
1917-18					70,928,000	_
1918-19	••				106,410,000	152,518,000
1919-80 (to	80th Nov	rember	1919)	•	14,108,000	60,875,000
				Total	324,612,000	213,393,000

The total amount is thus 538,005,000 standard ounces.

Gold and silver were taken under control and measures taken to prevent export and melting fold went to a premium and cessed to innestion as corrector. The Notes issue was expanded, and small Notes of one and two and a half rupees were specially prepared to economise the use of silver rupees. The nature of this expandion is shown below ——

		1		Lakhs o	Bupees,		
	Date.	Gross Note	o	omposition	of Reserve.		Per- centage of Total Metallic

The facilities for the encashment of Notes were expenditure for the Imperial Government. It reduced In these ways the Government were often meant sailing very near to the wind, but able to maintain the broad convertibility of the these measures carried the country through the Note issue and inance the essential trades and

#### V. THE 1912 COMMITTEE.

The effect of these measures however was to state in the course of these measures however was to state in the course of the cour

- (4) The reduction of the fineness or weight of the rupes, the issue of 2 or 3-rupes coins of lower proportional silver composit than or lower proportional silver composit than are supedisents that cannot be recommended. (46) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currenty from the risk of becoming inconvertibility and the causal to entertained.
- (ie) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continu ance of this benefit

(v) Indian trade is not likely to enffer any permanent injury from the fixing of exchange at

a high level

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fall to adjust them sayes with equal rapidity to the lower level of prices, then it might be necessary to consider the problem efresh.

(vi) The development of Indian industry rould not be seriously hampered by a high rate of exchange

(e(i) The gain to India of a high rate of ex change for meeting the Home charges is an inci-dental advantage that must be taken into con

sideration (exis) To postpone fixing a stable rate of ex-change would be open to serious criticism and entail prolongation of Government control (iz) The balance of advantage le detdedly

on the side of fixing the exchange value of the rupes in terms of gold rather than in terms of

The stable relation to be established between the rupes and gold should be at the rate

of Ra 10 to one sovereign, or, in other words, at the rate of one rupes for 11 30 016 grains of fine gold, both for foreign exchange and for internal circulation (xi) If sliver rises for more than a brief period above the parity of 2s (gold), the situation should be met hy all other available means rather than

by impairing the convertibility of the note issue-Such measures might be (a) reduction of sale of ouncil Bills. (b) shetention from purchase of silver, (c) use of gold to meet demands for metal its currancy. If it should be absolutely neces-tary to purchase silver, the Government should be prepared to purchase even at a price such that es would be coined at a loss

rupees would be coined at a loss (26) Council Drafts are primarily sold not for the convenience of trade but to provide for the convenience of the wider sense of the term the Home charges in the wider sense of the term There is no obligation to sell drafts to meet all trade demands; but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate position to see a trade demand for them exists, there is no objection to his doing so, subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender as competitive rates, a minimum rate being fixed from time to time on the basis of the starting cost of shipping gold to Indis At present time rate will vary but when starting is again, equivalent to gold, it will remain unform.

- (xtii) The import and export of gold to and from India should be free from Government
- (xiv) The statutory minimum for the metal-tic portion of the Paper Currency Reserve should be 40 per cent of the gross circulation
- As regards the fiduciary portion of the reserve, the holding of securities issued by the Govern-ment of Indis should be limited to 20 crores The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date The balance of the invested portion above these 30 crores should be held in short-dated securities with not more than one year's maturity, issued by Government within the British Empire

The eterling investments and gold in the Paper The defining investments and got in the raper Currency Reserve should be revaled at 2a. to the rupce The depredation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of dischargeing this liability in a limited number of years

(xr) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five corors over and above the normal fiduciary issue as leasn to the Presidency Banks on the security of export bills of exchange

Minerity Report -The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note issue, and without debaring the standard alver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form In order to attain these ends it was imperative to fix a ratio for the rupe in relation to gold which would ensure that the Government was able to purchase eliver for coining purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold all other recommendations are cubtilary thereto. But in this they were not manimous an important member of the Committee, Mr Dadaba Dalai, of Bombay, appended a minority report in which he urged the adop-tion of the following courses—

- (a) The money standard in India should re main unaltered, that is, the standard of the sovereign and gold mobur with rupees related thereto at the ratio of 15 to 1
- (b) Free and unfettered imports and exports by the public of gold bullion and gold coins
- (c) Free and unfettered imports and exports by the public of sliver builden and sliver coins
- (6) The existing silver rupees of 165 grains of fine silver at present in stroulation to continue full legal tender

- (f) As long as the price of allver is over 92 conts Government should coin 2 rupes silver coins of reduced fineness compared with that of the present allver rupes and the same to be unlimited legal tender. As long as the price of allver is over 02 for coverment requirements only and not for Government should coin z rupes allver for our process, succept for the purpose mention-of reduced insenses compared with that of resent allver rupes and the same to be underestatilizer rupes and the same to be underestatilizer proceed or "Reverse" drafts on London to be said only at 13 29-23. They proceed or "Reverse" drafts to be kept spart from all other Government to sell Council Bills by counting the contract of the contract of the council Bills by counting the contract of the counting the count

(a) As long as the price of silver in New York tary of State. The Budget estimate to show is over \$2 conts, dovernment should not mannitations under separate headings the amount of Council Education Silver rapees on the ining 155 grants fine. Silver distant for Householder (Applied Ottages, for Capital Ottage and Discharge of Debt. Council Bills to be sold (f). As long as the price of allver is over 92 for Government requirements only and not for

(g) Government to sell Conneil Bills by com- | ment rmoss and no so so nearest any purpose petitive tender for the amount defined in the | cocept to meet drafts drawn by the Secretary Budget as required to be remitted to the | Secre- | State at a rate not below is 4 3 32d per rupes.

#### VI. THE TWO SHILLING RUPEE

mittee was that the rupes should be linked to gold and not to sterling, in view of the decline in the value of sterling, that it should be linked at the rate of two shillings instead of the standard vaine, one and fourpence all other recom mendations were ancillary to this But it is very important to bear in mind the twofold problem which confronted the Committee It would be quite easy to fix any low ratio provided the paper ourrency were made inconvertible, or the rupes debased to such a point that the Government in sensed to said a point that the Government in providing runce currency, were independent of the price of silver. But if the convertibility of the runce were to be maintained, and if the runce were not to be debased, it was essential that the new ratio should be one at which the Government. sould reasonably rely on purchasing without loss the silver necessary to meet the heavy de-mands for rupes in India. For reasons set out in the Report, the Committee came to the con-clusion that the Government could reckon on purchasing silver for coining at a little under two shillings gold, and that powerfully infinenced them in fixing the new ratio at two shillings gold.

The Report Adopted —The Currency Committee's Report was signed in December 1919, but it was not until Pebruary 1920 that action was taken thereon. In the first week of that meanth a Notification was isseed in India accepting the principal recommendations in the Expension and notifying that the necessary official action and notifying that the necessary official action wide field, but for the sake of clarity in the hardally are also because of the principal control of the sake of clarity in the hardally are half conceptuate on the main terms. narrative we shall concentrate on the main issue, the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade That may be summarised in a senand trade Anax may be summarrsoon as son-tence. A policy which was avowedly adopted to seoure firity of exchange produced the greatest fluctuations in the axchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hun-dreds of hig traders to the verge of bankruptcy

The fundamental recommendation of the Com- ) Currency Report was signed the Indian exchan currency hepotr was signed the indust exchange gow were practically at two shillings gold. But between the signing of theReport and the taking of official sotion, there was a sometional fall in the sterling exchanges, as measured in dollars, the dollar-sterling rate, inasmuch as America was quoins-mering rate, insamica as america was the only free gold market, being the dominating factor in the situation Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification accept-ing the Currency Committee a Raport was issued. The Indian exchanges were two shillings and fourpence, and weak at that, the gold rate was about two shillings ninepence. There was an immediate and prodigious demand for Reverse Councils, to take advantage of this high rate of exchange, the market rate jumped up to two shillings eightpence

Effect of the Rise -The effect of a rise in exchange has been well described in the words of the Currency Committee's Report, it is that arising exchange stimulates imports and impedes exports, the effect of a falling exchange is the reverse

Now when the official notification of the two shilling rupee was made the Indian export trade was weak The great consuming markets of Great Britain and America were glutted with Indian produce The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit The only Indian staples which were in demand were foodstuffs, and as the rains of 1920 failed over a wide area, the Government were not able to lift the embargo on the export for foodstuffs, save to a limited extent in the case of wheat On the other hand, the import trade was strong Orders had been placed for machinery and other

Orders had been pisced for machinery and other manufactured goods during the war and after the Armstele for delivery at the discretion of manufactures. These began to come forward Difficulties Accontuated—In scoodnawth with the principles is id down by the Ourrency Oumnities these difficulties were secentuated by the action of Government in raising acclasing Financial Confusion—This result was by an administrative act. The weak export produced by many causes it has been explained above that the essential restures of the Indian emplation of a high exchange gave powerful currency system are the free sales of Council Silis at goid export point in London to pervent exchange from rising above the official regarder exchange from rising above the official regarder goods, in which textile filled an important place and the sale of Peverne Councils in India at gold all regards to prevent exchange from falling the capture point to prevent exchange from falling the capture of sheeked the export of Indian estion. Japan is the largest buy at of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trada was severely shaken and stocks accumulated at a great rate Even before the 1920 crop came into the market the stocks in Bombay were double these in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabiliza-tion of exchange at the high ratio attempted a bopeless proposition

23

Confession of Failure - Gnvernment struggled long against these conditions in the des perate bope that a revival of the export trade perate bope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the eterling-doller exchange, which at one time took the rate for liverer Councils to two shiftings to upsure half penny They sold two millions of the councils a week, then two millions, then dropped draw to a steady million. But their policy only aggressed the situation In addi-ton the importance of the council of the council of the tent of the council of the council of the council of the tent of the council of the council of the council of the tent of the council of the council of the council of the tent of the council of the council of the council of the council of the tent of the council of the council of the council of the council of the tent of the council of the cou ing the import trade at a time when the precise on verse was demanded, their action created an artificial movement for the transfer of capital from India to England Large war profits accumulated in India since 1914 were hurrically liquidated and transferred to England Then the difference between the Reverse Council rate and the market rate, which on some occasimas was several pence, induced gigantic speculations. The Exchange Banks sot aside all their available resources for the purpose of bidding for Bilis, and at once sold their allotments at substantial profits Considerable groups of speculators pooled their resources and followed the same course In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The hiddings assumed such proportions that it was necessary to put up fifty lakes of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy epeculators Various expedients were tried to remedy the cituation but without the slightest

Sterling for Gold -The first definite break Stering for 404 — He first desired orders from the recommendations of the Currency Committee come at the end of June, when the Guvern ment announced that instead of trying to at abiliase the rupes at two shirings gold they would aim at stabilities it at two shirings forting, leaving the stabilising it at two shillings steriling, leaving the gap between steriling and gold to be closed when the steriling ste

that Reverse Councils would be stopped alto-gether Exchange immediately shumpd to between one and sixpense and one and seven-pence, and it continued to range between these narrow points until the end of the year. The market made is owe rate of a made a most state and one of the year. attain an administrative etablifty

Other Measures.—Apart from the effort to atabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abandonment of the import duty on silver, always a sore point with Indian buildenists Legislative action was taken to after the official ratio of the sovereign from fifteen to one to ten to one, due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at fifteen rupees. As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive amuggling of sovereigns into India to take advantage of the premium Then to take advantage of the premium Then measures were adopted to give greater classification to the Note issue. Under this old saw believes to the Note issue. Under this old saw believes the statute and it could be altered only by altering the law or by Ordinance An Act was pessed king the metallic portion of the Paper Currency Reservor as fifty per cent of the Note issue, this invested portion being limited to Iss 20 cores invested portion being limited to Iss 20 cores in Indian securities and the balance in British In Indian securities and the balance in British securities or not more than twelve months currency. The invested portion of the Paper Currency. The invested portion of the Paper Currency and an undertaking was given that the profits on the Note issue would be devoted to writing and the depreciation, as also would be the interest on the Gold Standard Beserve when the total had reached 450 millions. Further, in order to give greater elastisity to the Note issue, power was taken to issue Rs 5 erores of commercial bills These measures, save the alteration of the ratio, were generally approved by the commercial public

Results.-- It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising acrohange impedes exports and stimulates imports, a failing exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted At the moment when it was

existeally high rate of exchange stimulated these focus, but they have confined to the steam by a dankets of exchange at the new total to the loss on these—that is the difference attempt by a dankets of exchange of let let loss, the natural fall in exchange would have the natural fall in exchange would have the natural fall in exchange would have the office of the state of the st Exporters found themselves loaded with produce far which there was no foreign demand, import-ers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached Immense losses were incurred by all importers The Government sold £55 by all importers The Government sold £55 were a considerable contraction millions of Reverse Councils before abandoning and the silver token currency

their stort to stabilise exchange at the law ratio, the loss on those—that is the difference between the cost of putting the funds down in London and in bringing them back to India— was Rs 35 orores of rupces Government sold £53 millions of gold, without breaking or serious— Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamiathis expenditure being made in India and set off hy payments in London The only advantages were a considerable contraction of the Note issue

#### VII — RECENT EXCHANGE AND CURRENCY HISTORY.

that is one shilling and fourpence to the rupee Meantime great improvements were made in the organization of Indian credit. The three Presidency Banks were merged in The Imperial Bank of India, a State Bank in all hut name, and the Bank entered into a contract name, and the Hank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank has mobilised and ettengthened and widened Indian credit. The metallic backling of the Paper Currency has been strengthened or the Paper Currency has been strengmented and the fluctuary perion of the Reserve brought within negligible proportions Greater elasticity has been established in the currency by the power to issue emergency currency np to Rs 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency sgainst sterling in England The Government of India now pur chases sterling in India to meet its Home Char ges when the conditions are favourable, instead of relying entirely on the sales of Council Bille of relying entirely on the sairs of the in London A notable feature in Exchange history during the past eighteen months has been the rise of Exchange, of its own strength, above the one and fourpenty figure Towards the close of 1924 it gradually rose to one shilting and elipence and stayed there. The prevailing the backbone of the Indian currency system spatiment in India is for fixity of Exchange, are shown below —

These unfortunate experiments induced a and for a Gold Standard, not the Gold Exchange period of great caution in dealing with indian Standard folicid on it by the India ourrency The currency The currency The Gurrency The Care This has revived in consequence of way, and proved their ignorance, went out of the rise of the rupes towards gold point. There the field, and the wholesome policy of teaving is movel the rupes towards gold point. Exchange alone, to find its natural level, for abilling rupes as more than a fittion which lowed Left alone Exchange established itself survives the tragic history of 1919, but there round about the old ratio of fifteen to one, is considerable doubt as to whether we have yet reached the stage when the rupee can be safely fixed in relation to gold But if we have not reached it, we are moving toward it and we may almost say it is in sight

Committee to be appointed.—Speaking at the opening of the Legislature in January 1925, the Viceroy said he was anthorised to make the following announcement, which ex piains the conclusions of His Majesty a Government and the Government of India —

" The Government of India have been in communication with the Secretary of State on the subject of the rupes exchange, and the intention of Government is to appoint an authoritative committee to consider the question as soon as world economic factors appear anficiently stable in justify the formulation of a new policy in their judgment there is much to be gained by Judgment there is much to be gained by postponing an enquiry till those factors on which any decision must rest are less fluid and obscure. But they anticipate that, if the movement towards more stable conditions which has lately manifested itself continues, the appointment of such a committee should be rossible not later than 12 months hence.

# Agriculture.

As crops depend on the existence of plant carried on with a minimum of capital, there lood and moisture in the soil so the observed being practically no outlay on feating, build of the agriculture of a country depends alregely lugs, or implements. The accumulation of a sits soil and climate It is true that goographical straighting, the observed or the people alteraction, the observed or the people and unine and the high rate of interest and extraicod and moisture in the sou so the character of the agriculture of a country depends largely on its soil and climate. It is true that geogra-phical situation, the character of the people and other considerations have their influence which le not inconsiderable, but the limitations imposed by the nature of the soil and above all by the climate tend to the production of a certalu class of agriculture under a certain given es of conditions.

The climate of India, while varying to some extent in dogree, in most respects is remark try The main factore in common are monsoon, the dry winter and early elimner months, and the intense beat from March till months, and the intense beat from March till months. The main factore in common are the These have the effect of dividing Dottoper Inese have the cheek of the Kharif or Monacon and the Rabior Winter Season each bearing its own distinctive crops From early lone till October ahundant rains fall over the greater part of the continent while the winter greater part of the continent while the winter months are generally dry although North Wes arm India benefits from chowers in December and January The distribution of the rainfall throughout the year, which is of considerable importance to agriculture, is more too favour-able, but is not quite so bad as is often represent of The rainfall is greatest at what would otherwise he the hottest time of the year, cur indi-summer and when it is most uceded it should be remembered that in a bot countri-tipermittent showers are practically valueless intermittent showers are practically valueless as evaporation is very rapid. The distribu-tion of rainfall such as is common in England, for example, would be of little use to Indian

Seil .- For the purpose of soil classification Sail.—For the purpose of soll obsatileation two main areas in (1) The Indo-Gasgetto plains, (2) Central and Southern March Sou services or antivious of great depth. The top self-varies in texture from sand to clay, the great-er part being a light loam, porous in texture, astly worked, and naturally fertile. The great depth of the alluvium tends to keep down the soil temperature Central and Southern India on the other hand consist of hills and valleys on the other hand consist of this said value, and the the rock to be suitable for agriculture which is is mainly practised in the valleys where the soil is deeper and cooler and moisture more piential. The main difference between the soils of the two tracts is in texture and while the greater

vacance of expenditure in marriage celebra-tione The organization of co-operative oradit which has been taken in hand by Government and which has already proved encountil in many provinces will undoubtedly lead to au

many provinces will undoubtedly lead to an uncrease in Agrieutural capital. Equipment—For power the ryot depends chiedy on cattle which, as rule, are light and active but possess little hauling power. The necessary tilt for erors is hrought about by frequency of ploughing, the result being that the soil is solioum tilted as it should be. This. is not obledy due to want of knowledge on the part of the people but through want of pro per equipment The Indian agriculturist, as a rule, possesses an intimate though limited know ledge of the essentials of his own business, and

ledge of the essentials of hie own bnaines, and falls, not only through ignorance, hut also bbrough lack of ways and means the property of the property of the property blooms are usually tipped with iron points, and there is a great similarity in their shape and ge-neral design. The introduction of iron plough has made much progress in the last few years and many hundred thoreass due now in use The and many hundred thoomand are now in use The involling beam in used throughout the greater that order, and throughout Northern India that hough and the levelling beam are the only im-plements possessed by the ordusary culturator. In the beavier soils of the Decean trap a on trating implement consisting of a single blade, recembling in things a Dutch hos, is much used

Seed drills and drill hoes are in use in parts of Seed drins and Madras but throughout the greater part of the country the seed is either broadcast-ed or ploughed in Hand implements cousies of various sizes of boes, the best known of which are the *kodal* or epade with a blade set at an angle towards the ishourer who does not use his feet or unging, and the starps or small hand hoe Of harvesting machinery there is none, grat-le separated either by treading out with oxen or beating out by hand, and winnowing by the agency of the wind. in digging, and the thurps or small hand boe

Cultivation —Cultivation at its best is distinctly good but in the greater part of the country it has pienty of room for improvement. commy it mas menty of room for improvement.

As in any other country success in agriculture varies greatly with the character of the people depending largely as it does on thrift and industry in most places considering the large population cultivation is none too good. Agriculture suffers through lack of organisa tal. The main difference between the folial river two tracts is in fecture and while the process part of the difference of the control of the process part of the difference of the control of the contro

descrally applied to the maximum extent available thus does not exist. This is partially if not bit, both to Exercical to Raby corpus, Seeding is estirally mad up for by the large numbers wooden plough at drill. Thinding and spacing but not nearly so well done as they might be, and neroublivation is generally too superficial flavoration of the seed of On the whole the methods of the ryot if car ried ont thoroughly would be quite satisfactory, but it is doubtful if this could be done with the

number of cattle at his disposal

irrigation is necessary in order to grow full crope on the land, over a large part of the country owing to insufficient rain fall and the vagaries of the monsoon Canal irrigation has been greatly extended over the Punlah, Sind, Uuited Provinces and Madras through Government canals which, in addition to securing the crops over existing cultivated land, have converted large desert tracks into fertile areas The Punjab and parts of the United Provinces are naturally well suited to canal or revenees are listeriany were suited to canise irrigation owing to the frequency of their rivers. The water is generally taken off at a point a fittle distance from where the rivers leave the hills and is conducted to the arid plains below The main canal splits up into diverging branches, which again subdivide up into distributants from which the village channels receive their supplies Water rates are levied on the matured areas of crops Government on the matured areas of crops tovermment, thus bearing a part of the loss in case of failure and the strength of the strength

Irrigation causis are generally classed into (1) perennial and (2) inundation causis Perennial canals, which give supplies in all seasons generally have their headworks near the hills, thus commanding a great range of country Parther from the hills, owing to the ver-gradual slope of the land and the lowness of the rivers in the cold weather, perennial irrigation is difficult and inundation canals are resorted to These canals only give irrigation when the rivers are high As a rule, in Nortbern India they begin to flow when the rivers rise

owing to the melting of the snow on the hills in May and dry up in September Irrigation from Wells—About one quarter of the total irrigation of the country is got from lifting water from welle ranging in depth from a few feet to over fifty feet numbers have greatly increased in recent years largely through Government advances for their construction The recurring cost of this

form of irrigation has, however, greatly increased nwing to the high price of draught cattle and the increasing cost of their maintenance.

Tank irrigation is common in Central and Sonthern India Large quantities of rain water are etored in lakes (or tanks) and distributed during the drier seasons of the year The system of distribution is the same as that

Manures — Feeding of animals for slaught-lian produce. The crop is generally grown er being practically unknown in India, the after a summer falless and, except in Irrigated amount of farm yard manure generally (easts, depends largely on the conservation of available in other countries from this source (the coll moisters though the previous measoon

same purpose and the net return of organic matter to the coll is thus insignificant. In some parts cakes of oil seed are used as manures for valuable crops like tea and engarcane but in for valuable crops like tea and engareane but in the greater part of the country the only manure applied is the balance of farm yard manure available after fuel supplies have been asstisfied Farm yard manure is particularly effective and its value is thoroughly appreciated but the people have much to learn in the way of storage of bulky manures and the conservation of urine

Rice -A reference to the crop statistics shows that rive is the most extensively grown crop in India, aithough it prependerates in the wetter parts of the country viz, in Bengal, Bluar and Burma and Madras The crop requires for its proper maturing a moist olimats with well assured rainfall Fie entity varieties are numerous different from the cultivated varieties. with well assured rainfall fbe childrated varieties are numerous, differing greatly in quality and in suitability for various conditions at lity and in suitability for various conditions at mitimate acquaintance with those grown in their own localities. The better qualities are sown in sead-beds and fransplanted in the monsoon Broadcasted rice is grown generally in lowling greas and is sown before the mon oon a lt must make a good start before the moods arrive Deep water rices grow quickly and to a great beight and are generally able to keep pace with the rise in water level

bot transplanted rice the soil is generally prepared after the arrival of the monacon and is worked in a puddle before the seedings are transplanted. The land is laid out into small areas with raised partitious to regulate the distribution of the water supply. The section of the water supply. The water has a reasonable to the small submelles containing the section of the section inches apart Where available, irrigation water is given at frequent intervals and the fields are kept more or less under water until the erop

begins to show signs of ripening Wheat -- Wheat la grown widely throughout Wheel —Wheat Is grown widely throughout Northern India as a winter crop, the United Provinces and the Pun'ah supplying about two thirds of the total area, and probably three quarters of the total outture in India Tho maken'ty of the varieties grown belong to the Speckes Triticium Vulgare Indian wheats are generally white, red and ambre coloured and are mostly chaseed as soft from a commercial point of view. The grains are generally plump and will filled but the samples are spoiled plump and will filled but the samples are spoiled through mixtures at various qualities. Indian wheat is generally soluterated to some extent with barley and largely with dirt from the threshing foor and although there is a good demand in England and the Continent for the surplus produce, prices compare unfavourably with those ubtained for Canadian and Austra-

Rains in January and Jobruary are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield On irrigated land 2 to 4 waterings of the yield On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and pipil and the threshing in good years the surplus crop is bought up at once by exporters and uo time is lost in potting it on the European market as other supplies are at that time of year scarce. In years of families the local price is generally experted the property of the property sufficiently high to restrict exports

The Millets -- These constitute one of the The Millets —These constitute one of the most important group of crops in the country, supplying food for the poster classes and fooder for the actine. The varioties warv greatly in a class can be considered to the control of the c isster land than the bairs and the distribution of the two crops follows the quality of the soil. Neither for lower on bairs is manure usually applied and cultivation is not so thorough as for wheat, the main objective being to produce a fine seed bear The crop being to produce a fine seed bear The crop soon and so it requires to be thoroughly weeded in the case of lower, however, cryp large area are sown as a rab! crop. It is often grown mixed with the summer pulses and other crops in which case thin seedings are resorted to The subsidiary crops are harvested as they ipper wards. The produce is consumed in the country.

Pulses are commonly grown throughout India and the grain forms one of the chief foods of the people Most kinds do well but are subject to failure or shortage of yield owing are suspect to failure or anortage or yield owing to a variety of circumstances among which rain at the time of flowering appears to be one of the most important. They are therefore more saitable to grow as mixed crops especially with cereals, and are generally grown as such. Being deep rooted and practically independed to the control of a Nitrogen supply in the soil they withstand drought and form a good alternation in a cereal rotation. The chief crops under this beading are gram, mash, mung and moth, gram forming the main winter pulse crop while the others are grown in the animer. The pulses grow best on land which has had a good deep cuit when the contract of For gram especially the soil should be loose and well meated. Indian pulses are not largely exported although they are used to some extent

Northern India it is sown broadcast (often mixed with other crops) and from the date of sowing till the time of picking is practically loft to itself. The average yield, which does not amount to more than 400 lbs per acre of seed cotton, could doubtiess he greatly increased.

hy better cultivation Sugarcane -Although India is not natur Sugarcane — Attnonga links is to taking ally as well suited for sugarcane growing as many other tropical countries, some \$\frac{1}{2}\$ millions of acres are annually sown. The erop is mostly grown in the submontane tracts of Northern indis. The common varieties are thus and The common varieties are thin and hard, yielding a low percentage of juice of fair quality, but cane of the highest quality and yield is grown in South India In India white sugar is is grown in South India in linear wines sugar in not made by the grower who simply boils down the juleo and does not remove the molasses. The product called gur or gul is generally sold and consumed as such, although in some partand consumed as such, although in some parta certain amount of sugar-making is earlied
on The profits, however, are small owing to
the cheapness of imported ungar and there
appears to be some danger to the crop if this
present taste for gur were to die out. The
question has been taken up by Government
and a cane investigate and and a cane investigate and
opened user Colimbators in Madras with the
opened user Colimbators in Madras with the Madras wit object of raising securing canes and observing improving the supply of cane sets. A number of sugar factories of a modern type have been set up within recent years in Bihar and the United Provinces and more recently in Bombay. The chief difficulty seems to be the obtaining o

The shift difficulty seems to be the obtaining or aumidently large supply of cause to offset the beavy capital charges of the undertainings the same of the control of the control of the same of the control of the con an immense area

Linseed requires a deep and moist soil and is thus grown chiefly in Bengal, Bihar, the United Provinces and the Central Provinces The crop is grown for seed and not for fibre and the common varieties are of a much shorter habit of growth than those of Buropa. The yield varies greatly from practically uothing up to 500 or 600 lbs of seed per acro. The seed is mainly exported whole hat a certain amount of uli pressing is done in the country

Sesamum (or Gingelly) is grown mostly in Peninsular India as an autumn or winter crop The seed is largely exported

For gram especially the soil should be loose and well started Indian pulses are not largely and well started Indian pulses are not largely as the state of the start of the st The Cruciferous Olisceds

\* The acreage of crops given in this table is for British India only, but the critimated yield includes the crops in certain of the ladian † The statistics of the production of tea, jute and rubbor are for calendar years, 

Raturn of production discontinued up to 1918-19

is very subject to injury from rain and great is very subject to injury from rais and great care has to be taken in the drying. The produce is largely exported whole, but there is a con-iderable amount of local oil-pressing—the cake being in demand for feeding purposes afute.—Two varieties of the plant are culti-vated as a crop, Capsularis and Qiltorius, Jute growing is confined almost entirely to lastero Bengal, in the Gasges Brahmapath produced to the plant and the plant of the last control of the plant of the plant of the last control of the plant of the plant of the receives a considerable alluvial deposit every vers and the land is thus able to sustain this year and the land is thus able to sustain this exhausting crop without manuro The crop is rather delicate when young, but once cetab is label equires no attention, and grows to a great height (it to 11 feet) Before riponing the crop is cut and retted in water After about three weeks submersion the fifthe is removed by washing and beating. At the recent high range of rices jute may be con sidered to have been, for the last few years,

the best paying crop in Iudia Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bahar, Bombay Madras and Burma Of two varie ties enitivated Nicotiana Tabacum is by far the most common Maximum crops are obtained on deep and moist allaviam solis and a high etan dard of cultivation including liberal manning is necessary The crop is only suited to amali holdings where labout is plentiful as the atten tion necessary for its proper cultivation is very tion necessary for its proper collabation is very great. The seed is granulated in seed both and the young plants are transplanted when a few luches high, great care being taken to shield them from the sun. The crop is very carefully weeked and bond. It is topped after attaining a being to, say, 2 ft., and all suckers are removed. It is copy mp.r. from February and removed.

of tobacco are obtained A black tobacco is required for Hooks smoking and this is the most common product but a certain amount of yellow leaf is grown for clear making Live-stock consist mainly of cattle

buffaloes and goats, horses not being used tor agricultural purposes Sheep are of secondary

importance
For draught purposes cattle are in more general use than buffaloes especially in the drier parts of the country, but huffaloes are very largely used in the low lying rice tracts For dairying huffaloes are perhaps more pro-fitable than cows as they give richer milk and near of it but they require more for it but they require more for it but they require more feeding. The poorer people depend largely on the milk of goats of which there are an enormous number throughout India Cattle breeding is carried on mainly in the non-cultivated tracts in Central and Southern India, Southern Punish and Southern Rules, Southern Futipes and Halputana, where distinct breeds with definite characters have been preserved The best known draught breeds are Hand, Nellors, Amritmehal, Gujrat, Malvi, and the finest milk cowa are the Saniwai (Punjab) Cur (Ka Ihlawsr) and Sind Owing, however to the encroachment of cultivotion on the grazing areas well hred cattle are becoming and some of the breeds ore threatened with extinction beforts to improve the quality of the cattle in the near breeding districts by the use of selected bulls have hitherto been frustrated by the promisenous breeding which goes on in the villages

Dairying —Though little noticed, dairying forms a very large indigenens industry through forms a very large indigedous industry through out. India. The best known products are, native butter (give) and obsess (dail). During recent years a considerable trade in timed butter has sprung np in Gnjrat (Bombay Presidency). While pure oftes and nilk can be procured in the villages, in the towns dairy are reduced. The error right from February butter has sprung up in Gujnat (Bombas become initial By varying the degree of the procured in the villages, in the towns dark fermentation of the leaves different qualities.

# AGRICULTURAL PROGRESS

they now "xist may be said to be a creation of the last twenty years There have for a good many years past been experimental farms, and only class control in various parts of ludia, but they were lutthe past to a large extent in the hands of amateurs, and the work of the Agricultura; Departments, with which all the major provin oes were provided by about 1884, was in the main confined to the simplification of reverge settlement procedure and the improvement of the land records system In 1901 the appoint ment of an Inspector General of Agriculture gave the Imperial Agricultural Department for the first time an expert head, and placed the Government of India in a position to en large the scope of their own operations and to oc-ordinate the work being done on independent lines in various provinces. At that time the staff attached to the Government of India consisted of an Agricultural Chemist and a Cryptogamic Botanist, while trained Deputy Orygonogamic Rotaniat, while trained laptuty in connection with these courses or purposes of Directors of Agriculture were employed only research as well as closed in The cvertual cost, and the Konomic Botaniat in Madras was the and the Konomic Botaniat in Madras was the coly provincial representative of the more legs some has cost nearly fills 0,000 including specialized type of appointments. Within the equipment, A part of the cost was met from maxis buy wears a number of new appointments is sum of \$50,000 placed at Lord Outson's the

The Agricultural Departments in India as I were made so that by March 1905 there were altog ther 20 sanctioned agricultural posts, these seven were imperial, locluding a number of specialist appointments attached to the Agri or the capital appointment as action a so the Agricultural Resoarch Institute and College the establishment of which at Pusa in Bengal was anothered in 1903. Agricultural Depart to the development of the Agricultural Depart ments by the decision of the Government of India in 1905 to set apart a sum of 20 jakhs (£13:000) a year for the development of agri cultural experiment, research, demonstration and instruction. Their ultimate aim, as then expressed, was the establishment of an experimental farm in each large tract of country in which the agricultural conditions are approximately homogeneous, to be supplemented by numerous small demonstration farms the creation of an agricultural college teaching up to a three years course in each of the larger provinces and the provision of an expert staff in connection with these colleges for purposes of

press by Mr Phipps, an American visitor to india. This example of suntificance has recently been followed by Sir Sassoon. J David, who placed the sum of £5,3500 at the disposal of the Government of Bombay for the establish ment of vernacular surficiental chools and onment of the surficient of the stability of Majesteke to India. The headquarters of the imperial Department of Agriculture at Paus are maintained at a cost of algority over £55,000 and the control of the control of the control of the Department of the control of the control of the Department of the control of the control of the Department of the control of the control of the Department of the control of the control of the control of the Department of the control of

Recent Progress.—A survey of the results of the activities of the Agricultural Department in relation to the chief crops of India shows valuable results. First in importance of all grain crops in India is Bires and the demand for imported seed now far outcomes the supply One-to in India is Bires and the demand for imported seed now far outcomes the supply One-to in the Madras Presidency produced 37 717 has per acre representing a net profit to the cultivator of nearly £23 sterling per acre for the cultivator of nearly £23 sterling per acre for the cultivator of nearly £23 sterling per acre for the cultivator of nearly £23 sterling per acre for the cultivator of nearly £23 sterling per acre for the cultivator of per per new been extended to all the wheat growing provinces Back acre cultivated return of £ 1 sterling. One of the main features of the super work of the Agricultural Department has been the promising results attending the case produced in Colinhatore in the Madras Presidency One variety of improved case in the Madras Presidency One variety of improved case in the Cast all rowness has given over a period of eight sugar per acre more than the variety if displaced sugar per acre more than the variety if displaced with 16 detail in the report of the Cotton Committee (q v y) and in the operations of the Indian (with a Cotton Committee et up in accordance or the examined by the £2 per part yet per acre where the commended by the £2 per part yet per acre where the case of Tobacco the demand of usualty and is suitable both for cigaratte making and general cultivation has interessed mer chain four fault.

haperiment has shown that the fruit-growing industry has a great field forfer it. But the possibility of establishing a system of co-operative narrating haper to be tested. The study of pasts animal and vegatable is making progress Experiments with the possibility of the study of pasts animal and vegatable is making progress Experiments with the properties of the proper

amongst the most important measures is the improvement of the catile population. At Pusa catile breedings directed mainly along two lines, the breeding of ordinary country miles catile and the experiment of breeding by crossing varieties of high milk yielding pedigrees. The progress is alow largely on account of the magnitude of the state. In regard to implement, the sine terrigated lands are no progress to be plantice and the state of the experimental work does by the agricultural Uppartness.

# Work of the Departments.

The work of the Agricultural Department has two main aspects. On the one hand, by experiment and research, improved methods or cope are developed, or the means of sombating a pest are worked out, on the other hand, according to the second of the second o

## Machinery

The rapid extension in India in recent year, of the one of of machinery in connection with structure and irrigation has created a demand for expert assistance to meet which Agricultural Engineers have been appointed in Bomhay and several other Provinces to advise cultivators as to engines, punns, threshing machinery, etc. Experiments have at various times and in various parts of India been made with steam ploughing machinery and sheet with the state of the properties of the properties of the state of the machinery, progress is greatly hampered by the islace; fair attitude of the mandiactures of it. The reports of the Agricultural Departments constantly bear writness of other Maken, may generally and with representation by agents in the large lowns. There are no stocks of machinery in the country, pare parts are difficult to get and excribitant prices are often enhaged for them.

spare parts are diment to get and exceptions prices are often charged for them. Regard to information and sanishance in the magnet conditions has, under present circumstance, to be interpreted and broughs home to Indian collivators integrily by the agricultural departments which have therefore to do a good deal of this work. Up to the present, the departments proform to a creation extent the function proform to a creation extent the function of the departments of the department of the departme

Issued by the Director of Agriculture, Bengal and relats to the reason 192; 25.

<sup>(</sup>a) Subsequently revised.

The chief characteristics of the Indian rainfall mortal In their simplest form, such storage re its nacqual distribution over the country, works consist of an curthen embanisment is fregular distribution throughout the sea The chief characteristics of the Indian rainfall are its unequal distribution over the country, its irregular distribution throughout the seateney. The uormal annual rainfall varies from 460 inches at Cherrapunii in the Assam hills to less than three inches in Upper Sind The greatest rainfall actually measured at any station in any one year was 600 inches, recorded at Cherrapuni in 1861, while at stations in Upper Sind it has been nil There are thus portions of the country which suffer as much from excessive rainfall as others de from The second important characteristic of the

rainfall is its unequal distribution throughout the seasons Except in the south east of the peniusula, where the heaviest precipitation is received from October to December by far the greater portion of the rain falls during the south west monsoon, between June and October During the winter mouths the rainfall is com paratively small the normal amount varying trom hall an Inch to two Inches, while the hot weather, from March to May or June, is practically ralinks. Consequently it happens that in one season of the year the greater part of Indin is deleged with rain and is the some of the most wonderful and rapid growth of vegetation, in another period the same tract hocomes a dreary, sun burnt waste The transition from the latter to the former stage often occurs in n few days. From the agricult tural point of view the most unsatisfactory leature of the Indian rainfall is its liability to failure or serious deficiency. The average annual rainfail over the whole country is about 45 Inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But if a parate tracts are considered extraordinary variations are found. At many stations amount rainfalls of less than half the average are not uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought

Scarcity—Classing a year in which the deficiency is 25 per cent as a dry year and one in which it is 40 per cent, as a year of severe irrought, the ovamination of past alatistics slows that, over the premius area, one year in live may be expected to be a dry year and one in ton a year of severe drought at a largely in order to remove the menar of these years that the great irrigation systems of india have been constructed

Government Works -- Jhe Government irrigation works of ludia may be divided into storage, and those dependent throughout the year on the natural supplies of the rivers from which they have their origin In actual fact, practically every irrigation work depends upon storage of one kind or another but, in many sourage of one kind of another but, in many cases, this is provided by nature without man a assistance In Northern India, npon the Himalayan rivers, and in Madras, where the cold weather rains are even beavier than those of the south-west monsoon, the principal non-storage systems are found

The expedient of storing water in the monsoon for utilization during the subsequent dry weather has been practised in India from time imme-

which the water collects, and those under Government control range from small tanks irrigating only a few acres each to the huge reservoirs now under construction in the Deceau which will be capable of storing over 20,000 million cublo feet of water By gradually escaping water from a work of the latter type, a supply can be maintained long after the river on which the reservoir is situated would other wise be dry and uscless

The Three Classes -For the purpose of determining the source from which the funds for the construction of Government works are provided, they are divided into three classes, productive, protective and minor works. The main criteriou to be satisfied before a work can be classed as productive is that it shall, within ton years of the completion of construction. produce aufficient revenue to cover its working expenses and the interest charges on its capital cost Most of the largest irrigation systems in India belong to the productive class

Protective works are constructed primarily with a view to the protection of precarions tracts and to guard against the necessity for periodical expenditure on the relief of the popula-tion in times of famine. They are financed from the current revenues of findin, generally from the annual grant for famine relief and lusurance, and are not directly renumerative, the construction of each such work being sopa rately justified by a comparison of the value of oach acre protected (based upon such factors as the probable cost of famue relief, the popula-tion of the truet the area already protocost and the minimum area which must be protocost in order to tide over n period of severe droughi) with the cost of such protection. A sum of Rs. 1.173 lakhs line, up to date, been expended on works of this unlut-

It is difficult to deline the class of minor works otherwise than by saying that works not classi-fied either as productive or protective are classified as minor works Nearly n third of the whole area irrigated in India from Government works is offected by these minor works

Growth of Irrigation - I here has, during the last lorty years, been a steady growth in the area irrigated by Government irrigation works From 104 million acres in 1878-70 the area animally irrigated rose to 194 million acres at the beginning of the century and to 28 million acros in 1919 20, the record year up to that This record was, however again sur passed in the year 1942 23 when the total area irrigated by all chasses of works in Iudia, excluding the Indiau States smounted to 281 million acres The main increase has been in the class of productive works which irrigated 41 million acres in 1878-79, 101 million acres in 1900-01 and over 181 million acres in 1922-28 The area irrigated by protective works has increased, in the same period, from nil to over three-quarters of a million acres, that by minor

turce-quarters or a minon acres, that by minor works from 6 million to \$\frac{1}{2}\text{million}\$ minor series 80ms idea of the probable future development of irrigation can be obtained from the forecasts appended to the project estimates of the works now under construction and awaiting sanction. The irrigated area in 1922-29 was over

33 million acres Schemes completed but which have not yet reached their full development are expected to said about 10,000 acres to the market with writer under construction. The said with the said their construction of the said their construction of State for sanction which, if constructed, will add another 4 million acres, a total eventual area in Eritish India of about 36 million acres in the state present contemplated from works sanctioned or awaiting sanction, irrespective of the natural extension of cristing stress and of new projects, of which several are under consideration, which may be put forward in future

The figures given are exclusive of the areas irrigated from the Punjab canals by branches constructed for indian states, which amounted in 1919-20 to 60,000 arres 7100 Snitel Valley solmes will add nearly \$1 million arres to this area to the a prose total of some 40 million cores on the special properties of the considerable of the considerable

Capital and Revenue —The total capital in vested in the works has risen from 12s 4.26 laskins in 1900-01 to 18s 8,67 laskins in 102-28, an in 1900-01 to 18s 8,67 laskins in 102-28, an expand revenue, the Government of the works of India, taken as a whole, yield a return of from 7 to 8 per cent on the capital invested in them, this is a satisfactory result as 18 1,173 lakks of the total have been spent on protective works, which return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent and 18s 7,60 lask in return less than 1 per cent lask in return less t

Charfes for Water—The charges for water are leveled in different ways in the various provinces In some notatily in Sind, the condinary land revouce assessment linetakes also the charge for water, 9/10ths of this sessements being regarded as facts to the charge for the charge for water, 10/10th of this sessement theign regarded as facts to the charge for the charge for water figured or not, and the assessment upon irrigated land includes also however be regarded as exceptional Over the charge for water These methods may however be regarded as exceptional over the charge for water tripated is measured and a rate is charged per acre according to the copy grown Lower rates are often level in cases where irrigation is by Ilit', that is to say where the land is too high for the water to

finw on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have been tried, such as by rotting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully undertands the principlo of "No crops, no charge results to the principlo of "No crops, in charge administration, but has no possible in cauda system under with his liability for water rate is

Independent of the arms and quality of his crip 1 he rates charged vary considerably with the crop grown, and art different in each province and often upon the secrets canals in a single province. Thus in the Punjsh, they vary from 18 7-6-10 ht 21 per ner for supar-canal, from 18 7-6-10 ht 21 per ner for supar-canal, from 18 3 0s its 4-4-0 per acro for wheat, from 18 3 0s its 4-4-0 per acro for oxion, and from 18 2 to its 3-4-0 per acro for millets and pulses to extra charge is made for additional water tigs. Practically sreaking covernment; guaran available. If the crop fails to mature or if its yield its much below normal citize the whole or part of the frigalding assessment is remitted

A conceive different system. The contribution of the contribution will be necessary a cell and if the cultivators have to pay the full rate, they are spit to hold off multi-water becomes absolute, lossestical, and the endden and universal domaind their insually exceeds the supply. By a paying a reduced rate overly year for a term of years they become entitled to water when the contribution of the contri

Jaken as a whole, irrigation is offered on extremely casy icrius and the water rates represent only a very small proportion of the exira profit which the cultivator secures owing to the water he receives

Frigated Areas — The average and righted in British India by Government works of all classes was 284 million area in 1922 23 accompared with 274 million area in a versue of the previous triennium. The area of 1922 21 is the record area irrigated in any one year up to date

The results obtained in each province are given in	the table below —

Projects.—At the close of the triennium three projects, for the Sukkur Barrage and Canals four weirs, three on the Sukkur Barrage and Canals four weirs, three on the Sutid and one on the Infilled, for the Sutid Valley Canals in the Palland, as the Chenah is called below its Punjab and for the Damodar Canal in Bengal, which were open The Sukkur Barrage when om the project in the project in the Sutid In the word, measuring 4,725 feet between the late of the Sukur Barrage when the project in 5,108,000 the substantial three projects and the project in 5,108,000 the pro A gross area of 71 million acros le commanded, of which 64 million acres is culturable and an annual area of irrigation of 54 million acres is anticipated, of which 2 million acres represents This is the return from wafer rates aloue, but become available for cofonisation and safe It a further large increase in general revenues is entomary, in the proferms accounts of may safely be recknord upon from the area of 3 irrigation projects to credit a scheme with the million acres of waste which will be krought interest on the safe proceeds of Coven waste with the million acres of waste which will be thought interest on the safe proceeds of Coven waste which was a count ander praceleally every bead of if this is included, the annual return on the excess and the like, not to mention the addition it bids fair, indeed, to rival the Lower to the country's wealth owing to the produce clean can be comediated. The country is wealth owing to the produce clean can be comediated to the country's wealth owing to the produce clean can be comediated. The country is the Lower waste of its 1,5500 lables per annual over 41 per cent

in Bikaner

The total cost of the project is estimated at Rs 1,460 takhs Upon this a return of 122 per anticipated, of which 2 million area represents existing inundation irrigation which will be called the given an assured surply by the new canale. But the scheme has another, and even more The utilitate annual net revenue forecasted incommended to the project, after paying duction of irrigation, no less than 34 million working expenses, is Ita 194 takes, which expresents a return of 10½ per cent on capital. This is the return from water rates alone, but the scheme has another, and even more frequency of the three represents a return of 10½ per cent on capital.

# WELLS AND TANKS.

So far we have dealt only with the great irri | used for litts beyond fifteen feet | For greater gation scheines. They are essentially exotic, lifts hullock power is invariably used | This is producte of British rule, the real eastern | generally harressed to the mot, or lesther bag, the products of initial fue, the rost eastern instrument is the well. The most recent figures give thirty per cent of the irrigated area in India as heing under wells. Moreover the well is an extremely efficient instrument of Irrigation. When the cultitator has to rake overy drop of water which he uses from a varying depth, he is more careful in the use of it, well water exerts at least three times as much duty as canal water Again, owing to the cost of lifting, ft is generally used for high grade crops It is estimated that well-irrigated lands produce at least one-third more than canal watered lands Although the huge areas brought under cultivation by a single canal acheme tend to reduce the disproportion between the two systems it must be remembered that the spread of canals in-creases the possibilities of well irrigation by adding, through scepage, to the store of subsoil water and raising the level.

Varieties of Wells,—Wells in India are of every description They may be just holes in the ground, aunk to subsoil level, teed to a year or two and them allowed to fall into decay These are temporary or kacha wells. Or they may be lined with timber, or with brick or shone. They vary from the kacha well counting a stone. They vary from the kacha well octains a better of the property of the property well, which will run label also sands, or in the sandy wastes of Rhands in the label also sands, or in the sandy wastes of Rhands in the property of the

which is passed over a pulley overhanging the well, then raised by hullocks who walk down a ramp of a length approximating to the depth of the well. Sumetimes the mot is just a leather bag, more often it is a self acting arrangement, which discharges the water into a sump autowhich discharges the water into a sump auto-matically on reaching the surface. By this usens from thirty to forty gallons of water are raised at a tine, and in its simplicity, and the raised at a tine, and in its simplicity, and the extra discount of the sum of the sum of the ed and repaired by 'lliage labour, the wot is unsurpassed in efficiency. There is also the Persian wheel, an endless chain of earthonware pots running round a wheel Recently attempts have heen made, particularly in Madras, to substitute mechanical power, furnished by oil economical where the water supply is sufficiently are, expectably where two or three wells can large, especially where two or three wells can be linked. Government bave systematically encouraged well irrigation by advancing funds for the purpose and exempting well watered lands from extra assessment due to improvement These advances, termed takers, are freely made to approved applicants, the general rate of interest being 62 per cent. In Madras and Bombay ryots who construct wells, or other works of agricultural improvement, are exempt.

or the roadside tank is one of the most conspicuor the readside tank is one of the most conspion-ous statures in the Indian scene. The Indian tank may be any size It may vary from a great work like Lakes Fibs and Whiling in the lakes Fibs and Whiling In the Travasiors, bolding op from four the same hillion cubic rets of water, and spreading their waters through great chains of canal, to the waters through great chains of canal, to the little village tank irrigating ten acres. I shey date bask to a very sarly stage in 'indian civili-great, also, holding from hire to four hillion great size, holding from three to four hillion cubic feet, with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still Irri-gate from two to four thousand acros are said to he over 1,100 years old Tank irrigation is practically unknown in the Punjah and in Sind, but it is found in some form or other in all other provinces, including Burma, and finds its highest development lo Madras, In the rectwari tracts of Bombay and Madras all but the email cat tanks are controlled by Government in there is issued a bricker statement the zemindari tracts only the large tanks are the progress of cach particular year

State works. According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is extremely precarious So far from tanks heing a refuge in famine they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the

Bibliography -- Priential Review of Irriga-tion in India, 1918-1921 Calcutta, Superintement of Government Printing Price Five Rupece The annual irrigation reports in India used to be as and as the Salara consisting of a duli stallstical record They have been greatly improved of recent years and have now assumed a quite satisfactory form the major review appears once every three years, and consists not only of an admirable summary of the work of the trien-thm, but a well illustrated history of the progress of irritation in India from the earliest times—the first of these triennal reviews was issued in 1922. Between the triconial reviews there is assest a bricter statement recording

# Meteorology.

The meteorology of India like that of other countries is largely a result of its geographical position. The great land area of Asia to the position of the great land area of Asia to the foldan Ocean to the continuous determining factore in settling its principal meteorological factores. When the North-ria Hamisphere is turned away from the sun, in the northern whiter, Central Asia becomes in the northern whiter, Central Asia becomes conditions of the temperate zono are unwheel an area of intense cold. The moteorological conditions of the temperate zone are pushed southward and we have over the northern provinces of India the westerly whids and castward moving cyclonic storms of tomperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia he is turned cowards the san, southern assauce comes a super heated region drawing towards it an immense curront of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean, so that at one scason of the ver parts of India are deluged with rain and at another

persistent dry weather prevs is.

Monsoons — The all important fact in the meteorology of India is the alternation of the seasons knowe as the summer and winter monsoons. During the winter monsoon the winds are of sontinental origin and hence, dry, fine wea-ther, clear skies, low humidity and little sir movement are the characteristic features of this season. The summer rains cease in the pro-vinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather becomes that have been succeeded about eastward and southward so that by the middle of october, they embrace all parts of the country except the southern ball of the Peninssia, and by the end of the year have extended to the whole of the Indian and sea area, the rains withdrawing to the Squaterial Belt. Thus the claracteristics of the odd weather from October to Fetruary and the Punjab about the middle of September

over India are -Westerly winds of the tem perate zone over the extreme north of India, to the south of these the north-east winds of the winter monsoon or perhaps more properly the north-east Trades and a gradually extend-ing area of fine weather which, as the session progresses, finally cinbraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period. due weather conditions exist during it is period, was, the Madras coast and the north was of the former rition in the forth-sate for the condition of the retreating summer monsoon, which current curves round over the Bay of Dengal, and, blowing directly on to the Mudras coast gives that region the westers and most disturbed weather of the condition the westers and most disturbed weather of the condition that region the wester of the condition o te, the summer monsoon, at the Madras Oh servatory amounts to 15 86 inches the total rainfall for the three mooths October to Derainfall for the three mooths October to De-cember amounts to 29 48 inches The other region in which the weather is mastited, during this period of generally settled conditions, is North-west India. This region during January, Ichritry and part of March is travered by a succession of shailow storms from the west-ward The number and character of these forms vary very largely Zeron very large and in some years in storms at a set the condiand in some years no storms at an are recorded in normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months, December to March, amounts to 5 20 inches while the total fall for the four months, June while the total fall for the four months, June to Septomber, is 47% inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer mon-soon. These two periods of subsidiary 'rains' are of the greatest economic importance. The fall in Madras is, as shown above, of comiderable actual amount, while that of North-west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Menths — March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric presence throughout India. During this period there occurs a steady temperature northward maximum temperatures, alightly exceeding 100, occur in the Deccan, in April the area of maximum temperatures, alightly exceeding 100, occur in the Deccan, in April the area of maximum temperatures, between 100° and 100°, lies over the couth of the Central Provinces and Gujant, in May maximum temperature, between 100° and 100°, lies over the couth of the Central Provinces and Gujant, in May maximum temperatures are considered in the Indian of the country while in June the highest mean maximum temperatures a zeoceting 110° occur in the Indian Valley near Jacobabad. Temperature hithest values of the Sanda Sulley near Jacobabad. Temperature hithest or corded in 126° registered at Jacobabad on June 12th, 1897 During this part of the Central Provinces, but the highest temperature hithest recorded in 126° regions at 250 control of the control of the Central Provinces, and the signal of the disappearance of the north-axis winds of the winter monsoon, and the air circulation over India and its adjacent seas, become a second of the Central Province of the north-axis winds of the winter monsoon, and the air circulation over India and its adjacent seas, become a series of the north-axis winds down the river valleys of Northern India and of the winter monsoon, and the air circulation and increasing land and sea winds, as they become stronger and more extensive, inline temperature hithest country and and are swinds and direct the control of the control of

By the time the area of greatest heat has been established over North west india, in the least week of May or first of Fune, india has been established over North west india, in the least week of May or first of Fune, india has been seen in the least of Fune, india has been seen in the wester of Fune, india has been seen in the wester are mainly determined by local conditions. Between the Equator and Lat. 30° or 50° south the wind efformined by local conditions. Between the Equator is bast of the south-east trades, that is to say an experience of the seen in the seen the see in the seen in the se

mediate neighbourhood of land there are the increalations due to the land and see hreezes which are attributable to the difference in the healting effect of the sun a rays over land and see. It is now necessary to trace the changes which occur and lead up to the establishment with cocur and lead up to the establishment at this time is progressing slowly northward at which the corner Tropic Hence the thermal equator is also progressing norit ward and with it the area of account of the south-east trades circulation. Thus the south-east trades circulation. Thus the south-east trades circulation are the state of the south-east trades circulation. Thus the south-east trades and further northward, as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air resolution and continuous expectally the sub-order than the support of the sub-order and the support of the sub-order and the continuous expectally the sub-order and the support of the sub-order and the continuous circulation extending northward until about the beginning of June the light unsteady in the south east Iradea, with its cool, moisture than the south east Iradea, with its cool, moisture indem winds ruises forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is Iradea, with its cool, moisture the Indian land area and the adjacent seas and India is Iradea, with its cool, moisture the Indian land area and the adjacent seas and India is Iradea, with its cool, moisture and the open the continuous continuous

When this current is fully established a con thuous air movement extends over the Indian Cocan, the Indian case and the Indian lead reas from Lat 30° 8 to Lat, 30° N, the southern half heing the south cast trades and the northern laif like south-west mouseon. The most important fact about it is that it is a continuous portionatal air movement passing over an optionatal air movement passing over an extension of the constantly in progress to that where the current cuters the Indian reas and flows over the single constantly in progress to that where the current cuters the Indian reas and flows over the single constantly in the single charged with aqueous Yapours.

The Current enters the Indian seas entire at the cammenement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bav of Rengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea current blows on to the west coast and sweep-lase exclusively over the Peubsula, Control India, Rajputans and north Bombsy. The lay of Bengal current blows directly up the Bay one portion is directed towards Burma, East Bengal and Assam while another portion current to south at the bread of the Bay and of the Himslays acurves still further and blows as a south-easterly and easterly wind right up the Gangetic plain. The south west mon soon continues for three and a half to four months, etc., from the beginning of June to revealence more or less general though far from continuous rain prevails throughout India, the principal factures of the rainfall destribution being as follows. The greater

portion of the Arabian Sea current, the total volumes of which is probably three times as directly on to the west coast districts. Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain slike to the coast districts and to the hilly range, and which is the same and the looks most of the state and the looks most of the state area of the state of t

The monsoon current over the southern haif of the Bay of Bengal hlows from south west and is thus directed towards the Ton seems that the southern t

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arahian Sea current there exists a debatable area running roughly from Hieser in the Yongh through them. All these the result of the current of the monoson prevails. In this seca the rainfall is uncertain and would probably helight, but that the storms from the Bay of Bengal exhibit a marked tendency to advance doughth track and to give it heavy falls of slong this track and to give it heavy falls of

The Total Rainfall of the momeon period (June to September) is 100 inches over part of the west coast, the amount diminishes easiered, is below 20 inches over a large part of the centre and east of the Pentinuis and the control of the centre and east of the Pentinuis and the coast of the Pentinuis and the coast of the Pentinuis and the Pentinuis and the Pentinuis and the Pentinuis Coast of the Pentinuis and the Pentinuis Coast of th

# MONSOON OF 1924.

The S W Monsoon as in the previous year not only arrived late in the reason but its incidence was feeble on both sides of the current Throughout the month of June lost of the Inland divisions continued to indicate drier and hotter conditions than usual On the Arabian Sea side the monsoon appeared on the Malabar coast on the 2nd June but the onset was feeble and the vigour of the unsystained pulses lasted ! only for a few days. The progress northwards was thus laboured, and weak monapoulsh road! tions were established on the Bombay coast on the 1°th June, a week later than the normal date Though the quest was field during the next few days it gave fairly good rates in the Dreean Querat and the Central Provinces The thuck in idence of a small depression off the Kathla on the 16th was fulling pube was war helptul COMBL the was chalded to anul carry the monsoon rates lolo Rajputana B & Punjab and Kathlewar Thereafter n complete by its supervened which practically Shuba Kumaan Hills and the adjacent plains lasted to the end of the mouth. The Bay mon the mean for India for September was 27 per soon which was tuttially restricted to Burms till cout in excess and all divisions showed marked the 6th June strengthened later and extended into North East India reaching the United Pr vinces by the end of the month In the Held controlled by this brinch also with the excep the of Burnes and North cost India pronounced deficiencies were returned from all divisions

Conditions in July seen assumed a threaten lug aspect and not until those it is veril divisions tead grown quite critical did the longed for rains at lost reach them Most of the divisions how ever late, were well served by the end of the mouth wille exceptionally herry rather were gathered in Malaber and the adjacent titings which inundated vast expanses of the country counting licity loss of property and rendering Averaged over the whole of Lucia the rainfull was not only 23 per cent in excess, but all divisions individually roturned excesses livderaland and Shut alone showing defects of 13 and 13 for cent respec ttvils

During August the monsoon, which had again relapsed into weakness, was in the main controll of by two de-pressions from the Bay with the result that the current on both sides became cutromely create and irregular giving heavy precipitation for a few days interspersed with long dry kreaks I be distribution over the various divisions was thus rendered patchy and nneven for widle large tracts suffered from marked desclenees certain parts of the country were laundated causing revere damage both to life and property by floods in the Indus, on the Mainler coast again, and on the upper Ganges tanul

The rains gathered during September on the Arabian Scaelde were agoin in the main controll ed by two depressions from the Bay scenting out by two or presents from the law scenario abouting preclipt sition in the Printials and central facts of the country. The Bay mousoon also was sindiarly influenced specially by the second of these storus causing heavy fulls in the 1 YCCS84 S C YCC Pt Burns

The numsoon conditions were sustained dur ing the mouth of October longer than usual the first helf of the month. This delayed the recession and tooldentally affected also the establishment of N F monsoon on the Coromandel coast consluga corresponding defect in the rainfall of Mudris and Mysore for the month The distribution was thus severely affected for while the average mer India was normal, ex coses of as much as 106 and 180 per cent were returned by Central Provinces and Rajputana respectively and heavy dejects of 67 47 53, 100 and 100 were showed by Mysore Madras, Bankay Sud and N. W. Province resuce tively

Seven disturbances in all—one in June two in August two in 80 ptember and two in Octobercontrolled the rules of the senson

The following table gives detailed information of the rainfall of the period June to Scutember -

# Famine.

na which great problems arise, produce a corresponding outburst of official activity to meet them and then fall into the background This general truth is illustrated by a study of the history of familie in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the raine was the corrected to the in which great problems arise, produce a corres tor The forecasts of the rains were studied with acute anxiety The actual progress of the rains was followed with no less anxiety and at the first signs of a bad or poor season the famine relief machinery was furthiabed up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry Nearly three-quarters of the people are directly dependent on agriculture for their daily bread Very much of this agriculture is dependent on the seasonal rains for its existence Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfail rarny season is short and if for any natural rea son there is a weakness, or absence, of the rain bearing currents, then there is either a poor harvest or no harvest at all. In Western is nds narvess or no narvest at at an western is not everyone is acquainted with the difference between a good and a poor season, but western countries ofter no parallel to india, where in an exceptionally bad year wide tracts of thockly populated land may not province even a hiade of grass. In the old days there were no rail ways to distribute the surplus of one part of india to the districts where the crop had failed There were often no roads The irrigation works were few and were themselves generally dependent on the rainfall for their reserves people lived from hand to month and had no store of food to fall back upon. Nor had they any credit. In the old days then they died Commencing with the Orissa famine in 1865-67 the Government of India assumed responsible lity for the saving of human life in such crises After the famine of 1899-1900 this responsible lity was also shouldered by the Indian States Stage by stage this responsibility was expressed in the evolution of a remarkable system of fa-mine relief covering the whole field But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries because the conditions have changed

To the student of Indian administration, bad year it may create administrative diffi-nothing is more remarkable than the manner collides, it has ceased to be an administrative in which great problems arise, rroduce a correr

# Famine under Native Rule.

Famines were irequent under Native Tile, and critical the the tile of the tile merchant reported that only eleven of the 260 families at 8 wally survived He found the road thence to Surat covered with bodies decaying thence to Snat covered with bodies decaying on the highway where they died, there boing aone to hury them in Surat, that great and orowded city, he could hardly see any living persons, but the corpses at the corner of the atreets in twenty togother, nobody burying them Thirty thousand had periabed in the lows alone Pestikane followed famine" Fig. ther historical evidence was address by Bir Theodore Morrison in his volume on the Roomo mic Transition of India. It has come to be seen mic Transition of India. It has come to be seen that whilst railways have checked the old-fashioned practice of storing grain in the vii tages they have made the reservers, where they exist, available for the whole of India. In india there is now no such a thing as a food familie, the country always produces enough tood for the whole of the population, familie when it comes is a money familie and the state of the State is confined to providing the means of the State is confined to providing the means of the State of the done will be examined after we have seen the experiences through which it was evolved.

#### History of Recent Famines.

The Orissa famine of 1865 67 may be taken as the starting point because that induced to first great and organized effort to combat distress through 8 take agency It affected 180,000 equare miles and 47,500,000 people The Bengal Government was a little slow in a ppreciating the need for action but late food was poured into the district in prodigious quantities. Thirty-five million units were relieved (a unit is one that machinery has reached a remarkable for million units were relieved to small to one armounts because the conditions have changed. The whole of india is covered with a network of the whole of india is covered with a network of the cutension of irrigation has encormously increased the product of the soil and rendered large areas much less dependent on the monacon rainfail by the highest of the soil and rendered large areas much less dependent on the monacon rainfail is well as the soil to the contract of the soil and rendered large areas in the soil of the soil and a rendered large areas in the soil of the soil and a rendered large areas in the soil of the soil and a rendered large areas in the soil of the soil and a rendered large areas in the soil of the soil and the families of the soil and strength of which a secondary in the soil of the so to scotts economy the Government relist pro hamine, with a terrible mortality amongst grasmes was not entirely successful. The essess the cattle. The water supply was deficient, mortality in this famine is said to have been and brought a crop of dissociates in its train \$2,500,000 in British territory shone. Through the continuous properties of the control of the at a cost of Rs 84 crores Charitable contributions from Great Britain and the Colonies aggregated Rs 84 is kins

#### The Famine Codes.

The experiences of this famine showed the The experiences of this tamine showed the becomity of pacing retire on an organized beaus the pacing retire of the pacing retire of the things of the pacing retire of the pacing of the shows the famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommend ed. (1) that employment should be given on the relief works to the able-bodied, at a wake simil relief works to the appendency, as a ware mani-cient for support, on the condition of perform ing a suitable task and (2) that gratuitous re-ited should be given in their villages or in poor hommes to those who are unable to work The; houses to those who are unable to work They recommended that the food supply should be recemmended that the food supply should be to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted that the land-owning classes should be assisted. Disequisio des devintagi classes about de assirtou-tas de land-owning classes about de civene-ta penportico to the croy fallure. In sendina a Famise Code to the provincial governmenta, the Government of India laid down as the cardinal beature of their policy that the famine wage "is the lowest amont sufficient to main "beatht under given circomateness Whilst the Government of India laid down as the large "as the foreignment of India laid down as the cardinal feature of their policy that the famine ware." Is the lowest amount sufficient to main the lowest amount sufficient to main the large "as the lowest amount sufficient to main the large "as the lowest amount sufficient to main the large "as the lowest amount of the large "as the cost of famine relief was Es. 7; curves, revenue in the shart they would help themsetres while it could be considered as the shart they would help themsetres while it could be comparable to the catent of Rs. 1; crore, and loans given aggregating Rs. 1; crore. The don't shall be relief fund amounted to about Rs. 1; crore, and loans given aggregating Rs. 1; crore. #### Famine Protection

Side by side with the perfection of the ma chinery for the relief of famine has gone the development of famine protection. The Fa chinery for the relief of famine has gone the development of famine protection. The Fa man or in ornaments, which can be drawn upon mine Commission of 1880 stated that the nest, in an emergency. The prodigious cooling of and often the only means of securing protection from the extreme effects of famine and trong the railways and irrigation. These relatives the railways and irrigation. These railways and irrigation. These railways and irrigation of two classes, productive and protective, form owing to the absence of banking institutions for two classes, productive and protective. I will all lack of confidence in the banking system. drought, are ranways and irrigation These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking hand charges are met from loans, protective works, which do not pay directly from revenue. In order to guarantee that there, should be continuous progress with protective works, the Famine Insurance Graot was insultated the Famine Laurance Graot was instituted been constructed, which hreak the shock of a in 1870. It was decided to set apart from the lattice of the riam Then the natural grown in 1870 to was a constructed, which hreak the shock of a interest process of the special revenues Ba 14 crores annually or of the population has been reduced by plague one million starting a first charge on this and famine disease; followed by the great instruction work, the third the avoidance of debt. The hills of people. This has not only prevented chain of protective railways is now practically complete Great progress is being sade with the increase of congestion, but has brought productive irrigation Acting on the advice below their former population-supporting capacity of the Irrigation Commission an elaborate proworks, the third the avoidance of debt. The chain of protective railways is now practically complete Great progress is being made with protective Irrigation Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine susceptible district in India—and in the Central Provinces

#### The Outlook

Such in hrief is the official programme and organisation which has been hult up out of the experience and practice of the past Yet everything goes to show that Govern ment activity to save human life will never be ment activity to save human life will never be wanted in the future on the colonal scale of for mer times, even so recently as 1899 1300 Radio Theorem and the colonial scale of the colonial there has been in silent progress an economic revolution in India. In the year 1918 the rains falled more sorticualy and over a wider area than during any monston in the recent history of India. The dedictory in the rainfall was more marked than in the great famine of 1899 Yet such was the increased ramine or isser it is not man to increase in creating power of the people that instead of a demand for State railef from over five millions, the maximum number at any time in receipt of public assistance was never so large as six. hun dred thousand The shock to the social life of the community was insignificant, the effects of the droughs completely disappeared with the good rains of the following year

when so often accompanies in the same and the same store of values of the material of the same atom of values of the materials board. The balance exports in favour of India in normal times is approximately 2.50 millions a year. The gold and silver bullion in which this is largely liquid. ated is distributed all over the country, in small There has been a large extension of irrigation More than one-third of the land in the Punjab store than one-turn of the land in the FIDJab is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Decean, irrigation works have been constructed, which break the shock of a city The increase of railways distributes the resources of the country with case, the agreed of the oc-perative credit Movement has improved rural credit Finally, there is the considerable development of manufacturing industry, which is generally short of labour and helps to absorb the surplus of a famine year whilst the Government is completely equipped whilst the Government is completely equipped. with a famine code, there is no reason to suppose that there will ever recur such an emergency as that of 1899 Famine can now be efficiently met by the liberal distribution of tagavi, the suspension and remission of the land revenue demand, the reitef of the aged and others who cannot work the provision of chespfodder for the cattle, with possibly some assistance in transporting the affected population of the famine-affected tract to the industrial centres

The increased resulting power of the people was affectly wip demonstrated during the famine of 1900-21 which was due to the falling of the mostoon towards the end of the year 1920. The distress which appeared in the end of 1910 persated during the early months of 1921 and regnize famine was deciared in parts of Madras, Southay Central Provinces and of Madras, Bombay Central Provinces and Baluchistan Local divtress prevailed also in Bengal, Punjab and Central India The largest number of persons on relief of all kinds did not exceed 0 45 million which was consider ably fees than 8% of the total population of the area affected by the failure of the monacon.

## The Indian Famine Trust.

the superior class poor who cannot scoupt of the superior class poor who cannot scoupt of the contractors when the raise heads to be held in trust for the relief of the needy intation of the outlivisors when the raise break in time of famine. This Trust has now swellen At every great famine large sums have been to over Ra. 35; laklus subscribed, particularly in the United Kingdom, for this purpose, and in 1893–1900 the people of the United States gave generous bein. With the Idea of providing a permanent famine that during the year 1922 greats for relief of the United States gave generous bein. 1900 a smouthing to Be 25,000

## BOY SCOUTS.

The Boy Socute movement, intilated to Ragiand by Le Gen Sir Robert Baden Fowell (the Chief Socut), has spread widely in India, both among Europeans and Indian The Vicercy is Chief Socut of India and the had to Provinces, are Chief Scott in their own areas. The aim of the Association is to develop good cilisenship among boys by forming their character—training them, in habits of observation, obeliene and self reliance—inculcating loyalty and thoughtfulness for others—and teaching them services medul to the public and handlerafts useful to themselves

It is confidently anticipated that in the Boy Scout Movement will be found a natural mean of bridging the guif between the different races of bridging the gaif between the different races cristing in India. The movement is non-official, non-military, non-political and non-sectarian lite attitude towards religion is to encourage every boy to follow the laths he professes Every boy admitted as a South makes a three fold promise to do his best (1) to be loyal to God and the King. (3) to be jothers at all times, and (3) to obey the South law. The taw referred to lays down.

- 1. That a Scout a honoor is to be trusted .
- 2 That he is loyal to God and the King his parents, teachers, employers, his country his country and those under him,
  - 3. That he is to be useful and to help others
- 4. That he is a friend to all and a brother to very other soout, no matter to what social dans the other belongs .
  - 5 That he is courteous .
  - 5. That he is a friend to animals .
- 7 That he obeys orders . 8. That he smiles and whistles under al
- difficulties . 9 That he is thrifty , 10. That he is clean in thought, word, and

# Hydro-Electric Development.

India promises to be one of the leading countries of the world in regard to the development of hydro-electric power and great arties in this coulty as the control of the countries of the world in the countries of the countries

Water power schemes, pure and simple, are encountly discust in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year Perennial rivers with sufficient water throughout the year are practically non-existent is India Water, therefore, must be stored for use during the dry therefore, must be stored for use during the dry warts in the mountainons and hilly regions where the heaviest rainfalls occur and the progress stready made in millising such opportunities by the electrical transmission of power affords high encouragement for the fatter. Further, hydro-electric schemes case them to be a such as the property of the state. Further, hydro-electric schemes can then projects, the water being first used to drive the turbines at the generating stations and than distributed over the fields Water, as was pointed ont in an interesting paper on the subject presented to the India in Project, CLE, M Inst. C E, intely in the Irrigation Project, CLE, M Inst. C E, intely in the Irrigation and Western Endia up to the time of his death, "can be stored in this country at a third or a country and the second of the death," and the second of the control o

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India On this recommendation the Government of India in 1918 appointed the late Mr G T Barlow, C.I. It, then Chief Engineer, Irrigation Branch, United Provinces, to undertake the Mild Engineer, including the Mild Engineer, Irrigation Mr. Mild E., Electrical Advisor to the Government of India. Mr Barlow deed, but Mr Mears issued a preliminary report in September, 1919, annumarising the present state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the problem in India and outlining a programme of investigation to be undertaken in the course on Investigation to be undertaken in the course of the problem in India now absorb over a million horse-power, but this excludes to 11 million horse-power, but this excludes continuous transport of the seven great rivers castward from the India to the capable of giving not less than three million horse-power in the Indian considerations app to there in column of the course of the seven million horse-power in the Irrawaddy and Chindwin rivers, given in the report of the London Couplett Board of Scientifio Studies

The Report points out that the Bombsy

The Report points out that the Bombay Presidency holds a unique position owing to its great cristing and projected schemes at Lonavis, the Andhra Vulley the Nils Mina and the Koyna Vulley and has the still greater advantage of possessing a firm ready to develop its resources.

## Bombay Hydro Electric Warks

The greatest water-power underfailings in Iodia—and in some respect the greatest in the world—are the Tata hydro-electric schemes recently brought to fruition, and constantly undergoing expansion, for the apply of power in the city of Bombay. Bombayis atter Londou in the city of Bombay Rombayis atter Londou in the city of Bombay Rombayis atter Londou in the city of the city o

heavy rainfall in Mr Gostling pressed the achieus on the attention of Mr Janusciji Tata for years, and with perseverance collected data which he laid before that ploneer of the larger which he laid before that product of the side of industries in India He summoned the side of experts from England to in vestigate the plan The scheme was ruly considered for six long years Meanwhile both Mr J N Tata and Mr David Gorilling passed away, but the sons of the former continued the work of their stather and on Mr Gostling's death, Mr B. B. Joyner's aid was sought to work out the Hydraulie side of the undertaking

The scheme completed, a syndicate secured the license from Government and an endravour was made to enlist the support of financiers of was made to onlist the support of financiers of Engiand who tried to impose terms which were not acceptable Meanwhile, the attention of Bir George Clarke (now Lord Sydenham), then Gewernor of Bombay, and an engineer of distinction himself, was drawn to the scheme The interest shown by him drew the attention of indian Chiefs in the examination of contact of indian Chiefs in the examination of contact the contact of the cont and outside it to its possibilities, funds flowed is and a company with an initial capital of 1,75,00,000 Rupees was started

The hydro-electric engineering works in The hydro-electric engineering works in connection with the project are cituated at and about Lonavia above the Bhor Ghat The rainfail is stored in three lakes at Lonavia, Walwhan and Shirswita, whence it is conveyed in manonry canals to the forebay or receiving reservoir. The power-bone is at Khopoli, at the foot of the Ghate, whither the stored water is conveyed through pipes, the fall being one of 1,725 feet. In failing from this height one of 1,125 reet in fature from this height the water develops a pressure of 750 lbs per square inch and with this force drives the turbines or water wheels. The scheme was originally restricted to 30,000 electrical horse power, but the Company, in view of the increasing demand for power from the Bombay mills cided to extend the works hy building the Shirawta Dam and lasued further shares bring Shirawa Dam and issued further shares bring ing the capticity of the actions being increased to more than ing the capticity of the actions being increased to more than 7 per cent. Preference 8, 785 shares tally jack and Ordinary 18,000, out of which 10,000 are fully paid and 8,000 new shares, on which He 400 have been called up Thore is also a Debenture Loan of He 85 laths. The works were formally Loan of Rs 35 is his The works were formally opened by H. E the Governor of Bombsy on the 8th February 1915. At present there are altogether 44 mills with motors of the aggregate B H P of 55,000 H P in service In addition to the octon and four mills which have contracted to take supply from the Company for a period of ten years, an arresement has been completed whereby the Tata Hydro Electric Company, the Andars Valley Fower Supply Company, and the Lata Power Company will between them supply the whole of the electric power required by the Bombay Electric Supply and Tramways Company, Lindfed and also the power for the electrification of the Garbour Branch and Dombay Kalyan the Hard Supply and Tramways Company, Lindfed and also the power for the electrification of the Garbour Branch and Dombay Kalyan the Hard Supply and Tramways Company, Lindfed and also the power for the electrification of the Garbour Branch and Dombay Kalyan the Hard Supply and the Hard Supply and Tramways company in the Garbour Supply of electrical control and the completion of the Company full scheme will not suffice for all such desands being dammed for the conservation of valer and the completion of the Company full scheme will not suffice for all such desands for the conservation of valer and the completion of the Company full scheme will not suffice for all such desands for the conservation of valer and the completion of the Company full scheme will not suffice for all such desands when the suffice for the conservation of valer and the completion of the Company full scheme will not suffice for all such desands for the conservation of valer and the conservation of valer an have contracted to take supply from the Com-

there are, for instance, tramways with possibilities of enburban extensions. The probable fulure demand is roughly estimated at about 160 000 H P During the past year the Company has embarked noon a considerable scheme pany has emeation poin a considerable scheme of extensions these involving the impounding of a fourth take at Lonavia, the doplication of the pipe line and the installation of additional machinery at the power bouse at Khopoli

Investigations undertaken by Mr H Glibbs with a view to further developing the electrical apply led to the discovery of a highly promising water storage site in the valley of the Andhra River, situated near the present lakes previously overlooked, as alto gether different treatment and design were required In this instance the draw off point is 11 mlies npstream from the dam and at a level 112 ft above the lowest river bed level at the 8,700 ft long driven in solid trap rock through the scarp of the ghants of which the presente pipes are an extension Seventy feet of the upper water in the lake can be drawn off comprising 75 per cent of the total amount of water stored both above and below draw off level A scheme was prepared to be carried out he a separate company and providing for holding up the Andhra River by a Dam, about a third of a mile long and 192 feet high, at Tokerwadi This dam holds up s nam, at 103erwall Init dam noids up a lake nearly twelve miles long the further ead of which approaches the brink of the Ghats at Khand Here, a tunnel, a mile and a quarter long, carries the water to the sarge chamber iong, carries the water to the sarge chamber, whence it enter the pipes for a vertical drop of about 1,750 feet to the generating station at Bhitynui about-17 miles from the centrating station at Khopoli The achemis is designed to yield 100,000 horse power in its full development. A new company to operate the acheme was formed on the list August. 1916, with an initial capital of Rs 2,10,00,000, divided into 160 000 Ordinary shares of Rs 1,000 each and 5 000 Preference shares of Bs 1 000 each and 5 000 Preference shares of Ea 1 000 cach this boing the Andhra Valley Power Supply Company, Limited The Company, Limited The Company of Hydrogenesis of Supply Company 15 per cent inport the profits (after making certain deductions), or a sum of Ea 50,000, whichever shall be the larger sum, the intention being that the new company shall pay smully to the Take Hydror-Blecket Power Supply Company a minimum sum of Ra 50 000 The areas intended to be supplied hy this Company are the town and island of Bombay and the Subarban Municipalities of Bandra and Kurla The supply of power commenced in 1922 and the whole project was

shares of Rs 1,000 each and 00,000 shares of Ss 1,000 each, the first and present less being of 10,000 preference shares and 35,000 ordinary One lake will be formed and from it shares Oise lake will be formed and from it water will me conducted direct through a short tunnel to a pipe descent to a turbine power house. For the below the conducted of the transmission of the power and the length of the transmission line Brombay will be 70 miles Half of the seheme, i.e., for the supply of 75,000 h p, will first be completed, and is expected to come into occuments. operation in about three years. The construction works at present are in progress and lands have been acquired for the Dam, and the lake

Nearly 100 miles southward of this Messrs Tata propose to creek two dams in the huge valley of the Koyna river, proposed by Mr A T Amail and developable on lines similar to the two projects by Mr Glibs above mentioned partly to supply power to Bombay and partly to develop a great assembly of electro-chemical in dustries near the power installation. The prelimi nary investigations for this scheme are still proeneding. The catchment area for the lake will be esceing. The extemment area for the take wil be 346 aquare miles and there will be a total storage after the rains of 112,600 million cubic feet, which will be sufficient to supply a normal load of 350,000 house power for 8 000 hours per year. The peliminary estimatos provided for a capital of Rs 310 lakhs to carry out the acheme

### Mysore Installation

The first hydro-electric scheme undertaken in India or indeed in the East was that on the River Cauvery, in Mysore State, which was inaugurated, with generating works at Sivasa mudram, in 1902 The Cauvery rises in the British district of Coorg, and sows right across Mysore The first object with which the instal lation was undertaken was the supply of power to the goldfields at Kolar These are 92 miles distant from Sivasamudram and for a long time this was the longest electrical power transmis sion line in the world Current is also sent to Bangalore, 59 miles away, where it is used for both industrial and lighting purposes

The initial undertaking has constantly been expanded since its inauguration, so that its total capacity, which was at first 6,000 horse power, is now approximately 25,000 hp This the maximum obtainable with the water which the Canvery affords and, therefore, with the number of consumers, large and small, rapidly increasing, the necessity of a completely new installation classwhere to be operated in parallel with or separately from that at Sivasamudram, has been recognised Two projects offer themselves The first would involve the use of the River Shimsha, a would in volve the use of the River Shimsus, a tributary of the Cauvery which has natural fails, and the second, known as the Machatat project, would have its power house on the Caurery, 25 miles down river from Stwasmadism and just within the borders of Mysore when the highest present in the Madrae Presidency. The making and distribution of Kysore but and the projects in the Domosy Eventurity United States and Andrew Michael and Comparable type band of water available at Sivasamudram is small plant was completed and put into operative type of the project o

a channel 20,000 feet long with a 224 feet bed would be necessary. There would be three generating units, each giving an output of 4,000 e h p. fature extensions yielding an additional 3,000 h. p. could be made. The progressive spirit which has marked the manage-ment of the works since their inception now characterises the manner in which the problem of further extensions are being considered

#### Works in Kashmir

A scheme of much importance from Its more interesting of the developments that may be expected Of the developments that may be expected from it than for the part which its form it than for the part which its country with the part which its country with the part which it is country with the part and the part house and the main connection between the two is a grent timber finme. These works and the fore bay at the delivery and of the finms have a capacity for carrying water sufficient for the g neration of 20,000 electrical horse power Four pipes 600 feet long lead from the forebay to the power house, and from forebay to water-wheel there is an effective head of 395 feet There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k w, 3 phase 2,300 voil, 25 period generator runuing at 600 r p m, and each unit is capable of taking a 25 per cent overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15 000 kw generating plant being installed within it. Two transmission lines run side by side as far as Baramulia, 21 miles distant at which point one terminates The other continues to Srinagar, a further 34 miles The installation at Baramulla was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation, but these operations have temporarily been curtailed, so that only one dredger is now in operation. The lighting of Baramula has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will increase and that a small or power was soon spring up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting hat for heating. The greater part of Srinagar city is now electrically lighted and during the past year a motor load of over 100 k w has been connected with the mains, motors being hired out to consumers by the Electrical Department This step was taken with a view to educating the people in the use of electric power and it has been entirely successful

## Recent Progress

Apart from the development of the three projects in the Bombay Presidency the past

record It is interesting to note, however, State Finally, there is a big combined pro-that preliminary investigations are proceeding look of bydro-electrification and irrigation in with a view to the erection of hydro-electric Hyderabad State This scheme is still very plants in various parts of India In the tea much in the sir, but the fact that it is under two bundred tea factories, whilst the Mandi and not allowed to run to waste (Punjah) project has advanced a stage and may be commenced in due course Another Punjah and Tramways Company has of Travancore have been selected for develop ment if and when the financial considerations can be satisfactorily settled The Pykara river scheme is of some magnitude, and it is estimated that upwards of 50,000 horse power will be available for electro-chemical industries which and the Travancore Darbar will be jointly res ponsible, for the power house will be located on hundreds of miles at a pressure of 200,000 volta, the British side of the river and the current or double the pressure commonly employed in transmitted to and distributed in Travanore; India for overhead long-distance transmission

which yiew to the Stream on synthe-electric integration of the late in moments as an explants in various parts of india in the tea much in the six, but the fact that it is under districts of Kalimpong and Kunseng, for consideration is worthy of being placed on record example, it is proposed to harness a promising in view of the somewhat nunusual circumstance water-power site and to supply current to an in incis, that the tail water from the turbines important area in which are situated more than will be made available for agricultural purposs

The fact that the Bombay Electric Supply and Tramways Company has definitely decided be commenced in due course. Another runjan and framways company use usualized victors scheme, the Sutle Hydro Electric Project, at to Aut down its ateam driven generating plant one time appeared to be one of the most pro and to take supply in bulk from the various mising propositions in the country, but owing to Tata companies has been recorded above, financial comsiderations it has now been Inde- and it is of more than passing interest to note finitely shelved In Southern India a large that the Poons Ricctric Supply Company has number of sites have been investigated, and of put forward a similar proposition with effect these one on the Pykara river in the Nitgiris from the time when power is available from the and another on the Kallar river on the borders I lata Power Company a installation at Nils-Tata Power Company a installation at Nila-Mula This is a phase of hydro electric distrihatlon which is quite in its infancy in India, hut it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges available for electro-chemical industries which supply of electric current in units, time greatly it is proposed to establish at Calleut on the reducing capital and administrative charges West Coast The Kallar river project is very and minimising the price of current to the commend amaller but it is interesting in being a samer It is a system which has become some-scheme in which the Government of Nadras thing of a fine art in California, where current is transmitted by overhead wires for many

# Local Self-Government.

No field of the administration of India is likely to be more profoundly affected by the Reforms of 1919 than local government This is one of the 1919 than local government. This is one of the subjects transferred to Indian ministers, and subject transferred to Indian ministers, and there are many signs that the power will be freely used for the purpose of experiments in the direc-tional bodies on the whole, the progress of local government in India for the past quarter of a entury has been disappointing. The greatest successes have been won in the Presidency town and particularly by the Smintpasity of Rombay The difficulties in the way of progress were manifest Local government had to be a oreation -the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration again the power entrusted to local bodies were insignificant and the financial apport was small There are however many indications that the dry bones of the motusal are stirring, insamuch as this being a transferred subject it is entirely provincial there will be the widest variation between province and province according to the special needs of each We

according to the special needs of each We can isdicate bere only the broat chedencies, with the expression of opinion that this field will be one of the most important in the growth of nation-building forces in Pritial following the constitution of the constitution of the constitution of the constitutes the primary territorial unit of Government organisation, and from the villages can built up the larger administrative subtice—tahuils, sub-divisions, and districts—"The typical indian village has its central residential site, with an open space for a pend and a catch stand Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for graing and wood-cutting The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little

simple surroundings, weather together in a first community with its own organization and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, e.g., in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads"—(Gazetteer of Index )

The villages above described fall under two

main classes, vis.—
Types of Villages.—"(1) The 'severalty' or 17pbs of Villages.—(1) The "severalty" or cultawars risinge, which is the previated form outside Northern Indis. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set spart for a common purpose, such as gra-illy, and waste land may be brought under the land and the common purpose, such as graplough only with the permission of the Revenue authorities, and on payment of assessment The village government verts in a hereditary headman, known by an old ventedular pleadman, known by an old ventedular pleadman, known by an old ventedular pleadman, and the control of the collection of the Covernment over an extending the location of the Covernment over an extending the covernment of the collection of the Covernment over might be increased gradually as results over the angle of the covernment over the covernm

"(2) The joint or landtord village, the type prevalent in the United Provinces, the Funjah and the Frustier Province Hiere the revenue was included the province of the province was included by the body of the propertor propeletors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body who allow residences to the tenantry, artisans, traders and others The waste land is albeited to the village, and, if wanted for cultivasion, is prototioned home of the market and the collection of the prototioned home gibrailty by the machinest of the prototion of the protot government was originally by the punckaget or group of heads of superior families. In later times one or more headmen have been added to times one or more beadmen have been added to the organization to represent the village in its dealings with the local authorities, but the arti-lical character of this appointment, as compared with that which obtains in a ratyatwari village is evidenced by the title of its holder, which is generally Lembersher, a vermenthar derivative from the English work number. This this type of village to which the well-known description in Sir H. Maine's Village Communities is alone an or in, makes village Communities is alone applicable, and here the co-proprietors are in general a local oligareby with the bulk of the village population as tenants of labourers under them."

them." Village Autosomy.—The Indian villages formerly possessed a large define of local articomy, since the native dynastics and their iccoil representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landbolder as responsible for the payment of the Government revenues, and the maintenance of local order. This autosomy has now dis appeared owing to the establishment of local, order interest of convival and criminal courts, the present revenue and police organisation, the increase of convival and criminal courts, the present revenue and police organisation, the increase of convival and criminal courts, the present revenue and police organisation, the increase of conviction of the individual rejestency raytem, which is extending even in the north of India Nevertheless, the village remains the first unit of administration, the principal village functionaries—the headman, the accountants, and the village watchman—are largely utilized and the village verment, and there is a still a certain paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets -- For some years there was Funchayets—For some years there was an active propagands in favour of reviving the village council-tribunal, or Psacksyst and the Decentralisation Commission of 1908 made the following special recommendations—

"Walle, therefore, we desire the development of a punchager system, and consider that the objections urged thereto are far from insur-momatable, we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure we think that a commencement should be made by glying certain ilmited powers to Puschweis in those villages in which circumstances are most is your-able by reason of homogeneity, natural intelli-gence, and freedom from internal feeds. These

much retionce, and judicious discrimination between the circumstances of different villages, and there is a considerable consensus of upinion that this new departure should be made under the special guidance of sympathetic officers"

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village and sovernment. to the support of village sear-governments. Various measures have been passed, but it is too early to say what life they have The Punjah Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character may be assigned in Bibar a Village Administration Act has been passed for the administration of village affairs by villager themselves, including minor civil and criminal cases Other Governments are taking steps in the same direction

Municipalities.-The Presidency town 5 had some form of Municipal administration had some form to municipal administration after under statute, from comparatively only times, but contained to them there was practically no attempt at municipal legislation before 1842. An Art passed in that year for Bengal, which was pracpersonal in some year for nemesia, which was prac-tically inoperative, was followed in 1830 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage muni-rous affairs, and authorized the laws of variances. cipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners ware all nominated, and from the point of view of self-government, these Acts did not proceed far Is was not until after 1870 that much pro-gress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, ment of funds devoted to education, samitations, medical charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which among other things, extended the elective principle, but only in the Central Provinces was popular out only in the Central Provinces was popular representation generally and successfully in-troduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1888-4 that greatly altered the constitution, powers, and functions of muni-cipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees responsibility were construct on the construction of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue saited to and capable of deve-topment under local management being transforred, with a proportionate amount of provincial extpenditure, for local objects The general principles thus laid down have continued to govern the administration of municipalities down to the present day

o present day

over 18 millen people resident within their timits Of these municipalities roughly 683 have a population of less than 50,000 persons said the remisinder a population of 50,000 and need a compared with the total population of Peeti-Accompared with the total population of Peeti-Accompared with the total population of Peeti-Accompany of amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent. of the total population. Turning to the composition of the Municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion Ex-officio saemhers are roughly 8 per cent and nominated 27 per cent Riccted members are almost everywhere in a majority Taking all municipalities together, the non-officials outnumber the officials by nearly six to one The functions of municipalities are classed nader the beads of Public Safety, Health, Convenience and Instruction For the discharge of these responsibilities, there is a municipal income of Rs. 12 98 crores derived principally from taxation inst over on-third coming from municipal property, contribu-tions from provincia revenues and miscellassous sources Generally speaking, the income of municipalities is amali, the four cities of Calenta, Bombay, Madras and Rangoon together providing nearly 40 per cent of the total. The heaviest items of this expenditure come under the heads of 'Conservancy 'and "Public Works" which amount to 16 per cent and 14 per cent respectively, Water-supply comes to 18 per cent. Drainage" to 7 per cent and Education to no more than 81 per cent In some localities the expenditure on education

is considerably in excess of the average In the Bomhay Presidency, excluding Bombay City, for example, the expenditure on education nmounts to mure than 21 per cent of the total inads, while in the Central Provinces and Bersr It is over 15 per cent

District Boards -The duties and functions assigned to the municipalities in urban areas are in rural nreas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate tu which are two or more sub-dis-trict boards, while in Bengal, Madras and Bihar and Orlass, there are also Union Committees Throughout India at large there are some 219 district boards with 543 snh-district boards and more than 800 Union Committees. This machinery has jurisdiction over a population which was some 213 millions in 1919-20 Leaving aside the Union Committees the members of the Boards numbered a little over 13,000 in 1921 22, of whom 59 per cent. were elected As in the case of municipalities the tendency has been throughout India to in crease the elected members at the expense of the nominated and the official members The Boards are practically manned by indians, who constitute 96 per cent of the whole membership Only 18 per cent of the total members of all boards are officials of any kind The total income of the Boards in 1921 amount ed to Bs 10.93 croses the average income of each district hoard being Rs. 5,00,060 The The Present Position —There are some 751 most important item of revenue is provincial Municipalities in British India, with something rates, which represent a proportion of the total

income varying from 18 per cent, in the M W F Province to 61 per cent in Bihar and Orissa The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works anch as roads and bridges Medical retief is also sharing with education though in a less degree the lion's share of the available revenue

Improvement Trusts -A notable feature he recent sanitary history of India is the activity played by the great citles in the direc tion of social improvements. In Bomhay and Calcutta the Improvement Trusts are continu ing their activities which are described in separate chapter (q v) In Bombay the work of the improvement Trust is being developed by the Bombay Dovelopment Directorate cities are heginning to follow the examples of been constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in soveral of the larger cities of the Provinces of India Their activities have, however, been severely curtailed by the financial stress

Provincial Progress -There was passed in Bengal in 1919 a Village Seli Government Act embodying the policy of consiltuting Union Boards at the earliest possible date for groups of villages throughout the province number of these boards continues to increase rising from 1 500 to more than 2 000 Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their OWD Affairs

In Bombay the development of viliage scif government is also proceeding, as the result of an Act for constituting, or increasing the power of village committees, which was passed in 1920 by the Legislative Conneil in this presidency, some 75 ont of 157 municipalities had a two-thirds elected majority of councillors in the year 1920, and s distinct step forward has been projected by the administration in the direction of liberalizing the constitution of all municipal bodies The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large num ber of non-officials have also been appointed presidents of sub districts (taluka) boards In Madras also the institutions of local self-gov erument continued to progress in an encouraging manner. The number of district boards in the Presidency was 24, with 882 members number of sub-district boards rose from 119 to The total number of Municipal Councils rose from 73 to 80 and the proportion of Indian to European and Anglo-Indian members further increased In 1920 21 there were 54 manicipal councils, consisting entirely of Indian members, as against 41 in the previous year The average imposition of taxation per head of average imposition of taxation per hand of population is still very low, being only about Ba 2. None the less, 28 towns in the presi-dency possess a protected water apply and water works achieves are either under execution or in contemplation in a number of others.

The number of educational institutions main tained by municipal councils rose to 1,016 which was 99 more than in the previous year while the net educational charges amounted

Re 12 61 launs In the United Provinces, there has been a con siderable, if uncatestations, progress during the their work.

year Unfortunately, not much progress has been made towards solving the main difficulties which confront municipalities in improving their system of taxation Efforts have been made to introduce terminal taxes, and with certain hoards this source of income is work ing well. It has also been proposed in some towns to extend the pilgrim tax by a snrcharge on the tickets of railway passengers. As in the past the expenditure and income in conbection with water supply are far from balancing in fact, finance is still a greater obstacle which lies in the path of nearly all the heards So far as district boards are concerned little improve ment can he expected while they are financially dependent on Government It is recognised that their emancipation from official leading strings is the centralitem in the programme of reforms.

The U P District Boards Act of 1922 sime at making them as independent as le possible and destrable

In the Punjab municipal administration con tinued to show improvement, the general attituda of the un mhers in regard to their responsibilities being promising for progress in the future But the financial position is not unite satisfactory The total Municipal expenditure exceeded the total income by Rs 7 77,944. The receipts under the head of Octrel have fallen off coniderably The prevailing tendency towards the sub-titution of terminal taxes for octroi conti uned and several important towns, including unes and severa supportant towns, including Lahore art, preparing for the change The expenditum of District Boards also exceeded their revenue during 1921 22 by Bg. 14,89,183 The position is grave, but considering the results achieved it is not without lore

Three Acts of considerable importance, providing for the creation of improvement trusts for the more effective administration of smaller towns and for the cablishment of village panchayats have been passed Further, Municipalities and District Boards have been

reconstituted in a more democratio form
In the Contral Provinces, the year 1920 witnessed the passing of a Local Self Government Act which will guide into proper channels the undoubtedly growing interest in public matters The continued reduction of official members and chairman, and the wider powers of control given to local bodies will be an incentive to the development of local self government, leading to an increased sense of public duty and responsibility Another very important measure regulating municipalities was passed into law in 1922 Its chief feature, are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control

In the North West Prontier Province, the institution of local self government is some-what of a foreign growth Certain of the munici pal committees are still lax in the discharge par committees are still lax in the discharge of the responsibilities, and meetings are reported to be in frequent, but the attendance of non-official members is gradually increasing Except where factional and personal considerations were involved, the members of the municipalities still remained apathetic. The same statement is unfortunately true of district boards, whose members, it is said, evince little real interest in

Local Government Statistics.

Manachesities.—With this general infections we see now turn to the statistical results of the working of local Sait-Govern The islicating table gives information as to the constitution of municipal committees, taxation, dot, in the chief provinces in 1970-21.——

(s) One seat vacant

The Calcatta Improvement Trust was insti-tited by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up con-gested areas, laying cut or attering streets, providing open spaces for purposes of venti-lation or recreation, demolishing or construct-ing buildings and re-housing the poorer and working classes displaced by the execution of improvement scheme

improvement schemes.
The origin of the Calonta Improvement Trust must, as in the case of the corresponding was to a large extent modelled, he looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague It was estimated that the Trust might in the was estimated that the Trust might in the examing 30 years have to provide for the housing of 225,000 persons. The population of Calentia proper, which includes all the most cowded areas, was 649,995 in 1801, and increased to 801,251, or he 25 per cent. by 1901. The cor responding figure scording to the 1911 Census was 680,697 and this had increased by 1921 to 993,508

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other hy the Salt Lakes.

and on the other by the Satt Latest.

Preliminary investigations continued for several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Silli provided for a scheme involving special local texts on the second of the special local texts on to this end. It also provided for the appointment of a whole time chairman of the board of trustees and the membership of the Trust was fixed at eleven The following formed the Board of Trustees and the Satt Continue of th Crofficio), Raja Reduce Case Law, C I E, M L C elected by the Corporation of Cakoutta, Ead Nalini Nath Sett Bahadur, elected by the Ward Commissioners, Mr W H Phelps, elected ward commissioners are will radius, election by the Commissioners appointed under Section S (2) of the Calcutts Kunicipal Act, 1899. Mr A H Johnstone, B.A., B E A.M.J.C.E., elected by the Bengal Chamber of Commerce, Bahn Woomean Chandra Banerjee, elected by the Bengal National Chamber of Commerce, and Mr H Sudlow, F R I B.A., Rai Annoda Prosad Barkar Bahadur, Basi Sahih Bam Deo Chokhare, and Mr J H Lindsay, I C S., a ppointed hy the Local Government

During the 12 years that it has now been at work, the Trust have decided, and partly erentirely carried through, several improve entirely carried through, several improve ment schemes for epotting up congested areas, laying out or widening streets and providing open spaces it has spent over 6 8 crores or rapees on Capital Account, of which 1 24 crores has gone in Engineering Werks and 5 56 crores on Land Acquisition it has solid land to

crores on IAMA Acquisition it has some hand to the value of 23 crores in Central Calcultar many highly insanitary beatest have been done away with and several loads of an improved type laid out, the most important of which is the Central Avenue, 100 th wide, which, at precent extends from Beadon Steet to flow Bazar Street, a distance of 13

miles and which will shortly be extended towards the south to link up with Chowringhee, and to Stambeuer on the north.

Shambear on the north.

In the north of the City, a park and play ground have been completed and several wide ground have been completed the City have also the proposed the City have also been adequately widened. The Subtrah Areas to the South and South-East of Calentar required greater attention and extensive development schemes were under and extensive development schemes were under taken Several open spaces and squares have been made in various parts. Insanitary tants requiring sproximately 2 cores C.f.t of earth have been filled up. Russa Road which forms the southern approach to the town has been when the southern approach to the town has been to the southern approach to the town has been to the southern approach to the town has been of the southern approach to the town his and the southern approach to the town the southern approach to some the southern approach to the so gives a most pleasant drive from Chowringheo to Tollygunge To improve the drainage of this area a 100 ft wide Kast to West road, from Ballygunge Ballway Station to Cheila Bridge, and for recreation an artificial lake of 167 highas with adequate grounds are being made

made

Lastly, for the bouring of the displaced
population the Trust has undertaken en a large
scale the following schemes —

In the early stages, three blocks of chawls
were built in Wards Institution Street for
persons of the poorer classes. It was foond,
however, that the persons displaced preferred
to the compensation and migrate to
the stage of the poorer classes. It was foond,
but compensation and migrate to
the stage of the process of the stage of the
terms of street the present of the class of structures they were
accustomed to live in These chawls were
then filled with persons of limited means,
e.g. School Masters, poor Students, Clerks and
persons of the artian class. As many as 1,200 persons of the artisan class As many as 1,200 people are housed in these chawle, these buildings, including land, cost Es 2,44,868 and are let at at very low rents—ground floor rooms at Es 5 per measure and top floor rooms on Rs 6 per mensem each room measuring 12'X12' with a 4 ft verandah in front opening en te a contral passage 7 ft wide

As these chawls falled to attract the people

As these chawls falled to attract the people for whom they were meant, the Board next tried an experiment in providing altes for mustees Two altes with a lettaths area of 16 mileton and the state of t construction in this area

The Trust has also built a cluster of houses in Kerbala Tank Lane, off Beadon Street, to house temporarily persons whose residences have been acquired, while they are huliding new houses

Finally, the Trust has under construction in Bow Street a number of blocks of one, two and three roomed tenements capable of a and three roomed tenements capable or accora-modating 500 people. These are intended for Anglo-Indians, who have been displaced in the area to the East of Bentinck Street.

The single roomed tenements are just ready and have been greatly in demand by the people for whom they are intended

## ROMBAY IMPROVEMENT TRUST.

Bombay is an island twelve miles long, but very marrow and containing only 28 square miles more than the latter of Bombay is an island twelve miles long, but i claim or of commerce, the mindwheir Asso-dation and the Fort Trust, and the balance nominated by Government, or all es-oficio as officers of Government. The Board is presided over by a whole time chairman appointed by Government and he is also head of the executive The present chairman and members of the Trust are as follows -

Observan-

Nominated by Government-

Sir Lawless Hopper, Kt JP Mr Mirra Ali Mahomedkhan, M.A., LL.B.,

Dr S. S. Batiiwala

The apecific duties of the Trust are to construct new and wideu old street, open out led localities, reciaim lands from the sea to egarued sometimes, rousent manus rivin the row no provides room for expansion, and construct manifery dwellings for the poor (including the Translaney Police) and also at the cost of employ ers of labour for the labourers employed. Rombay city grew on haphasard lines homes being added as population poured in regard to town planning or the sanitary requirements of a great town. The price of land was always comparatively high, owing to the small area of the laland, and while the builder had only one object in view, namely, to collect as many rent paying tenante as possible on the smallest possible piece of land, there were no proper restraints to compel bim to observe the most ordinary rules of hygiene The result was the erection of great houses, sometimes five and six storeys high, consti-tuting mere uests of rooms. There was no adequate restriction as to the height of these chawls or the provision of surrounding open space, so that the elementary rules as to the admission of light and air went unobserved and the bouse bullder invariably creeted a building extending right up to the margins of his site Consequently, great houses ac-commodating from a few hundred to as many as four thousand tenants were built with uo more than two or three feet between any two of them and with hundreds of rooms having no

opening at all juto the outer air
The Truet has practically reconstructed
large area on modern anitary ires, but the old
municipal by laws having until within the past year remained quite inadequate for the due control of private building operations by the Municipality, the Trust have spent millions sterling of public money in sweeping away abuses, while uncorupulous landlords, still unchecked while unscripulous landlords, still unchacked, added in the same old manner to the insanitary conditions of the place. It is hoped that the amendment of the by-laws, as recently settled, will o vercome this evil of bad building.

Certain Government and Municipal lands were vested in the Trust, the usufruct of which it enjoys, and the Trust receives a contribution from municipal revenues amounting to a definite ahare in the general tax receipts, approximating to 2 per cent on assessments and subject to no maximum. Works were financed out of 4 per cent loans, until the war stopped borrowing by the Trust, the loans being guar-anteed by the Municipality and Government, and the revenue of the Trust being used to meet interest and sinking fund charges. Short term loans were raised in 1919 and 1920 at 6 per cent interest and for the last three years loans are borrowed from Government (at rates of interest varying between 6 per ceut and 7 per cent )

The salient features of the Trust's programme of 69 schemes as completed or sanctioned up to 1923 24 may be summarised as follows

The total capital expenditure up to 31st March 1924 was Rs. 1,529 lakhs. The margin for expan-aion is about Ea. 151 lakhs. The total borrow-lugs stand at Rs. 1,384 lakhs, involving interest and sinking fund charges of Rs. 81 lakhs per annum

#### Plan of Operations.

The work of the Trust, as epitomised by thee s, can be divided into two parts. ?

the worst burdens of insultation and the second consisted of opening up liew rediential areas. The Trust began by stacking that most insanitary areas, cutting broad roads through them Meanwhile, large areas of good brilling lead, jving idde for wast of development works, were developed and brought on they built upon. Instances of this development are the Chaupatl and Gemdevi estates, the innd overhung by Maisbar Hill, between it and the native city. These were cut up with fine new roads and are now nearly overed with modern shartban dwellings. Two of the most insanitary shall be for the development of the third with the control of the most insanitary shall be pround and rebuilt in accordance with hygienic principles Sanitary chawle have been built for over \$21,000 persons.

The death-rate in the Trust'e permanent chawls has always been considerably below the general death-rate in the vicinity. The emailest one room tenement on the Trust Estate is large enough for a family of five

The second phase of the Trust s work, arising gradually out of the first and advancing along with its later stages, consists of the development of a new suburban area in the north of the island, beyond the present city, and the con struction of great arterial thoroughlares travers ing the island from north to sonth.

During the past few years there has been an important movement towards the establishment of co-partnership housing societies on the Board's Estate The Board regard the new departure as one descrying every encouragement at their hands, specially in connection with the disposal of land in their solurib in the north of the island and sides have been given to societies on specially favourable terms, and have granted valuable concessions to the Society which approached them for plots of the latter agreeding to limit their dividends their hands.

The Board have prevented, as far as possible, profiteering on their estates, by preventing the transfer of plots before completion of buildings.

Doronne schemes for the expansion of boundings in the city are now passing through the final stages before being put into execution (fovernment, the Improvement Trust and the great employers of latour will all be concerned in the work and the Improvement Trust have foated a huge new programme, their new schemes sanctioned representing a greater undertaking than all their former schemes put together

The new schemes of the Trust concern the northern part of Bombay Island, where large opportunities for suburban development offer themselves. At Worll on the north-west of the Island, at Dharavi on the north, and at Sewri and Wadais on the north sate, the Trust have undertaken development schemes to the Bombay of the Island, at Dharavi on the north sate, the Trust have undertaken development schemes of the Bombay Island A considerable amount of the Bombay Island A considerable amount of this purpose material from the hills on the north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and north-west of the Island will be north seat and I

Government have decided to transfer the functions of the Trust to the Municipality and the necessary formalities and legislation to effect the transfer are receiving attention at their hands.

# Bombay Development Scheme.

The Bomhay Development Scheme in its widest sense represents concerted attempts by the three local bodles, the Municipality, the Sity Improvement Trust and the Port Trust, sach working in its own ephere, and by the Government to secure the rapid and adequate development of the city

The Minishipality is developing various areas in the city which will result in providing increased residential and business accommodation. The Mahim scheme will provide two main avenues raming north to south, in addition to the 60 feet road from Worlt to Mahim Basan, now practically completed, and a large number of cross roads. It aims at the development of the control of the section of the se

Improvement Trust—The Improvement Trust are developing the north of the latter and a second of the latter and the latter and latter

Port Trust.—The Port Trust is completing the properation of a scheme for a great expending of the docker, the new docks to be located on the smath-wast corner of Trombay The construction of the new cotton depot on the Mangacu-Sewrit reclamation has been completed and has released for other purposes the ground now occupied by the Cotton Green

Programme —The works which Government propose to carry out themselves are as follows —

(s) The provision of one room tenements for the working classes, to meet an actual existing shortage of accommodation as reported by the Municipal Commissioner in 1919

(b) The Back Bay and East Colaba Recla mation, to reduce congestion in the business area and provide residential accommodation and open spaces in the south of the City

(e) The development of South Salsette, in sluding Trombay, partly for residential and partly for industrial purposes

(d) The provision of other industrial areas at greater distances

(s) The improvement of communications to the suburban areas

(f) The improvement of the supply and transport of building materials

The question of special measures for the development of Bombay was under the consider ation of Government for many years. The results of the last general survey of the sobject are contained to the report of the Bombay Bevelopment Committee submitted in May 1914. The war made it impossible then to carry cut sary large schemes as to formulate a definite policy. And whose the war had come to an end, if was found that owing to the large locroses to the City's population during the war, and the high prices of materials, could make the property of the control o

Scope of Work—lo a speech to the Lagisaive Council in August 1920, His Kroellaney the Governor explained that the industrial hoguing scheme, which Governmon consider ed essential, would be carried out by them direct, instead of being entrased to the Mnui cipality or the Improvement Trust, because of the very heavy liabilities which already rested to those bodies. He introduced a Hill for the large the second of the very heavy liabilities which already rested to those bodies. He introduced a Hill for the large the second control of the large that the second control of the large that the large that the large that the large programme of expenditure, partly to meet the loss anticipated on the housing scheme, and partly to assist development schemes in Balsette.

He announced Government's decision to establish a new Development Department, and Directorise, which would be at once a department of Government, detached as far as possible from the ordinary Scorotariat, and an ensemble or organisation, and defined its duties at under:—

(s) To carry out the Back Bay Reclamation Scheme and any other reclamation schemes which may be found necessary in or near Bombay Usy. (b) To undertake the industrial housing scheme of 50,000 one-roomed tenements for the working classes in Bombay

(e) To organise systematically the supply of building materials for its own work and for the works with which it is connected.

(5) To take over all questions relating to the acquisition of land in Bombay City and all questions regarding the utilisation of Government land.

(s) To carry out large schemes for the systematic development of Salsette —

(f) by town planning schemes to be carried out by local authorities, and

(if) by the purchase of areas outright with a view to resale after development.

(f) To secure an adequate water anpply for the whole of Salsette when it is developed as an urban area.

(g) To deal with the supply and distribution of electrical energy, both for domestic and industrial purposes in the area outside Bombay

(A) To take up the question of the improvement of communications to link up Bombay City with the areas to be developed in Salaette and Trombay

He stated also that, to view of the magnifund of the schemes to be undersken simultaneously by Government and the local bodies, Government had decided that the finance of the whole scheme should be pooled, that they should lend the public for the money required by them as well as by Government themselves. The result the public for the money required by them as well as by Government themselves. The result of this decision was the Sombay Development Loan of 1920, the sobscriptions to which amount to the state of the state

Personnel — The whole Development Department, inclinding the Directorate, is in charge of the Houbie his Coversies changing, C.L., o. E. a. as General Member of Council The Director of Development in the Coversies of the council of the Coversies of the Coversies of the Coversies of Cov

The Back Bay Reclamation works and the East Colaba Reclamation Project arch charge of a Chief Engineer (under the Director), assisted by three Deputy Chief Engineers, one in compared to the Court of t

For development works other than the reclamation, the Director is Chief Engineer and is assisted by two Superintending Engineers. One is in charge of industrial housing and the majorials division and one of development works in Salsette.

The appointment of Salastic Development Officer, created many rearrage, has been absorbed in the Directorale, and the helder of it is also Collector of the Salmurban District, and in charge of the staff employed on the acquillation of land in the suburban area. There is a the preparation of details of schemes, nagotiations with land owners, management of chawle in Bombay City, etc. As the existing land revenue survey is not nearly accurate enough for another the second of the control of the contr

Industrial Housing—In Bombay City, apart from some minor schemes affecting Government properties, the work of the Directorate consists of industrial Housing and the Back Bay Reclamation There are four housing schemes in progress and Government have dedded that till these are complete additional land is not to be taken up for industrial housing and further new schemes are not to be embarked on a such title new schemes are not to be embarked on the complex of the scheme in September 1924 was as under — and the cheme in September 1924 was as

- Naugaum —42 chawls, of which 19 have been completed
- 2 DeLusie Road —32 chawls, of which 27 have been completed and the rest are near completion
- 3 Worli—121 chawls, of which 20 chawls have been completed and 60 require only drainage and water supply connections.
- 4 Secri—16 chawls for the workmen at the Cotton Depot, of which 2 have been completed.

Out of the 5,120 tenements completely ready for occupation, about 8,900 are already occupied Provision has been made for shops in the chawls at Worll, Naigaum and Sewri

The average economic rent of the chawls works out at Rs 14-8-0 per month per tenement without a maham and at Rs 15-8-0 per month per tenement with a maham.

The average minimum rent fixed for the present per month for each tenement with and without a sakons is Rs 11 and Rs 10 respectively On this basis there is a lose of Rs 54 per tenement which is being met from the cetton reas.

All the four housing schemes referred to are expected to be complete before the end of 1925

Reclamation — As regards Reck Easy the quarry has been equipped for a continuous output of 2,000 tens a day, the product varying from crashed stone and ordinary mible to blocks weighing up to 10 tons. There is through rail and this has been extended to the Colash section At Marine Lines 6,480 feet of the wall, mass concrete out a rubhle bank, have been completed, and the first section of the wall at Colaba, 2,000 feet of mass concrete built directly on the reef the colaba end will consist of mass concrete built directly on the reef at the Colaba end will consist of mass concrete wall built on a rubhle mound, as at Marine Lines 6,710 feet of this rubhle mound has been completed and the extension of the concrete wall has been completed as Colaba and the filling was commenced at Colaba and shout 5,28,000 cuble yards of material has been deposited

salestte —In Salette the widening and tax macadaming of the surface has been completed in the greater portion of the Esadra Andhorf Road The Maid Marve Road, including the construction of a bridge, has been completed, while the first section of the Kolwaid Boria Road, which will first section of the Kolwaid Boria Road, which will include the completed, while the first section of the Kolwaid Boria Road, which will have been finished Quarrying and rectanation works have been carried out at dilibert Hill, Andheri, and progrees besteven that the text of the complete section of the section

sold therein fer a small match factory which has been erected and brought late use Considerable progress has been made in the provi sion of water-supply, especially in Santa Crus and Julu, while arrangements for sddittons to the Andheri water-supply are nearing completion.

In Trombay there are three large schemes, Trombay North East is intended to provide for (a) a new municipal slanghter house, tannerise day works and other noxious trades which ought to be removed from the City (b) as exparate area for milich catile stables, (c) residential areas for the people employed in the tanneries, etc Trombay North West is intended to provide a residential area for no three sides the existing Chembur village and extending to the south and east. The development of Trombay West will depend on the detailed proposals of the Port Trust as regards the new docks.

In Trombay North West, which is Intended to be a readential area, the dred-poment of a gross area of 570 acres, to provide over 3,100 milding plots, has been worked out in detail The Chembur sector of this scheme which has been designated Chembun. Garden Suburb , has now a rood, system completed and has been designated the Chembun and the second of the scheme which has been started by the G.I.P. Radiway and it is well patronised especially in the mornings and evenings. The earth work for the extension of the line from Chembur to Trombay was taken in hand and completed as far as Mandala btation which will serve the new tannery area. The filing in of the tannery area has been completed removal of this trade from the Lishand of Bombay, the work of constructing roads, drainage, water supply, etc., in the area has been completed.

The Salastile-Trombay Railway rems from Anik to Kuria and then through the Shahar area, lying between the 6 IP and BB & CI Railways to Andheri This railway is now practically complete as a single line, expection for the bridge over the 6 IP Ry at Kuris, the construction of which is in progress through the construction of which is in progress through The main objects of the railway are to bring stone for road making in Salaste from the quarries in Tombay and to provide a transway service to open up the areas, through which it passes with the construction of the railway are with the salastic form the

development scheme for an area of about 20 acres in Dania village has also been worked one and the construction of roads in the scheme is in progress. Five roads have been completed in the residential scheme in Kirol-Rorth. An interested area at Kuris-Kirol, for smaller in the residential scheme in Kirol-Rorth and industries, has been provided One plot was scheme in that the convenient will advance, at

not exceeding fifteen years

industrial Town -The Ambernath Development Scheme aims et creating a new township to esteblish industries with all modern facili During the year, a site was sold at Amber neth to the Western India Match Company and an up to-date factory stablished on it Owing to the increase in the population and industries of the area the temporary water supply became inadequate but the permanent supply Is now almost ready for distribution. The approach roads to all existing factories were completed, together with a road connecting Ambernath Station with the Kalyan Badlapur Road Roads for staff hungalows and work mon a quarters have practically been finished. The colding a wage arrangements are hy means of septic tanks but e small activated sludge plant is being installed as an experiment and fished to other instance as an experiment con-if successful will probably be extended to deal with the sewage of the erea. A market to serve the residents of the erea has also been provided. The GTP Railway are running a abuttle service between Kalyen and Badlapur with a good number of passengers and are considering the question of remodelling Amher nath station to deal with the traffic of the factories. An arterial siding for the factories is elso being arranged by the Railway Company

The main water scheme is located at Badlapur, 5 miles from Ambernath Station The works comprise -(a) A barrage across the Ulbes River about 14 miles from the railway station, which about 14 miles from the railway station, which has been completed (b) A set of Paterson rapid filters to filter three million gallons of left bank. The filtration plant, with the exception of a few minor items, is finished and will be in working order abortly Owing to delay lo arrival of the permanent motor driven pumping plant from England as temporary engine end pump were erected to fill the reservoir during the hot weather

The provision of a small power station hes also been undertaken. It will supply electric energy for running the permenent pumping plant at Badlapur and will meet the demands of the present factories in the area. The plant has been so laid out that it can easily he supple mented, should further demands arise in the future The power house has been practically completed and the plant is under erection

6 per cent laterest, a sum equatio 6th is of the cost of land on 4 the cost of than do not 4 the cost of than building of the secretary lavering of the dredger which it is intended to erect, the advance being the source of supply of sand will now be confined respectable in instalments a present over a period; to Munitra and no further sidings will be ladd. down at other points Raliway sldings from Mahaluxmi to the Worli Housing site and from Lower Parel to the DeLisle Road site, for the transport of materials, have been constructed A depot has been established and sldings are completed at Matunga These sldings will be used for materials required on developne men nor materials required on develop-ment schemes in Bombay not accessible by rail, and facilities can be given to the public engaged in building in the north of the Island A small fact of steam wagons and trailers has been provided for the transport of materials, and in connection with the proposed development of Salactte and Trombay, small workshops capable of expansion as required have been erected near Kelikalyan and Wadavli near Chembur

Military Lands —Arrangements have been made with the Government of India involving made with the Government of India have brise the relinquishment by the military anthorities of practically all the fand they bold in the Fort area. The services displaced are to be reinstated partly at Deciali and partly at Colaba, where the military area is to be increased by about 285 acres at the southern end of the Back Bay Reclamation. The Government of India have to pay the Government of Bombay for this land, and this payment and the cost of new buildings, etc. due to the removal of the military from the Fort are to be covered by the land on the Pailton Road Estate Gormerly the Government of Road Inten) has been sold to the Bombay Municipality. A few plots on the estate and another lu Garnac Road have also been sold. The plots aveilable for tale in the Mazagon Defence, a red site have allo been sold. Mazagon Defence \ ord site have all been sold. managed between the distributions and have all been sold while the small site known as the Old Salnting Battery site, situated at Strand Street on the Harbour Face, south of the Apollo Bunder, was sold to the Port Trust for road widening The old town barracks in the Fort have been The old town bertauks in the Fort have been sold to the Bontbay Muldipality in connection with its Hornby Road Baland Pier Scheme, near Marine Lines and New Indian Infantry Lines at Beolaii have been completed, which the temporary Mechanical Transport Depot at Colaba and the officers quarters et Colaba ere nearing completion. The Filot Bunder ere nearing completion The Pilot Bunder flats at Colaba heve elso been completed and the quarters for the General Officer Commandthe quarters or ne venera univer command-ing, Bombay District, et Colaba, are under construction The Bombay Military Lande Scheme is in charge of a Board of Control, consis-ing of the Director of Development and the Gene-ral Officer Commanding, Bombay District The Audit and Accounts Officer, Bombay Develop-Supplies.—As regards materials, arrangements have been made with a group of Indian Companies for the supply of all the cement likely to be required by the Development Directorate for 10 years, the local bodies in Bombay Maving an option of participating, if they with lawing an option of participating, if they with lawing an option of participating, if they with a voice of the Military Scheme The transfer of the Military Scheme The constructed at Mumbrs, the principal source and supply of sand and shingle A suitarbelled defending plant for getting shingle and as and from the fiver both has been obtained and is now warking at Mimbrs. A contract of the Development Directorate, has work to supply for disposal, it is handed over hy the north warking at Mimbrs. A contract of the Development Directorate and the Development Directorate, has work to do so Additional shalingle A suitarbelled and the suitarbelled and the property of the supply of the property of th

# The Indian Ports

The administration of the affairs of the total expenditure, respectively, of all the chief larger ports (Oslessies, Bombey, Madres, Esracht, Indian ports during the year 1918-19, the latest Respect and Oslidgones) is vested by law to port to the purpose. They have wide powers, but their proceedings are studied in the purpose of the port of the purpose of the port of the purpose of the port of the purpose of Except in Calcutta, the slocted members are fewer in number than the nominated members at all the ports the European members con-stitute the majority and the Board for Rangoon consists mainly of European members

The income, expenditure and capital debt, according to the latest figures obtainable from the Department of Statistics (India) of the five principal ports managed by Trusts (Aden is excluded from the tables) are shown in the following table -

_	Income	Expendi- ture	Capital Debt.
	f	4	2
Calcutta	1,270,568	1,227,628	6,852,080
Bombay	1,811,202	1,242,194	10,817,716
Karachi	871,412	881,848	1,717,408
Madras	191,463	184,529	907,510
Rangoon	348,481	288,727	1,990,800

In the Department of Statistics. India, the collowing reduces have been compiled, showing the ratios borne by the income and the expenditure of each port to the total income and the comparisons up to date on the lines of diture of each port to the total income and the

-	Income per cent.	Expenditure per cent.

# VIZAGAPATAM HARBOUR PROJECT

The question of the creation of a harbour at imagestam, to supply an outlet for a large area fertile country lithertous understoped and with the still table access to the outside world, was stelly brought to the fore through a report to of the Castern Ghata, is formed by nature to be the outlet stelly brought to the fore through a report to of the Castern Profitors, from which a convisagapatam, to supply an outlet for a large area of fertile country hitherto unde veloped and with or serials country intertoo more representation out suitable access to the cottaid world, was lately brought to the fore through a report to the Bengal-Naspour Rallway Company by their consulting engineers, Sir John Wolfe Barry, Lyster and Partners This report, which was based on personal inspection, uphodd the practice. based on Persuant improved, update are present cost, an inland harbour to which scoses would be maintained by two breakwaters projecting into the sea, and by dredging a channel to the depth (10 the first instance) of 24 feet A depth (lo the first instance) of 24 feet A doep-water quay would be provided, 1,600 feet in iongth, with a possibility of copplying forther made in this report were carefully gone into at site by representatives both of the Gonstille, Englisheer and of the Bengal Nappur Railway and wurking plans have been prepared so that there might be no delay in starting work when funds became available for the purpose

"The Government of India have now under their consideration the scheme for the construction of the harbour and the method of financing and controlling the work That the creation of such a port would have a beneficial influence on the development of financing and controlling the work That the creation of such a port would have a boneficial infiguree on the development of a large area in East Central India seems un-

of the Cotral Frovinces, from which a con-aidorable amount of trade has taken this roote in the past, even with the imperior-communications hitherto available A neces-sary complement of the scheme would be the construction of the proposed railway by Farvati puram to Enipur, which with its existing constitution the Enipal Raipur Selfrary, would constitute the Enipal Raipur Selfrary, would coast line of the Bengal Naspur Ballway, would make a large and rich area tributary to the proposed port, and obvisto the long and expensive circuit by Cakouta. A line would also be sopplied to the most direct route to Rangoon and a provided a state of a fact from the state of a fortified port on the long and almost un protected strotch of coast between Colombo and Calcutta is held to be a consideration of a fortified port on the long and almost un great importance. The lotty projecting nead-land of the Dopplin's Nose would, it is pointed for protecting the antisance to the Port from the effects of south and south-westerly gates. The Government of India have under their

The Government of India have noder their

# Education.

Indian oducation is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a binned based on an initial error easily avoided, to another it stands out as a symbol of sincertiy and bonest endes vori on the part of a far-signed race of rulers whose meants and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bother and the subject of 
The Introduction of Western Learning In the earth days of its dominion in India, the Rast India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East His policy was to enable the ancient learning to revive and fourths major the protection of a subject of the laws and interactive as little property of the laws and interactive as little property of the laws of the interaction of a label property of the laws of the interduction and promotion of a knowledge of the sciences was in terpreted as a scheme for the encouragement of Bankirit and Arabio. In the following year the Court of Directors instructed the Governor General to leave the Hindus "to the practice of change, long established among them, of giving instant of the court of the

It was from sources other than Government that the desire for western knowledge arose in India In 1816, David Hare, an English waschmaker in Calcritz, Joined hands withten the State of th

that a taste for English had been widely disseminated and that independent achievable son
ducted by young men reared in the Elanis dislege, were springing up in every discusses. In
Bombay, the Elphinstone Insultations was
founded in memory of the grade select
who left India in 1887. A feel more
renartable inmorations was made in 1886 by
Gollege, whose objects was to teach." Sing plantiples and practice of medical science in strict
accordance with the mode adopted in Europe."
Many pronounced the fallure of the undertaking
to be inevitable, for, under the Hindu custom
the higher castes were forbidden to touch the
dead This obstable was surmounted by Ma
dansidan Gupta who, with a few courageous
form that it is no contract in the courage of the

Another impetus to the introduction of western learning was the devotion of Christian missionaries. The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilbertiree, intreased action also in India. Carey, Marnhann and Ward opened the first natural spirit of the spirit

Lord W Bentinck's minute of 1835 (based upon Macsus'y famous minute) marks the somewhat tearly acceptance by Government of the new policy Government of the new policy Government then determined, while observing a neutrality in religious matters of secondary schools and colleges of western learning to be taught through the medium of secondary schools and colleges of western learning to be taught through the medium of secondary schools and colleges of western learning to be taught through the medium of secondary schools and colleges of the secondary in the secondary schools and the form of the western the freedom of the press was established in 1835. English was substituted for Perstan as the language of the Courts in 1837 and in 1848 fir Henry Hardings critished that preference to those who had recovered a western extension. In the following decade the new learning took firm root in India and, though the Mushamma dans still held aloof, the demand for English schools contactypod the means of Government for the secondary of the se

# GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854 Perhaps its most notable feature was to the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country. For this purpose Departments of Public Instructions were created on lines which do not differ very materially from the Departments of the present day The despatch also broke away from the practice followed since 1835 whereby most of the available publle funds had been expended upon a few Govern ment schools and colleges, and instituted a policy of grants-in aid to private institutions "Such asystem as this, placed in all the degrees under efficient inspection, beginning from the bumblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but eteady ex tension of its benefits to all classes of people' tension of its benefits to all classes of people'.

Another feature of the despetch was an online of a university system which resulted in the foundation of the Universities of Calcutta, for the control of the Universities of Calcutta, affidialing type of university then become the private of the Indian education system. It has undoubtedly been of value in several ways to enable dovernment to select recruits for its service on an impartial basis, it did much, through the sagency of its Colleges to divide the control of the co education, and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scho lars, but corporations of administrators they did not deal directly with the training of men, but with the examination of candidates, they were not concerned with learning, except in so far as learning can be tested by examination The colleges were fettered by examination re quirements and by uniform courses, their teachers were denied that freedom which teachers should enjoy, and their students were encouraged not to value training for its own sake but as a means for obtaining or las own qualifications. In certain important respects the recommendations in the despatch were not followed The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions. tions, they recommended the establishment of university chairs for advanced study They were aware of the dangers of a too literary course of instruction, they hoped that the system of education would rouse the people of India to develop "the vast resources of their country

and gradually, but certainly, confer a pon-them all the advantages which accompany the healthy learness of wealth and commency. The enobstragement of the grant-h-aid system was

advocated to an even greater extension of Refreshing Commission of 1888, which the policy of withdrawing higher education in the control of Government within certain limits and of stimulating private effort in theory the docision was correct, but in practice it was irrotrievably wrong In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay And, in the course of time, an unworkable system of dual control grew np, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions There can be little wonder that, under such a system of neglect and short-sight-edness, et ils crept in which are now being re-moved gradually by the establishment of Inda-pendent Boards of Intermediate Education charged with the administration of the bigh school and intermediate stages of education

## The Reforms of 1902 4

In 1902, the Universities Commission and appointed by Lord Ourson Stovernment, as appointed by Lord Ourson Stovernment, and wertilize Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent. of the ordinary members of the Senates and to approve the election of the remainder the Gov erament retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the sanction. The universities were given the seponalbully of granting recognition to schools and of inspecting all schools and colleges. Each of the second sec their scope was in practice limited to post-graduate work and research. The terrisorial limits of each university were defined, so that universities were precluded from any connex-tor with institutions lying ontaid these beundaries Neither the Commission nor the Gov-vernment discussed the fundamental problems vernment discussed the fundamental problems of university organisation, but deat only with the immediate difficulties of the Indian system They did not inquire whether the amiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the properties of the control of the contro

# Recent Developments.

Since the passing of the Universities Act of 1904, there has been a considerable expansion of the educational system. The two tables given below afford metral comparisons with previous years and serve to illustrate the growth and expansion of education in India

The following table provides an interesting and valuable comment on the state of education

In 1923-29 the total expenditure on edu-cation amounted to Rs. 18,54,77,181, of which states amounted to Rs. 18,54,77,181, of which states and the states of the states o in will be seen that over 76 per cent. of these are in the lower primary stage, and it may be safely deducted that over 50 per cent. of these are in the lower primary stage, and it may be safely deducted that over 50 per cent. of these architectures of the safely seen total number of pupils at school is not a safe criterion of the state of education, and a sounder stated and deconnection would be that number standard of comparison would be that number multiplied by the average period agent at school

Primary Education.—The primary achoois not lucinde scholars reading in the primary are mainly under the direction of the local classes of secondary schools). The total direct locards and municipatities in 1911 the late type of the first primary schools, during the Mr G K Gokhale pleaded in the Imperial reading to the first primary schools, during the great 1922-23, assumed to Es 6,58,68,723. compulsory primary education but Government was unable to accept the proposal mainly for financial reasons. In recent years, seven pro-vincial legislatures have passed Primary Fduca tion Acts authorising the introduction of compulsory education by local option Rombay led the way in this matter by a private Bill which was passed into law in February 1913 Tho other private Bills which followed were those of Bhar and Orlesa passed in Fobruary ones of binar and Orless passed in Fobruary 1919, of Rengal passed in May 1919 and of the United Provinces, passed in June 1919 of the Government measures, the Punjab Act was passed in April 1919, the Contral Provinces Act in May 1920 and the Madres Act in December 1929 The City of Bombay Primary Education Act of 1920 extends generally the provisione of the 1918 Act to the Bombay Corporation also enabling it to introduce free compulsory education ward by ward Not content with this, the Bombay legislature passed a now Act in 1923 to provide for compulsors elementary education and to make better provision for the management and control of primary education in the Bombay Presidency The Bombay and the United Provinces Acts apply only to nunlipalities, the Bongal Primary Education Act applies, in the first in-tance, to municipalities. but is capable of extension to rural areas Boys only are included within the scope of the Punjab, Biliar and Orissa and Bengal Acts, while the Central Provinces Act ie capable of extension to girls and the remaining Acts are applicable to both sexes All the Acts are drafted on very similar lines. It a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compnision in any part of the area under its control, it may then enbmit to Government for approval, a scheme to give effect to its decision. The scheme much be within the means of the local body to carry The scheme must out with reasonable financial assistance from Government Ordinarily the age limits of compulsion are from six to ten years though provi-sion is made for prolonging the period Pro-vision is also made in all the Acts for the exemption of particular classes and communities and for special exemption from attendance in cases of bodily infirmity Walking distance to a rebool is generally defined as one mile from the child's bome. The employment of children, who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order The Acts generally provide that, subject to the sanction of the local lovernment, education where compulsory hall be free 8nch in brief are the ordinary shall be free provisions of the various provincial Education Acts Local bodies bave not bowever shewn as yet any great alacrity in availing themselves of the opportunity afforded them by these Acts The poverty of focal bodies le usually the came assigned to their diffidence to introduce compulsory education to any appreciable extent

Secondary and High School Education The policy of Government is to maintain a small number of bigh schools (roughly one for each revenue district) which are to be regarded each revenue districtly which are to be regarded as models for private enterprise, and to add proposed to the proposed proposed to the proposed proposed to the proposed propo tion in these schools The Commission of 1882 enguested that there should be two sides in secondary schools, 'one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non literary pursuits "
Some years later, what were called B and C
classes were started in some schools in Bengal, but, as they did not lead to a university course, they have not been successful. In more recent cars, the Government of India have advocated the institution of a school final aver advocated the institution of a school final examination in which the more practical subjects may be included Efforta have also been made to improve the conduct of the maximulation and to omphasise the importance of oral tests and of echool records In Madras, this examination, which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbrons and certain modifications were made in the United Provinces, only the better schools were privileged to Prepare for the School were privileged to prepare for the School Final Examination so that better results were achieved in the Punjab and in Bombey, the school leaving examination is conducted by Boards But the main, difficulty has not yet been touched The University which recognizes the schools has no money where with to improve them and the Department of Public Instruction, which allots the Government Public instruction, which allots the Government grants, has no responsibility for the recognition of schools, and no connexton whatever with the private unaided schools a This dual authority and this division of responsibility have had unhappy effects The standard of the schools also here yet low so that the matter calletes are often more than the control of the control of the schools and the schools also have been supported by the schools also also seen that the matter calletes are often as the school of the schoo lege conress In some provinces the standard of the schools bas been raised by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State

There are schools for Europeans and Angio-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simila to consider the matter. The difficulty is that European Schools are very remote from the general sys-tem of education in India.

On the 31st March 1913, there were 612,016

On the 31st March 1913, there were 612,016

Primery schools in British India containing defended as a medium of instruction in public schools (the latter figure does schools was discussed by a representative con-

The foregoing statement mentions the uni versities incorporated by law for the time being versities incorporated by law for the time nems in force. The first University in India, that of Calcutta, was founded in 1857. Between 1867 and 1887 four new Universities, at Bombay, Madras, Lahore and Allahabad were added these dree universities were all of the affiliat These dree universities were all of the affiliat these drees universities were all of the affiliat the second of the seco and bound together by a legally constituted central organisation, which determined the qualifications for admission, prescribed the central organisation, which determined the qualifications for admission, prescribed the courses of study, conducted the examinations and exercised a mild form of control over the affiliated colleges There was nothing under the system to limit the number of institutions affiliated to a University, and for thirty years, i.e., from 1887 to 1917, the growing demand for university education was niet, not by the creation of new nuiversities, but by enlarging the alse of the constituent colleges and by increasing their number By 1917 this inflation had been carried on so far that the composition of the original five universities stood as follows -

University	Colleges	Scholars
Calcutta	58	28 618
Bombay	17	8,001
Madras	53	10,216
Punjab Allahahad	24	6 658
Allahabad	33	7,807

It had become obvious that further expansion on the same lines was no longer possible without a serious loss of efficiency and the Govt of India had recognized in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the exist ing affiliating universities The develop-ment of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the

proposal as to the lines to be followed in univer sity reform A detailed account of the old and new Universities is given below

The Universities of Calcutta, Bombay and the Punjab -These three Universities alone still retain their old form, as measures for their reorganisation are still under considera-tion. On the 27th March 1921 an amending Act was passed by which the Governor General ceased to be the Chancellor of the Calcutta University and now the head of the provincial government is the Chancellor of each of the older nniversities The Vice-Chancellor is nominated by the Government concerned The executive body is the Syndicate which is now organised so as tolinclude a larger educational element. Over this body the Vice-Chancellor presides, all other members being elected by the Faculties, except the Director of Public Instruction who is a member ex-office. The secretarial work is under the direction of the Registrar The legislative body is the Senate which consists of from 75 to 100 members, 80 per cent of whom are nominated by the Chancellor, the rest being elected by the Senate, or by its Faculties, or by the body of registered graduates. The Senate s divided into Faculties, which are in most cases those of arts, science, iaw, medicine, and engineering There is an oriental faculty in the Punjab University alone There are also Boards of Studies, whose duties are to recommend textbooks or books which represent the standard of knowledge required in the various examinations The newer universities differ considerably from the older universities in constitution

Apart from the general tightening up of uni versity control over its colleges, the chief fea ture of university development since the passing of the Act of 1904 has been participation by the universities in post-graduate teaching and research in Madras a small number of university professors have been appointed in the Punjab the services of a certain number been strongly advocated by the Calcutta Universe post-graduate students students and other than the control of 
notable advance has been made in Calcutta, owing to the energy of the late Sir Amstehl Mookerjee and to the liberality of Sir Tarak Nath Pallt and of Sir Rash Behari Ghosh In 1916, a committee was appointed to investigate the matter In accordance with its report, new regulations have been passed by the Senate, whereby all post graduate teaching and research in arts and science in Calcutta is now conducted directly by the University, though many of the college teachers have been invited to take part in the work Post-graduate connells in arts and science have also been constituted, which comprise all the teachers engaged in the work and a very small number of edditional numbers appointed by the Senate

The University of Madras - This is one of the older universities. It has recently been reconstituted. The reconstituted University while functioning as teaching and residential University in so far as the city of Madras is concerned, continues to exercise its jurisdiction over its mofussil colleges which remain affi listed toit Theadministretion of the University is in the heads of a Senate which has been so constituted as to include both those who are ducationists and those who are connected with the actual husiness end commercial life large elective element has been introduced in its composition Government control over the details of edministration has been decentre Tho affairs of the University ere managed by the Benate through a body called the Syndicate while the Acedemic Council, enother now body, has charge of the scademic matters. The affiliated colleges bave been entrusted to the care of a new organization called the Council of Affiliated Colleges. In accordance with the recommendations of the Calcutta University Commission, the Intermediate Franciation Certificate has been mede the admission test to the courses of the University The Governor General of India has been associated with the University as its Visitor with certain emergency powers The Governor of Madras continues as thancellor The Vice Chancellor is an elected whole time utilicer

The University of Allahahad - This is another old University which has undergone In 1921 an Act was passed with reorganisation a view to establishing a unitary, teaching and residential University at Allahabad while enabl ing the University to continue to exempe due control over the quelity and character of the teaching given in its name by colleges affiliated to the University at Allahabad The Governor Chersi is Vintor, and the Governor of the United Provinces Chanceller The Price Chan cellor is a whole time officer There is a Court, an Lieculite Council, en Academic Council a Committee of Reference dealing with expendi ture only, a Council of Assorated Colleges, &c

The Mysore University was constituted under Regulation V of 1916, for the better under Regulation v of 1919, for the better encouragement end organisation of education in the Stete His Highness the Meharaja is the Chencellor Tho University is very aimi lar in its constitution to the older Indian uni

It departs from existing practice by centralsing university instruction in Mysore and Bangalore, and by conducting the work of the first year of the old college course in a few specially select-chigh schools. This University has been re-cognised by the Government of India as as University incorporated by law for the time feing inforce, that is to say its examinations and degrees have been accorded the status of the corresponding exeminations and degrees of a Univer ity incorporated by law in British India

The Patna University -- Much thought has also been given to the evolution of a new also been given to the evolution of a new type of nilversity which will run abrust of tic old Patra university, which was constituted in 1917, is in most of its features a university of the old type, but certain invovations have been made. The Chancellor, who is the Governor of the province, may annul may proceeding of the University which is not in conformity with the Act and the Englishment of the Change of the Chang Fellows and the categories of electing bodies; and the Senate includes representatives of the teaching staff and of the graduate feachers of recognised achools Further all colleges are given statutory representation on the Sepate in the persons of their principals. The Syndicate is the ultimete authority in academic matters, aubject to the provise that any six of its memsuppect to the provise that any six of its members have the power to refer such matters to the Senate for review The Vice-Chancellor is a paid officer and is appointed by the local Government. In addition to other duties, he has the power to inspect all colleges of the Unit versity The colleges effliated to the University are of two kinds, colleges of the University whose buildings are situated within a specified area, and external colleges whose inidings are situated in one of the four following towns Muzuflarpur, Bhagalpur, Cuttack and Basaribegh.

The Osmania University, Hyderabad— The Osmania University was established under, a Charter promulgated with a Firman of His knalted Highness the Nizam, dated the 22nd September 1913 The fundamental principle underlying the working of the University is that Urdn forms the medium of education, aithough a knowledge of English as a language is compulsory in the case of all students is a Bureau of Translation attached to the is a Bureau of Translation statement to the University with produces text books required for college classes. The constitution of the University consists of a Council, a Senate, a Syndicate, Faculties end Boarde of Studies. There is a Chancolor and a Vice-thanellor, both refigient officers. The executive government of the University including general superment of the University including general supervision and control over colleges is vested in the Council which is the bighest authority and which performs the function assigned to Government in the case of British Indian Universities The University possesses at present only one constituent college, viz, the Oemania University Col lege, which wes opened in 1919 The Osmania University has been recognised by the Govern-ment of India as a University incorporated by versities, baving a Scoate of not less than fifty and not more than sixty members, but, nalike last of indicate as University incorporated by and not more than sixty members, but, nalike last of the less of the sixty of the constraint of the sixty of the corresponding to the sixty of the corresponding constraints. The sixty of the corresponding examinations and degrees have been accorded spate to the university professors or of spin, in status of the corresponding examinations.

The Hindu University Benares —The creation of the Hindu University, Benares, forms a landmark in the history of the Indian university system. The university is not designed to meet the needs of one province alone, but to draw students from all parts of

It has no monopoly, no privilege Its energies are not diffused by the necessity of super vising distant colleges nor is its vitality impaired by the embarrassment of administrative duties other than those of organising its own teaching it is therefore the first Indian university which is primarily a seat of learning and not an admit nistrative organisation Its constitution is therefore very different from those of the other therefore Very different from those of the other indian universities. A dividing line is made between administrative matters, entrusted in a large body called the Sourt, with an executive committee called the Council, and cademic matters, entrusted primarily to a Senate, with an executive body called the Syndicato. The Contr. which is the supreme governing body. besides its administrative powers, has the right to review the sets of the Senate, except where the Senate has acted in accordance with the Act statutes and regulations With a solitary exception it is composed entirely of Hindre in esenate has the entire charge of the organisa tion of instruction in the University and the colleges the courses of study, and the examina tion and disciplice of students end the confer ment of ordinary and honorary degrees university can recognise schools all nver India

The University of Dacca—With the modification of the Partition of Ben gai in 1911, Dacca ceased to be the capital of the separate province of Rastorn Bengal and Assam Shortly afterwards, the Government of India decided to establish a ninversity of Dacca and the Government of Bongal appointed a committee to frame a scheme for the new University The committee was instructed that the University should be of the teaching and residential and not of the federal type, and that it should be a self contained organism unconcected with any colleges outside tho limits of the city of Dacca fhe committee which was presided over by the late Mr R (after wards 81 Robert) Nathan presented its report later in the year The report is of great value and in it certain new principles are enunciated fireat emphasis was attached to physical train ing and education and also to the tutorial guid ance of the students The University was to be ance of the students— The University was to be very largely a State institution, and practically all its teachers and those of its colleges were to be Government servants. Though the colleges were to be government servants. leges were to be separate units, each with its separate staff end buildings, they were to be linked together and with the University by a close form of co-operation. The executive body, to be called the Council, was to have very body, to be called the Council, was to have very considerable powers, subject to the sanction of Government. The Council, which was to be the sanction of Government. The Council, which was to be the sanction of Government, and in other respects of the council of the sanction of the san catimated at 58 lakhs, but deducting certain variety.

and degrees of a University established by law in British India
Tas Rindu University Benares —The craction of the Hindu University, Benares, the Benares of the Hindu University, Benares, the state of the Hindu University, Benares, the state of the Benares, the Benares the Benares, the Benares, the Benares the Benares the Benares the Benares the Benares t ouse a sauction) could be taken in hand, the war brinks out. The Act constituting the Uni-versity was passed in April 1920 and Mr P J Hartog, O'l B, was appointed the first Vice Chancellor.

The Aligarh Muslim University— It was the aim of Sir Syed Ahmed Khan years ayn in place the benefits of a liberal edu cation within the reach of the Muhammadan community, and in 1875 a school was opened which three years later wes converted into the Muhammadan Anglo-Oriental College, Aligarh The movement in favour of transforming this chilege into a teaching and residential university farted, es early as the end of the last century in 1911 during the visit of His Majesty the king Emperor to India 11is Highness the Aga Khan mede an appeal which resuited in the collection of large subscriptions A draft constitution wes drawn up and a consults tite committee was formed But the draft constitution was not approved by the Secretary of State and on the question of the right of affiliating colleges outside Allgarh in particular, there was a sharp difference of opinion Government laid down, as in the of opinion Government laid down, as in the sity should not tave the power of amiliating Moslem institutions in other parts of India

On October 15th, 1915 a meeting of the Mosor October 10th, 1915 a meeting of the Rose lem University Association was hold at All-garh, under the presidency of the Rais of Mah-nndabad, when it was proposed that the meet-ing recommends the Moslem University Foun-dation Committee the acceptance of the Moslem University on the lines of the Hindu University It was evident at the meeting that a large number of Indian Moslems were not prepared to accept a constitution for their naiver-sity similar to that of the Hindu University

In April, 1917, at a meeting of the Foundstion Committee the following resolution was passed.-

" That this meeting of the Moslem University Foundation Committee hereby resolves with reference to the letter of the Government of indis, Education Department, dated Dilli, 17th February 1917, D O Nn 66, that the Committee is prepared to accept the best University on the lines of the Hindu University It further authorises the Regulation Committee appointed at its Lucknow meeting, with the President and Honorary Secretary of the Moslem University Association as its ex-officio members, to take necessary steps in consulta-tion with the Hon the Education Member for the introduction of the Moslem University Bill in the Imperial Legislative Council

The University of Rangoon.—Plans for a university in Burma had been under consider ation for some years. After his arrival in Burma the then Lieutenant Governor Sir Harcourt Butler thought that, on general grounds and with some reference to the needs of the province, the Rangoon University might naefully be of a more practical type than any yet attempted in India with courses in arts and science, pure and applied, technology, medicino, engineer ing, agriculture, law, forestry veterinary, science and training, commerce and architecture. It might perhaps combine with university instruc-tion practical studies at the Chief Conrt, the Pasteur Institute and the hospitals, and also at the Maseum which the local Government was committed to build as soon as funds were was committed to could as soon as indus were available it is possible in Burna to a greater extent than in any of the older and more advanced provinces in India to concentrate the intellectual energies of the province in one immediate neighbourhood and to develop a really many sided university. An Act to establish a teaching and residential college at Rangoon was passed on the 24th October 1920 Thie Act however did not find favour with a section of Burmese and was consequently amended in 1923 The amending Act introduced greater popular end representative elements in the com position of the Council and invested the reformed council with greater discretionary powers in metters affecting public interest, such as the question of admitting affiliation of mofused question or samitting ampairon of montant colleges or of admitting more colleges to the status of constituent colleges in short, it rendered the University more suited to the needs and septections of the province The University anthorities are the Chanceller Vice Chancellor, the Council (with an executive committee) and the Senate The Council is the supreme administrative body while the Senate is an academic body with entire control of studies, examination and discipline The Governor General, as Visitor, has the right to cause inspection to be made founds

The Lucknow University - The tion of this University may primerly be ascribed to the patriotism of the people of Outh It is a unitary teaching and residential University incorporated by a primer product of the property of the property of the product of the pro incorporated by an Act passed in 1920 The University authorities are (1) the Court, with powers of making statutes, (2) the Executive council which administers the property of the Council whith administers are property to early a large purpose of the places which contains the places and appoints examiners, (v) the Naguru and in other places which contain Acad mic Council which controls the backing colleges admitted to the privileges of the Unit and advises the Evecutive Council on all seades—verity. The Act is so framed as to permit mic matters, (4) a Committee of Reference (3 Sub-Committee of the Court) deals with items of new expenditure only The Governor there is a Visitor has the same power as in the use of the Rangoon University and other new,

or reorganised, universities

The Beili University -The Delhi University was created by an Act passed in 1922. The University depends for its existence mainly on the generosity of the Government of India who eccupy the position of a local Govern ment in rejation to it It is a unitary teaching and residential University, designed on the model recommended by the Calcutta University Commission for the Dacca University, powers Commission for the Dacca University, possessing at present three constituent colleges The Act provides for two admens—a provincia and which is in force at present, the constituent colleges remain with their needs, etc., in their criting buildings. They also retain interme diate classes. But there have been instituted to the constituent of the constituen for graduate teaching The matriculation examination of an Indian University or an equivalent examination, is the admission test to the University courses. The permanent scheme contemplates that the existing colleges in Delhi City would become intermediate institutions and that degree classes would be conducted in new huildings to be built in Imperial Delhi Thore would be halls and hostels where studente would receive tutorisi instruction. The Inter-mediate Examination of an Indian University inotitie Examination of on indian University or an equivalent examination, would become the admission test to the University The Governor-Genoral is the ex-office Chancellor There is a Pro-Chancellor, a Vice Chancellor and a Rector The principal governing bodies of the University are a Court, an Executive Council and an Academic Council

The Nagpur University—This University was created by an Act passed in 1923 Its constitution follows the recommendations of the Calcutta University Commission and the provisions in other University Acts in so far as they are applicable to local conditions In particular the recommendations of the Cal In particular the recommendations or the the cutal University Commission have been adopted in the matter of the appointment of the Chan cellor and the Vice-Chancellor and of their powers and duties, the composition and functions of the Court the Executive and Academic Councile, and the relations of the University with Government The University Act provides in the first instance for a University of an examining and affiliating type in which the oristones of the colleges is preserved as the unit of instruction both in the University centre of of a gradual dovelopment of the University into of a gradual development of the entremaint into a managing and teaching body which may supplement, or entirely replace collegiate by University instruction either by taking over the management of existing colleges or by insti tuting and maintaining its own colleges

The following statement mentions the normal admission tests to the various Indian Uni versities -

Name of University	Tests	Remarks
1 CALCUTTA	The Matriculation Examination of the Calcutta University	
2 Madras	The School-leaving Certificate Examina- tion of Madras at present ultimately an Intermediate Examination.

There is still a leeway to be made good. All the influences which operate against the apread of education amongst the boys are reinforced in the case of women by the purdah system and the custom of early marriage.

Arts colleges, medical colleges, and the like damit students of both serces, and a rew gris attend them The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreemati Course for medical students. The Shreemati University was started some ulus years ago by Professor Earve. It is a private institution and is doing good pioneer work. So far it has granted only 15 degrees, and there are only 30 sides presecuting higher studies at the sfillisted of the recognised high schools is said to be about 700.

Education in the Army—The Army in India undertakes the responsibility of the education of certain sections of the community like activities are directed into various channels with certain definite objects, which may be summarise an as follows.—

(i) The education of the soldier, British and Indian, in order to —

(s) develop bis training faculties,

(b) improve bim as a sobject for military training and as a citizen of the Empire,

(c) enhance the prospects of remocera tive employment on his return to civil life

((f) The fulfilment of the obligations of the State to the children of soldiers, serving and cx service (British and Indiao)

(M) lbe provision, as far as possible, of training for the children of soldiers, who have died in the service of their country

(49) The creation of a body of Indiao geotlemen educated according to English public school traditions, which should provide suitable can didates for admission to the Boyai Military College, Sandhurst

Administration — The educational services are divided into (a) the Indian Educational Service, (b) the Provincial Educational Service, (c) the Subordinate Educational Service

(a) The Indian Educational Service which comprises officers performing inspection and tutorial work, is subdivided into two branches—oue for men and the other for women Appointments to both branches are made by all officers belonging to this service come under the apecial teave and peusion rules The tuture of this service is under consideration as a result of the recommendation made by a Royal Commission on the superior CVII services Indian

Commission Language and Commission Language and Commission Language and Language an

In selecting candidates for appointment to the IES (Men s Branch), experience in teaching is regarded as indispensible, and weight is gived to the possession of (a) a university degree in honours, or equivalent distination, and (b) qualifications in special embjects depending on the nature of the veacocies to be flided

(4) Indian Educational Service (Women's Branch)—The organisation and conditions of service are similar to those to the Min's Branch—The pay is Ba 400-25-550 a month with severion grade of Ba 500-25 500 a month with severion grade of Ba 500-25 500 a month of the service of the service of the service of the service of the pay amail, one member of the service is eligible for estection grade post irrespective of the por centage maximum Officers of on Todian donicide are to addition granted a uniform overceas pay of Ba 50 a month. The priocipalis in the property of the pay of Ba 50 a month of the property of the pay of Ba 50 a month of the pay Directresses of Public Instruction are eligible for a duty slowance of Re 100 a month

In selecting candidates for appointment to the I b 8 (Womeo & Branch), experience in teaching is regarded as indispensable, and weight is given to the possession of (a) high neademic qualifications, and (b) qualifications in special subjects depending on the nature of the vacancies to be filled

(b) The Provincial Educational Service— The service also consists of two brauches, one intended for men and the other for woman. The service comprises posts more or less similar to those boroe on the cadre of the Indian Educational Service, but of secondary importance tanddates are recruited in India by local Govornments. They are invariably gruduates of Indian universities and natives of the province concerned.

(i) Provincial Educational Service (Men's Branch)—The minimum and maximum pay has been fixed at Rs. 250 and Rs. 800 a month respectively, and local Governments have been smpowered to settle grading within these limits.

(v) Provincial Educational Service (Women a Branch) —The minimum pay is the 200 a month and the maximum pay Rs 500 a month As in the case of the Men s Branch local Government are competent to fix grading within these figures

(c) The Subordinate Educational Service
—This service is meant for posts of minor importance Each province has its own rate of pay For example, in the Pusish the maximum pay of S.E. 8 officers is Re. 250 a month,

Department of Education, Heatith and lands of the Government of India—in 1910 a Department of Reseation was established in the Government of India at the Constant of India an office of its own and a Member to represent it in the Executive Council The first Member was Bit Harcourt Butler in 1928, the activities of the Department were widened, in the first Department of Revenue and Agriculture The Constant of Revenue and Agriculture The Department has been designated the Department of Education, Health and Jands SIF B N Sarma and Mr J W Bhote are the present Member and Secretary, respectively The Department possesses an educational adviser set of Educational Commissioner 1s Mr J A Bilectory Interest of Educational Commissioner 1s Mr J A Bileflery

Calcuits University Commission —The Report of the Calcutta University Commission was published in August 1919 and in the following January the Government of India Issued a Resolution summarising the main features of the Report and the recommendations of the Commissioners.

The Government of India drew special attention to the following points in the Report —

(f) High schools fall to give that breadth of training which the developments of the country and new avenues of employment

demand

- (ss) The intermediate section of University education should be recognized as part of school education and should be separated from the University organisation
- (iii) The defects of the present system of affiliated colleges may be miligated by the establishment of a strong central teaching body, the incorporation of unifary noisy control of the incorporation of unifary noisy control of the administrative machinery which will admit of fuller representation of local interests, and supervision of different classes of institutions by several annormitative constituted hodies.

The Commission gave detailed suggestions for the reorganisation of the Caluttix University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Decading These measures concerned only Bengal hut at These measures concerned only Bengal hut at the criticisms made by the Commissioners admit of a wider application Committees were consequently appointed by the Universities of Madras, Borniay, Patan and the Paulish to Madras, Borniay, Patan and the Paulish to Madras, Borniay, Patan and the Paulish to University at Succession of the Alphabad University at Lucknow, the second to sensider measures for the reorganisation of the Alphabad University and the creation of a District of the Commission of the Alphabad University and the creation of the Alphabad University and the creation of an excession of control secondary and intermediate education

In Bengal the first outcome of the Commissions Report was the passing of the Dacca University Act in the Imperial Legislative Council in March 1920 mentioned in detail else-

where A scheme for the reorganisation of the Calcutta university is under consideration.

The Referms Act —The Referms Ace of 1919 has altered the conditions of educational administration in India Education is now a dransferred 'abplete in the Governors' provinces and is, in each such Province, under the charge of a Minister There are, however, some exceptions to this new order of things; for education of Europeans is a "Povincial of the Control of Europeans is a "Povincial of the Minister of Education, and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new niversities as may be declared by the Governor-General in Council to be central subjects. The Government of India are also in charge of the Chiofs Colleges and of clears in the Council to the Council of Ceneral in Council for the Dender of the Chiofs Colleges and of the Council Council for the benefit of members of Hie Majesty a Forces or of other rubble servants

Chiefs' Colleges—For the education of the sons and relatives of the Oblefs and Frinces of India, whose families rule over one-third of the Indian continent, five Chiefs' Colleges are maintained. vsz.—

- (f) Mayo College, Ajmer, for Rajputana
- Chiefs.

  (41) Daly College, Indore, for Central India
  Chiefs.
- (iii) Altohison College, Lahore, for Punjab Chiefs,
- (10) Bajkumar College, Hajkote, for Kuthiawar Chiefs, and
- (r) Rajkumar College, Raipur, for Centre Provincee and Biharand Orless Chiefs.

In point of buildings, staffs and organisation three institutions approach English Publis Schools Students are prepared for a diploma examination conducted by the Government of India. The diploma is regarded as equivalent to the matriculation certificate or an Indian University. A further course of University standard called the Higher Diploma is conducted at the Mayo College. The examination for this Injurious is also hold by the dovernment of India. He stendard is roughly equivalent to start the Diploma is conducted as the Bayon of the Control of the Co

Indigenous Education—Of the 8,791,000 scholars being educated in India 612,115 are classed as attending private or 'un recognised institutions Some of these lastitutions are of importance. The Gurdwich near Hard Education of the Company of the Company of the Education of the Ed

These institutions generally have a religious or 'national' asmosphere and are possibly destined to play an important part in the future of India.

The Need — More than sixty per cent of the government suggesting that the formation of vast population of I india subsist on agriculture of o-operative societies afforted an excellent and the majority of these millions gene means for relieving surfar indebtedness. Unathermostation of the control of the co education and consequent lack of fore sight, he has to incur heavy dehts to meet sight, he has to menr neavy dents to meet occasional expenses for current seasonal pur pones, the improvement of his land, or for ceremonial objects, and he has therefore to seek the assistance of the local money leader, known as the Sowkar or the Mahajan Tho rate of interest on such advances, though varying from province to province and even in different parts of a province, is generally very high in addition to charging excessive rates the Sowkar extorts money under various pretexts and takes from the needy borrower bonds on which stamp duties are payable One of the chief causes of the ryots poverty is, that owing to the absence of security and his short-sightedness due to want of education, he does not as a rule collect and lay hy his savings hut fritters away his small carnings in oxtra vagant and unproductive expenditure, on the purchase of trinkets and ornaments, and on marriage and other ceremonies 1 radition says that he hoards coins under the ground with the likelihood that on his death the money is lost likelihood that on his ceath the money is con-to his family for good. This absence of thrift and the habit of dependence, in case of difficulty, in the Government or on the Sowkar are the bane of his lift. There is besides a general ab-sence of ideals or desire for progress. A co-operative society changes all this linearity. operative society changes an this inashutus as it provides him with a suitable institution in which to lay by his savings and teaches him the valuable lesson of self help through the sense of responsibility he feels in heing its member Thus the chronic poverty and indehtedness of the Indian agriculturist afford a very good field for the introduction of co-operative methods, especially as his work is of a productive character likely to enable him to earn a better living under circumstances more favourable than they are at present

Genesis of the Movement—The question of improving rural credit by the establishment of agricultural banks was first taken up in the or agricultural banks was inst taken up in the early nineties when Sir W Wedderburn, with the assistance of the late Mr Ranade, prepared a scheme of agricultural banks which was approved of by Lord Ripon's Government hat was not sanctioned by the Secretary of State The matter was not again taken up nntil about fifteen years later when Lord Wonlock's Government in Madras deputed Mr F A (now Sir Frederick) Nicholson, to report on the advisability of starting agricultural or land banks in the Presidency for the financing of the agricul tural industry There was lu existence in Ma dras an indigenous system of banking available for the person of small means This institution called the Nidhi corresponded in some respects to the provident funds and friendly societies
In Kuropean countries Though these Midhis
Provided these pathlat of agriculturists the in his stad free of charge
spirit of co operation was lacking in them. Sit is stad free of charge

(6) The labelity of a member of a rural resoluted in minimized an axhaustive remort to stockets was to be unfinited.

on the measures to be adopted in future to prevent famines and to protect the ryot from their ravages. The Commission laid stress ob the proper working of the Agriculturists Losns and the Land Improvement Losns Acts under which takari advances are made by Government to cultivators. This system was given a long trial in the years previous to the reat familnes as well as during the years sue cording the 1899 1900 families But it la ack nowh deed on all hands that the system has not been successful in solving the problem of rural stagnation, as it is olear that it is not facility for ohtaining cheap capital alone which will raise the omeaning circle capital aind which will raise with agriculturiet and relieve him from his debts, but the provision of capital combined with the inculcation of habits of thrift and self help This commission also recommended that the principal means of resisting famines was hy strengthening the moral hackbone of the agri-culturist and it expressed its view that the introduction of co operation in rural areas might be useful in securing this end

Co operative Credit Societies Act —Those recommendations induced Lord Curzon to appoint a Committee with Sir Edward Law at its head to investigate the question and a report was submitted to Government recommending that co operative societies were worthy of every encouragement and of a prolonged trial Sir Anthony (now Lord) Macdonell and others were at the same time making experiments on similar lines in the United Provinces and the Punjah with satisfactory results. All these activities, however, took an organized shape only when Lord Curzon's Government Introduced in the Imperial Tegislative Council a Bill to provide for the constitution and control of co operative credit societies. The main provisions of the Bill which became the Co-operative Credit Societies Act (1rt X of 1904) were

(1) That any ten persons ilving in the same village or town or belonging to the same class or easte might be registered as a co-operative society for the encouragement of thrift and self help among the members

(2) The main husiness of a society was to raise funds by deposits from members and loans from non members, flow members and to ansert of the co-operative societies, and to distribute the money thus obtained in loans to members, or with the special permission o. the Registrar, to other co-operative credit societies

(3) The organization and control of cooperative credit societies in every Presidency were put under the charge of a special Govern-ment officer called the Registrar of Co-operative Credit Societies

(6) No dividends were to be paid on the profits of a rural society, but the profits were to be carried at the ead of the year to the reserve und, although whea this fund had grown beyond certain limits fixed under the bye-laws, a bonus might be distributed to the members

(7) In urbsa societies no dividend was payable antil one foarth of the profits in a year were carried to the reserve fund

Soon after the passing of the Act the local Governments in all the Presidencies and analor provinces appoint d Registrars with full powers to organise register, and supervise such ties In the early stages of the working of this Act, Government loans were freely given, and the response to the organished work of the Registrars was gradual and steady throughout most parte of the country

Co-operative Societies' Act —As co-operation progressed is the country defects were noticed in the Co-operative Credit Societies Act and these were brought to the notice of Government by the continues of the Registrars which were for some years held annually Infwa directions the need for improved buildston was especially felt. In the first place the success of credit societies had led to the intro duction of co operative societies for distribu tion and for purposes other than eredit for which no legislative protection could be accured under the then existing law. And secondly, the need for a freer supply of capital and for an improved system of supervision had led to the formation of various coatral agencies to finance and supervise primary credit societies and these central agencles ren all the risks attendant on a status unprotected by high-lation. The Government of India recognising the desirability for removing these defects, declied to amoud the old Art and a Bill embolving the assestial alterations pro posed was introduced la the Imperial Legi lative (ouncil and after a few amendments it concred from the Council as the Co-operative Societies Act (II of 1912) replacing Act A of 1904 The outstanding features of the new Act were as under

(a) It authorised the formation of societies for purposes other than credit, which was possible under the old Act only with the special

(b) It defined, in precise torms the objects for which co-operative societies could be orga alsed

(c) It removed the arbitrary division a more scientific divisios in accordance with

the form of liability adopted
(d) It facilitated the growth of central ageacles by insisting on limited liability by means of a special clause about the registration of a society one of whose members is a registered

of a society one or whose measures—society
(e) it empowered Local Governments to
frame rules and after bye-laws so as to pat
restrictions on the dividends to be declared by
salaction distribution of profits to their members
by unlimited liability societies

(f) It allowed societies with the permission the Registrar to contribute from their act profits, after the reserve fund was provided for, amounts up to 10 per ceat, of their remaining profits to any charitable purpose as defined in the Charitable Endowments' Act (This kept the movement in touch with local life by per mitting societies to lend assistance to local edacational and charitable institutions )

(g) It prohibited the use of the word "eo" operative as part of the title of any business coacern except a registered society

Composition of Capital Agricultural Societies -On the organization of agricultural credit was necessarily concentrated the attention of the promoters, for it presented a far more important and tar mor difficult problem tion urban eredit There was a great variety of types among the agricultural societies started in different provinces, and some Registrars adopted the 'Raifle isea, and some the "Luzzati' methods in their cutirety. Lie commonest type as pre-valling in the Paujab Burma and the United Provinces - and now extended practically all over India- is the unlimited hability society with a fee for membership and a small share capital the share payments to be made in ins talmeats. In some places the byc laws insist tamicals in some parce fit by his members lefter on compulsory deposits from members lefter entiting them to enjoy the full privileges of membership the system in Bombay and the Central Provinces is different there being no of the working capital is raised by deposits from members and other local sympathisers, but the bulk of it in all provinces is obtained but the bulk of it in all provine, sis obtained by loaus from central and other co-operative societies. In all the Presidencies, the Govern meat set apart in the initial stages every year a certain sum to be advanced as loans to newly started co-operative societies, naually up to an amount equal to the deposibs from members raised by a society State ald la the form of direct money doles to apricultural credit societies has now become an exception rather than the rule, and this withdrawal in no way becapers the development of the movement on account of the rapid increase of co-operative financiag ageacles and the growth of public confidence in the possible uader the old Act only with the special permission of the Local Government (This permission of the Local Government (This primary societies Out of a total working categories of the credit marks an important stage in the component in Indian in protein the oblocal of the component in Indian credit marks and important stage in the component of the compone soch the and 9 crores loans from central socic tics The advances taken from Government amounted to a little over 1 crore 16 lakhs being held in Burma by colonization societies and societies lato rural and urban and substituted three lakhs in the Central Provinces and Berar out of a special famine grant In Bombay since 1923 Government place at the disposal of the Provincial Bank au allotment for distri bution as advances to agriculturists under the Land Improvement I cans Act, such advances to be made through primary societies and central banks to which these are affliated

Constitution of Agricultural Credit Societies.—The typical agricultural credit society in India corresponds to the "Balfelsen society , the management being gravintous, the profits indivisible, and the area of work limited.

In the Punjab, the United Provinces and Derma where shares form as integral part of the system, the distribution as dividend of a portion of the profits attact ten year, working is permitted under ordariant controllers, although in the Punjab the tendency naw is to make the profits wholly indivisible and the sometime to distribution and the same non-withdrawable. In parts of the same may be found but many of these are the shares as the close of the controllers as the controllers are non-withdrawable. In parts of the same may be found but many of these are the sharest parts of the same and the same parts of hardly fit enough to undertake the responsible work of a secretary, being practically (gnorant of account keeping. In auch village either the village school-master or the village school master or a single sockety can afford, uneighbouring societies are grouped together with a whole time well paid scoretary As the work of societies develops, the need for trained scoretaries is being felt more keenly, for it is now realized that the function of a secretary does not really With a view to neet the domand for trained scoretaries, training classes have been organized in Bombey in the Pumphs and elseorganized scretaints, training classes have been comparised to Bombay in the Punjab and elsewhere during the last few years and efforts have been made to provide education in cooperation through the new educational and propagandist associations which have heen started in some of the major provinces raugements have also been devised in some provinces to educated the members of mana ging committees in the principles of the move ment through peripatetic instructors and courses of simple lectures delivered at central villages In Burma, the system of guaranteelug

Internal Management of Societies —The managing committee of a society consists of 5 to members, the chairman being usually the 9 members, the chairman being usually the leading person in the village The daily work is carried on hy the secretary, but the managing committee supervises this and has alone the power to admit new members, to receive deposita, to arrange for outside loans, to grant loans to members and to take usoles of defaulters. The practice is now. growing of fixing the normal credit of every member once or twice in the year at a general meeting and the committee can sanction loans only within the limits so fixed The accounts meeting and the committee can sanction tosses only within the limits so fixed. The accounts resonant properties of the society are kept by the secretary and presented, meeting within the limits so fixed. The accounts resonant presented, meeting within the limits of sixed in the secretary and presented, meeting within the limits of sixed in the society and presented, meeting within the limits of sixed in the legistrar's of once to simplify the work of the secretary. The books are kept according to the rules framed by the Local Governments and are open to inspection by the limits of the secretary secretary and the secretary secretar

committees with the chairmen and secretaries are elected. The general meeting fixes in some provinces the borrowing limit of individual members, lays down the maximum amount up to which the maneling committee may borrow during the ensuing year, dismisses members for misconduct or serious default, and settles the rates of interest for motivation of society are annually carried to the reserve fund, which is individuely defined to the reserve fund, which is individuely defined to the reserve cannot be drawn now without the sanction cannot be drawn now without the sanction cannot be drawn upon without the sanction of the Registrar, and which must be luvested in such a manner as the rules framed under the Act may prescribe It is intended to meet unforescen losses and to serve as an asset or security in borrowings Except in the Central Provinces and Madras, iu and to some extent in a few other provinces the reserve funds of primary societies are generally utilised as an addition to their working capital except when they have considerable outside deposits and have to mak special arrangements in respect of field resource to cover such horrowings

Main defects .- The main defects of primary unions has been very successful in promoting societies may be summarized. The most pro-co-operative education among rural workers miteent is the evil of unpunctuality. This is due more to easy going ways of life and the narrow uess of margin between income and expenditure lmore to easy going we's us income and expenditure than to recalcularly. Nort is the frequency than to recalcularly. Nort is the frequency control of the committee and the committee transfers its powers to the obstimant, sorretary or some other member. Then there is the objectionally practice of making book adjustments and taking bonars tonus A grave control of the control of th been started in the Punjah, and may be found Burma, npen current accounts, grant cash necessary in other Provinces where large ordites and overdrafts and issue or discount amounts are required by agriculturists on the local bills of orthange. These give promise security of their landed property A similar of developing a truly non-capitalist system proposal has already been motored in Madras of banking run for the people and by the peo-where the Local Government have agreed to ple, providing for the person of small messas other half is raised locally in the capital providing for the person of small messas other half is raised locally in the capital providing for the person of small messas other half is raised locally of the person of small messas other half is raised locally of the person of small messas other half is a small provided in the capital providing the providing and the providing the provi scheme is the recognition of the land mortgage banks debentures as trustee securities and Government guarantee for payment of interest and the subscription of half the capital in the initial stages. As the bye-laws in many pro-vinces place a limitation on the amount of igan that can be advanced to an individual and financing agencies are often unable to make long term advances societies cannot be said everywhere to have supplanted the money lender

Non-agricultural Societies,—Non agricultural credit societies have grown np in towns and cities at part of a movement for improving the economic and moral condition of persons engaged in handlerafts and cottage industries, of artisans and small traders, mem industries, or average and amount receive, members of particular castes and employees of hig firms and Government departments fhese societies have manally a limited liability. This is due partly to the absence of any assets in real property among their members, but mainly to the field of their work. not being compact as is the case with agri-cultural societies, where every member may be expected to know every other member constitution is based on the Schulze Delitzsch model In most societies the management is honorary, though sometimes, when the sphere of a society's work is extended a paid staff is em-ployed. There is in all societies a substantial share capital, payments being made in monthly instalments, and the rest of the working capital is obtained by local deposits from members and others Loans from co-operative banks and societies anually form only a meagre proportion of the capital At the end of the year 1922 23 out of 5 crores, only 40 lakhs were held from central hanks

At the end of every year, one-fourth of the net profits must be carried to the reserve fund and the balance may be distributed as divi dend or bonus There are a few drawbacks in the working of these societies. The most serious of these complaints are that the spirit of cooperation is facking in many non-agricultural societies, that there is too great a desire to go in for profit-making and dividends and a grow ing tendency to make the societies close Pre a ries once they have started running on profitable lines The rates of interest on loans are at times higher than they ought to be, and the men at the head of the societies are loth to

tries in other countries. Some or specially re-agricultural societies, after meeting the needs of their members, have large balances on hand, which they are allowed, with the pre-vious sanction of the Registrar, to advance to smaller primary scoleties. This practice is emailer primary sooleties. This practice is however, helng gradually eliminated and the surpluses of all primary societies are being concentrated in their central banks

With the growth of industries and the development of cities an important inhouring class has grown up in big industrial elssa class has grown up in big industrial towns and this class is as deeply indebted and as badly remunerated as the agriculturists uitimately are. Co-operation, if introduced, among people of this class, provides opportunities of organization for common ends, besides being the means of their economic regeneration Systematic efforts have been made, how ever, only in a few centres, elsewhere urban co-operation has so far been confined mor or less to middle class people. The first expe ment was initiated in Bombay under the auspices of an organization known as the Debt Redemption Committee Considerable work in this direction has also been done in Madras, through social workers and the Labour Infough social workers and the Labour Department, pari lonkry among the depressed classes and among the low paid employees of municipal bodies The Social Service Lea gne of Bombay has lately started a large num ber of credit eocletics among factory workers. and the formation of co-operative credit societies for workers in factories has come to be recognized as nn essential feature of every well considered scheme of welfare work

Loans advanced.-The total amounts of Loans advanced — The total amounts or loans advanced to members by agricultural and non-agricultural societies during the year 1922-23 were Re 6,42,68,630 and Rs 4,42,45,751, respecwere Re 6,42,08,630 and Rs 4,52,55,751, respectively Loams are mostly given on the security of two co-members Under the Act, societies are allowed, subject to certain conditions, to advance loans on the hypothecation of moveable property, and there is nothing unco-operative in this so long as personal accurate, which is the central principle of co-operation, it given and the borrowers properly in recording the second of the condition of the contract of the condition of the cond loans for large amounts

times higher than they ought to be, and the mean at the head of the societies are both to admit new members who are in need of loans to the constances of th It is impossible to insist on the restriction

of new lands, repayment of debt or redemption over the Presidency, was started without Govern of mortgaged iand and personal maintenance in ment aid as early as in 1907. This was followed times of soarcity in agricultural societies, and by the starting of banks at district head-quarfor purchase of raw materials for industries, ters. In other Presidencies, district and taluta for tends, ofto house building and for food and jeaks were established making good the other necessaries of life in non-agricultural societies. The period of repayment is one year or less for loans for current needs whether or less for losis for current needs who are for agriculture or petty trade, and up to five Years or so on losans for liquidation of old debts or for land improvement. An unsatisfactory feature of the co-operative system in some of the Provinces is the laxity and nopunctuality in the matter of repayment uppunctuality in the matter of repayment in floars by members and a general pathy io the matter oo the part in societies. As co operation is both floancially and educationally a failure unless punctuality in repayment is ensured, no efforts are spared by urganizers to educate societies in this respect. The Co operative Societies' Act grants to societies operative Societies' Act grants to societies priority of claim over other creditors (except the State or the landlord) to enforce any nnt standing demand due to the societies from members or past members upon the crops or other agricultural produce, and upon the entire, fodder or agricultural implements in cases when locals hove been advanced for the purposes specified Law Courts have ruled that claim is not valid unless a decree is obtained by a society in its favour lo advance To carry sy a scelety in its favour io advance. To carry out the intention of the framers of the legislation it is proposed to convert the iolain ioto a lien and thos get over the legisl difficulty. But not content with this, some co-perations hove pleaded for appeala powers of the content of the co ments have fromed rules under the Act enobling the Registrar to refer disputed claims to arbitration and to coforce the aword of the arbitrator in the same manner as o decree of the Civil Court It has been suggest ed and is made the practice in some provinces that sums doe under awards of orbitrators should be made recoverable according to the procedore allowed for the recovery of orreas of land revenue. The existence of a special privilege of this charactor may however, lead to laxity in the selection of members and care iceaness in the granting of loans and in securing regular repayments on them The demand for a special procedure for the recovery of the dues of o cancelled society stands on a somewhat different footing and the Local Governments of Bengal, and Bihar and Orissa were the first to adopt on actments enabling the contributions levied by the liquidator of a cancelled society to be col tote indicator of a cancelled score to be one lected in the same manner as arrears of land revenue on an application being made to that behalf by the Registrar of Co-operative Societies. Legislation on similar lines has since then been adopted in almost all other provinces

banks were established making good the deficiency in the local capital of the sodetics within their districts, and in some places joint stock banks were persuaded to make advances direct to agricultural soulctic or through the medium of local central banks A large number of prosperous non agricultural societies, as stated above, could afford to make temporary advances to agricultural societies out of their mrpins funds Government aid was also freely given in a few Provinces, eithough with the progress of the movement this aid was discontinued. In Bombav there was no movement to start local financing agencies and the slow increase in the number of societies made it difficult for central banks with a restricted area of operations to work successfully Accordingly, the Bombay Central Co operative Bark was founded in 1911, with the object of finaoclin, co-operative societies throughout the Prisidency later on local central banks came to be started and have taken over from the central bank at Bombay the work of finan cing societies in the various districts. The bonk at Bombay has therefore assumed the functions and even the name of a Provincial Bank It countries its dealings with primary societies to those areas where central banks are not likely to be established in the near tuture or where special local circumstances taxour direct relations with a strong finencial organization. For areas served by it the Provincial Bank has opened ten branches and six branches have been started by three of the

The Madras Ceotral Bank referred to shove has also been converted into a Pro-vincial Bank working to harmony with district banks A Provincial Bank with central banks and societies affiliated to it is in existence in Upper Burma and this Bank finances primary coleties either through the affiliated local banks or through the guaranteeing onions composed of societies. An Apex Bank was started in the Ceotral Provinces in 1918 to form a link between the district banks in the Province and the inint stock banks with branches in the pinvince It led to the establishment of a Provincial Bank with a similar constitution lo Bihar and Orlasa A Provincial Bank com-posed of central banks as shareholders has been started in Bengal, where, as also in Bihar and Orissa, primary societies are at present financed by central banks at district nr taluks head quarters In the United Provinces pri mary societies are financed on the same system, and there, too the starting of a Provincial Apex Bank under which central banks will be federat-The Pinancing of Agricultural Societies.—As soon as the initial stage of the move ment has been under contemplation. The societies is a sound of the societies of the move ment has been under contemplation. The societies the number of which was growing ment and the stages of development the societies the number of which was growing quaranteed by Government is under consideratively sometimes as the societies of the special conditions and the stages of development the move for the local banks in the province and the stages of development the move for the local banks in the province and plant, which left as to copyright expectations.

The constitution of central banks is not uniform, but the existing banks may be classified under three general heads —(1) banks of which the membership is confined to is dividuals or whree societies are admitted as members on exactly the same footing as itsidviduals, (2) banks of which the membership is countred to societies, and (3) banks which include societies and individuals as their mem bers and secure to societies separate representa-tion on the board of directors. The majority of the central banks are of the mixed type and there are bardly any of them which now adhere to the old capitalist constitution. The federal type is theoretically the best, but the panelty of the resources of the constituent primary societies, the lack of personnel and the need for enlisting the support of the urban middle classes have all combined to make the mixed type the most popular in almost all provinces In Bengal and the Punjah as also to a smaller degree in the United Provinces, and Bihar and Orissa, there has recently been an increase in the num her of federal central banks which are found to work well provided their area of operations is much smaller than a revenue district and they serve a compact group of well established

restricted area of operations, within a radius of lederation was adversely criticized in the reflect to eight miles from a central village. They port of a Committee of Inquiry appointed by the are accepted as integral parts of the provincial organization in Burma and the Central Provinces, ogeneration in parameter and the Central Provinces, that this body mouse of dissolved and replaced to oge province serving as a film between primary he separate educational institutes for the societies and the provincial bank and in the Central Provinces and Bern. An institute for other between primary noticities and local banks education and propagands has already been. The system has also been extended to Madras, started in Bern. A Provincial Union has also

to the Provincial Banks mentioned above, though n this province in guarantee is under-Mayore has a Provincial Bank and assem taken the nation. In Bombay, guaranteeing started one during the close of the year for minors were introduced as local agencies for supervision and assessment of greatly, but the tendency now seems to transfer these func-tions wholly to central banks. The unions in Bombay are, like those in Madras, to eschew quarantee and work as supervising and local controlling bodies with a fairly wide area of operations and engaging competent well-trained supervisors In Burina and Magras, some progress has been made in federating the nations into district councils intended to co-ordinate local activities and represent local coperative interests

Organization and Propaganda -It may be mentioned that in most of the provinces the work of organising and looking after the societies is done by the Registrar with the help of a staff of assistant registrara, anditors and other officers and a few honorary non-official workers. Where the central hank omotal workers where the contral mana system has developed properly, the directors of the central hanks either themselves or through a paid agency, organise societies and, as stated above, surpervise their working. The number of honorary workers is steadily lucrasing and in some Presidencies there is a staff of specially appointed honorary organisers stands specially appointed nonvary organisers who regularly assist the Registrars. The activities of the honorary workers are often, however, sparmodic and morganized, and in most of the major provinces the need has been Emetions of Central Banks—The tone is a function of contral banks are to belance the fore some cooperative institution which will be funds of societies and to supply capital. But foreigned the foreigned of societies and to supply capital. But belief under ser not limited to the provision between the funds of societies are not limited to the provision between the funds of banking facilities only, but often include the capacitation and supervision of societies representative bodies like organisation societies. Hence in all the major province with the exception of colerations existing in German Faglind, before and Bornas, central in land and else where Such institutions carry banks perform the functions of enpervision on active educational propagands, and through and guidance of the sucleties affiliated to them, the above of local committees and groups of and its course they also store a numerous conference to the course of th personucl necessary for its successful working official staff to an unlittifed extent-on pay may he difficult to secure in a smaller area inert of some fived contributions. Hunlip, However, In most of the provinces of Upper and the federations should have the nitimate India and Bengat there are in extenence vice in the determination of policy, and entitled the statistic of the statistic powers of the Reformantial collections inducted and occasionally subject to the statistic powers of the Reformantial collections inducted and the statistics of of the cooperative organization in a province described as federations of societies which somewhat the statistics of of the cooperative organization in a province described as federations of societies which somewars a lederation of Cooperative Banks are maintained for appervision, either and Societies which provides a regular combined or not with the assessment or and effected system of appervision, sufficient on the province of the statistic of the federation staff, attempts to secure occept in the Funjab, the unions in which save maintained or province and societies and societies of the federation staff, attempts to secure occept in the Funjab, the unions in which save and informity of practice among co-operative way differ from the pure yet or ceaser and way differ from the pure yet or ceaser and province and province of this restricted area of operations, within a ratio of jectoration was adveryed yet received for the restricted area of operations, within a ratio of jectoration was adveryed yet received for the port of a Committee of Inquiry appointed by the I ocal Government in 1922, and it was proposed that this body should be dissolved and repisced

againess the institute has no powers of con-trol, thought it is expected to ascertain and re-present the views of co-operators on questions affecting the movement. The activities of the Lossitute in the modusell are carried in through its divisional branches formed on a ijnguistic basis and local branches in tainka or district towns This is the most active among non official central organizations in and has established international relations by sending a delegation to the International Co-operative Conference and participating in the International Co-operative Ethi bition held at Ohent in 1923 In Bengal, a similar propagandist organisation has hoen started with identical aims. The Society has taken over some of the educational and pro-pagandist work hitherto performed by the Co-operative Department, and has assisted in the organization of co operative stores among students in colleges It has opened hranch oen tres and projected a scheine for the training of members of village societies and their secretaries. A federation with a constitution more or less similar to that in the Central Provinces Refer-ation but having divisional boards to decentralize stion put insving rivations to accept the control is also in existence in Bihar and Orissa, and has appointed a special officer for propaganda and development. In the Punjab a provincial minon has been organized for conducting the audit and inspection of pri considered the sand independent of primary societies and indertaking general propagandist work in hurms, the audit of primary societies is conducted by a central council consisting of important departmental officials and representatives in do operative institutions. This also assists in the organization of the provincial conference and acts as an advisory body to the Registrar Organizaman marriadly body as the negetital Organiza-tion, supervision and propaganda are intribered by district federations of unions of primary societies The starting of educational and propagandist bodies like the Institute in Bom bay is contemplated in the States of Hyders. bay is comempared in the covers of return bad, Mysore and at Ajmere for the Rajputaus States and the district of Ajmere-Retwars These are all recent developments and it is still too early to icrecast on what lines the transfer of con trol to representative co-operative agencies

been started in Madras, but its objects are arisen. Before the year 1918-19, there were mainly educational and propagandist. Its only a few store societies all neer the country activities are as present confined to the issuing In all provinces, particularly in Madras, a of co-operative journals and the holding of legislands had been made in the direction of conferences its consistantion and its lines distributive co-operation among the middle of work have now been revised so as to obsace, while in Bengal and the United Provinces in the merchanism. A Central Institute to focus a towns for students living in hostels attached the efforts of co-operative workers and to carry on propagandist work was established in Bom law in the merchanism of the middle of the direction of the same of the co-operation among properative movement in the servinces of the co-operation and yo co-operation middle provinces in the law of the war fapply unload, store societies, and co-operation and yo co-operation middle provinces are to develop a proper the co-operation and yo r co-operation which were also your co-operation when your co-operation and your provinces. various custributive organizations. The work of organizing or-operative distribution in rural area was poshed sheed with considerable success under official analyzes in the Punjab and Madras but in both provinces a school of the province societies are in a nonrising commune in consumer's movement in nrban areas received particular attention in Bombay, Madras Bengal and a few other provinces, but with the disappearance of the special conditions which generated enthusiasm in the years in mediately succeeding the close of the War, stagnation has set in and only a few among the numerons store societies started in these provinces have firmly established their position and continue to enjoy the loyal support of their members

In some Provinces efforts have been made to revive the ancient handicratts of the country and cottage industries by organizing co-opera-tive societies for the workers Many of these societies merely provide cheap credit, but in some places they undortake the supply of raw materials and the sale of manufactured goods An important industry which flourished in India before the introduction of machinery was handto revive its by the formation of co-operative societies of handloom weavers Most of the weavers' societies are merely credit societies, but some undertake the purchase of good yarn for members, and others have store branches to sell the cloth produced by members They have also been instrumental in introducing improved fooms and methods among the conservative weaving classes. In Bengai and the Punjab much success has attended the organization of central unions among weavers societies, and similar intensive work in Bihar and Orissa and Rombay has met with good results Other industrial societies, to be found in very small numbers here and there are those for 'ganless or millmen, dyers, basket and brass workers in the Central Provinces, 'Cham-mars' and 'Dhers' in Bombay and the Punjab, Lacquerware workers, carpenters, trol to representative co-operative agencies will be carried out "Driver and the will be carried out "Other forms of Co-operation.—After the passing of the amended Co-operative Societies" the special of the amended Co-operative Societies (Societies) blacks and the state provides special fraces the special forms and technical sets the product of actions of the state provides appearance for the development of actions only during the last few years that a great more than a state of the state provides appearance of the development of actions only during the last few years that a great more than a state of the state provides appearance of the development of actions only during the last few years that a great more than a state of the state provides and the state provides appearance of the development of actions of the state provides appearance of the s

from the ancient guild spirit animating the made only slight progress, with the exception communities, it aims at oracting a strong comonoise organization among these various fadusirial workers and cartisusen, based on schiebip of

industrial noions are organised for bulking orders, epartments making contracts, distributing goods, and guged with collecting payments

of industries, but as these will be engaged with problems of big industries, it is doubtful! If the cottage and small industries will have been contage and small industries will have been contage for development under twelf means and direction.

An interesting development of recent years in the provision of housing through on operative the provision of housing through on operative the most independent on local traders to be provided on housing through on operative the most independent on local traders have been stated in Bounday City and enhanced the form of the local traders while Burna led the way by starting the provision of housing through on operative the most independent of the local traders while Burna led the way by starting the base been stated in Eventual City and enhanced and also in a few other courts. They are generally organized on the co-partnership system, under which the society owns the bouses and lets them to members at fixed not be another than the content is feasible for such and the Karnatak. This aspect of co-operation houses and lets them to members at fixed native present of the contage of Tenant-ownership societies have also been it will indeed be a great achievement if these etarted. There are some building societies in efforts are successful and the cultivator obtains temperous resume accidence mave also been at the management of the second of the secon

ahly in the empty of seeds, manures and ferti | varieties of seeds "Wherever agriculture and lizers, the sale of agriculturel implements and | co-operation | have experienced the assistthe saie of produce, particularly jaggery

Efforts have been made in various parte of the country to solve the problem of milk-supplycountry to solve the property of milk-supply-to reduce the price and increase the purity-hy starting co-operative dairies, composed other wholly of goolle or milk-mem or the preducers and the consumers together Co-operative oreameries and give producing societies have also been started in one or two provinces Another interesting development is the starting of cattle-breeding societies in the Central Provinces and discwhere It is anticipated that these cocletics will assist in amonipart that dread occludes will asked in supplying the keen demand that exists for bulls of good stock. In a few provinces there are societies for rice-bulling, the manufacture of laggery and for lift irrigation. The latter is an interesting development of co-operation which, interesting development of co-operation which appears to have established itself in popular favour in the Burdwan Division of Bengal this tract once very flourishing has been ravaged in recent years by frequent floods and famines and the population had jost all initia tive end sank into poverty while their lands deteriorated and maiaria claimed a heavy toli The starting of irrigation societies has opened a new chapter in the listory of the truct and has revived the energy of the people and brought them together for common economic hardeavon Ginning on co operative nuce-andeavon Ginning on co operative nuce-bas size been attempted an interesting experiment in sgricultural co operation and the punish of experiment in signicultural cooperation is the starting in the Punjab of societies for the consolidation of small and seathered holdings. These propose to re-group and re-shot the holdings of members, and if this voluntary socion proves similar for the purpose, one of the gravest evile of modern indian sgriculture will be solved with one the aid of State help or legislation. Jo Brownsy, action has been taken on somewhat Sixwept lines to deal with the problem of the undestondie cititator. A beginning has been uncommonic cultivator A beginning has been made in the direction of starting co-operative societies for joint farming, and the movement may lead to the evolution of a system of ocoperative cultivation of land ench as has been extremely successful to Italy

Co-operation has already been successful to some extent in redeeming the chronic indebtedness of the agriculturist, but if the indebiedness of the agriculturist, but if the improvement in his economic condition is to be permanent it is essential that he should be prevailed upon to adopt improved methods of production The Agricultural take propagandist work with this object, but their efforts have not proved as an essential step ought to be A co-operative society provides an effective agreey for reaching the agriculturist, and in many places societies have been the means of bringing and have been in the means of bringing and have been in the means of the production of the and have been made the centree for conducting and have been made the centres for conducting United Provinces, and the Central Provinces, the propagandist addivises of the Agricultural Blue have been drawn pin foreastement by the Department and district Agricultural Asso local Legislatuse Councils to take the place of castions As a result, a few soudsteen have the Cooperative Scientists. The Bombay been enterprising enough to purchase the proper of the Cooperative Scientists. The Bombay agricultural mignements, and the machinery July 1924 in the Doubay Legislative Conneil recommended by the Department and to use and has been referred to 8 Select Committee the proper manures and the occulied it reproduces, in the main, the framework of

varieties of seeds. "Merever agriculture and co-operation have experienced the assistance which each can defive from association with the other they are fast developing a truly organic connection." To this end, joint efforts are being promoted in almost all provinces where the Departments are in charge nf one Minister This co-ordination is secured by joint conferences, and joint boards of co-operation and spriculture and the starting of local agricultural associatious under Co-operative Societies Act

Committee on Co-operation in India --In July 1914, the Government of India Issued a lengthy Resolution on Co-operation in India, surveying its progress in the country In October during the previous ten years. In October tovernment appointed a Committee under Sir Edward Madagan to examine whether the movement especially in its higher stages and in its financial aspect was progressing on sound lines and to suggest any measures of improvement which seemed to be required The enquiry was to be directed primarily to an examination of such matters as the cons titution and working of central and provin citi banks the financial connection between the various parts of the cooperative organization the audit inspection and manage ment of all classes of societies, and the ntilization of the reserve funds. In its Report, which was issued in September 1915, the Committee stated that it had not confined its enquiries to the subjects referred to it for it had to recognise that the financial welfare of the higher etages of the co-operative system was largely based on the soundness of the foundation

Government Action on Committee's Report — The Government of India have passed orders on the recommendations in the light of the opinions of the Local Governments
With a view further to elect opinion on the recommendations a special conjurence of the Registrars was convened in August 1918, to which all the Registrars and a few selected non-official co operators were invited. The Conference was also asked to consider the augustion made by the Committee on Cooperation that as the financing of the move ment involved grave difficulties which baffled solution unless the discounting of pro-notes was arranged through an Imperial State Bank or the several Presidency Banks, a careful examin ation of the question was immediately called for A proposal was made for the appointment of an expert committee, but the Government of India have practically shelved it by stating on man may precitedly written by stating that they would assemble the committee at some date convenient to them. Under the Reforms, co-operation has been made a provincial subject and also a transferred subject. The control of Co-operative Departments has been entrusted to Ministers and in Bombay, the United Provinces, and the Central Provinces,

- (i) The adoption of a scientific system of classifying societies
- The improvement of the procedure for liquidation of cancelled societies
- (116) The extension of summary powers of recovering to the awards of arbitra
- (te) The provision of penalties against specified offences

The Bill has been subjected to severe criti cism by non official co operators and has been referred back to the Scient Committee for forther consideration

Effect of Crisis on Co-operation -It is hardly possible without any close and scientific inquiry, such as has not yet been carried ont to appreciate accurately the effects of the co-operative movement in enabling agricul turists to resist the rigours of a famine as also to judge the reaction of the latter on the co erative organisation as there is an interplay of various ecocomic forces affecting the life and industry of agriculturists the proportionate value of which cannot be estimated easily The agricultural season of 1918-19, however, put the co-operative organization lo most provinces to a very severe test and the reports for the succeed og years afford some iodication of the resisting power of the co operative organization In the Central Provinces owing to the drying up of recoveries and the issue of lyrge advances to agriculturists to tide over a had season the fluid re ources of the movement were seriously depleted and the the movement were seriously depicted and Apex Bank was able to meet its ilabilities only with the financial assistance of Government. The fluid resources of the Provincial Bank were repleoished and the Local Government with the concurrence of the Local Government of India, place decelles at the disposal of the 'covincial Bank sod made advances direct to primary societies in the form of Tage I loans A Committee of In form of Task i loans A Committee of In quiry was app need which made sweeping recommendatio s the mot important of which was the liquidation of the Provincial Bank and the placing of central banks in direct touch with commercial banks This recommendation was bowever sobsequently turned down by the Lossi Gow rumeut although some other re commendations such as the division of agri commendations such as the division of agri luss been rendered possible to a great cultural finance into short term crop long and steeps, and many an agricultarist who long term non crop loans met with a coo-idora was formedly in a state of obronic indebt-ble amount of public unport in Benezia and the idness has been relieved of all his disbta ble amount of public apport in leugal and the edness has been relieved of all his dabts Punjab the return of favourable assons has and treed from the coeseasty of incurring naw averted any breakdown of the averteem which once Credit has been moch cheapened and threatened to overtake the local co operative; it is do now possible for this agricultural to revenit and the could not wide scale caused acrious difficulties some time borrow at less than 20 to 75 nor cent to reaso. The same may now be asserted of the merry. If has been calculated that in interest United Provinces, where there appeared to be alone the agriculturities of India, by taking some danger of the strain not heing unite isleast from the village money landers, are wan now were also appointed in Bibar and Oriasa and saving themselves from an unnecessary burden Moron, in the former to admind our day of the control of

tbs Act of 1912 but proposes to introdoes the and the relief of indebtedness. With a following important modifications — hetter appreciation of the dependence of the agricultorist oo seasons, and a more sys-tematic management of the funds of central societies it is anticipated that in future the situation arising out of a fallure of rains will be satisfactorily met. To 1918 and the follow-log months practically the whole of the country was subjected to a banking crisis of considerable magnitude but a marked feature of this crisis magnitude one a mararu resture of can etials was a tendency to withdraw deposits from commercial institutions and place then in co-operative banks. The outbreak of the War brought another set of influences into play and there was a temporary tendecey to withdraw and deposits and a temporary consistent wideligns deposits and a temporary cossistion of new deposits. The disturbance was not serious except to two or three provinces and by the end of the year 1914-15, the situation became practically normal In two of the provinces where the situation caused some anxiety owing where the signation caused some anxiety owing to the creation of fresh deposits in central banks, the Government sanctioned advances to the steet of Rs. 5,00,000 to central societies to ho utilized in the grant of urgent loans to agricultoral societies or to meet withdrawals of deposits On the whole, therefore, the movement appears to have stood the test of the War much better than might have been experted

Social Reform -- Co-operation some places, stimulated the desire for education and mambers of rural societies have been known even at advanced agenta receivs the elements of edocation to enable them to pot their signatures on their society's papers and to take a lively interest in the internal work of their in titoticos In Bombay, night schools for their in thotios in homes, night sociols for adults have been started with the aid of a splendid docation made by the late Sir Vithaidas D Thackersev, while in the Punjab, Bihar, Bengal and slaswhers much expenditure on education is incurred by co-operative institutions themselves the Punjab separate rural societies have been registe ed to conduct night schools. There are not few cases where a society has not its face against drunkenness, supolled members notorious for their intemperate habits and has insisted on a high standard ni morality and attempted to improve the standard of life Societies have ocrasionally condemned excessive expenditure on marriages, and have thus indirectly trained members to habits of thrift. The liquidation of old debts again beneficial result that the agriculturist has its important lessons of self-help and self-teams to conduct his own work more official reliance, but the most important soliversment of asyring letter appreciated Association in soliver of the project help blessings of unity and litigation has often decreased in villages will accelety. In the Punjish, a number of solicities were started organization frames in the results of the project will be a feeling of the solicities and the project of the project in rural reas whose members agreed to refer. The following statements show the progress all disputes to arbitration by their elected, of the Co-operative movement in different committees and to abbte by the awards of provinces, and contain some information about arbitrators. Participation in the manage their detailed working till the end of the ment of societies has instilled among members official year 1922-29.

Origin of Indian Resignation - Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon Emigration for purposes of labour dates from the heginning of the 19th century From 1800 A D onwards indians crossed the Bay to the Straits Settle indians crossed the hay to the strate setties ments to work on the sugar, spice, taploca, and coccannt plantations of Penang, and this intercourse was allowed to continue for iong without regulation. The first officially re-corded instance of genuine recruitment for corted instance of genuite recruitment for labour emigration contred in 1830, when a French merchant, named Joseph Argand carried some 150 artitans to Bourhon The abolition of slavery in British colonies to 1834 gave the first great impetus to the movement The sugar planters of Mauritina at once turned to India as their hest recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta The Government of india at a very early stage realised the neces sity of hringing such emigration under regula-tion. The Law Commission was asked to investigate the case and to make recommend ations for securing the well heing of emigrants. They advised that no legislation was required except in order to prevent undue advantage heing taken of the simplicity and ignorance of emigrants by providing that a megistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and aus tenance during the voyage A copy of every Government under which the emigrants were to live These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be deter minable after 5 years

History of Emigration -- Under the above History of Emigration — Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia) In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable. and a committee of enquiry reported in 1840 that emigrants were heing entrapped hy force or fraud, rohhed of their wages and treated with brutality In consequence, emigration was prohibited (Act XV of 1842) except to Manri prombited (Act Av or 1942) except to mann; tius, and there control was tightened In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad Act XIII of 1847 re moved the restrictions on emigration to Ceylon The emancipation of slaves in the French colo The emancipation of slaves in the French color is 1849 gave fiet to a system of emigration remise in 1849 gave fiet to a system of emigration remised in force until 1908, when a fresh review of the property 
and consolidated the whole system of control It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements In 1869 emigration was permitted to Grenada, and in 1872 to Sprinam Owing to the removal of to Surinam Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam Owing to the injury caused to the agricultural indus tries of the colony, these restrictions were removed in 1872 subject only to magisterial removed in 1872 subject only to magaterial control of recruitment in India In 1870 complaints reached the Government of India of gross almes in the treatment of emigrants in British Gulana. A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants, which was subsequently extended to Trinidad Owing to similar complaints from 18441 and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 hrought to light a number of points requiring amendment

lookints requiring amondment.

Racent Legislation—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1884 were incorporated in the control of the Acts and two amending Acts with the Acts and two amending Acts and the Acts and two amending Acts and two amending Acts and two Acts and two amending Acts and two Acts and the the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards to the people towards to the people towards the state of the people towards the law was again recust and consolidated hyact XXI of that year. This Act appelies the contries to which emigration is lawful, hat empowers the Governor General in Connell to the people of the contries to which emigration is lawful, hat empowers the Governor General in Connell the contribution of the people of the contribution of the c to add to the list hy notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced This Act with certain amendments of no importance to the system of indentured emigration re-mained in force until 1908, when a fresh revi-

amagration to Katal was discontinued from the
last July 1911 as the Government of India were
on the condition of Indian Emigrants in the

and repatriation of the immigrants
The labour laws of the sever the several Colonies The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the con laboureres of Indiao Deputations from India visited Fijl and Br Gulana in 1921 In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration, and Indian public opinion has during the last decade been punite opinion has during the last decade because introngly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs McNeill and Chimanisi and they arrived at the conclusion that the time and they arrived at the concusion that the time had come when contract isboor should be abolished. The Becretary of State for Iodia, accepted this policy and authorised the Govern-ment of India to announce the aboliton of the indentured system, and the announcement

to this effect was made in 1916 In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured amigration and all unskilled emigration, except amigration and an unaskined emigration, except to countries specially approved by the Legals ture. Emigration to (eylon and Malaya was brought under control, and the definition of "Rmigrant was extended to cover all per sons "assisted" to depart from Iodia Extremences—The following is a list

gration to British Guiaua.

Present Position — Indian emigration questions have recently taken on a wider as emigration pect The status of Indians in the Empire generally is one in which the Indiao public now take keen interest. It is no longer possible to deal with the treatment of Indian ishour apart from other classes of Indiau emigrants and tra veilers in several colonies and dominions considerable indian communities have aprung up which although composed largely of the descendants of judentured labourers, are them seives free and lawfully domiciled citizens of the countries in which they are settled, but the countries in which they are settled, but have not yet heen placed on a footing of legal, social, political and economic equality with the rest of the population. The lasoes round which public interest at present centres are

(a) Control of emigration
(b) Rights of Indians to admission to other parts of the Empire (c) Bights and disabilities of Indians do-

ndciled overseas These questions may be considered seps

rately Control of Emigration -80 far as nuskilled ishour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigra tion Act of 1922 are as follows -

10 (1) Emigration, for the purpose of unskilled work, shall oot be lawful except to such countries and on such terms and condi-tions as the Governor General in Council, by notification in the Gazette of India, may specify

in this behalf

(2) No notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamher, either without modification or addition, or with modifications and additions to which both Chambers agree, but, npon and approval being given, the notification may be issued in the form in which it has been so approved

Under this law emigration has been legalised to Ceylon on the following conditions

(1) The emigrant shall

(a) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Lmigration Commissioner) appointed by the Government of Ceylon, or

(b) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

service for a period exceeding one month

(3) Within eix months from the issue of this

Notification, or within such further period as the Governor General in Council may by noti fication appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void

(4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fond to be raised in such manner and managed by such agency as may appear anliable to the Colonial Government

(5) The Government of Ceylon shall at any time when so desired by the Governor General in Council admit and give all facilities to an Agent appointed under section 7 of the Act
(6) Within one year of his arrival in Ceylon

any emigrant who has been assisted to emigrate at the cost of the common fund referred to in clause (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which be is required to do is un suitable to his capacity, or that he has been unjustly treated by his employer, or for any other sufficient reason, be reputriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters Association

(7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Ceylon shall appoint a person to perform the duties of the Agent as set forth in clause

(8) Within six months from the isene of this Notification, or within such further period as the Governor General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by e recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable

(9) The Government of Cevion shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of persons emigrating to Ceylon in accordance with this

Notification

Similar conditions have been imposed in the case of Malaya Emigration has also been permitted to Mauritius for a period of 1 year only with effect from May 1st 1923, and limited to a number not exceeding 1,500 isbourers The terms are more onerous than in the case of the nearer Colonies and the most important additional clauses are the following-

Any emigrant shall, if he desires to return to India at any time after two years from the date of his introduction to the Colony, be repatriated at the cost of the Government of Mauritius to

Any emigrant shall at any time within the period of two years from the date of his introduction to the Colony he artitled to he

(2) The emigrant shall not, before leaving this return to his home is desirable either on British India, have entered into a contract of the ground of the state of his health or on the ground that the work which he is required to do is unsuitable to his capacity or that he has been unjustly treated by his employer or for any other sufficient reason

If any emigrant at any time within the period of two years from the date of his introduction to the Colony satisfies the Agent appointed under section 7 of the Act that he is unable to obtain a wage which will provide the cost of living for a man with a wife and three children and also a reasonable margin for savings, sickness and old age, he shall be entitled to be repairiated at the cost of the Government of Mauritina the place of his recruitment. The position now is that the Government of India has vested the Chambers of the Legislature with complete power to decide to what countries emigration shall be permitted and to regulate its conditions, and has bound itself to be guided in its policy by Indian public opinion Skilled lahour is of course more shie to take care of itself and, subject to certain necessary safeguards, le at liberty to emigrate to any country in the world

Admission of indians to Other Parts of the Empire —On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917 and 1918, and the policy accepted by the self government of indians and the British Government.

was embodied in the following resolutions —
(1) It is an inherent function of the Governments of the several communities of the
British Commonwealth including India, that each should enjoy complete control of the composition of its own population hy means of restriction on immigration from any of the other communities

(2) British citizens domiciled in any Bri tish country, including India should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education, such right shall not extend to a visit or temporary residence for labour pur

poses or to permanent settlement
(3) Indians already permanently domiciled
in the other British countries should be allowed to bring in their wives and minor children on to ming in their wives and minor children on condition (c) That not more than one wrife and her children shall be admitted for each such Indian, and (c) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

The first paragraph of this resolution has regularised the various restrictions on immigra-tion which the self governing dominions have, from time to time adopted and which, with-out expressly differentiating against Indians are in practice used in order to check Indian inter in practice used in over to cheek indian immigration, the objections to which are etaded to be not racial or political but economic. Australia prohibits the entry of any person who falls to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person ion to the Colony, we entitled to be synatistical who has not received in advance a permit at the cost of the Government of Mauritius to from the Dominion Government which is re-the puses of his recruitment if he satisfies the I made to any person regarded as unsultable Agent appointed onder section 7 of the Act that the settle in the country South Africa pro-

hibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to the second of his scanned to hand of the Union. Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unies he possesses in his own right 250 dollars New-loundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the or sources, tourists and merchants visiting the countries for the temporary purposes of com-merce, pleasure, or education India on its side has assumed power to regulate the ad-mission of immigrants from any other part of the Empire or foreign countries, by means of sesports. A bill has also been passed by the passports. A bill has also been passed by une indian Legislature empowering the Govern-ment of India to make rules for the purpose of scenting that person not being of Indian origin, doniciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification sovernment is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the colonial Office except in the case of Kenya colony where as stated hereafter, the British of the colonial impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population A sta-tistical inquiry is now on foot to determine whether the introduction of such restrictions

s necessary

Rights and Disabilities of Indians

Lawfully Domiciled Oversons—The potion of the Imperial Conference, 1921. When the resolution of the Imperial Conference, 1921. When the was recorded in the following terms—This Conference reasirms that each Community of the Rithin Commonwealth should en-

nity of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incompruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British indians iswally domicide in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of each indians to cities solidarity of each indians to cities. The representatives of South Africa regret their insulity to accept this resolution in view

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representations of the part of the Union of the representation of the resolution, nevertheless feel bound to record their protound concern at the position of In-dians in South Africa and hope that by nego-tiesions between India and South Africa a way can be found as soon as may be to reach a more substances by position."

The Bight Hard his Strivens Shastel visition to an Omnibuse of Assethia, Caunda and New Zealand in the course of 1972 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of this mission was to appeal to the Governments and public of Canada and Australia (Injly to enfranchise qualified domilled Loidians In Australia, Indian resident in Queensland and Western Australia have neither the pro-vincial nor the federal franchise In Canada, Indians resident in British Columbia are excluded from the dominion as well as the provincial franchise While successful in securing a more sympathetic atmosphere towards Indians, he failed to bring about any modification in the existing electoral laws

The question of giving effect to this resolution of 1921 was raised by the Indian representatives at the Imperial Conference, 1923 Their

proposal was as follows -

Let the Dominion Governments who have an Indian population, jet His Majesty 8 Government in the areas under their direct control, such as Kenya, Uganda, Fill and other places where there are Indians readent, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how somes

expore the averages of now been and now soccess the principle of equality implicit in the 1921 Resolution may be implemented "This proposal was favourably received by the Dominion Premiers, excluding General Smuts, and by the Secretary of State for the Colonies who cordially agreed that there should be full consultation and discussions between him and a Committee appointed by the Government of India upon all questions affecting British Indians demiciled in British Colonies and pro-Indians definition in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr. J. Hope Simpson, M.P. Chavrasan, Behadur T. Bangacharlar, M.L.A. and Mr. K. C. Roy to make representations to the Colonial Office on certain outstanding questions affecting Indians in Kenya and Fiji Summary of Present Position—Outside Australia, N. Neeland and Canada the position survival and the Colonial Office of Present Position—Outside Australia, N. Position Colonial Colonia

stands as follows — The main grievances (1) South Africas—The main grievances (1) South Africas—The main grievances of the standard resistance of the standard resistance of the standard resistance of the standard resistance of this agreement. The substance of this agreement is embodied in the following extracted resistance of this agreement is embodied in the following extracted from letters.

(i) Mr Gorges, Secretary for the Interior, to Mr Gandhi, June 30th, 1914 "With re-gard to the administration of existing laws, the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are adminis-

of the Government to see that they are administered in a just manner and with due regard to vorted rights."

(ii) Mr Gandhi to Mr Gorges, July 7th, 1914.

"By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading, no matter how often he shifts his residence or business from place to place in the same township.

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not, should be respected "

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold iand in the Union Their main recommend

ations were as follows

(1) Law 3 of 1885 (Transvasi), the Gold Law of the Traosvasi (Act No 35 of 1908) and Act No 37 of 1919 should not be repealed. (2) There should be no compulsory repatria

tion of Asiatics but
(3) Voluntary repatriation should be en

couraged (4) There should be no compulsory segre gation of Asiatics but

(5) A system of voluntary separation should be introduced under which municipalities should have the right, subject to certain condi

(a) to lay out residential areas for Asiatics , (b) to set aside certain streets or portions of the town for Asiatic traders to which exist ing license holders abould gradually be at

(6) These areas should be selected and al located by a board of independent persons in consultation with the Municipal Conneil

and Asiatic community
(7) In Natal the right of Asiatics to acquire (7) In Natal the right of Aslatics to acquire and own land for farming or agricultural pur poses, outside townships, should be confined to the coast bett, say, 20 to 30 miles inland (8) A uniform License Law" applicable to all the Provinces of the Union should, if possible, be enacted if that is impracticable, the law relating to the laus of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive con solidating Act of Parliament providing enter alsa

(a) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction, outside those areas, to divisional Connoils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator

The grounds upon which an application (b) for the grant of a new ilcense may be refused

(c) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the applica

tion

(d) That, in the case of the r fusai of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board,

appointed by the Administrator

(e) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business

(e) There should be no relaxation in the

bands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa Details of all applications for trade licenses, and transac-tions in connection and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1918

On the other hand he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complainte or grievances and generally safe-guard their interests

No action has been taken by the Union Government to give effect to these proposals except with regard to voluntary repatriation 7 430 Indians have returned to India from South Africa during the last 4 years of whom probeby a large proportion have abandoned their South African domicile and accepted free repatriation under the official scheme. It is understood that the remaining recommendations still form the subject of negotiation with the Government of India

Present Position -- Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only In Natai In the remaining two provinces they are not enfranchised They are subjected to differential treatment in the matter of trading licenses, specially in the Transvan Their immigration into the Union is baryed and severe restrictions exist on inter provincial migration. In the Transraal they are not allowed to acquire immorable property outside locations and on the Witwaterprand they are subject to the res trictions of the Gold Law

The anti-Ariatic party bave made several Natal, further to efforte especially in Natal are merely irritating social disabilities, such as railway regulations debarring Indiana from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms Examples of recent anti-Asiatic legislation of major importance are

(a) The Natal Rural Dealers Licensing Ordinance, transferring the power of granting trad-ing licensee from the Licensing Officer to an elected Licensing Board, on which Indians may

not sit

(b) The Durban Land Alienation Ordinance This Ordinance, which enables Municipalities in selling land to assign it for particular commnnitles and to that extent to secure segregation, has been allowed on condition that Asiatics are given reasonable opportunity for acquiring

adequate residential sites

Anti-Asiatic feeling in South Africa does not (9) There should be no relaxation in the enforcement of the immigration Laws, and more active steps should be taken to deal with Area Bill was untroduced in the Union of the Adalete known as the Class more active steps should be taken to deal with Area Bill was untroduced in the Union of the Adalete with Area Bill was untroduced in the Union of the Adalete with Area Bill was untroduced in the Union of the Adalete with Area Bill was untroduced against Indians, contained (10) The administration of the Adalete policy of the Ouron of the Government should be placed in the palacet of against Indians, contained the Government should be placed in the palacet of a strength of the Couron of the Government should be placed in the palacet of the couron of the Government should be placed in the palacet of the couron of the Government should be placed in the contained the couron of th areas. Iodian psinlon was desply actiated tower the prospect of this legislation while the was apprecised end in legislation with the supersistence in Routh Arrica result in the conceils rule of a large number of Indian tracters in the Union In response to the viccoras forms in the Union In response to the viccoras Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements to the interests and reasonable requirements of the interests and reasonable requirements or the interests and reasonable requirements or the interests and reasonable requirements or the interests and reasonable requirements of the interest and reasonable requirements of the interest and reasonable requirements of the interest and reasonable requirements and the results of the interest and reasonable requirements are required to the interest and reasonable requirements and reasonable requirements are required to the results of the result

In November 1023 the Natal Township iaw, (Bulet's Ordinance) which access to climinate Indiana completely from the Township franchise was introduced in the Provincial Conneil hat has not been ascended to by the Governor General. The Natal Boroughs Ordinance however which deprives aliresh additions to the Indian population of the municipal franchise has been passed into iaw.

(2) Kenya Colony—The grievances of Idlass domiciled in this Colony are fully set forth in the published despatch of the Govern ment of India, dated October 21st, 1920 The controversy centred round the following points—

(c) FRANCHISE—Indians have not the elective franchise The Government of India proposed that there should be a common electoral roll and a common franchise on a reason able property basis pick an educational test, without racial discrimination, for all British applicates

(b) BREENATION—Professor Simpson who was sont to Reast Africa to report on Sanitary matters, recommended sagregation on sanitary grounds The Government of India Objected, firstly, that it was unpracticable escondity, that tit was commercially inconvenient and thirdly, that indians are in practice unfairly treated in the allocation of sites

(c) The Heritandes—Lord Eigin decided in 1806 that as matter of administrative our varieties grants of land in the upland are should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land int to which Lord Eigins decision applies This decision has now, however, been extended so as to prohibit the transfer of land in the uplands to non Europeans

(d) IMMIGRATION—Suggestions have been put forward for restricting Asiatic immigration into Kenya The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle independing.

be in transfer and the continuous woman to the right state of the Retific Government were contained to a White Paper presented to Parliament in July 1922 It was hald that the guiding principle should be that "the interests of the African matter must be paramount," and in light of this it was decided.

(a) FalkChira.—A communal franchise was adopted with 11 seats for elected European, on elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority One Indian is also appointed on the Governor's Executive Council

(b) SEGREGATION —The policy of segregation as between Europeans and Asiatics is aban depend.

(c) THE HIGHLANDS—The existing practice is maintained both as regards initial grants of land and transfers A similar reservation in the low lands is offered to Indians

(d) IMMORATON — Racial discrimination in immigration regulations is rejected But in the economic interests of the Africans, further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry loganization of the control of Kenya and Uganda have been interested to submit joint proposals for isgulation.

The Government of Iuda reviewed these decisions in a resolution published on August Rething 1823, and recorded their deep regretable 1824, and recorded their deep regretable 1825, and recorded their deep regretable 1825, and recorded the proper medications made by them? Mad reserved liberty to recipie the case on a suitable opportunity to recipie the case on a suitable opportunity or representations reparation to making representations reparation to implement these decisions, particularly in the matter of the Immigration requisitions.

Following Dron the Kenya award statutory action was taken by the local administration on the franchise question to the franchise question on the franchise question on the franchise question on the franchise question on the franchise question of the bill giving effect to the decision of this adjustry's dovernment until such time as the committee proposed by their representatives at adjustry to the franchise question of the decision of the final proposed by their representatives at the committee of the colonial Secretary. The Government for the bill was postponed at the instance of the Colonial Secretary. The Government for an explanatory statement ment of Kenya was also saked by His Majesty's Government for an explanatory statement ment of India received massines. The Government of India received massines are the convertible would be afforded for the expression of their views, and that carnest attention would be given to any representation which their Committee desired to make A has a leady been march 122. The committee of the convertible of the force of the Government of the Secretary of bate for the Government of the Secretary of bate for the Government of the Secretary of the force of the Government of the received of the received of the convertible of the received of the convertible of the c

the result of the representation made by the Colonies Committee —

"(1) INMIGRATION — My position is that if danger ever arises of such an influx of immigrants, of whatever class, race, nationality or character, as may likely be prejudicts to the conomic interest of the natives, I hold myself entirely free to take any action which may be entirely free to take any action which may be necessary Conflicting statistics which have

- been laid before me have not enabled me to ; reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps still be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya Meanwhile the Kenya Immigration Ordinance will not be caucated
- (2) FRANCHISE—I have given careful consideration to representations in favour of a common poil, but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will nitionally require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.
- (3) Highlands—I consider that the Secretary of State for the Colonies has no alternative but to continue piedges, expressed or implied which had been given in the past, and I can hold out no hope of the policy in regard to agricultural laud in the Highlands being reconsidered.
- (4) LOWLANDS—IL was proposed to reserve an area in the lowlands for agricultural limin grants from India The Committee made it piain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in indian sectionent and agricultural methods to red the matter is in suppense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question.
- (3) Fiji and British Gulana—In certain respects Indians in these colonies are under disabilities. In Fiji, for instance they are practically excluded from both the political and the municipal franchise But the Indian population in these colonies belong aimost entirely to the labouring classes and their griev ances are mainly economic The wages in Fiji are said to be unduly low, and the recent poll tax of £1 on every adult is regarded as a heavy burden Wages in both Fill and British Guiana are to a large extent dependent on the sugar market, which is at present bnoyant It will be possible to form a more accurate opinion will be possible to form a more accurate opinion of the position in Fill when the report of the deputation sent to that colony by the Govern ment of India in 1922 is published. The reports of the British Gulana deputation were published on the 21st of January 1924. Towards the end of the month a deputation from the Colony of British Gniana, consisting of Sir Joseph Nunan, Kt, and the Honourable Mr J C Luckhoo. K C , arrived in India to re-affirm the scheme of colonisation which these gentlemen had submitted to a committee of the Imperial Legislative Council in February 1920 and which that committee had generally approved. They brought proper credentials from the Government of the Colony and were authorised to place this scheme before the Government of india and the Indian Legislature for considera-tion. The Government of India agreed to give the deputation facilities to meet the Standing Committee on Emigration of the two Houses

- of the Indian Legislature, and this Committee met the deputation, which had, in the mean-time the deputation, which had, in the mean-time the deputation of the mean-time that the deputation of the Hindian and Muhammadan sections of the resident indian community, on the 18th and 18th of March The Committee fully discussed the acteur with the deputation but decided the acteur with the deputation to decided the committee of the the decided (Government of India multi their next meeting, which took place on the 28th May 1924 On this occasion the Committee bad also the advantage of examining Mr Tewary, who was one of the members of the Committee appointed by during the committee of the Committee appointed by Cultana in 1922. After thil consideration the Standing Emigration Committee reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation chey would, before making any definite recommendation, like the Government of the recommendation.
  - the progress made in providing suitable land for prospective settlers, the size staken to provide such settlers with materials and skilled assistance to put up residential accommodation and with loans for agricultural development, and the measures instituted to improve the sanitary conditions of the colony, especially in respect of drainage and water supply.
  - (b) the steps, if any, taken by the Government of British Gulana to provide facilities for the repatriation of the Indians already settled in the Colony, and
  - (c) such other matters affecting the political or economic status of the resident Indian community as the Government of India may direct

The Government of India bave this recommundation under consideration but are not likely to reach any decision regarding the deput tation of an officer until the results of the enquiry into the causes of the recent riots in British Guiana are known

(4) Other Parts of the Empire—In the conrse of the year trouble occurred in Tanganyika territory in connection with a trade licensing and other measures imposed for revenue purposes. Indians were compelled to maintain subjected to somewhat heavy licensing fees Agitation, accompanied by passive resistance cocurred the was not mecessful in its object. The Government of India took up the maintain with the Countain Office, with the result that with the Countain Office, with the result that Ordinances which are calculated to protect the Ordinances which are calculated to protect the Smaller Indian-trader on whom they were most likely to press hard in Gyjon, Maart that, and Mainya, the potition of Indian base on the whole been besides down and make the calculation of the contract of the countain Government have published the results of a careful sequity into the rates of wages of indians one extent in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of indians one extents in relation to the coast of

### Indians in Great Britain.

More than usity years have gone by since the After a very coosiderable temporary check Parsi community, in the persons of the late caused by the Great War the number rapidly Databnal Nacroil and other members of the expanded from 1919 in spite of pressure on firm of Cama & Co, led the way in the vojount college accommodation. In addition to the firm of Cama & Co, led the way in the sojonra of Indiana in England for business purposes This lead it has since maintained, though there are both Hindu and Mahommedan business are both Hindu and Mahommedan business men firmly established there Nor are the professions unrepresented, for there are in London and elsewhere practising berristens, solicitors and medical men of Indian hirth Three Indians (all belonging to the Parasee Community) have sat in the House of Comons An indian has served since 1910 on the Judicial Committee of the Privy Council, and others are to be appointed Three Indians serve no the Secretary of State s Council in 1919 centres
Lord Sinha led the way as the first Indian to
be raised to the peerage and to be appointed

ft la a member of the Home Government In the apring of 1923 Mr (now Sir) Dadiba Dalai was In the spring of 1923 at (n.w.s); Dadina Patta was appointed High Commissioner for India being the first Indian to hold the office. The early years of the present contury saw the gathering of a new Indian element in permacent residence—that of retired officials and business dence—that of retired officials and business men or people of independent means who from preference or in order to have their midden dencated in Lagland, leave the land signa. Further, the stream of Indian summer visitors includes weathly people who compregularly There is an Indian Social City founded in 1012, with Sir M M Bhownagree as president, which arranges for dinners and other innotions to colebrate Indian restivals or to honour Indian visitors of epecial distinction or or innour minary values at special data community to be fully organized is that of the Paris They have an incorporated and well endowed Paris Association of Europe, and have established "Zoroastrian House" (168, Cromwell road, S.W. 5) as a communal centre

The Indian Pavilion at the British Empire Exhibition in 1924, with its gleaming towers and minarets and its cool, foundain filled forecourt was one of the most conspinous and admired architectural features of Wembley, and the great popularity of the section was shown by the crowded state of the more attractive centre day after day The continuous edu cation of English, Colonial and foreign visitors in regard to the products and art wares of India was of great value and did much to spread a vogue for Indian artistic workman ship. It is estimated that the value of the sales at the stalls reached a total of some £350,000 This success led to proposals for a permanent India House in London to replace the small though choice exhibition of Indian artistic wares at the office of the High Commissioner for India

### The Students

ordinary graduate or under graduate student, there are some youtha of good family, inoln ding heirs of Native States, admitted into our public schools such as Etm and Harrow There are over 300 Indians at the Inns of Court Since the war there has been a welcome increase in the number of technical and industrial students Altogether including technical and medical students, there are some 1 500 young Indians in London, Edinburgh Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other

### The Advisors

It is well known that until a few years ago the young Indians, apart from inadequately supported unofficial effort and the charce of coming under the influence of English friends coming nader the influence of English friends of their Lamilies, were practically left to their own devices. But in April 1909 Lord Morloy, created for their henefit a Bureau of Information and appointed Dr (now Sir) T. W. Arnold to the charge of it nader the title of Educational Advisor The Bureau was located at 21, Cromwell Ecod, together with the National Indian Association and the Northbrook Society, while were the second with the National Indian Association and the Northbrook Society of the Sociation of th burness educates distinct can accommodation le provided, parily by subventions from Indian revennes, in the commodious Alblon House, St. Peters educare, Haumensmith, W 6) In India provincial advisory committees exist to belp and advise intending attendants. The work near and savine intending students. The work of the Burean rapidly expanded, and in consequence Lord Crewe in 1912 re-organised the arrangements under the general charge of a Secretary for Indian students, Mr. (now Bir) C. h. Mailet who resigned at the close of 1916 He was succeeded by Dr Arnold under the designation of Educational Advisor for Indian Students to the Secretary of State Mr N C Sen followed Dr Arnold as Local Advisor in London At Oxford the Oriental Delegacy, end at Cambridge, the Inter Collegiate Committee with Oriental students generally, whilst Local Advisers for Indian students have been appoint od at Manchester, Edinburgh and Glasgow

These arrangements underwent far reaching revision in the autumn of 1920 in connection revision in the autumn of 1920 in connection with the setting up, under the Act of the previous process of the The Students
Under normal conditions it is the student Mr. St. Sen. In the control of the contro High Commissioner in Groavenor Gardens, 8 W 1, thereby obviating a good deal of duplication of files and papers

The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton Arrangements had been made for the Committee to continue their investigatious in India in the cold weather of 1921 22, but were ahanduned in consequence of the refusal of the Legislative Assembly to vote the necessary grant This largely accounts for the somewhat tentative form of the recommendation of the unani mous report published in October 1922 The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India Atten tion was invited to the diminution of the num ber of Indian students proceeding abroad that would result from giving effect to recommen dations made for such development by pre-vious commissions, and by the establishment of an Indian Bar held that it should be possible to secure admission both to British universities and, subject to certain reservations to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that come machinery exists to ensure their distribution to the places best suited to their requiremen's Subsequently a committee presided over by Sir Edward Chamier recommended the creation of Indiau Bars, which will have the effect of much reducing the number of Indians going to the Inns of Court

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives or all organisation interested in the

scotial and intellectual wefter of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Under the presidency of Lord Hawke and the chairmanship of Lord Carmichael, an Indian Gymkhana Ciub in 1921 acquired its own eports ground at Osterley, the total cost of purchase and equipment being estimated at £15 000. Generous gifts were made by some Ruling Princes and other particularly the Maharaja of Patials, but further holy a required The cricket eleven of the patients of the cricket eleven of the control of the cricket eleven eleven eleven eleven eleven eleven eleven eleven ele

A notable development of 1920 was the opening of the Bed Triangle 'Shakespeare link in Bloomahury, off Gover Street, as a union and hostel for Indian and Ceylonese students up to the number of 500. The hostel was removed to permanent premises 104-112 Gover Street close to University College in the autumn of 1923. It is Indian both in concept autumn of 1923. It is Indian both in concept nathman and committee being at ponsible not nathman and committee being at ponsible the National Council of V M C A 's in Loadon but to the Indian National Council in Calcutta. While the organization has a definitely moral and epiritual as well as a social purpose, it is not a proceeding the first possible of the National Council of V M C A 's in Loadon but to the Indian National Council in Calcutta. While the organization has a definitely moral and epiritual as well as a social purpose, it is not a proceeding the process of the national Council of Table 1921. The state of the national Council of Table 1921 and the Indian Council of Table 1921 and Calcutter of Table 1921.

Lately there has been considerable growth of the number of Indian girls and women etudying in Great Britain, and at least one is reading at the Inns of Court But it is chiefly for medical or teaching training that Indian ladies go to England

ROYAL SOCIETY OF ARTS, INDIAN SECTION —
This Society was founded in London IT
This Society was founded in London IT
Hery It remain Word, but the Secretary of the
Hord It remain Word, but the Secretary of the
Society, gives the following account of
the Indian Section In 1857, a proposition
was made by Mr Hyde Clarke, who
wrote to the Council suggesting that "a
epecial section be formed for India, another
for Austraia, one for English, America and
so on." It was suggested that the Indian
section should meet once a cornight for
her indian in the section should meet once a cornight for
the Hyde Clarke returned to England, and in
1868 be renewed his proposal, but only
proposing the formation of a committee
which should organise conferences on Indian
subjects This time the suggestion was

taken up more warmly Mr Hyde Clarke himself was placed on the Council, and the Indian Conferences, which soon developed into the Indian Section, were started. "The Indian Section thus established become a most important department of the Seciety and Indian Section which the development of Indian manufactures and Indian products could most needly lag information as to the directions which the development of Indian manufactures and Indian products could most needly lack, and in England by giving similar in formation as to the industrial resources and received great help from the Indian press and it has in return been of service to the Indian press in anplying usually information to it it has been of great value to the Section titled as the means it within many members then the section for the Colonies, a large proportion of the present number of members come from the dependencies of the Empire abroad. See Emerstry of the Indian press. M. Emilies & M. Servictor of the Indian and Colonies, a Bigby, C 12, 18, John Street, Adelphi, London, W C 2

SERVANTS OF INDIA SOCIETY -The Servants REVARIS OF LEDIA BOCKETY—The Bervants of India Society which was founded by the late Mr Gogal Krishna Gokhale GLE, in 1905, has its Head quartere in Poons and its objects are to train national missionaries for the service of India and to promote hy all constitutional means the promote by an constitutional ureas our true interests of the dudian people. Its government is vested in the First usember or Freatdent and a Council On the death of Mr Gokhale in February, 1915, the Right Hon'ble Mr V S Stinivass Sasti was elected President. He has again heen re-elected for a further term of three years Besides the headquarters, it has at present four branches, riz (1) in Bomhay (2) in Madras (3) in the United Provinces (4) in the Central Provinces Moreover it has several addi tional centres of its activities under the branches such as, (alicut, Mangaioro, Luck now labore and Cuttack in Orissa Each Branch consists of ordinary members, mem bers under training and permanent assistants who work under the direction of a Senior Mem ber The Rt Hon Sastri is an elected mem ber of the Connell ot State and Mr N M Joshi, a nominated member of the Legis lative Assembly representing labour interests
The branches engage both in propagandist
and active work of political, educational
social agricultural and philanthropic character in which they secure the help of a large number of Voluntary workers, both men and A fair idea of the work of a branch can be had from a hrief description of the operations of the Sombay Branch whose members have so far undertaken activities in various fields. (1) Social purity like the Holika Samme-lan of Bombay, (2) Social reform organization under the auspices of the National Social under the auspices of the national Social Conference, (8) rousing public opinion about elementary education, (4) promotion of the cause of elevation and education of Indian women by building up institutions like the Poons.

of about 150) women and girl pupils in nearly 53 classes of its 8 departments and four hostels in the city Mr G K. Devadhar, M.A., is its Hon Organiser and Genaral Secretary (5) Social Service as carried out hy the Social Service League of Bombay of which Mr N M Joshi, B.A., is the Honorary General Secretary, (6) spread of co-operative movement among the agriculturists, compositors in the city of Poons and mill-hands in Bombay The co-operative societies as at Hadapear and other villages around Poons, started for the benefit of these poor people, number over 36 with a total membership of over 1,800, capital which a total membership of over 1,000, capitals of nearly three lakhs and a total turn over of five lakhs per year Kinsteen of these societies which are in Bombay for poor labour-ing classes are so conducted as to free their ing classes are so conducted as to free their members entirely from their chronic Indeh tednosa. Their mombership consists of above 160 and debts amounting to nearly three takes of rupees have been cleared off Moreover, educational work was organized by starting a Co-operative Quarterly and by starting a Co-operative Quarterly. Class in Bombay for 60 Secretaries from the various districts for three years These are now transferred to the Central Co-operative Institute, Bombay, of which Mr G K Devadhar is now the Vice-President These three experiments on auch a scale were the first of their kind in India, (7) relief work connected with wide-spread calamities work connected with wide-spread calamittes by organizing the Fisque Relief Committee of Poona, which snooeeded in making inoculation popular in the Decoan, the Salmm-tra Fire Relief Committee which arranged for the Relief to sufferers for five years and by undertaking a scheme of non-official relief during the famines of 1907-08 and 1914 in the United Provinces, the famine in Gujarat and Kathiawar of 1911 12 and the famine of 1918 in the district of Ahmednagar, and that of 1918 1919 in Gujerat and the Deccan , and in 1920 in Orissa near Puri, Infinenza relief was well organized members of these associations in Bombay and Poona Since the outbreak of the Malahar Rebellion in Angust 1921 the members of the Society organised the work of relief which was administered with the help of ontside organisations like the Poona Seva Sadan, the Y M C.A., etc., and in col-lecting funds from all over the country especially Bomhay Thus from all over the country substantial help to the extent of nearly Rs 3,50,000 was collected For the first six months about 19 camps with nearly 27,000 men, women and children of all castes and creeds were maintained very efficiently and during the later six months thousands of Hindn and Moplah families were supported in their villages in the disturbed and the destroyed parts of the district of Malabar This work was closed in the beginning of October 1922 Mr G K Devedhar as Vice President of the Malabar Central Relief Com resignant of the Managar Central Rends Con-mittee directed the work on behalf of the Servants of India Society In 1924 the Society organised the South Indian Rood Relief Central Land in Bombay with a view to giving relief to the poor people, especially the Papchamas, who had suffered from

ecedented goods in the districts of maprecedented moous in the Malabar, Trichinopoly, Colmbatore, Tanjore, and the Indian States of Mysore, Fravancore and Cochin Mr G K Devadhar is the Hon General Secretary and Treasurer and Mr C S Deele, one of the Hon Secretaries of the Fund The distribution of relief was carried on with the help of X M C A workers carried on with the help of Y M C A workers in the different districts, (9) organizing public opinion on the question of Indians in South Africa (10) its political work is conducted strictly on constitutional lines and thus it was able to start District Congress Committees in several wards of the only of Eombay These conducted as the control of Eombay These conducted by an arganizer, or allow the Indian Committee of the Indian Committ and also conducted a vernacular class Mr C S Deole, BA, is one of the Hon Secretaries (12) A new association called the Indian Liberal Club has been started to the Indian Liberal Club has been started to carry on political propaganda Besides, the society was engaged in conflicting a scheme of welfare work to supply chesp grain, cheap cloth and cheap credit et Jan-shedjur, which may be required sgain by the Branch getting it worked on behalf of our of its organisatione One of its Members has started a Guisrati ladies organisation called the Bhagini Samaj for work among women in Gujarat and Kathiawar Mr A V Thakkar has started in the District of Panch Mahais in Gujarat a mission for the Bhlis for the improvement of the Rhil population and it is called the Bhil Seva Mandal. The Society also takes active interest in the atton and it is client to plate New Market.

toung Men's Christian Association — This Association, which was founded by the late Sir George Williams on June 6, 1844, seeks to unite those young men who, regarding Jesus Christ as their God and Baviour according to the Holy Scriptures, desire to be His disciples, in their doctrine and in their life, and to associate their efforts for the ortension of His kingdom among young men. The above is known as the "Paris Basis" and it is world wide It was adopted at the first World's Convention in Paris in 1865 and re-affirmed at the Jubilee World's Convention in Paris in 1805 The Triennial National Convention of Y M C A sof India, Burma and Ceylon adopted this in November Burma and Ceylon sciopted cills in November 1920 The aim of the Association is through its religious, social, educational, and physical work to answer the fourfold— spiritual, social, mental and physical— needs of young men, and its policy is one of intense loyalty to the Church

There are, as a rule, two classes of members. Any young man who subscribes personally to the 'Paris Basis' may be an active or voting member and any young man of good character may be an amociate

The Young Men's Christian Association though relatively new to India, is spreading rapidly The local Associations are antonomous and governed by local Boards of Directors These Associations in convention elect a National Council of Enropean and Indian laymen who are responsible for the supervision and expansion of all forms of the Association work Both the National Coun oil and the local Associations employ specially trained full-time Secretaries Sixty nine out of 130 Secretaries are Indians and are supported from funds raised in India Burma and Ceylon. The remaining remaining Secretaries are supported by the Associations of North America, Australasia, and Great Britain, but their work is directed by com mittees in India, to whom their services are inamed. The first paid Secretary came to India over thirty years ago, in response to an appeal from Madras Soon afterwards the National Council was organised, and has become increasingly an indigen ous institution

There are now approximately 250 Associations with 12,000 members Of these about onewith 12,000 members Of these about one-nights are Empesars and seven-eighths are chirt are Empesars and seven-eighths are Christians. The following Associations own one or more buildings which serve as the local headquarters —Aliahabad, 8, Bangalore, 3, Alioppey, 1, Bombay, 4, Calenta, 6, Calenta, 2, Colmbatore 1, Oolombo 1, Gallet, 1, Hydre 2, Edmbatore 1, Oolombo 1, Gallet, 1, Hydre 22 Kgillon Morken, 1 Kunnamkniam, 1 Kottayam, 1 ore, 2, Madras, 4 Maymyo, 1, Nagpur, 2. Kunnamkniam, 1 sousayam, Lahore, 2, Madras, 4 Maymyo, 1, Nagpur, 2, Naini Tal, 1, Falamcottah, 1, Foona, 2, Rangoon, 4, Secundenshad, 1, Sinila, 1, Ootacamund, 1, Wellington, 1, Delhi, 1, adina, 1, Madurs, 3, Midnapore, 3, Midnapore, 1 Poona, 2, Rhaipuri, 1 owned by the As

sociation, bungalows have been rented to serve as headquarters in the following stations - Colombo, 4 Hyderabad 1, Jub hnipore, 1, Madras, 1, Poona, 1, Rangoon, 1, Matale, 1, Maymyo, 1, Nowshera, 1

The Association also has rent-free quarters in stations as follows -

Bombay, 1, Delhi 2, Karachi, 1, Lahore 1, Madras 1 Nowshers 1 Secundersbad, 2 Trichinopoly, 2, Trivandrum, 1

The departments of the National Council are Student, Rural, Literary, Architectural, Publication, Physical, British Army Revenue Publicity, Lecture Business Religione Work Ihr Rural Department is organising village Y M (A s and co-opera tive credit societies and promoting cottage industries in over 50 centres. The Literary Department of which Dr. J. b. Farquhar has been Senior Secretary, endeavours to promote a proper and sympathetic under-standing of the non Christian religious and show their relationship to Christianity the beginning of the war there were but three Army Associations and five Army Secretaries in the whole of India In 1923 Asso retaries in the winde of incine. In 1923 Agod clation privileges were provided for British Troops in 37 cantonments under the direction of Secretaries. In addition to organising school boys. Y. M. C. A. s. the High School Department arranges for holiday camps for boys and High School teachers. The National Council employs its own architects who plan and construct its buildings, hostels, and playgrounds The Physical Department specialises on physical education and is promoting the playground movement

# ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

(1) To facilitate intercommunication and The Association of British University Women co-peration between woman belonging to has four branches. The addresses of the Honotha universities of the United Kingdom, resident par

(2) To provide a mean of keeping in touch with the universities of the United Kingdom, by communication with the Federation of University Women, and otherwise as may seem expedient

(8) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university Calcutta women on matters especially affecting them

Membership is open only to those wnmen who bold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours Certificates, but Associate Member ship is open to women who have studied at British University for two years and each

The Association of British University Womeu | Branch may admit as Honorary Mambers, in India was established in 1918 Its nbjects | women who have advanced the higher adnocate — tinn and interests of women

Hon General Secretary - Miss M W Jesson. Lady Hardinge College, Delhi

Hony Local Secretaries

Mrs E F Hingeley, Pratt's Buildings, Hnghes Road Bombay

Miss Aiton c/o Messrs Leslie and Hinds, Sollcitors, 6, Hastings St , Calcutta

Delhi and Punjab Miss Harrison, Queen Mary a College, Lahore

United Provinces Mrs Daniels, Tshri Kothi,

The Dehl Branch came into extenses in 1918 The United Provinces Branch is somewhat scattered. The Calcutts and Bombay Branch see influential, and have presentelly intervened with good effect to educate public organizations of the properties of the properties of the properties of the Regard to subjects a factoring women. They have, for instance, made investigations of healt of the Rucestion Department, Govern ment of India, the Calcutta University Commission, etc. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Produces with the double object of discovering —

- (1) What were the exact resources of the country
- (2) How firms and individuals could be induced to develop these resources, to find ambitistates for imported goods and to improve existing methods of preparation of indigenous food products. The Bombay Branch has done good work in connection with the formation of the Soolal Parity Committee and base through a special sub-committee, organised public meeting the product of the connection of the source with the product are consistent with the product and the second product of the se

Valuable part of the work of the Association has been the establishment of Women's Employment Burean's In Calcutta and Bomby The work of mobilising women and Bomby The work of mobilising women want of goodwill on women's part but for want of machinery and organization The Association of Univenity Women realised that, as the only body of educated Englishwomen in this country, it was called upon to provide the macessary organization Bureaux were formed and were the means of (1) belying many employers to get into touch with the available reserve of women tabour, (2) showing trained women where their services were most needed to the needed to the services were most needed to the needed to

As a means of promoting trisudables between women from various parts of the United Kingdom, with widely differing tarres and interests and spheres of life in India, and as an instrument for affecting opportunities for mertiment to educated women, the Association of University Women has a sectof innoton to perform

### Federation of Indian University Women

The Federation of Indian University Women was founded in Calentta in July 1920 The effort was an outcome of the discovery that to find a common factor and co-operate

upon that basis, was our best chance of achievement in a world which needed the work of women. The women of oreat Britain made the discovery during the war when the British Universities Mission to America the International Federation of University Women has embodied the memory of that discovery in a Federation which simed at including all the Universities of the world. It is in fact a League of Nations, in which the University is the unit. Most of the countries of the second of the countries of the second of the se

In the International Federation there are opportunities for better understanding and world frisochalth, for admittance to the privileges of the International Federation, plans for the foundation of acholarships, for the care of suddets going to foreign countries, for the students going to foreign countries, for the care of the c

The sims and object of the Indian Feders tion are (1) To act as an organisation which shall afford opportunity for the expression of united opinion and for oncerted action by University Women (2) To facilitate intercourse and co-operation between University Women and maintain that: intercourse produce study, and to stimulate the interest of women in public life. The annual subscription is Es. 2

Membership is open to graduates of Indian Universities only but a limited number (five in Calcutta) of women of other Universities may be admitted as Associate Members. During the one year of its existence, the Indian Federation has collected over 200 members, and has Branches in Bombay, Calcutta and Orissa. Other Branches are in process of formation

The aim of the Federation is to have Branches eventually in all Indian University Towns-Members in Districts belonging to the nearest branch

# The Church.

In the ordinary acceptance of the term there is no established Church in India. An Ecclesiastical Establishment is maintained for providing religious ministrations, primarily, to British troops, secondarily to the Enropean civil officials of Government and their families Seven ont of the eleven Anglican Blahops in India are officers of the Latablishment, though their episcopal jurisdiction far transcends the limits of the Ecclesiastical Establishment The stipends of the three Presidency Bishops The stipends of the three Presidency Bisnope are paid entirely by Government, and they hold an official status which is clearly defined free Bishops of Lahore, Lucknow, Nagpur and Rangoon draw from Government the atlpender of Senior Chaplains only but their puseopairank and territorial titles are officially coognised The Bishops of Chota Nagpur recognised The Bishops of Unita Nagpur Tinnevelly-Madnrs, Travanore-Cochin Dorna kai and Assam are not on the establish-ment The new Bishopric of Assam was created in 1915 In its relations with Government it is subordinate to the see of Calontta But the maintenance of the Bishoprio is met entirely from voluntary funds.

The ecclesiastical establishment incindes Inte ecclesisation estaniament includes four denominations—Anglican, Scottish, Roman and Wesleyan Of these, the first two eajoy a distinctive position, in that the Chap lains of those denominations (and in the case of the first-named the Bishops) are indiviof the first-named the Bishops) are individually appointed by the Secretary of State and rank as gasetted influers of Government Throughout the Indian Empire there are 134 anglican and 13 Church of Seodaud chapitains whose appointments have been condituded. The Roman Catholics and Wesleyans receives the Control of the C afixed salary from Government and 25 chaplains working on a capitation basis of payment by Government Churches of all four denomin ations may be built, furnished and repaired wholly or partly at Government expense

In the Anglican Communion a movement towards disestablishment has recently taken definite shape. The Indian Church Measure adopted by the Provincial Connell of the Church of England in India and Ceylon in February 1922 sims at the severance of all legal ties bet ween the Indian Church and the Church of England The fate of this Measure is at present uncertain The Government of India may not acc pt its proposals in their entirety But assuming that the Government of India accepts the principle of the Messure it will have to pass the National Assembly of the Church of England and be presented by that body to Parliament The object of the Measure is thus stated by the Bishop of Nagpur

Church and of the Governing body of this country as are our sister Churches in the Colonies We shall then have power to select our own Biahops, to create new Dioceses, to frame new rules and regulations for the Church rame new rules and regulations for the Church suitable for India, as well as to give it freedom to adopt its own expressions of faith, worship, rites and ceremonies Our Synods and Councils will then be not merely Synods and Councils in name but actually ruling bodies whose resolutions would form laws of the Church which every loval member of the Church would feel bound to obey "

In effect it will confer upon the Indian Church not only the privilege of appointing its own not only the privilege of appointing its own Bishops but the responsibility of paying their stipends. This sapect of the matter causes disquietude in certain quarters. On the other hand the fact that Government is already taking steps to reduce the personnel of the Ecclesiastical Establishment is regarded as a strong argument in favour of the Church claiming full freedom of self government now

So far as the European and Anglo-Indian communities are concerned the activities of the Church are not confined to public worship and pastoral functions. The education of the children of those communities is very largely in the hands of the Christian denominations. There are a few institutions such as the La Martiniere Schools, on a non-denominational basis, hut they are exceptional in all the large centres there exist schools of various grades ac well as orphanages, for the education grades ac well as orphanages, for the education of Europeans and Anglo-Indians under the control of various Christian bodies. The Roman Cathonic Christian bodies The Roman Cathonic Christian bodies and the Cathonic Christian Bodies and the Cathonic Christian Bodies and the found throughout the length and hreadth of the Indian Empire, and they maintain shigh standard of efficiency. The Angilean Church comes next, and the American Medicin the larger hill-islations. The Preservierians in the larger hill-stations The Presbyterians are also well represented in this field, parties larly by the admirable institution for destitute iarry by the admirable institution for destribute children at Kallmpong, near Darjeeling Schools of all denominations receive liberal grants-in ald from Government and are regularly in spected by the Education Departments of the various provinces. Thanks to the free operation of the denominational principle and its frank recognition by Government, there is no "religious difficulty" in the schools of the European and Anglo Indian communities.

#### Christian Missions

The tradition that St. Thomas, the Apostic was the first Christian missionary in India is hy no means improbable History, however, carries us no further back than the sixth cen-Bishop of Nagpur—

"It is simply to sever every legal connection

"It is simply to sever every legal connection
which at present exists between the Church of so-called Syrian Church in south-west India
England in India on the one hand and the
lass had a continuous life Except in its in
Government of India, together with the Secretary | snow the Church of or staker these Churches
of State for India, as well as the Church in | for the Syrian Christians are now divided into
England in England II passed, it will make | four communione) has displayed little of the
our Church in India as independent of the Home | missionary spirit | until | quite recent times

Western Christianity was first introduced into the property of the protection of the many ut the truits of his labour were lost with the shrinkage of the Fortuquese Empire It is resulty to the work of the missionaries of the Propagands in the 17th neutry that the Papacy uwes its large and powerful following: and the number 1,823,000, of whom 322,000 were added during the decade 1911-1921. The total of "Syrian" Christians (exclusive of those who while using the Syrian liturgy are of the Roman obedience) is 315 000, as against 367,000 in 1901. Protestant Chris-tanglicans) number 2,820,000 au increase of 547,000 since 1911. Thus, the total number of Christians of all denominations in Indis is of Christians of all denominations in India is of Christians of all denominations in finds and on the close ou five millions. In fact it probably exceeds that figure at the present moment as these statistics are taken from the Census Report of 1911, and the rate of increase during the previous decade was nearly 100,000 per annum.

The Protestant Churches made no serious attempt to evangelise India till 1813 They have thus been at work in the Indian mission field for over 110 years and the statistical results of their efforts are given abuve. It is results of their afforts are given abuve. It is now, however, generally reconsisted that Chris blan missions are producing indirect effects in India while head themselves only incompletely to any sort of tabulation. The main ageory to any sort of tabulation are main ageory to the investment of the control of the control of the control of the control of the country according to the 1923 Report of the National College of the Carletten Country According to the 1923 Report of the National College of the Carletten Country for India they are teaching 420,255 children in 12,696 elementary echocise (245,895) of children in these schools are uon Christians. The same is true also of the secondary schools and in a still greater degree of the Christians The same is true also of the secon | most marked at mas awakemed the second dary schools and in a still greater degree of the concleme of the un-Christian public and colleges The former number 523 with 70,254 such movements as 'The Servants of India' maje and 25,303 female public There are 40 and the mission to the Depressed Classes colleges affiliated to Universities, containing are merely the ontward and visible sign of 20,662 male and 1,303 female students of a creat stirring of the politachropic spirit far these as many as 14,148 are non-Christians beyond the sphere of Christian missionary From the estand-point of makeonary polity much lorest one of the sphere of t indirect proragation of the Christian faith statesman and the publicist are chieffy interested in the excellent moval effect produced ested in the excellent moral effect produced by these institutions amongst the durated of manufactured by their staffs The principal policies and the higher educational ideals of the produced by their staffs The principal policies and the policies under Fatter and the produced by their staffs The principal policies and the policies and the policies of the produced by their staffs The principal policies and the policies of the produced by the

unque and Mahmmelane it is conspicuously higher The Roman Catholies have some 3000 elementary schools in which 8000 boys and 41,000 girls are receiving instruction Iu middle and high schools they have 143,000 boys and 73000 girls and in University colleges about 5,000 students of both exces These figures, bowever, includas a leaveeexes These figures, bowever, include a large proportion of Europeans and Eurasians, who are an almost negligible quantity in Protestant mission schools and colleges

More recent, but producing even more wide-spread results, is the philanthropic work of Christian missions Before the great famine of 1878, missionaries conflued themselves or 10.78, missionaries connuced themselves almost exclusively to evangelistic and edu-cational activity. The famine threw crowds of destitute people and orphau children upon of descript people and orphan mutuel upon their hands Orphanages and industrial schools became an urgent necessity Bu-the philanthropic spirit is never satisfied with one kind of organisation or method. A great stimpius was also given to medical missions stimulus was also given to medical missions thought and dispensaries have spring up in all parts of the mission field, and leper asylums are almost a monopoly of Christian missionaries are almost a monopoly of Christian missionaries working under Protestant societies in India was 118 men and 217 women the majority of the former being also ordained ministers of relizion. There are 184 industrial institutions in which 35 different arts and cratte are taught ranging from agriculture to cratter are taught ranging from agriculture to confidence of Government in their methods has been aboven by their heire ofiniality. bas been shown by their being officially entrusted with the difficult work of winning over certain oriminal tribes to a life of industry The indirect effect ut all this philauthropic autivity under missionary anapices has been most marked it has awakened the social conscience of the uon-Christian public and

Beunion — For very many years Indian Christians have shown that they felt much more acutely than Europeans the scandal and disadvantage of the divisions of Christendom These divisions are due to a very much greater extent than is always recognised to

fundamental unity in Christ Compared with the greatness of the gulf which separates Christian from non-Christian, the differences of "con fession" and "order" which separate Chris-tian from Christian seem to be wholly artican from Contributant seem to be worthy are ficial and negligible In consequence the reunion movement, which is noticeable all over the world, is nowhere to strong as in India, in South India it has already resulted in the formation of the South India United Church, which is a group union of five of the principal Protestant communions, and as these bodies are in communion individually with all, or almost all, the other Protestant bodies at work in India the Union may be regarded as a Pan Protestant Union The SIUO is at present negotiating with the Anglican Church If as seems probable the negotiations are snocessful the result will amount to a union of all the Christian bodies in South India, except the Roman Catholics, on the basis of the last Lambeth encyclical This will mean that a real National Indian Church will come into being Although it will be tolerant of almost every expression of Evangelical opinion and will retain the freedom of development charac teristic of Protestantism, by its acceptance of the Oatholic creeds and the flistoric hplecopate, it will be linked np with the Catholic tradition of the Anglican Church

## Anglican Missionary Societies

The Church Missionary Society carries on work in India in seven different missions—the United Provinces, South India, Travances and Cochin lengal, Western India, Punjah and Sind and the Central Provinces and Rajputana The names are in order of semiority Work was begun in what are now called the United Prois 100, European laymen 30 and European lay women 258 The Society claims a Christian community of 2,21,359 of whom 63,655 are aduit communicants

Society for the propagation of the Gospel Statistics of the work of this Society are not easily accertained, as much of it is done through Diocean institutions, which, while financed at In many cases manned by the S P G, are entirely controlled by the Diocean authorities. The best known of the S P G missions is that at Delhi, commonly called the Cambridge Mission to Delhi, carrying on educational work at St Stephen's College and School At the College there are about 200 etudents under instruction, and at the High School 800 The College hostels accommodate 100 students Missions to the depressed classes exist in Burms, in the Ahmednagar District and in several parts of South India, especially in the Diocase of Tinnevelly Madura The S P G also maintains an important Criminal Tribes settlement at Hnhll, in the Bombay Carnatic There are 116,000 Indian Christians under the ugis of the 8 P G, 90 ordained European missionaries and 98 European lady workers

Other Anglican Societies—The Oxford Mission to Calontia was started in 1880 it works in the poorest parts of Calentia and also at Barisal. There are 11 mission-priests of this Society, and 16 Sisters. In addition to its work amongst the poor, the Oxford Mission addresses itself to the educated classes in Bengal and issues a periodical called Expensive, which is known all over India.

The Society of St John the Evangelist (com In a society of its John ten avangement (commonly known as the Cowley Fathers) has bouses at Bombay and Poons, and small stations in the Sombay for knokan In Bombay its missionary work centres round the Church of Holy Crose, Umarkhadl, where there is a school and a dispensary The Christians are chiefly drawn was the United Promore than United Promo and High standards. The Church of England lesses Association of Lebore carries on important Leanan Missionary Society is an ofishood of the educational work (chiefly amongst the domistical C M S controlling the work of 162 missionary community) in the Funjah. The mission issionaries of the C M S in India and Caylon in Dublin University Mission at Hasarbagh, and is 160, European insymen 30 and European lay the Mission of the Church of England in Canada women 285 The Society claims a Christian working at Kangra and Falampir (Funjah) community of £21,589 of whom 38,565 are should also be mentioned nuder the bead of Anglican Missions.

# THE ROMAN CATROLIC CRURCH.

With regard to numbers, the Catholic Directory of India, 1924, gives the following discrepant

	1		
	1901	1911	1921
	!	!	
1 British India and Indian States— (a) Latin Rite (b) Syriac Rite	1,312 224 316,923	1 614 620 364,660	1,851,408 440,488
2 French India 3 Portuguese India	25,859 26,660	25 918 296 148	25,480 188,741
Total, India	1,916,656	2, 101, 146	2,606,117
4 Ceylon	285,018	322,163	363,986
Total, India and Ceylon	2,201,674	2,623 509	2 970,103
Total, India and Ceylon	2,201,674	2,623 509	_

NOTE (1) -In 1860 the total for India and Ceylon was 1,170,854 In 1880 it had risen to 1,610,265 and in 1900 to 2,201 674

NOTE (2) - The number of (atholics under the Royal Patronage of Portugal (the Padroado) in 1921 were reckoned at 604 802, of whom more than half are in British India

NOTE (3) -In 1860 there were 1,504 priests In 1021 there were 3,156

#### The Catholic community as thus existing is Of the Portuguese Jurisdiction composed of the following elements -

- (1) The ' Syrian " Christians of the Malahar 1) The 'Syrian' Christians of the Makakar Coast, traditionally said to have been converted by the Apoette 8°. Thomas They were houses under allestance to the placed first under feault bishops and then under Carmellte Vicars Apostolic They are at present ruled by four Vicars Apost Colic of their own Syriae river.
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and np the west coast, Ceylon, Bengaf, etc
- ,8) European Immigrante at all times, inciuding British troops
- (4) Modern converts from Hinduism and Animism in recent mission centres.

The Portuguese mission enterprise starting after 1500 continued for about 200 years, after which it began to decline To meet this decline fresh missionaries were sent out by decline fresh missionaries were sent ont by
the Congregation de propagenda field, till by
the middle of the 19th century the whole
such portlems as were occurred by the foot
elegy Hance arose a conflict of jurisdiction
in many parts between the Portuguese clery
of the "padroado" or royal patronage, and
the propaganda elegy This conflict was set the propagata clergy This conflict was set at rest by the Concordat of 1886 At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows.—

The archbishopric of Gos (having some ex-tension into British territory) with suffir-gan bishoprics at Cochin, Mylapore and Damaun (all three covering British territory)

### Of the Propaganda Jurisdiction -

The archbishopric of Agra with suffragan hishoprics of Allahabad and Aimere

The archhishopric of Bombay, with suffragan hishoprics of Poona, Mangalore and Trichinopoly

The archbishopric of Calcutta, with suffragan hishoprics of Dacca, Krishnagar and Patna, and the Prefecture Apostollo of Assam

The archhishopric of Madras, with sufragan hishoprics of Hyderabad, Vizagapatam and Nagpur

The archhishopric of Pondicherry (French) with suffragan hishoprics of Mysore, Colmbatore and Kumbakonam

The archhishopric of Simia with suffragan bishopric of Lahore and the Prefecture Apos tolic of Kashmere

The archishopric of Colombo (Ceylon) with suffragan hisboprics at Kandy, Galle, Jaffns and Trincomalee.

The archbishopric of Verapoly, with suffragan hishopric of Quilon

Four Vicariates Apostolic of the Syriac rite for the Syrian Christians of Malabar Three Vicariates Apostolic of Burma.

During 1928 two new dioceses have been constituted Tutleorin and Callent

The European ciergy engaged in India almost all belong to religious orders, congregations or miscion seminaries, and with a tew excep-tions are either French, Belgian, Dutch, Swim, Special or Italian by nationality They number about 1,000 besides which there is a number about 1,000 besides which there is a body of secular deepy mostly native to be constry, numbering about 2,000 and prob-ably about 2,000 nms. The first work of the clergy is parcolain ministration to enisting Christians, including railway people and British twops Second comes education, which are considered to the constraint of the con-tact of the control of the control of the con-tact of the control of the control of the con-tact of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the control of the con-trol of the control of the con-trol of the control of the contr the most important institutions are St. Kavier's che most important institutions used a associated college, Agra, St. Zavier's College, Boudbay, St. Joseph e College, Trichinopoly, St. Aloysius College, Mangalog, teaching university courses besides a large number of high schools and elementary schools. The education of girls is supplied for hy numerous convent schools worked by religious congregations of nums of as an action of the conting of orphanages and other charitatele institutions. The total number under education amounted in 1964 to 145,051 boys and 73,164 girls, later figures being unavailable Apostolic of the East Indies who resides a family of the continuous tions congregations of nuns to say

covered with numerous mission centres among which those in Chota Nagpur, Gujerat, Orissa, the Nizam's Dominions, the Ahmed-nagar district and the Telugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already will be found in the Cartolle Infectory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension The resources of the olergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of the Society for the Propagation of the Fath and of the Holy Childhood, belped out by private or other donations secured from home by the different local missecured from home by the different local missecurity and the second mainly described by the different local missecurity of the second mainly described by the different local missecurity of the second mainly described by the described by the second mainly described by the described by the described by the second mainly described by t sionaries In mission work the fathers count sionaries in mission work the institute count as enrolled only those who are baptised and persovering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation This, while keeping down the record, has the advantage of guaranteeing solid results

### THE SCOTTISH CHURCHES

The Church of Scotland.—The Chaplalapy sent to Calcutta 1814, when the Bav Dr Bryce landed in Calcutta, and organised controlled the Calcutta of Scotland Sc regiment the chaplain is attached to the regiment, instead of being posted to the station where the regiment happens to he placed and as a rule moves with the regiment. There are three Presidency senior Chaplains in charge of Bengal, Bombay, and Madras respectively. There are churches in the chief towns of the Presidencles. and churches have also been built in all considerable military stations, s.g., Chakrata, Lucknow, Peshawar Ranikhet, Rawalpindi, Sialkot, Umbalis aud Jub Rawajpindi, Bilkicot, Umbalia and Jubb lew Ommes Association of Foreign Missions ment there are a number of acting Chaplains and not better are a number of acting Chaplains and the control of Scotland, and these are serving in such stations as Rawajpindi, Lahore, Cawpore, Meerra Minow and Quetta. The Additional many control of Scotland and Lahore, Cawpore, Meerra Minow and Quetta. The Additional month to provide education for European coat of the additional establishment in other places such as Slaikot, Murree, Dalboaste and Darjeeling, regular services are provided hy Scotlain Missionaries Simis has a minister places such as Slaikot, Murree, Dalboaste and Darjeeling, regular services are provided hy Scotlain Missionaries Simis has a minister place among such institutions, and exercises place among such institutions, and exercise to the control of t

sent to Calcutta. He was the first to open schools where English was made the medium schools where anguen was made the medium for instruction, and where religious teaching was given faily Similar educational missions were soon afterwards started in Bombay and Madras Educational work is still an importwere soon knewarm started in Bounsty and Marinas Educational work is still an imported that the Bountay College was closed in 1891 and in 1907 the College or at closed in 1891 and in 1907 the College of the United Free Churche of Scotland, to form the Scotlan Churches College in the Punjah Evangelistic work is being carried on from eight centres under seventeen missionaries. The baptised Christian community now numbers over 14,000 Work commenced in Darjeeling in 1870 is now carried on the understand the whole now carried on the start of the community there of over 1,000 in the five mission districts of Cajoutta, the Eastern Himalayas, Madras, Poons, and the Punjah there were at the end of 1919 over 24,787 baptised Indian Christians in connection with these missions the Women a Association of Foreign Missions the Women a Association of Foreign Missions the Women a Association of Foreign Missions

Giris' Boarding and High School is under the extended of the Kirk-Session of St. Andrew's City, Chingleput, Sriperumbudur and Concaurch, Sinala The now well-known St that Charanth Concaurant, and Concauranth Co by and are being locally managed by mission aries of that Church The homes exist for the benefit of the domiciled European Community, and are doing magnificent work There are now twenty cottages, and about 600 children in residence Further information may be found in "Reports of the Schemes of the Church of Scotland, Blackwood & Sons "The Church of Scotland Year Book and "The Handbook of the Church of Scotland in India and Ceylon" a new edition of which is being prepared

The United Free Church of Scotland — This branch of the Scotlan Church has only thres purely European congregations in India, two in Calentta, Wellesley Square, and Howrah and one in Bombay, Wandby Road In Calentte the Howrah Chnrch is in the district of the mills, and every effort is made to minister to the Scottish Eogineers and other workers in the mills. As noted shove members of these con gregations co-operate with the Established Church of Scotland in providing education for European children

The Church carries on Mission work in seven different areas They are Bengal (Calcutta, Kama and Chinsura), the Santal Parganas, with five stations Western India (Bombay, Poons and Alibag), Hyderabad State (Jaina.

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN -Formed in 1792, largely through the efforts of Dr Wm Carey, operates mainly in Bengal, Bihar and Orless the United Provinces, the Punjab and Ceylon. The Baptist Zenana Mis sion has recently been united with this Society.
The staff of the united Mission in India numbers 219 missionaries and about 877 Indian workers Connected with the Society are 224 Indian Chur thes, 290 Primary Day Schools, 22 Middle and High Schools, and 3 Theological Training Col The church membership at the close of 1922 stood at 17,979 and the Christian Community at 50,796 In the methods of the So In the methods of the So clety, a prominent place is given to Bazaar and Village preaching Increase in membership during the past ten years about 60 per cent sod in the community 50 per cent for the same period Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self supporting

The work falls into three main divisions. and work rais into three main dvisions, evangeshite, medical, and ednestional. The Christian community has been organised in all the chief centres into congregations which form part of the Indian Presbyterian Church and this Church is seeking to take an increasing and this Church is seeking to take an increasing share in the work of ovangalism. There are share in the work of ovangalism There are four excellently equipped and staffed Women's Hospitals, in Madras, Negyur, Almer, and Jaipur From the days of Duff in Calcorka and Wilson in Bombay the Mission has given a prominent place to education. It has many colooks in all parts of its teld and it has alsee made a large contribution to the work of higher education through four Christian Colleges The Scottish Churches College, Calcutta, is under the joint management of the Church on Sectiand and the United Free Church The Madras Christian College, which owes so much to the work of Dr William Miller, is now under the direction of a Board representing several Missionary Societies Wilson College, Bombay, with which the names of Wilson and Dr Mackichan are aponally associated and Histop Col-lege, Nagpur, are nuder the direct management of the United Free Church.

#### RAPTIST SOCIETIES

1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Educational operations, Arts and Theological It was amiliated in 1857 to the newly-formed Calcutta University, reorga-nised in 1910 on the lines of its original foundation with the appointment of a qualified Theo-logical Staff on an Inter-denominational basis for the granting of Theological Degrees qualified students of all Churches
